SPECIAL ANNOUNCEMENT

RESOURCES IN EDUCATION (RIE) Semiannual Index

The RIE Semiannual Index (January-June, July-December), published for many years by the U.S. Government Printing Office (GPO), will be discontinued after the July-December 1994 issue, as a cost saving measure.

Subscribers to RIE who require cumulative printed indexes should consider as an alternative the RIE Annual Cumulation (Resumes and Index) and/or the RIE Semiannual Indexes (projected) published by Oryx Press, 4041 North Central Avenue, Suite 700, Phoenix, AZ 85012-3397 (Tel. 800-279-6799).

EDUCATIONAL RESOURCES

INFORMATION CENTER

Resources in Education (RIE) is processed for printing by ARC Professional Services Group, under contract with the U.S. Department of Education, Office of Educational Research and Improvement (OERI), and is published monthly by the U.S. Government Printing Office (GPO) with printing funds approved by the Office of Management and Budget. The contents of *RIE* do not necessarily reflect official OERI policy.

Subscriptions to *RIE* (12 issues/year), individual issues, and semi-annual indexes (January-June and July-December) are available from the Superintendent of Documents, U.S. Government Printing Office (GPO), Washington, D.C. 20402. Inquiries regarding prices should be directed to the Superintendent of Documents.

Introduction

RESOURCES IN EDUCATION (RIE) — A monthly abstract journal announcing recent report literature related to the field of education, permitting the early identification and acquisition of reports of interest to the educational community.

Sponsor: Educational Resources Information Center (ERIC)
Office of Educational Research and Improvement (OERI)
U.S. Department of Education
Washington, D.C. 20208-5720

ERIC is a nationwide information network for acquiring, selecting, abstracting, indexing, storing, retrieving, and disseminating significant and timely education-related reports. It consists of a coordinating staff in Washington, D.C. and 16 clearinghouses located at universities or with professional organizations across the country. These clearinghouses, each responsible for a particular educational area, are an integral part of the ERIC system. The clearinghouses are listed on the inside back cover.

Organization of Journal: *Resources in Education* is made up of resumes and indexes. The resumes provide descriptions of each document and abstracts of their content. Resumes appear in a "Document Section" and are numbered sequentially by an accession number beginning with the prefix ED (ERIC Document). The indexes appear in an "Index Section" and provide access to the Resumes by Subject, Personal Author, Institution, and Publication Type.

Availability of Documents: The documents cited in *Resources in Education*, except as noted, are available from the ERIC Document Reproduction Service (EDRS), in both microfiche (MF) and paper copy (PC), or microfiche only. Availability in microfiche only may be determined by the source, for proprietary or copyright reasons, or by ERIC for reasons related to legibility and reproducibility. The price per document is based on the number of pages and is subject to change over time. An ERIC Price Code Schedule permits the user to convert all price codes to actual dollar amounts. Current price information for documents, microfiche, and subscriptions to microfiche collections is to be found in the section entitled "How to Order ERIC Documents" in the most recent issue of RIE.

How to Submit Documents to ERIC: If you have documents that you would like to have considered for announcement in *Resources in Education* (RIE), you should send clean, legible copies (in duplicate, if possible) to the ERIC Processing and Reference Facility, 1301 Piccard Drive, Suite 300, Rockville, MD 20850-4305. A reproduction release, giving ERIC permission to reproduce in paper copy and microfiche (or microfiche only), and signed by the author or official representative of the source institution, is requested for all documents selected for inclusion in RIE. Standard reproduction release forms may be obtained from the ERIC Facility (a sample appears at the back of this issue of RIE).

How To Order RIE: The U.S. Government Printing Office (GPO) prints RIE and functions as subscription agent. Detailed subscription information appears on the page in the back of RIE entitled "How to Order *Resources in Education*."

ERIC Clearinghouse Publications

This page highlights publications announced in this issue of *Resources in Education* which were created by the ERIC Clearinghouses and which have been selected as having special significance for educators. For each brief citation appearing here, there is a full abstract appearing under the same ED number in the pages of the issues.

In addition to collecting the literature of education for announcement in *Resources in Education* and *Current Index to Journals in Education*, the ERIC Clearinghouses analyze and synthesize the literature in a number of different formats designed to compress the vast amount of information available and to meet the varying needs of ERIC users. These formats include research reviews, state-of-the-art studies, interpretive studies on topics of high current interest, research briefs, annotated bibliographies, and compilations. While some publications are comprehensive reviews designed for those who are interested in pursuing a subject in depth, others are brief analyses designed for the busy practitioner whose time for staying abreast of new developments in education is limited.

ERIC publications are published either by the ERIC Clearinghouses responsible for producing them or through cooperative arrangements with other organizations. Copies are usually available directly from the responsible Clearinghouse or from the source listed in the citation. In addition, the publications announced in *Resources in Education* are contained in all ERIC microfiche collections, and are available in paper copy and/or microfiche from the ERIC Document Reproduction Service (EDRS), 7420 Fullerton Road, Suite 110, Springfield, Virginia 22153-2852; Telephone: 1-800-443-ERIC (3742).

Descriptors — Career Guidance, *Career Planning, *Demand Occupations, *Employed Women, *Employment Opportunities, Females, Labor Force, Labor Market, Postsecondary Education

Identifiers — Consortium of States, *National Occupational Competency Testing Institute

Women's opportunities for employment will be directly related to their level of skill and experience and also to the labor market demands through the remainder of the decade. The number of workers needed for all major occupational categories is expected to increase by about one-fifth between 1990 and 1999, but the growth rate will vary by occupational group. Professional and technical workers are expected to have the highest predicted rate (39 percent), followed by service workers (35 percent), clerical workers (26 percent), sales workers (24 percent), craft workers and supervisors (20 percent), managers and administrators (15 percent), and operatives (11 percent). This publication contains a brief discussion and employment information (in English and in Spanish) concerning occupations for professional and technical workers, managers and administrators, skilled trades, sales workers, clerical workers, and service workers. In order for women to take advantage of increased labor market demands, employer attitudes toward working women need to change and women must: (1) receive better career planning and counseling, (2) change their career aspirations, and (3) fully utilize the sources of legal protection and assistance that are available to them. June 1993

Document Resumes

The document resumes in this section are arranged in numerical order by ED number, and also alphanumerically by Clearinghouse prefix and Clearinghouse accession number.

As explained in the Introduction, each Clearinghouse focuses on a specific aspect of education. The reader who is interested in one of these major aspects (e.g., Reading) may, however, find pertinent resumes among the entries of virtually any Clearinghouse, dependent on the orientation of the document. For this reason, it is important to consult the Subject Index if a comprehensive search is desired.

The following is a list of Clearinghouse prefixes and names used in this Section, together with the page on which each Clearinghouse's entries begin:

	Page		Page

Resources in Education (RIE) is a monthly abstract journal that announces (catalogs, indexes, abstracts) documents of interest to the educational community (including researchers, teachers, students, school board members, school administrators, counselors, etc.). Each issue announces approximately 1,100 documents and provides indexes by Subject, Personal Author, Institution, Publication Type, and ERIC Clearinghouse Number. This special Computer Output Microfiche (COM) edition is prepared directly from the ERIC magnetic tape database prior to publication of the printed journal and therefore is lacking the cover and other regular introductory and advertising matter contained in the printed journal. The COM edition contains only the first three of the five indexes in the printed edition. The first accession in each issue of RIE is the issue itself. In this way, the monthly microfiche collection for each issue is immediately preceded by a microfiche index to that collection. This practice began with the RIE issue for May 1979. (CRW/WTB)

Charland, William A., Jr.
Career Shifting: Starting Over in a Changing Economy. Points West Review.

Center for the New West, Denver, CO.

Pub Date—Sep 93

Note—21p.; Inside title page cover varies: "Career Shifting: Shifting Gears in a Changing Workplace."

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adult Education, Demand Occupations, Economic Change, *Educational Needs, *Employment Practices, *Employment Problems, *Employment Projections, Entrepreneurship, *Futures (of Society), *Lifelong Learning, Unemployment

The economic shifts of the past decade represent a new era in the U.S. workplace. Many of the millions of dislocated managers and professionals will not be reemployed in similar jobs because those jobs have disappeared. The economy has changed from the pyramid shape that most people envision, with a large blue-collar base and a smaller white-collar top, to a diamond shape, with a small tip of managers and owners, a large middle of worker-producers, whether white or blue collar, and a small layer of clerical workers. In this new economy, people must find new ways of working. Many are becoming entrepreneurs. Others are retraining in a variety of technical occupations. All, however, must constantly learn new skills and new ways to apply old skills as the economy continues to change. Workers must become generalists, able to do a variety of things. In order to do so, they need college programs to which they can return throughout their lives. Lifelong learning must become a way of life for the workers of the present and the future. (KC)

Aiming for Excellence: A World-Class Workforce, a World-Class Economy.

New York State Job Training Partnership Council, Albany.

Pub Date—Apr 94

Note—41p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Adult Education, Economic Development, Educational Policy, *Government School Relationship, Information Dissemination, Job Skills, *Labor Force Development, *Partnerships in Education, Program Improvement, Public Policy, Resource Allocation, *Retraining, Skill Development, State Action, *State Programs, Vocational Education

Identifiers—*Competitiveness, *New York

A task force examined New York State's role in providing resources and information to employers desiring to upgrade the skills of their current work-

ers. The following were the task force's 12 major findings: (1) upgrading the skills of New York's existing work force is vital to the state's economic future; (2) all workers need opportunities for training and retraining; (3) State policy and investments in upgrading skills should help discourage low wage strategies for economic competitiveness; (4) the state must encourage employer investment in current workers's skills; (5) the current level of knowledge about world class work organizations and worker skills is inadequate; (6) the state has a shared responsibility with employers, labor unions, and workers to develop those skills that could lead to higher work force productivity and performance; (7) few employers have made skill upgrading a priority; (8) encouraging employers and workers to adopt higher skill levels will have long-term benefits for the state's economy; (9) New York should take steps to ensure that a comprehensive network of services is in place and easily accessible; (10) an objective set of standards based on workplace competencies will ensure consistent service delivery; (11) New York's existing programs for funding skill upgrade training should be expanded and redirected; and (12) a range of funding options and incentives is needed. (The bibliography contains 21 references. Appended are descriptions of 16 Department of Economic Development programs and 28 recommendations for state actions regarding job training.) (MN)

Observations are offered regarding differences between the academic persistence, academic achievement, and general learning behaviors of male and female students in job skills classes for physical plant and security employees at a state university. Greater numbers of women tended to enroll in and continue attending classes. The men tended to enroll for a specific purpose, such as gaining the literacy skills needed to obtain a driver's license or learning enough math to take the General Educational Development tests. The women attending classes were more likely to be motivated by a desire to keep on learning or to help their children and grandchildren. The men were more likely to follow

2 Document Resumes

directions and stick to one task until they master it, whereas the women were more likely to dabble (in other words, work on one task for a while and then pick up something else to work on for a while). Although the women did not fit into a school model of mastery and testing, they kept attending class and did make progress. The Bible proved to be a powerful book for both the men and women, and members of both sexes read Bible stories in class. (MN)

Edwards, Patricia M.

A Comparative Analysis of Adult Learning Styles and Interpersonal Communication Techniques.

Pub Date—Jul 94

Note—79p; Master of Education Field Project, Western Washington University.

Pub Type—Dissertations/Theses - Undetermined (040)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Adult Education, *Adult Educators, *Adult Learning, *Cognitive Style, Comparative Analysis, *Educational Needs, *Interpersonal Communication, *Teacher Education

A study examined the effectiveness of preservice and in-service training in selected interpersonal communication techniques as a way of improving adult educators' ability to communicate with students with a variety of learning styles. The literature on adult learner characteristics and practice, learning style, and concepts and components of interpersonal communication was reviewed to determine the extent to which interpersonal communication techniques facilitate the practice of adult education principles and ways in which individual learning style affects the effectiveness of interpersonal communication techniques. Selected interpersonal communication techniques were analyzed from the standpoint of their appropriateness with adult learners in view of the principles of adult learning. It was concluded that adult educators would definitely benefit from preservice and in-service training in interpersonal communication techniques. The following interpersonal communication techniques were found to be especially effective with adult learners: perception checking, behavioral descriptions, "I" language, paraphrasing, active listening, confirming, win-win negotiating, empathetic communication, nondefensive response, sending change messages, and intercultural communication. Literacy in Turkey with Special Reference to Women's State.

Pub Date—[94]

Note—14p.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adult Basic Education, Citizenship Education, *Educational Development, Educational Objectives, *Educational Opportunities, Educational Practices, *Educational Principles, *Educational Trends, Foreign Countries, *Literacy Education, Nonformal Education, Nonschool Educational Programs, Rural Areas, Rural Education, *Women's Education

Identifiers—*Turkey

In Turkey today, 93% of all persons between the ages of 6 and 15 attend school, and 89.7% of males and 71.1% of females over the age of 15 are literate. Turkey's largest adult education programs are public, free, and offered both within and outside the formal educational system by governmental bodies, national institutions, and voluntary organizations. Since the Republic of Turkey's founding in 1923, many government and nongovernment agencies have been supporting or offering programs for adults in literacy, farmers', vocational efficiency, health, family living, women's, and citizenship education. Turkey has public reading rooms designed to serve as lending libraries and meeting places for reading circles, discussions/lectures, and short-term courses. Since 1926, women's education has been supported by a civil code establishing basic gender equality. Training programs for women emphasizing health and family planning operate largely as mobile courses touring villages. Public education centers called people's houses offer adult education activities in areas such as language and literature, fine arts, drama, sports/games, social assistance, literacy and foreign language, library use, and rural activities. Turkey's fifth (present) 5-year development plan includes provisions to integrate the educational system by forming organic relationships

between the formal and nonformal educational systems. (Contains 17 references.) (MN)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Curriculum Development, Educational Benefits, Educational Change, *Flexible Scheduling, Foreign Countries, Higher Education, *Learning Modules, Models, *Open Universities, Organizational Development, *Professional Continuing Education

Identifiers—*Modularization, *Netherlands

Publications in the fields of educational science, organization theory, and project management were analyzed to identify the possibilities that modularization offers to institutions of higher professional education and to obtain background information for use in developing a method for modularization in higher professional education. It was discovered that, in higher education, modularization is generally regarded as a means of organizing programs more efficiently, maintaining/improving program quality, and bringing programs more into line with demand for additional training. Educational innovation was found to go hand in hand with organizational development. Modularization programs were found to consist of three stages. In the first stage, modularization is primarily a matter of policy in which objectives are of paramount importance. It is in this stage that decisions to divide study loads into standardized units are generally made. The second stage of modularization is aimed at the curriculum and is the stage in which diploma requirements and objectives of modularization are finalized on the basis of information about labor market demands. The third stage of modularization is the logical elaboration of the decisions made in the first two stages and is the time when decisions at the modular level are made. (Contains 30 references.) Descriptors—Adult Education, *Computer Assisted Instruction, *Courseware, *Curriculum Development, Foreign Countries, Higher Education, *Independent Study, *Learning Modules, Models, *Open Universities

Identifiers—Modularization, *Netherlands

A project management design for modularizing higher education at open universities was developed and tested. Literature in the fields of project management and development of modular curriculum materials was reviewed and used as a basis for developing a project-based approach to the process of developing modules for self-instruction. According to the model developed, project management should be regarded as a combination of planning control techniques requiring systematic planning and control of time, quality, information, organization, and money. The module development process consists of the following activities: development of an overall course description; development of a course plan; production and testing of written, audiovisual, and software course materials, readers, and test/examination instruments and harmonization of the materials/course with study support requirements; development of a draft course; development of a finalized version of the course;

and publication and distribution of the learning modules. The proposed modularization method has several advantages: it permits optimal use of staff capacity and material resources; it provides a better overview of the various projects involved in the modularization process; and it allows better subsequent costing of each module. Project SCANS Integration. Formative Evaluation Report.

World Class Associates, Columbus, OH. Spons Agency—Dependents Schools (DOD), Washington, D.C. European Area.

Pub Date—Jul 94

Note—77p.

Pub Type—Reports - Evaluative (142) — Tests/Questionnaires (160)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Academic Education, Career Education, Competence, *Competency Based Education, Educational Practices, *Education Work Relationship, Formative Evaluation, High

Schools, *Integrated Curriculum, Pilot Projects, *Program Effectiveness, Student Certification, Student Evaluation, *Vocational Education Identifiers—*Secretaries Comm on Achieving Necessary Skills

Project SCANS (Secretary's Commission on Achieving Necessary Skills) Integration is a 5-year initiative to explore how well all high school instructors would be able to integrate competency-based instruction in designated work-related competencies into their courses and rate students' mastery of the competencies. Three teachers from each of 14 curricular areas attended a 1-week workshop and 1-week institute on competency-based approaches to achieving necessary skills. During the following year, the teachers achieved consensus on three competencies per SCANS category. The original teachers shared their experiences in a 2-day workshop, and one teacher from each discipline acted as a mentor to three newly selected teachers. The teachers then pilot tested the program during the 1993-94 school year. In a systematic formative evaluation of Project SCANS Integration's pilot test year, an external reviewer used program-specific instruments to interview 19 administrators, 54 teachers, and 36 students and to structure classroom observations at 20 schools. The preliminary evaluation findings were discussed with an evaluation cadre of 13 SCANS teachers and synthesized into a best practices handbook. (Appendixes are the following: SCANS performance checklists, pilot test log, evaluation instruments, cognitive learning theory table, and SCANS best practices handbook.) (MN)

Descriptors—Adult Education, *Agricultural Education, *Change Strategies, *Conferences, *Educational Change, Educational Needs, *Educational Objectives, Educational Practices, Educational Strategies, Elementary Secondary Education, Program Administration, Program Costs, Program Implementation, Program Improvement, Two Year Colleges, *Vocational Education

Identifiers—Agenda Preparation (Meetings)

Representatives of 11 organizations playing a leading role in agricultural education (AE) attended a conference to discuss their vision of AE in the year 2000. During the conference, the issues of greatest concern to AE were prioritized, specific strategies/solutions to accomplish each priority were identified, an action plan to achieve desired outcomes and a mission statement unifying the entire AE profession (grades K-14 and adult) were developed. Adjustments in AE organizational structures to foster productive and efficient national leadership were proposed. Among the items included in the action agenda were the following: clarify/define authority, staff, leadership, and other roles; propose shared management services and overhead reduction; create and leverage job openings for executive director positions; consider consolidating AE boards; create an AE budget; and provide training for boards. (Appendixes constituting approximately 75% of this document contain the following: participant list, conference agenda, AE organization profiles, extracts from a study to identify high priority AE issues, list of priority issue strategies and action plans, general session notes, congressional forum speaker summaries, conference memorandum of understanding and news release, mission statement development notes, and matrix of strategies and promises.) Four governor's regional literacy summits were held throughout Ohio in autumn 1992. At the summits, literacy and adult education program administrators and teachers, business representatives, government leaders, community agency workers, adult learners, and others expressed their opinions about Ohio's literacy needs and ways of meeting them. An action agenda of 23 recommendations regarding coordination and collaboration, public awareness, research, program resources and support, advocacy and funding, and accountability were developed on the basis of the opinions expressed at the summit. The following were among the actions recommended: establish a state-level task force on literacy and state-level literacy goals; promote/support networks of local providers, local coalitions, and other collaborative efforts; undertake campaigns to create public awareness of the scope/cost of illiteracy and recruit literacy volunteers; delineate areas needing research annually and disseminate research syntheses to providers; develop mechanisms to identify model literacy initiatives and disseminate information about them; increase the use of technology in delivering adult basic and literacy education; and adopt model indicators and program standards and provide technical assistance to help literacy programs comply with them. (Appendix is a glossary of agencies/organizations and the membership list of the governor's literacy summit state planning committee.) (MN)

Job Corps Centers. Comparison of Costs and Outcomes.

General Accounting Office, Washington, D.C. Div. of Human Resources.

Report No.—GAO/HRD-93-16R

Pub Date—19 Feb 93

Note—22p; Update of ED 274 748.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Administrative Organization, Adult Basic Education, Comparative Analysis, Economically Disadvantaged, Education Work Relationship, *Federal Programs, Job Placement, *Job Training, *Outcomes of Education, Privatization, *Program Costs, Salary Wage Differentials, Vocational Education, Youth Programs

Identifiers—*Civilian Conservation Corps, *Job Corps

A study examined the costs, outcomes, and administrative structure of the Job Corps program. Information obtained from the Department of Labor's (DOL) Office of Job Corps and discussions with DOL officials was used to study the structure of the Job Corps program, cost differences between Job Corps centers run by contractors and Civilian Conservation Centers (CCCs), outcomes for students trained by national sole-source contractors, and sole-source contractors' hiring of students. The study established that the Job Corps' administrative structure has not changed substantially since 1986 and that 108 Job Corps centers in 43 states, the District of Columbia, and Puerto Rico are currently providing basic education, vocational training, and other services to economically disadvantaged youth in residential settings. In 1991, the cost per training slot at CCCs was higher than that at contractor-operated centers (\$17,602 versus \$15,835). Youths completing training at CCCs were slightly more likely to be placed in jobs than were youth receiving training at contract centers, and CCC students received higher starting wages (\$6.50/hour) than did other students (\$5.45/hour). Few students were hired by center operators after completing training; however, union contractors helped place 16% of their students in apprenticeships. (MN)

Principles of Technology. Workshop Presenter's Handbook for Pennsylvania Educators.

Temple Univ., Philadelphia. Center for Vocational Education.

Spons Agency—Pennsylvania State Dept. of Education, Harrisburg.

Pub Date—93

Note—360p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC15 Plus Postage.

Descriptors—*Classroom Techniques, High Schools, Industrial Arts Teachers, *Inservice Teacher Education, Laboratories, Mathematics Teachers, Science Teachers, *State Standards, Teaching Methods, *Technology Education, *Workshops

Identifiers—*Pennsylvania, *Principles of Technology

This workshop presenter's handbook was developed to provide assistance to those who will serve as Principles of Technology trainers of science, industrial arts/technology education, and mathematics teachers throughout Pennsylvania. The handbook provides trainers with presentation materials, transparency masters, suggested activities, and selected resources to promote structure as well as facilitate the delivery of inservice training to those interested in teaching Principles of Technology. The handbook is organized in three parts. Part 1 (introduction) has the following sections: an overview of the Principles of Technology, Pennsylvania's role in the development of the Principles of Technology curriculum, the potential of the Principles of Technology materials to improve student knowledge levels, and an overview of the instructional design and structure of the Principles of Technology materials. Part 2 (implementation) provides materials to promote the development of skill in the set-up and completion of Principles of Technology laboratory sessions as stand-alone and infused demonstration lessons. Sample student lessons are included. Part 3 (logistics) contains a laboratory equipment list, a vendor list, and information on the following: specification writing, laboratory design and facilities, equipment fabrication plans, guidelines for laboratory management and grading, a safety supplement, and Pennsylvania teacher certification requirements for Principles of Technology. A Principles of Technology miniguide includes materials for conducting a public relations and community awareness campaign. (KC)

"It's Never Too Late." A Learning Pack for Older People with Few or No Formal Qualifications.

Oxford Univ. (England). Ruskin Coll.

Pub Date—93

Note—160p.

Available from—Agewell, Ruskin Learning Project, Ruskin College, Walton Street, Oxford OX1 2HE, England, United Kingdom (5 British pounds plus postage and packing).

Pub Type—Guides - Classroom - Learner (051)

EDRS Price - MF01/PC07 Plus Postage.

Descriptors—Adult Basic Education, Aging (Individuals), *Basic Skills, Citizen Participation, Creative Writing, Foreign Countries, Health Promotion, Information Sources, Leadership, Learning Activities, Listening Skills, Numeracy, *Older Adults, Recreational Reading, Reminiscence, Social Services, Welfare Services

Identifiers—Great Britain

This learning pack, which was developed in Britain primarily for use with small groups of older adults who have had little formal education, contains nine self-contained units of learning activities dealing with topics related to older adults' everyday lives. The following topics are covered: techniques for organizing and running a group; myths about aging; creative writing; listening skills; sources of information about social services and welfare rights in specific localities; exploration of local, national, or international issues and ways of influencing policymaking; health and well-being, the National Health Service, and ways of staying healthy; reading for pleasure; reminiscence; and basic mathematics (learning to be critical about accepting figures at face value, using a calculator, and calculating percentages and fractions). Each unit contains some or all of the following: guidance for group leaders, one or more warm-up activities, learning activities and suggestions for conducting the learning session, a list of recommended resources, information to be presented during the session, student handouts, and student feedback sheets. Lists of 21 addresses and 3 directories are included. (MN)

Descriptors—Access to Education, *Adult Education, *Day Programs, Educational Research, Foreign Countries, Lifelong Learning, Noncredit Courses, *Nonformal Education, *Womens Education

Identifiers—*Ireland

A study examined daytime education groups, a major phenomenon in Irish adult education. Results showed that 96 groups were operating, mostly in suburban areas, particularly Dublin. These groups had 8,723 adults participating in their courses and programs. What made them unique was their voluntary, locally based nature. The groups received little or no recognition, encouragement, or support from the Department of Education. They were generally dependent on local level support. More than half operated from private homes. Two-thirds rented premises. One in three did not have any insurance coverage for their activities. Two-thirds provided child care, which approximately one-fifth of the participants used. The groups provided a large number and wide range of educational courses and programs. In contrast to statutory providers, the groups had greater control over the whole process. Although crafts and skill-based learning were still emphasized, the main type of learning was oriented toward social and personal understanding. Most courses were run on a strict self-financing basis. More than half provided subsidies for the cost of fees. Courses were not linked to any overall system of certification and accreditation. Several problems were identified: funding, maintaining the voluntary commitment and motivation of group members, lack of permanent premises, and lack of facilities. (Appendices include the daytime education groups, listed alphabetically by county, and questionnaire.) (YLB)

Identifiers—Great Britain

This book presents ideas about and approaches to human resource management (HRM) in British further education (FE) colleges. Introductory material includes author biographies and a preface (Brain) on human resource issues in FE. "Investors in People" (Chambers) considers how working toward recognition as an Investor in People (a British National Standard) may support colleges in implementing change. "Total Quality Management" (Gorringer, Anslow) describes total quality and a method for developing quality standards and suggests means of devising and monitoring achievement in relation to quality standards. "Embedding a Professional Development Culture" (Dodson) proposes that existing staff development practices must quickly evolve even further so that a full professional development culture exists in all colleges. "Changing the Culture of Human Resource Development in Colleges" (Gorringer) describes the ways in which all aspects of managing and developing human resources in colleges are undergoing rapid change. "Recruitment and Selection" (Gilchrist) looks at three particular stages: post-identification, attracting interest, and selection and appointment. "Appraisal" (Skitt) emphasizes the importance of the process in increasing organizational effectiveness. "For Quality, against Appraisal" (Henry) suggests that appraisal of staff does not add to the quality of a student's learning experience. "Reward Systems and Management" (Brain) addresses rewards as an underused tool for

improving motivation and supporting strategic objectives. "HRM in the Next Decade" (Wagstaff) explores three external influences that colleges cannot change but can plan to take advantage of—demographic issues, labor market features, and European legislation. An index is provided. (YLB)

Identifiers—*Great Britain

Education reform in Great Britain during the last 15 years has been piecemeal, and all the pieces are not yet in place for broad and balanced post-16 education. The last 10 years of debate have achieved much common ground among the goals perceived by government, industry, and education. Three major ways of looking at the post-16 curriculum have emerged: the triple track, the all in, and the broad continuum. Some more detailed developments have also been taking place within the 16-19 curriculum: National Vocational Qualifications, General National Vocational Qualifications, education and training targets, core skills, records of achievement, credit accumulation and transfer, modularization, and the place of coursework. Closely related to curriculum development are the delivery of learning and assessment. An increasing use of more flexible approaches to learning is an important element in effective curricular change. Modular developments have, in turn, opened the way for continuous assessment, recognition of partial achievement, and construction of a framework for credit accumulation and transfer. Clear progression must be ensured from school to postcompulsory education and training at 16. Suggestions for a practical program for the 1990s can be grouped into the starting point, institutional practice, and modifications required nationally. A national curriculum must be developed that delivers both breadth and balance through post-16 education and training. (Contains 22 references.) (YLB)

Descriptors—Career Education, Educational Legislation, *Education Work Relationship, Federal Legislation, Grants, Models, Postsecondary Education, *Program Development, Program Implementation, Secondary Education, *State Legislation, *State Programs, State Surveys

Identifiers—School to Work Opportunities Act 1994

A study to ascertain state progress in building school-to-work systems reviewed the state applications for school-to-work planning grants submitted in December 1993 and 1993 state reports on progress toward achieving the National Education Goals. State infrastructure to support and guide local programs included clear goals, public understanding and support of school-to-work efforts, occupational and labor market information resources, skill standards, performance-based assessment tools, portable skill certificates, and evaluation mechanisms. Nearly every state had begun developing some elements of a state school-to-work system. System elements being addressed included occupational information systems, content and skill standards, performance-based assessments, portable

skill certificates, and developing a statewide consensus. States with the most elements under development tended to be urban, industrialized states. States that reported the most progress developing the state infrastructure tended to be members of state coalitions. Many states struggled to create strong partnerships with business, industry, and labor. States identified the public's concern and lack of understanding of the goals and strategies of school-to-work programs as one of the most persistent barriers. The number and types of programs to facilitate school-to-work transition varied by state as well as the extent to which the state promotes or supports each model. (YLB)

Fact Finding Report. Commission on the Future of Worker-Management Relations.

Department of Commerce, Washington, D.C.; Department of Labor, Washington, D.C.

Pub Date—May 94

Note—174p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC07 Plus Postage.

Descriptors—Adult Education, *Collective Bargaining, *Employer Employee Relationship, Labor Conditions, Labor Economics, *Labor Legislation, *Labor Relations, Personnel, *Personnel Management

Identifiers—National Labor Relations Act

This report presents findings of a commission that held hearings and examined quantitative and qualitative evidence on the current state of worker-management relations in the United States. Chapter I identifies those facts about the changing economic and social environment that bear directly on the mission statement of the commission (to ensure that workers and managers work together more effectively) and highlight the challenges these facts pose for existing workplace practices, worker-management relations, and labor regulations. Chapter II reviews the facts with respect to employee participation and labor-management cooperation. Sections report on the following: views of workers, managers, and labor leaders; the extent of employee involvement; the issues addressed in these processes; the evidence on their effects on economic outcomes; their prospects for diffusion; and the legal issues they raise. Part A of Chapter III focuses on how effectively the National Labor Relations Act (NLRA) works in providing workers the free choice whether or not to bargain collectively with their employers. Part B considers workers not covered by the NLRA, including contingent workers, the construction sector, and workers in the railroad and airline industries covered by the Railway Labor Act. Chapter IV examines employment regulation, litigation, and dispute resolution. Appendixes include historical perspectives on the work of the commission and its national and regional meetings. (YLB)

Identifiers—*Proposed Legislation

In the fragmented federal system, over 150 pro-

grams provide employment training assistance to adults and out-of-school youth. Individually, these programs have well-intended purposes. Collectively, they raise four concerns: (1) they are difficult for job seekers and employers to access and for administrators to implement; (2) they overlap and duplicate one another, adding unnecessary administrative costs to program operation; (3) they fail to meet client needs; and (4) many lack the basic monitoring and evaluation systems needed to determine whether they are achieving desired results. During the past year, members of Congress have introduced 13 legislative proposals that would restructure parts of the federal employment training system. The bills contain provisions that would reduce the number of programs, create clearer points of entry and clearer pathways between programs, or create more common definitions and requirements. Proposals that would simplify the system could also improve the system's administrative efficiency. Although some proposals include provisions concerning mix of services, only a few specifically call for an independent comprehensive assessment or better local labor market information and linkages with employers to ensure that training would prepare clients for meaningful jobs. Most proposals recognize the need to hold program administrators accountable for program performance. (Appendixes include tables comparing the proposals with regard to each of the four concerns.) Identifiers—Aid to Families with Dependent Children, *Job Opportunities and Basic Skills Program

A study examined states' development of automated systems for the Job Opportunities and Basic Skills (JOBS) program administered by the states, with the Administration for Children and Families (ACF) responsible for program oversight and direction. Results indicated that ACF had not provided direction and focus in its systems development guidance to help states develop automated information systems that effectively support the basic JOBS program objective—helping welfare clients become employed. ACF's system development guidance instead focused merely on requirements for data collection and reporting on people in the program. Officials from all six states visited said that accessibility to a listing of available jobs or information on the kinds of jobs needed in the community would help caseworkers provide greater assistance to clients by helping them find jobs or tailoring a training program to increase their marketability. They did not design their systems to provide this information because they were concerned solely with meeting the federal requirements provided by ACF. Most of the 53 states and territories had automated JOBS information systems that were either operational or under development. The kind of system and degree of automation varied by state. Almost half of the states' systems did not collect all the data or have all the functions required by ACF. (Appendixes include a summary of questionnaire results and comments from the U.S. Department of Health and Human Services.) (YLB)

Descriptors—Adult Education, Career Development, *Fisheries, Land Use, *Staff Development, *Strategic Planning, Training, Wildlife, *Wildlife Management

This strategy plan for training personnel addresses the goals, objectives, and recommended strategies for managing human resources development within the Wildlife, Fisheries, and Special Status Plants Program. It provides a justification for developing human resource programs to maintain a motivated, energetic workforce; goals and objectives of the plan and background on training are presented. It describes five categories of training: orientation, entry level, advanced professional, career/professional development, and mandated. Two types of training delivery methods are detailed: formal and informal. A two-part employee development model is presented. The final section contains recommended strategies that have been developed to meet the current and future training needs of wildlife/fisheries professionals. A brief background statement precedes each strategy recommendation. The recommended strategies are divided into these categories: training delivery, training evaluation, current and future training needs, competency models, and coordination. Appendixes include the following: Bureau of Land Management's Career Development Program Framework; employee development model; training and other developmental materials; plan implementation strategies/actions with action to implement, comments, and lead office indicated; and estimates of plan implementation costs. Identifiers—*Even Start, *Family Literacy, Ohio

To investigate the initial experiences of the various Even Start programs in Ohio following approval and funding, a project developed a survey instrument and sent it to Even Start program directors. The survey asked directors open-ended questions aimed at getting a general description of each program and a discussion of the issues and concerns that the programs had to deal with in the initial stages. Eight programs responded. In general, directors believed they experienced significant challenges and difficulties in initiating programs. Considerable overlap was found in the types of activities seen as essential to successful initiation of the projects, including the following: hiring staff, selecting and preparing sites and purchasing equipment and essential materials, coordinating with other agencies, introducing the program to the community, and identifying and recruiting potential clients for the program. Problems were encountered in the following areas: site and staff selection, staff orientation and training, coordinating with and gaining the cooperation of related agencies, finding appropriate materials for the program, perceived unrealistic expectations and lack of support and guidance from the federal agency, and recruitment and retention of parents. Collaboration was recommended with other Even Start projects and family literacy personnel, within the program, and within the communities; being realistic about program goals was suggested. (The instrument is appended.) (YLB)

Identifiers—*Even Start, *Family Literacy, Ohio

To investigate the initial experiences of the various Even Start programs, a project developed a survey that was sent to program coordinators in Ohio. It asked open-ended questions to get descriptions and perceptions of situations that preceded turning point events and the turning point events themselves. Data from eight programs highlighted their diversity. Their turning points were varied, but several themes were identified that seemed significant in successfully achieving turning points. Staff development was critical to successful early program development. Both self-study and development of action plans were effective in increasing staff understanding, facilitating program start-up, and solving problems related to early program delivery. Several programs mentioned that things did not begin to fall into place until appropriate facilities were found. Several program coordinators found that nurturing communication with other complementary agencies was a definite turning point for their programs. State coordinator recommendations for the planning stage were as follows: developing firm, written agreements with cooperating agencies; securing a site; and clarifying with cooperating agencies that provide staff what kind of persons are needed. Insisting that staff experience training and plan instruction together as a team and giving parents ownership of the program in every way possible were recommended. (The instrument is appended.) Identifiers—*Even Start, *Family Literacy, Ohio

Formative, in-process evaluation results can be used to refine or "fine tune" Even Start programs. The assumption is that the programs have obtained comprehensive and appropriate empirical data on the assessment of the program as a whole as well as its specific goals. This six-step model uses evaluation data to improve program delivery. The steps are as follows: (1) convene a planning team of five to eight people who represent various aspects of Even Start delivery; (2) develop a shared understanding about what the local evaluation results mean for or about the program; (3) explore reasons for the results (the problems); (4) generate and evaluate possible solutions; (5) develop and implement the plan for program refinement; and (6) evaluate the success of the plan. Following the presentation and explanation of this model, two fictional examples of the model in action are provided. One describes a program that uses that model to solve the program's retention problems. The second focuses on a program that encounters unexpected problems with Even Start parents' reading ability. Identifiers—*Maine

This publication contains the comprehensive grades 6-12 guidance plan developed for NOVA/Region 9 schools in Maine. It begins with the Career and Vocational Guidance Team philosophy and goals. Three lists present the general categories that address the goals of the NOVA career and guidance plan, key components of the plan, and components of the ongoing assessment of skill within NOVA community, including tests and inventories, recommendations, and school records. Specific career and guidance plan outcomes are presented in five general categories: skill building, awareness, involvement, aspirations, and assessment of skills. A chart identifies career awareness/development programs by grade level within each school. Appendixes include the following: listings of plan resources for grades 6-8 and grades 9-12; career development competencies correlated with portfolio section; list of NOVA Community's career development middle school (grades 6-8) student competencies and indicators in the areas of self-knowledge and career planning; NOVA Community's career development high school (grades

9-12) student competencies and indicators in the areas of self-knowledge and exploration; and results of a survey of middle and high school teachers to assess what was being done in the four categories of skill building, awareness, involvement, and aspirations. Other appendixes list areas being considered for future work sessions, a list of placement options for high school graduates, and the plan's 3-year objectives. (YLB)

This packet consists of a tutor's guide and the first two booklets of "The Women's Series." The series is part of a program of a national literacy campaign dedicated to women who cannot read well enough to use literacy skills in everyday life. The two booklets focus on child care because that is such a major concern for so many women. They are written at a fourth- to sixth-grade reading level, using basic language and clear illustrations. The titles of the two booklets are "Kids Alone, Safe at Home" and "Child Care Choices." Each concludes with a checklist for the user to complete. The tutor's guide offers suggestions for how to use the booklets in the series. It contains general tips as well as two sections that suggest a variety of other specific activities for use with each booklet. All activities teach reading, writing, and thinking skills while helping learners apply relevant information to their own lives. (YLB)

This book contains a collection of 76 original essays produced by students at a model adult literacy program run by Literacy Volunteers of America-Chippewa Valley (Wisconsin). The essays were produced by the students with the encouragement of their tutors. The essays are grouped into the following topic categories: life's lessons, citizenship, work and recreation, memories of family life, joys and trials of parenthood, goals and challenges, legends and customs from faraway lands, the ravages of war, and finding a new homeland. The writers and their tutors are profiled at the end of the book. (KC)

This manual is designed to guide literacy providers through the process of producing a book of writings by their adult literacy students. The book is organized in seven chapters. Chapter 1 advocates the value of writing and provides a rationale for a book of writing by literacy students. Chapter 2 provides details of a workshop to be conducted to teach tutors to do the types of writing through which they will coach their students. Application of the writing process to tutoring sessions with adult students is explored in chapter 3. The process of submitting the works, selecting which works to print, and editing the pieces to produce the book are explained in chapter 4. In chapter 5, suggestions are offered for the full range of possibilities for printing the book, and chapter 6 suggests ways to fund the printing costs. Chapter 7 suggests ways to wrap up the project and also provides information on marketing and distribution. Appendixes include handouts for tutors and a resource list for funding. Contains 39 references. (KC)

Identifiers—*Family Literacy

This manual was developed to help facilitators explain, implement, or expand a family literacy program. It is based on research and on the experience of developing and implementing the model program established by Literacy Volunteers of America-Chippewa Valley in Eau Claire, Wisconsin. The program encompassed the four basic components of family literacy: education for the adult, education for preschoolers, parent education, and parent and child interaction activities. The manual follows a question-and-answer format to take program directors sequentially through family literacy program development and implementation. The book covers the following topics: What is family literacy? Why build a comprehensive program? Who are the partners? What about publicity? Who can participate? Who recruits the families? Implementing the basic components: What are the obstacles to learning? How is the game won? Who makes the rules? Who coordinates the components? What about volunteers? What about English as a Second Language? Who pays for all this; and What about my own program? More than half the book is made up of appendixes that contain the following: (1) sample job descriptions; (2) tools (organizational, grant writing, publicity, recruitment, instructional, and program evaluation); (3) forms (intake, policy, attendance, permission, evaluation, interest surveys, and scheduling); (4) resource lists (organizations, program development, adult education, early childhood education, parent education, parent and child interaction, portfolio assessment, English as a Second Language, and funding sources); and (5) a bibliography listing 112 references. This document contains four papers that were written in preparation for a national conference on building partnerships to help adult learners make the transition from volunteer literacy to adult education programs. Discussed in "Technology as an Instruction Strategy for Program Transitions" (Eunice N. Askov, Barbara H. Van Horn) are the characteristics of effective literacy instruction and effective instructional technology, benefits of and barriers to technology as an instructional strategy, computer-assisted instruction, and considerations in using technology as a bridge between literacy and adult education programs. "Setting up Transitional Programs through Effective Collaboration: A Practitioner's Point of View" (Carol Clymer-Spradling) examines the primary transitional players, transitional models and strategies, and a framework for transition and presents a case study for developing a transitional process. Described in "Learner Portfolios to Support Transitions in Adult Education" (Jane Braunger, Sylvia Hart-Landsberg, and Stephen Reder) are the principles of learner-centered instruction and assessment and ways of using portfolios to support transitions in adult education. "Strategies for Building Collaborative Relationships and Articulated Programs" (Judith Alamprese) outlines the elements of effective transition programs, illustrative transition strategies, and state supports for transition programs. *Caregivers, *College Programs, Core Curriculum, *Curriculum Development, *Day Care, Inter-

generational Programs, Two Year Colleges

This document reports on the development and field testing of a curriculum for persons interested in the caregiving field. The curriculum is designed to encourage students who are economically disadvantaged, ethnic minorities, or limited English proficient to seek training that will equip them with the education, skills, and background information necessary for employment as caregivers or for family caregiving responsibilities. The following components of the curriculum are described: needs assessment, rationale, goal, target population, curriculum

design and content, cost analysis, learning objectives and outcomes, the learning environment, lesson outlines, evaluation, and revision. The learning objectives and lesson outlines cover the following five topics: caregiving, human development, field work, safety and wellness, and business aspects of a caregiving career. Other contents of the document are as follows: recommendations and conclusions, caregiver career ladder, marketing/promoting the program, advisory committee, a resource list containing 180 citations, and definition of terms. Eleven appendices make up more than half the document: labor market projections, intergenerational care provider course outlines, information from the Secretary's Commission on Achieving Necessary Skills (SCANS), an example of a questionnaire, forms, endorsement of the curriculum, samples of recruitment efforts, California legislation regarding the project, an articulation agreement, brochures for the course, and student data. Descriptors—Aging (Individuals), *Clergy, *Continuing Education, Curriculum Development, *Educational Certificates, *Gerontology, Guides, Human Services, Models, Older Adults, Program Development, Public Service, *Public Service Occupations, Religion, Statewide Planning, Student Certification

This training model is a guide for developing statewide training for a continuing education certificate in gerontology in religion and aging. It is designed for use by gerontology educators, state office of aging executives, and leaders of religious judiciaries. Section I begins with a description of the training model and covers where and how to begin. Chapter 2 focuses on the course format, schedule, requirements, and modifications. Chapter 3 deals with the central focus of the training: building collaborative relationships and using the course content in projects that extend programs and services to older persons in the communities. The chapter covers a project planning process and using the resources of good community involvement, older volunteers, and advisory committees. Chapter 4 provides information on research instruments and research report results and their use for planning and evaluation. Section II introduces the recommended curriculum content. Each chapter covers one area and identifies content issues and suggested resources. Concepts include the following: biological, social, and psychological processes of aging; similarities and differences in the organizational structure and function of congregations and aging agencies; community and congregational programming; community resources; counseling older persons and their families; and policy issues. Section III summarizes the model. Appendixes include selected examples of projects and a sample area agency annual plan. (YLB)

This annotated bibliography documents the resources collected and held by the Adult Basic Education Resource and Information Service in Victoria, Australia. The resources and readings listed include materials that are related in some way to workplace-based education and training—not only specific workplace materials, but also materials related to employment and vocational education. The bibliography contains two main sections: resources and journal readings. The resources section includes 212 books, reports, pamphlets, and audiovisual materials. This section contains abstracts listed alphabetically by title, followed by an author index that links the title listings and the abstracts. The 214 journal readings are listed in two ways—by title and then by author. These lists include relevant readings collected from Australian and other countries' journals and collections of readings. Identifiers—*Canada

Based on the experiences of teachers of adult continuing education, this manual was developed to introduce adult educators to the field and the practice of adult education, especially in universities. The book is organized in seven chapters, each containing practical material along with observations of the adult educators. The introductory chapter outlines the purposes of the manual and the assumptions that shaped its development. Chapter 2 provides an overview of the field of adult education by looking at what adult education is and what educators do. This chapter also introduces the adult education tradition in Canada. Chapter 3 focuses on the practice of adult education in universities and the importance of understanding the university context; Chapter 4 describes adult learners (who they are, why they participate, and how they learn). Chapter 5 looks at the practice of continuing education, especially program development. This discussion is augmented by chapter 6, which discusses each component of program development, from needs assessment to evaluation, in greater detail. The final chapter emphasizes the importance of professional development and provides sources of information and ideas about how to go about developing a personal professional development plan. The appendix contains the following: summary of philosophies, personal philosophy worksheet, comparison of four orientations to learning, midcourse evaluation form, course evaluation questionnaire, continuing education budget/course proposal, and brochure preparation checklist. Contains 186 references. (KC)

New Perspectives on Professionals' Learning: The
Literary and Limiting Potential of Dialogues.

Pub Date—Sep 94

Note—45p.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Adult Education, *Cognitive Processes, *Communication (Thought Transfer), *Communication Skills, *Dialogs (Language), Educational Improvement, Foreign Countries,

*Professional Development, *Skill Development
Identifiers—*Reflective Practice

A literature review was conducted on the subject of dialogue. The review examined these topics: how professionals learn and come to reflect critically upon their practice through talk; the barriers that are embodied in prevalent communicative structures and dominant discourses that impede reflective learning through talk; and how these barriers can be minimized or overcome. The study found that the literature points to the potential promise of communication. It suggests that when professionals are encouraged to communicate their personal experience through the expressive language of their own narratives, authentic links can be made between the public world of rational theory and the private landscapes of lived experience. The literature supports dialogic relations in a community dedicated to reflective learning. The literature also points out a paradox: communication can stagnate the growth of an organization just as quickly as it can encourage it. Nonreflective tasks can perpetuate dysfunctional patterns of thinking, reproducing taken-for-granted beliefs and ways of posing and solving problems that limit rather than liberate professionals. Dialogue governed by current dominant rhetorics emphasizes formal knowledge and inhibits reflective learning. According to the literature, five steps can be suggested for organizations committed to reflective learning: (1) recognize the differences between talk that stagnates and talk that stimulates in organizations; (2) deconstruct narratives to find caps, contradictions, and limiting assumptions; (3) promote a learning environment by expressing and challenging these assumptions; (4) cooperate to create a truly collaborative community built upon trust and risk; and (5) foster active and continual critical reflection. (Contains 57 references.) (KC)

Descriptors—*Adult Education, Adult Learning, Disadvantaged, *Educational Finance, *Educational Legislation, Federal Legislation, Foreign Countries, Lifelong Learning, Postsecondary Education, Special Needs Students

Identifiers—*Further and Higher Educ Act 1992 (Great Britain)

This publication is a record of the Parliamentary debate on adult education that accompanied the publication and eventual passage of the Further and Higher Education Act in Britain in March 1992, with a commentary on the development of major issues as the legislation proceeded. Chapter 1 provides a summary of the main measures of the act and identifies sections of particular importance for adult educators. Chapter 2 presents extracts of debate in both houses regarding the importance of adult learning. Where it is helpful, a brief editorial comment has been inserted to place the quoted extract in context. Chapter 3 contains extracts from ministerial replies to amendments made during the passage of the bill, together with clarifying editorial comment. The material is presented to give an indication of the policy intent behind the legislation and to illustrate ways in which the act might be implemented. These topics are considered: statutory duties, the Further Education Funding Council (FEFC) sector, FEFC operation and funding, the local education authority sector, quality, special needs, institutions in the FEFC sector, and other issues—Open College Networks, Welsh, literary tuition, prison education, and trade union education. Identifiers—*Informal Education

Through their own inventiveness and persistence, adults are circumventing institutional indifference and creating alternative educational networks to teach themselves art. Problems that must be overcome are as follows: inadequate instructor preparation, a generally narrow array of programs in most community centers with the preponderance of offerings at the introductory level, and art instruction in multipurpose community education centers that do not often have the appropriate facilities. Problems within colleges and universities include the following: the preoccupation with the full-time student, the artwork/artplay dichotomy, absence of an extensive professional curriculum to train art educators to work with adults, and persisting and prevailing negative views of the abilities of older adults. At some universities, a largely invisible, extracurricular network for informal group learning exists. These networks resemble clubs and are a mixture of social activities plus art. Several trends present opportunities for art educators to reach larger numbers of potential students: the aging population, the growing availability of places where adults can study art, and a heightened art awareness. Both Grandma Moses and Winston Churchill have legitimized the struggling amateur. A need exists for current visible examples of eminent and productive adult artists as motivators for new generations of adult art practitioners. (Contains 29 references.) (YLB)

Identifiers—*Scotland

A project examined information currently made available by colleges of further education in Scotland to users and the marketing strategies used. Thirty-eight of 45 colleges completed a questionnaire on current marketing practice. Other activities included focus groups and interviews with students and members of the general public and a postal survey of employers to assess the relevance and value of information to users and potential users of further education, examining how promotional material and marketing strategies affected users' and potential users' perceptions of further education, and examining the effectiveness of marketing strategies on the marketplace. Findings indicated that marketing plans were often not based on an assessment of client needs or of internal strengths or weaknesses. There was little evidence of close liaison between colleges' marketing personnel and other key management functions. Only seven colleges had marketing information systems fully in place. Only 37 percent monitored effectiveness of promotions. There was a relatively high level of communication between colleges and employers. The main channel of communication with the public was the local press (64%) followed by TV advertising (40%). The public thought colleges had changed a great deal. They felt that colleges were more modern and innovative; the staff cared about the students; and lecturers ensured the right course of study for the student. The most important factors for employers when choosing a training provider were quality of staff and their understanding of business needs. Most colleges expected further development of their mar-

keting function in the next 2 years. (YLB)

Identifiers—*Benchmarking

Hospitals—the most costly segment of the health care system—are beginning to use benchmarking to discover how other hospitals and businesses have developed cost-cutting and time-saving ways of doing things. Benchmarking is a sophisticated, multifaceted procedure, usually conducted by teams, for identifying and adapting best-in-class practices. Benchmarking involves the following steps: defining one's own key processes and understanding how they work, selecting the processes most suited to benchmarking, developing measures of quality, identifying the best organizations with which to benchmark, and implementing the best of the best by modifying processes and testing the results. Groups of hospitals have used benchmarking to improve several areas: the quality of administrative and financial services, the quality of records management, the quality of admissions and related processes, the quality of emergency services, and health care itself. Educators can look at health care benchmarking practices and adapt the process to their own needs in their schools and school systems. (YLB)

Nationwide Participation in 4-H during the 1980s: Information from the Office of Education

NELS:88 Study.

Wisconsin Univ., Madison, Univ. Extension.

Spons Agency—Extension Service (DOA), Washington, D.C.

Pub Date—Jul 93

Note—42p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Agricultural Education, *Attendance Patterns, Demography, Dropouts, *Educational Benefits, Grade 8, High Risk Students, Interpersonal Relationship, Junior High Schools, National Surveys, Parent Child Relationship, Parent Participation, Self Concept, *Student Organizations, *Student Participation, *Vocational Education

Identifiers—*4 H Clubs, 1980s

A study examined national participation in 4-H Club activities during the 1980s. The study population was a carefully drawn sample of 24,500 eighth graders from more than 1,000 public and private schools throughout the country as well as their parents and teachers. The study established that, as of 1988, about one of every six eighth-grade students had at some time participated in 4-H. Fewer than 3% of the eighth-grade 4-H participants were from families who were actively farming, nearly 10% were from a city or suburb, and only 5% expected to be farmers at age 30. Among ethnic groups, Blacks were most likely to participate in 4-H (20% versus 18% of White and 7% of Hispanic students). Nearly one-third of eighth graders participating in 4-H for the first time had annual family incomes below \$15,000. Efforts to make 4-H relevant to young teens appeared more successful at the community level than at the national level. The parents of students who remained in 4-H were slightly more likely to be active in school activities. Little indication was found that participation in 4-H results in measurable differences in such areas as better grades, better self-esteem, and more certainty about future plans. (MN)

Descriptors—Career Choice, Career Education, Career Exploration, Educational Development, Foreign Countries, Moral Values, Secondary Education, Skill Development, Social Values, Teacher Attitudes, Work Attitudes, Work Ethic, Work Experience Programs

Identifiers—Netherlands

Career education in the Netherlands is a regular part of the curriculum and provides students the opportunity to collect information about different professions and studies. The policy of the Dutch administration is to stimulate the creation of secondary schools with both vocational and academic tracks. Career education is designed to balance between delay and choice. By delaying the student's choice of a particular stream, the student keeps open as many options as possible. However, the sooner the choice is made, the sooner the student can pursue an interest in certain professions and the best educational preparation for that profession. A campaign has begun to recruit more students into vocational streams. Every secondary school has to offer career education. All subject teachers must show what their subject means for the different professions. Many secondary schools use work experience programs as part of their career education. The University of Amsterdam has implemented a program to motivate secondary students to attend higher education. The program's four themes are as follows: developing one's possibilities and investing in one's future, choosing a study and a profession, studying at the university, and life at the university. A study has investigated the importance secondary teachers attached to developing values in students. Results show teachers transfer knowledge and skill to students and also stimulate the development of values related to labor. (Contains 15 references.) (YLB)

Women's Career Development: Barriers to Learning within the Traditional Workplace.

Pub Date—Apr 94

Note—21p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Reports - Research (143)—Speeches/-Meeting Papers (150)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Access to Education, Career Development, Educational Discrimination, Educational Needs, Educational Research, Employed Women, Foreign Countries, Interpersonal Competence, Managerial Occupations, Professional Occupations, Promotion (Occupational), Sex Fairness, Skill Development, White Collar Occupations, Work Experience

Two phases of related research investigated the nature of women's skill development needs. The first phase examined prior schooling and current and future training needs of managerial and professional women. A questionnaire was administered to an initial sample of 163 and a replication sample of 207. Participants indicated interpersonal, managerial, and specific skills most frequently as areas of current and future training need. Findings suggested that professional and managerial women primarily seek training in a range of general skills that can be used across most white-collar occupations and allow adaptability within a changeable work environment as well as career maintenance and advancement. A second research stage with 130 managerial and professional women addressed three areas: comparison of levels of request for formal training with informal practical experience, learning opportunities for women as influenced by access to appropriate workplace support, and interpersonal training needs. Findings showed a relationship between experiential learning opportunities and priorities for interpersonal skill development. Results supported the hypothesis that women would have most demand for experientially learned skills. Most frequently re-

quested interpersonal skills training was for conflict resolution, leadership, and counseling skills. (Contains 67 references.) (YLB)

Descriptors—Academic Achievement, Career Choice, Career Education, Foreign Countries, Goal Orientation, High Schools, Nontraditional Occupations, Self Evaluation (Individuals), Sex Stereotypes, Social Status, Vocational Interests

A study traced changes in preferred occupation over a period of 5 years, from Year 9 (approximately age 14) to the first year beyond high school, for over 3,000 Australian students in a sample of 22 government schools. Reasons for changes in preference were probed in questionnaires administered annually. Interviews of a subsample of students and their parents were conducted during Year 10. Questionnaires were completed by a larger sample of about 600 parents. Analyses of reasons given for changed preferences showed that most commonly the reasons were changes in interests and experiences during work placements or "career" lessons. The important "barriers" in Gottfredson's scheme (1981), gender and social status, were rated among the 5 lowest in importance from the list of 15 reasons supplied. Perceptions of their own abilities were, however, ranked among the top five reasons by the students and had the strongest influence on projected compromises during Year 12. With increasing age, respondents were increasingly more likely to compromise by choosing a related course or job at a lower status level than to change field. Males were much more likely to compromise within gender-stereotyped boundaries than females. Sources of questionnaire items and items used to probe reasons for changes in preferred occupations are appended. (Contains 17 references and 8 data tables.) (YLB)

Descriptors—Attitude Change, Corporate Education, Cultural Differences, Diversity (Institutional), Employee Attitudes, Employer Attitudes, Employment Practices, Equal Opportunities (Jobs), Organizational Climate, Personnel Integration, Racial Discrimination, Reverse Discrimination, Salary Wage Differentials, Sex Discrimination

Labor force participation rates, pay inequities, occupational segregation, positions in the hierarchy, interactions between diverse groups, and organizational culture all demonstrate that diversity in the workplace has not been fully achieved. Existing approaches to supporting workplace diversity have not worked, and, in many cases, have resulted in new sets of problems or dilemmas. For example, the equal employment opportunity approach, although effective in increasing participation, has engendered a strong racial and gender backlash. Corporate efforts to increase sensitivity through inhouse programs have often aroused animosity rather than defusing it. Family-friendly policies offered by many organizations are often not widely used because women who use them are perceived as less serious employees. Therefore, it is necessary to develop a new perspective on how to incorporate diverse groups successfully. A new, more workable approach should be drawn from multiple disciplines—economics, psychology, sociology, anthropology, business, and law. A multilevel analysis must be developed that includes attention to individual, work group, organization, and societal factors. It is necessary to understand a variety of complex and relatively unanticipated problems:

contradictions between intent and impact, resistance and backlash, and limited impact on organizational cultures. The goal is to reduce institutional and attitudinal barriers to diverse groups working together and to empower individuals and groups within a more favorable environment. (Contains 151 references.) Materials for Serving Homeless Adult Learners. A

Resource Guide.

Office of Vocational and Adult Education (ED), Washington, DC. Div. of Adult Education and Literacy.

Pub Date—Jun 94

Note—49p.

Pub Type—Reference Materials - Bibliographies (131)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Adult Education, Adult Learning, Affective Behavior, Basic Skills, Curriculum, Daily Living Skills, Data Collection, Demonstration Programs, Homeless People, Job Search Methods, Job Skills, Needs Assessment, Outreach Programs, Parenting Skills, Program Administration, Program Descriptions, Program Evaluation, Student Evaluation

This guide is intended to assist in linking service providers to existing resources and models and to build awareness of the body of innovative work that has been developed to respond to needs of homeless adult learners. It describes materials for instruction, outreach, and program management that were primarily developed in projects funded under the McKinney Adult Education for the Homeless Program. Introductory material includes information on the two referenced clearinghouses Division of Adult Education and Literacy (DAEL) and Educational Resources Information Center (ERIC) and addresses and telephone numbers of state coordinators of Adult Education for the Homeless projects. The materials are organized into three sections. The section on curriculum designates systematic strategies for delivery of instruction or modules/materials focused on these specific topics: basic skills, job or job search skills, life management or affective skills, parenting skills, and other skills. The section on information includes descriptive/educational materials about adults experiencing homelessness and the programs that serve them. It also includes examples of specific projects' solutions to a learner need, in a cartoon-form outreach/fact sheet targeting low-level readers. The section on tools designates tools useful for instruction and program management in the following areas: learner assessment, program evaluation, data collection, and learner tracking. Each entry follows this format: instructional/content area, type of product, product description, developer, availability, and contact person. (YLB)

Diagnostic Techniques for Training and Development.

Pub Date—Nov 93

Note—17p; Paper presented at the Annual Meeting of the American Association for Adult and Continuing Education (Dallas, TX, November 1993).

Pub Type—Speeches/Meeting Papers (150)—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adult Education, Corporate Education, Educational Needs, Evaluation Methods, Models, Needs Assessment, Student Evaluation

Adult educators undertaking training assignments with businesses or industrial firms should use the following methods to conduct a complete needs assessment to determine the scope, depth, length, and cost of training required: general questionnaires/surveys; interviews with several prospective trainees and their administrative supervisors; assessment of records and documents; review of the company's training history; and review of the organizational climate, culture, and levels of support. The diagnostic techniques used during the needs assessment should be comprehensive enough to determine the following: who needs training (intended participants' age, maturity, and educational and experience levels and the organization's philosophies, policies, and practices); why training is needed (mandatory versus voluntary training, participant and company/management expectations, and barriers to training); how and where the training will be conducted (on-site versus off-site training,

room arrangements, and special audiovisual equipment needed); what is to be taught and what training strategies and methods will be used (pacing, classroom techniques, adult education skills required of the trainer, and instructional and evaluation techniques); and how much the training will cost (including the costs of instruction, material, travel/housing, certification, and celebration). (Contains 37 references.) (MN)

Identifiers—*British Columbia

The use of six integrated learning systems (ILS) in adult basic education (ABE) programs in British Columbia was analyzed. The systems studied were as follows: Autoskill, Computer Curriculum Corporation (CCC), Jostens (INVEST), Pathfinder, Principle of the Alphabet Literacy System (PALS), and Programmed Logic for Automatic Teaching Operations (PLATO). Three instruments were developed for interviewing instructors and students using the systems as well as some students who were not using an ILS. Twenty sites were visited across the province. Twenty-one instructors and 60 students were interviewed. Generally, the project team felt positive about what they saw and experienced, and the students interviewed seemed enthusiastic about their work with an ILS. None of the systems were found to be perfect, and administrators and instructors were cautioned to determine their needs and the characteristics of the systems carefully before purchasing a system. (Thirty tables provide detailed analysis of student characteristics and responses. Appendixes to the report include the following: guidelines for acquiring computer-based adult literacy systems, analysis of ILS, and interview questionnaires developed for the project. Contains 33 references.) (KC)

Adult basic education (ABE) teachers and administrators in British Columbia find it difficult to attend an annual conference because they are on short-term contracts or do not have budget or time to travel. A project was conducted to address their need for professional development. During the first part of the project, a needs assessment was conducted. A questionnaire was developed and mailed to about 550 adult education practitioners in British Columbia, with a response rate of about 50 percent. The greatest rate of return was from the northwest region, although the greatest number of replies were received from the Lower Mainland and Vancouver Island. Sixty-two percent of the respondents were instructors, 14 percent combined some instruction with responsibilities for program coordination, another 16 percent were coordinators only, and the remainder were in miscellaneous positions. Fifty-eight percent of the respondents had 1-10 years experience in ABE, and 35 percent had more than 10 years in the field. Almost half of the respondents had never attended an annual conference on ABE. Respondents rated 10 topics most important for their professional development: learner diagnosis and assessment, creating learning materials, strategies for teaching people with learning difficulties, strategies for teaching critical thinking, strategies for teaching reading, strategies for teaching writing, strategies for computer-assisted instruction, counseling topics, strategies for teaching numeracy, and strategies for teaching life skills. Based on this needs assessment, a series of 8 workshops, attended by a total of more than 100 educators, were conducted throughout the province. (The needs assessment instrument and workshop outlines are appended to the report.) (KC)

ducted throughout the province. (The needs assessment instrument and workshop outlines are appended to the report.) (KC)

This guide resulted from a project conducted to develop a process for evaluating adult basic education (ABE) tutoring programs. Through a literature search and discussions with ABE practitioners in Canada, a list of 17 statements of good practice was formulated. These statements were used as a basis for the development of a program questionnaire, a tutor questionnaire, and a learner questionnaire, which can be used to evaluate ABE programs. This document includes the list of statements of good practice and the three questionnaires, as well as a bibliography listing 20 books, kits, and reports and 42 journal and newsletter articles used in preparing the statements of good practice. Directions for implementing the program evaluation process also are included. (KC)

The school-to-career movement has reached critical mass on the U.S. political stage. It is not yet clear, however, whether this movement will have any substantive effect in the lives of youth—particularly those in the "neglected majority" who are not bound to graduate from a four-year college. In comparison to their European and Japanese counterparts, U.S. youth take a much longer time in settling into a career after high school graduation, with almost 30 percent of high school graduates not established in a career by age 30. Proposals to improve school-to-work transitions for youth have centered on a new type of "tracking," with tracking's attendant negatives, that would result in a "career prep" alongside "academic prep." Questions can be asked about the possibility of this approach making things worse for disadvantaged youth, but some proponents think that they could not be any worse off than with the "no-track-no career" approach common now. Any career prep approach would require sound grounding in basic skills for all children and a better defined pathway to well-paying jobs. Among the pitfalls of this approach is the possibility that even if youth benefit from better career preparation, there still may not be jobs for them to put the skills to work. These questions must be further researched. (Contains 46 references.) (KC)

Identifiers—*School to Work Opportunities Act
 1994

Youth jobs can serve as an introduction to em-
 ployment, but few jobs for young adults in their 20s
 make use of their skills. Young people will be moti-
 vated to succeed in school only when they can find
 employment in jobs that pay well above minimum
 wage and provide benefits, security, and opportuni-
 ties for advancement. In order to improve the pros-
 pects of youth, a career opportunity system is
 needed. Work-based learning is at the core of an
 effective career opportunity system, and youth ap-
 prenticeship is the most highly developed form of
 work-based learning. Tech prep is another means of
 relating school to employment, and cooperative edu-
 cation is a related approach. The challenge is for all
 educators and employers to bring existing compo-
 nents together as a coherent whole that serves the
 needs of all young people. The components of a
 career opportunity system should include the fol-
 lowing: career information and advising, high ac-
 ademic standards for all, career majors and career
 academies, and work-based learning. Partnerships
 must be formed among schools, employers, govern-
 ment, the community, students, and parents, with
 defined responsibilities for each partner. An orga-
 nizing mechanism is needed to provide overall sup-
 port and coordination for the system. The
 School-to-Work Opportunities Act provides a basis
 but not a blueprint for starting a career opportunity
 system for noncollege-bound youths. (Contains 30
 references.) (KC)

 This resource packet, which was developed for
 use at a training workshop for Florida vocational,
 adult, and community educators, contains infor-
 mation and materials designed to assist educators in
 marketing their programs at the "grassroots" level.
 Presented in the first three sections are differences
 between public relations (PR) and marketing, rea-
 sons for conducting marketing/PR campaigns, and
 four steps to prepare for contact with the public and
 media. The fourth section includes detailed guide-
 lines for the following steps in developing a market-
 ing plan: create a marketing/PR team, assess image,
 establish goal(s), select target audiences, develop
 the message(s), choose marketing/PR strategies, set
 timelines, determine cost and resources, plan evalua-
 tion, and implement the plan. Described in the
 next two sections are exemplary grassroots market-
 ing strategies (advertising, publicity, promotions,

PR, and direct contact) and specific marketing/PR
 strategies used by school district staff in four Florida
 counties. Included in an appendix are the following:
 a sample PR plan developed to market vocational,
 adult, and community education programs in
 Orange County; marketing resource material; a
 business partnerships resource guide; and informa-
 tion about the FAUN (Florida Application Update
 Network) computer bulletin board system. (MN)

This two-part document summarizes and analyzes
 the implications of a national study of adult literacy
 in Canada that included home interviews with a
 representative sample of 13,571 Canadians between
 the ages of 16 and 69. Part I summarizes the study's
 objectives, methodology, and findings. Among the
 main findings are the following: (1) 16% of adult
 Canadians have reading skill limitations that pre-
 vent them from facing most of the demands encoun-
 tered daily; (2) most functionally illiterate
 Canadians are either persons with limited school
 attainment or first-generation immigrants; (3) 22%
 of those surveyed are able to understand simple,
 well-organized text; and (4) 62% of the 22% of Ca-
 nadians capable of understanding simple texts have
 had at least some secondary education. The bibliog-
 raphy contains 18 references. Appended are discus-
 sions of the study methodology and interview
 questions. Part 2 contains the following examina-
 tions of the study's findings/implications: "An In-
 ternational Review of the Concepts, Definitions and
 Measurement Approaches Underlying Literacy Sta-
 tistics" (Satin); "Literacy and International Com-
 petitiveness: The Relevance of Canada's Survey"
 (Hirsch); "Implications for Adult Education"
 (Morrison); "Literacy and Health in Canada: Con-
 tribution of the Survey of the LSUDA (Literacy
 Skills Used in Daily Activities)" (Rootman); "Liter-
 acy and Old Age in Canada: The Results of the
 LSUDA Survey" (Ross); "Functional Illiteracy:
 Economic Costs and Labour Market Implications"
 (O'Neill, Sharpe); "Workplace Literacy: The Re-
 sults of the LSUDA Survey" (Hawrysh); "Literacy
 for Workers: A Labour Perspective on Basic Skills"
 (MacLeod); "Gender, Nativity, and Literacy: Pro-
 ficiency and Training Issues" (Boyd); and "Literacy
 Programming and the Survey of Literacy Skills
 Used in Daily Activities" (Jones). Sixty-two ta-
 bles/figures are included. (MN)

This document contains guidelines and support
 materials to assist potential purchasers of compu-
 ter-based adult literacy (CBAL) systems as they con-

sider which specific system to purchase. Included in
 the document are the following: guidelines and eval-
 uation criteria (written in question form) pertaining
 to seven areas affecting the purchasing decision for
 a specific adult literacy program, a discussion of the
 best sources for obtaining the information required
 to answer the questions, guidelines for using the
 evaluation criteria, and definitions of selected terms
 pertaining to CBAL systems. The evaluation crite-
 ria/questions are organized under the following cat-
 egory headings: equipment; cost, installation, and
 licensing; compatibility with the adult literacy pro-
 gram; flexibility; management; documentation and
 support; and sources of further information about
 individual CBAL systems. A worksheet designed to
 be used in developing a purchasing recommenda-
 tion is also included. Appended are a 22-item an-
 notated bibliography of publications about the use of
 computers in adult literacy programs and CBAL
 systems and a chart cross-referencing items in the
 annotated resources with six integrated learning
 systems: Autoskill, CCC, Josten's INVEST, PALS
 (Principle of the Alphabet Literacy System), Path-
 finder, and PLATO. (MN)

 Literacy Secretariat (Canada), Workplace Liter-
 acy

Canada's National Literacy Secretariat (NLS) de-
 velops innovative partnerships to involve voluntary
 and national organizations, governments, business,
 and labor in a national effort to make Canada a more
 literate society. The two main objectives of the NLS
 are to promote a variety of opportunities for people
 to improve their reading and writing skills and to
 make Canada's social, economic, and political life
 more accessible to people with weak literacy skills.
 Through its work with Canada's provinces and terri-
 tories, the NLS has been able to set a national direc-
 tion for literacy programs, meet local and regional
 needs in projects addressing national literacy objec-
 tives, and support projects with the following ob-
 jectives: research literacy issues, increase public
 awareness about literacy, develop new learning ma-
 terials, broaden the range of Canadians receiving
 literacy training, and coordinate and share infor-
 mation among groups involved in literacy. NLS part-
 nerships have resulted in literacy programs for
 young offenders and ex-offenders, persons with dis-
 abilities, women, Canada's aboriginal people, and
 members of ethnocultural communities. NLS part-
 nerships have also resulted in workplace and family
 literacy programs. NLS defines its success by the
 quality of its partnerships and works with organiza-
 tions in all sectors to make plain language the stan-
 dard for communications. (MN)

This document profiles six successful literacy partnerships between Canadian community colleges and public/private agencies. The following partnerships are examined: an adult basic education program provided through a partnership between New Brunswick Community College and the Correctional Service of Canada; a workplace literacy program offered jointly by George Brown College and the Labour Council of Metropolitan Toronto and York Region; a deaf literacy project sponsored by Red River Community College, the Society for Manitobans with Disabilities, and the Winnipeg Community Centre of the Deaf; the Effective Reading in Context Program, which is a partnership between Keyano College and the synthetic crude oil producer Syncrude Canada, Ltd.; SARAW (The Student's Voice), which is a talking computer program designed for severely disabled adults through the joint efforts of Capilan College and the Neil Squire Foundation; and I-CARE (Individualized Community Adult Reading Education Program), which has evolved as a partnership among Douglas College, surrounding communities, libraries, and community agencies. Each profile contains background information on the program's partners, program objectives, and innovations that have made the program/partnership successful. Concluding the document are a discussion of the program and partner characteristics that make partnerships work and contact persons/addresses of the six partnerships profiled. (MN)

Identifiers—National Adult Literacy Survey (NCES)

Existing research on supply and demand (S&D) in adult literacy education in the United States was reviewed to determine the types of data needed to model S&D more accurately. Recent state/national studies of literacy service providers/technology, data on the demand for literacy instruction, the recent National Adult Literacy Survey, and studies of participation were reviewed. It was discovered that few S&D studies in adult literacy have gone beyond enumerating service providers or examining barriers to further participation (demand). The S&D equations for literacy instruction in the United States were found to be complicated by several factors: changing demands for basic skills in the workplace, an increase in immigrants with limited command of English, changing federal welfare policies, and limited awareness on the part of persons with low reading/writing ability that their skills are insufficient for everyday needs. Types of data required for modeling S&D were identified. It was concluded that the S&D characteristics in U.S. literacy policy have not been well understood, S&D are often poorly equated, and recent national studies can provide useful guidance toward providing a better S&D balance. (The bibliography contains 24 references. Appended is a table detailing funding of participation in California's work force literacy programs.) (MN)

Identifiers—*Professionalization of Teaching

A study examined issues of teacher professionalization within adult literacy education. Relevant research and theory on professionalization were reviewed, the historical experiences of other professional fields were examined, data on state certification requirements for adult basic education (ABE) teachers were analyzed, officials from states having such requirements were interviewed, and focus group discussions and interviews were conducted with adult literacy teachers and program administrators in the Chicago area. It was concluded that the debate on professionalization is likely being impeded by the existence of the following unstated beliefs or premises regarding the nature of ABE: (1) the right of adults to education; (2) state responsibility for the education of adults; (3) the role of teachers in achieving/improving educational quality; (4) the effectiveness of teacher training; and (5) the existence of a body of knowledge relevant to adult literacy education. It was further concluded that the quality of the ABE teaching force will be improved only through close collaboration of practitioners, researchers, and policymakers and on their finding common ground on the five issues identified. (The bibliography contains 46 references. Appended are three tables detailing state teacher preparation/certification requirements, states' teacher training expenditures, and the relationship between them.) (MN)

Identifiers—United States, *Wealth, Workplace Literacy

A literature review examined the relationship of adults' verbal and mathematical literacy to employers' investments in training, employee wages, unemployment probabilities, unemployment duration, technological change, productivity, and economic growth. Most of the publications analyzed dealt with the United States. The analysis revealed that adults' basic literacy skills, which are usually acquired in school, do indeed affect the wealth of individuals and nations both directly and indirectly. The study also established that, although many workers receive some training from their employers, employers tend to invest most heavily in training their best educated/trained employees and concentrate training on craft, sales, managerial, and professional/technical skills. Employer-sponsored training has been found to complement rather than

substitute for good foundation skills and to increase employees' productivity and earnings more than training in postsecondary institutions does. Employer-sponsored training also reduces job turnover, layoffs, and duration of periods of unemployment. Determining whether employers or economic sectors in a nation underinvest or overinvest in training depends on estimates of the rates of return to training; however, in the United States measurement of training costs is too poor to yield estimates of returns sufficiently narrow to serve as a basis for policy decisions. (Contains 33 references.) (MN)

This insert, which is written for adult basic education (ABE) teachers, presents practical advice on storing the written work generated by students and teachers in ABE programs. Discussed first is the value of ABE students' completed work as the following: a record of achievement that can document students' progress and motivate them to continue their programs; reference material to which students can refer when they need repetition, reminders, and reinforcement; a planning tool that can be used to appraise students' work more and thereby result in better learning plans; material for inclusion in accreditation portfolios; and a vehicle for helping students develop pride in their work and improve their self-esteem. Teacher and student roles in saving/storing work are outlined, and considerations in deciding who should assume responsibility for storing students' files are discussed. Examined in a section on file organization are the questions of how to classify students' written work and what to include in accreditation portfolios and student files. A sample student record consisting of background information about the student and a coursework file is included along with a sample numeracy skills assessment instrument. (MN)

Identifiers—*Washington

This discussion paper provides background material to four issues identified as important to study for the adult literacy effort in Washington State: goals and outcomes, priorities for service, effective practices, and roles of providers. The paper provides a starting point for decision making. First, it sets a backdrop for the attention focused on basic skills in the state. It shows that an examination of adult basic education in the state can be divided into three areas: (1) the importance of adult literacy to the global competitiveness of the state; (2) the demand for accountability, standards of program quality, and collaboration; and (3) recent findings about literacy needs, services, and student persistence. The discussion highlights four major assumptions underlying current policy and practice: definitions of literacy, the deficit model, learners' goals versus society's

goals, and literacy as the sole determinant of self-sufficiency. The paper presents these conclusions: the skills of workers, particularly those who traditionally have the lowest literacy skills, are critical to the state's economy; accountability is necessary; new adult literacy standards are needed based on the Program Quality Indicators adopted in 1992; agency cooperation is improving; learners are not staying in programs long enough to make a difference; and resources are not adequate to meet the needs. It recommends considering new guiding principles, including the following: consciously chosen and shared definitions of literacy, an orientation toward adult learners founded on strengths rather than weaknesses, incorporation of learners' goals along with society's goals, and recognition that literacy is only one of many complex and interacting factors involved in individual and social change. Identifiers—*Washington

This discussion paper endeavors to inform decision makers about the goals and outcomes for adult basic education in Washington State. It first examines the current goals operating in adult literacy programs in the state, concluding that, although there may appear to be agreement about the very general purposes of literacy education in the state, the operative goals vary widely, and the absence of agreed upon and clearly stated goals and outcomes has made collaboration around operational issues such as participant definitions, intake and placement, curriculum and assessment difficult. The paper then describes a framework and suggests the following considerations for determining goals: making goals specific, stakeholder agreement, learners' goals and motivations, statewide applicability, change requirements, purposes, and assessment of progress toward the goals. Finally, the paper proposes policy options and implications for consideration. Implications for setting the following goals are discussed: self-sufficiency, community-oriented goals, Goal 5, a National Education goal which states that "By the year 2000, every adult American will be literate and will possess the knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship," employability, and literacy skills. Various outcome measures for assessing progress toward the goals are outlined. The paper concludes that the effective redirection of policy and practice in Washington State requires that goals and outcomes for adult basic education be widely shared, measurable, broad enough to include learner aspirations but narrow enough to promote accountability, built on the strengths of a pluralistic delivery system and diverse learners, and based on consciously chosen principles rather than obsolete assumptions. Identifiers—*Washington

This discussion paper provides background information describing the service base of adult literacy education programs in Washington State and highlights local initiatives to coordinate services. Based on "The Washington State Literacy Resource Directory," the report identifies 102 local service providers of literacy services to adults. About one-third of these programs are in community or technical colleges; about half are in King County, with 11 in Pierce County. More than half the programs receive funding from the Office of Adult Literacy; about 40 programs offer individual or small group instruction exclusively by volunteers. The amount of collaboration among providers varies greatly. This description of the adult literacy education service base is followed by a brief description of the range of roles providers fulfill, such as referrals, intake and assessment, instruction, coordination of volunteer tutors, support services, case management, and job development and placement. The report then provides a list of considerations that serve as a basis for examining some options for creating an effective and efficient infrastructure for adult basic education. Options for providers include the following: (1) develop local consortia; (2) work toward different outcomes; (3) manage services to different groups; and (4) serve populations at different points on a literacy continuum. The report concludes that no options can be implemented effectively until state leadership and action is directed toward the following areas: demonstrating a commitment to collaboration among agencies at the state level; establishing policies about state goals, priorities, and practices; ensuring that shared definitions of literacy and purposes for literacy education are used; promoting collaboration by providing incentives and rewards; and allocating resources based on the roles of the various providers. Identifiers—*Washington

This policy paper lays the groundwork for policy recommendations by providing information about the level of adult literacy needs and services in Washington State. Analysis of two reports shows a gap between the population in need of literacy services and the current level of services in Washington. In this context, considerations and options for effective and equitable strategies for prioritizing the allocation of resources and services are explored. Policy considerations are as follows: equity, access, participation, state goals, long- and short-term goals, cost, and various other factors. The paper concludes that there are questions to be explored as part of the decision-making process, such as recruiting basic skills students, communicating priorities and determining participant eligibility, making targeting of priority groups consistent with long-term state and national goals, and setting priorities for service without creating inequities. Identifiers—*Washington

This discussion paper examines the current state of practice of adult literacy education in Washington State as well as initiatives to improve program effectiveness in a number of areas, including staff quality and curriculum. The paper discusses staff and curriculum development being undertaken by the ABLE (Adult Basic and Literacy Educator's) Network, and quality assurance being provided through the Office of Adult Literacy for programs funded through that office (about half the providers and 80 percent of the literacy students statewide). The range of effective practices center around the following: measuring educational gains, program planning, curriculum and instruction, staff quality, adequacy of resources, recruitment, retention, and service coordination. Six options are presented as considerations for identifying and promoting effective practices: (1) validating and disseminating promising practices; (2) preserving diversity in order to support the learning needs of all learners; (3) assessing the impact of practices on the state-level structure; (4) assessing the impact of a practice on local programs; (5) determining resources that are available or necessary to implement the option; and (6) determining if the option can be implemented in a cost-effective manner. The Washington State Indicators of Program Quality are suggested as a framework for the multiple program features that affect program quality. They serve as a basis for policy recommendations to improve the state of the art in adult basic skills programs in the state. (KC)

Descriptors—*Career Education, Careers, Course Content, *Educational Resources, *Education Work Relationship, *Entrepreneurship, Integrated Curriculum, Learning Activities, *Models, *Occupational Information, Postsecondary Education, Risk, Secondary Education, Self Employment, Small Businesses, State Curriculum Guides, Vocational Education

This curriculum guide for infusing entrepreneurship education into the vocational education curriculum is organized in seven sections. The first two sections point out the need for awareness of entrepreneurship in vocational education and suggest some approaches to infusing entrepreneurship awareness. The third section of the guide, which makes up most of its content, describes eight models for infusing entrepreneurship awareness. Lesson plans—containing an objective, materials list, teacher behaviors, and student activities—are included for the models. The models are on the following topics: future entrepreneurs conference, entrepreneurship awareness on a tight schedule, brainstorming a business, orientation to entrepreneurship, entrepreneurship opportunity awareness, overview of entrepreneurship, open for business, and risks and rewards. Content notes, basic information needed for the models, is provided in the fourth section of the guide, followed by a section listing additional ideas for infusing entrepreneurship awareness. A listing of commercial materials for infusing entrepreneurship is followed by an annotated bibliography containing 25 references. (KC)

Identifiers—*ABCs of Construction Project, *Workplace Literacy

The ABCs of Construction project was a demonstration project designed to integrate basic skills training with an industry-developed vocational-craft training program. The program was located at the central training facility of the Pelican Chapter of Associated Builders and Contractors (ABC), an organization made up of nearly 300 member companies involved in construction in southern Louisiana. During the project's 20-month grant period (March 1991-October 1992), 649 workers were screened on the reading and mathematics sections of the Test of Adult Basic Education, and 204 of them were identified to receive educational counseling comparing their reading and mathematics skills to individual training tasks identified through a literacy task analysis of their apprentice program. During three 5-month cycles, 107 workers each received 10 to 268 hours of instruction in an open-entry/open-exit classroom program. Trainee attendance averaged 44.63 hours. A total of 359 students slots were filled during the project's 7 semesters in workplace dynamics. Contact hours throughout the project totaled 2,945 hours, and the retention rate was more than 80%. Pre/postcompetency tests established that, after 50 hours of instruction, trainees' skill levels increased an average of 2.8 years in mathematics and 2.02 grades in reading. (Appendixes constituting approximately 75 percent of this document contain the following: external evaluation report, original grant abstract, classroom environment inventory, literacy task analysis, and overview of the project curriculum and original materials.) Identifiers—*ABCs of Construction Project, Workplace Literacy

Developed as part of the ABCs of Construction National Workplace Literacy Project, these instructional modules are designed to help low-level readers develop paragraph composition skills. The first module is a list of 10 topics about which students are daily to write several paragraphs related to their craft. The second module consists of 10 frames. Each frame contains a paragraph consisting of open-ended sentences along with instructions for students to complete each of the sentences and re-copy the completed paragraph into their notebooks. The paragraphs deal with the following work- and training-related topics: my job, work and school, classroom preparation, asking questions in class, classroom behavior, planning time at work and school, answering questions in class, active listening, listening to myself, and listening problems. Identifiers—*ABCs of Construction Project, Fire Extinguishers, Workplace Literacy

Developed as part of the ABCs of Construction National Workplace Literacy Project, these modules contain materials for improving listening skills that are designed to be used in conjunction with a commercial training video in a required 8-hour Occupational Safety and Health Administration safety course. The first module, which is designed to prepare students to view a video on hazard communication, contains the following: a viewing/study guide to help students identify words and ideas from the video, a word list, material on the concept of main ideas and ways in which they may be organized, fill-in-the-blank exercises on topics covered in the hazard communication video, and information/exercises dealing with drawing conclusions. Included in the second module, which contains materials designed to prepare students to view a video on portable fire extinguishers, are the following: a list of pertinent vocabulary, material on the concept of main ideas and ways in which they are organized, reading materials covering the main topics covered in the video, and a viewing/study guide to help students identify important words and ideas from the video. Identifiers—*ABCs of Construction Project, Following Directions, Millwrights, Pipe Fitters, *Sequencing Skills, Workplace Literacy

Developed as part of the ABCs of Construction National Workplace Literacy Project, this instructional module contains instructional materials designed to help students understand the concept of sequencing and develop basic sequencing skills. The module begins with a unit in which instructional materials dealing with the construction industry are used to teach the importance of sequencing skills. Presented next are three sections of exercises containing reading materials specific to one of the following occupations/occupational clusters: electrical and instrumentation, pipefitting, and millwright. Each section contains five exercises in which students are presented with a story or some job-related procedure and are then asked either to answer a series of questions about the sequencing involved in the story/procedure or to select the best sequencing sequence from a series of sequencing options. Also included are answer keys for each of the three sections of exercises. (MN)

Identifiers—*ABCs of Construction Project, *Compound Words, Workplace Literacy

Developed as part of the ABCs of Construction National Workplace Literacy Project, this instructional module is designed to help persons in electrical and instrumentation occupations develop strategies for finding the meanings of compound words used in technical writing and the workplace. Presented in the first section is a method for deducing the meaning of compound words by performing the following steps: reading the compound word and finding the two smaller words within it, finding the meaning of the first word, finding the meaning of the second word, and putting the two meanings together. The remainder of the module consists of six exercises in which students are asked to use the four-step procedure to determine the meaning of a total of nine words encountered in the workplace. Each of the nine words is introduced in a brief paragraph on a topic related to some electrical and instrumentation occupation. Each paragraph is followed by a series of questions that guide students through the four-step procedure. (MN)

Identifiers—*ABCs of Construction Project, *Millwrights, Workplace Literacy

Developed by the ABCs of Construction National Workplace Literacy Project, these curriculum materials for the occupational area of millwright contain a lesson that deals with reading diagrams. The lesson consists of an objective, instruction, and 10 exercises. Three types of problems are provided in each exercise: "try it," "apply it," and "go with it." The objective for the lesson is for the student to learn to locate and apply information from a diagram. (YLB)

Identifiers—*ABCs of Construction Project, *Millwrights, *Word Attack Skills, Workplace Literacy

Developed as part of the ABCs of Construction National Workplace Literacy Project, this instructional module teaches word attack skills for use in understanding technical terms encountered by persons employed in the occupation of millwright. The following topics are covered: the principles of structural analysis, word parts and their use in determining the meanings of words, the limitations of structural analysis, and steps in using structural analysis. Included in the module are 26 exercises in which students are required to use word attack skills/structural analysis to determine the meanings of technical terms used in materials read by persons employed as millwrights. Identifiers—*ABCs of Construction Project, *Compound Words, *Millwrights, Workplace Literacy
Developed as part of the ABCs of Construction National Workplace Literacy Project, this instructional module is designed to help persons preparing for the occupation of millwright develop strategies for finding the meanings of compound words used in technical writing and the workplace. Presented in the first section is a method for deducing the meaning of compound words by performing the following steps: reading the compound word and finding the two smaller words within it, finding the meaning of the first word, finding the meaning of the second word, and putting the two meanings together. The remainder of the module consists of four exercises in which students are asked to use the four-step procedure to determine the meaning of a total of seven words encountered in the workplace. Each of the nine words is introduced in a brief paragraph on a topic related to some electrical and instrumentation occupation. Each paragraph is followed by a series of questions that guide students through the four-step procedure. (MN)

Identifiers—*ABCs of Construction Project, *Pipe Fitters, Workplace Literacy

Developed as part of the ABCs of Construction National Workplace Literacy Project, this instructional module is designed to help individuals employed as pipefitters learn to solve problems with charts and tables. Outlined in the first section is a five-step procedure for solving problems involving tables and/or charts: identifying the question to be answered, deciding which operations to use, determining the information needed from the chart, plugging the information into the selected operations, and working the problem. The remainder of the module consists of seven sections that each begin

with a table/chart and 10 problems based on the information contained in it. The problems are related to the following pipe fitting-related tasks/topics: stacking and determining pipe diameters, rated capacities for slings, pipe wall thicknesses, and required sizes of concrete pipe and ductile iron pipe. Identifiers—*ABCs of Construction Project, *Pipe Fitters, Workplace Literacy. Developed by the ABCs of Construction National Workplace Literacy Project, these seven worksheets are designed to enhance the basic skills of pipefitters. Reading and Solving Basic Pipefitting Problems #1 defines and uses eight basic terms pipefitters need to know, reviews steps a pipefitter must take to identify and solve a simple pipefitting problem, and includes simple problems to find "take out" and welder's gaps. Reading and Solving Basic Pipefitting Problems #2 reviews seven basic terms pipefitters need to know, uses each term while solving 45 pipefitting problems, introduces a five-step method to solve pipefitting problems, and provides practice exercises. Practicing Problem Solving for Pipefitters uses pipes velcroed onto a wall to practice real pipefitter problems, using the five-step method. Exercises are designed to help the worker transfer the method to handling a real-world pipefitting problem. Basic Vocabulary for Pipefitters de-

picts and explains 11 terms and has a fill-in-the-blanks exercise. Basic Trig for Pipefitters explains right angles, teaches the worker how to "see" one in pipe elbows, reviews what the sides of a triangle are called, practices how to see them in a pipe elbow, shows the worker how to use a trigonometry chart to find tangents, and includes practice exercises. Reading and Solving Pipefitter Take Out Problems shows what a "take out" is, provides exercises on finding one, shows how to read "The Pipefitters Blue Book" to find tangents, and provides practice exercises. Reading and Solving Basic Pipefitting Problems #3 introduces four steps to solve simple offset problems when the elbows are not 45 or 90 degrees and provides simple offset examples and problems. Identifiers—*Great Britain. In the 1960s, most individuals engaged in adult education in Great Britain were romantics in the sense that they considered the impetus of the field to be not just to remedy deficits, make up for inadequate educational resources in the broader society, or meet new needs but also to make learning part of the process of social change itself. Self-selection was advocated as the only student selection criterion, and the number of social and recreational courses provided increased significantly. In January 1970, the British government's Inspectorate held a retreat devoted to critical analysis of the knowledge, insights, and competencies expected of professional adult educators. Such critical analysis marked a break with the liberal romantic tradition. The mid-70s also marked the beginning of a change in attitudes toward adult education that eventually evolved into a "modernist" philosophy/policy endorsing formal, work-related, instrumental opportunities at the expense of broader educational opportunities. An adult education system in which lifelong learning is incorporated into a broad educational system that is considered the focal point of individual and social development leading to a "truly learning society" has been proposed as an alternative to the narrowly concentrated adult education now supported and encouraged by the British government. Identifiers—Congress 103rd, *Job Opportunities and Basic Skills Program

This document records the oral and written testimony of persons who testified before or prepared

reports for a Congressional hearing on the usefulness of the JOBS (Job Opportunities and Basic Skills Program). Witnesses included persons who had participated in the programs as well as state and local administrators of JOBS programs, national organizations, and Congressional representatives. Testimony showed that the JOBS program had produced some useful results in training and placing people in jobs. Witnesses stressed that such efforts were successful only when they provided child care and job placement, especially if attention was paid to the types of jobs in which people were placed. Witnesses stressed the importance of the Earned Income Tax Credit and the need to pass some type of health care legislation for the working poor so that they are better off working than being on welfare. Problems with the JOBS program included the following: lack of money, resulting in long waiting lists; emphasis on participation rather than on outcomes; and lack of good jobs available for people who were trained. Identifiers—*Welfare to Work Programs

Research on the results of welfare-to-work programs is both encouraging and sobering. On the one hand, it provides evidence that states can effectively implement various work-oriented programs to encourage large percentages of the welfare caseload to prepare for and enter the labor market. These programs range from rather low-intensity programs aimed at moving recipients into jobs as quickly as possible, to more complex and intensive programs that may include assessment, counseling, and case management as well as education, training, and support services. A number of highly successful programs place a heavy emphasis on employment while providing an integrated set of education, training, and support services. On the other hand, research suggests it is difficult to achieve the multiple objectives established for welfare-to-work programs. None have been able to lift participants out of poverty. A strategy that is successful in increasing the employment and earnings of welfare recipients may not be successful in reducing welfare dependency or achieving cost savings to the government. Strategies aimed at promoting responsible behavior among teenage recipients of Aid to Families with Dependent Children have met with limited success. Continued research on states' programmatic initiatives and structural reforms will provide additional guidance to inform welfare policy and program implementation. (Appendices include highlights of major research studies on welfare-to-work programs, and seven endnotes. Contains 21 references. (YLB))

Descriptors—Adult Education, *Dislocated Workers, *Employment Practices, Federal Legislation, *Job Layoff, *Labor Legislation, Public Policy, *Retraining, *Vocational Adjustment, Vocational Education

Identifiers—Congress 103rd, *Worker Adjustment and Retraining Notification Act

In February 1993, a General Accounting Office (GAO) representative testified before a U.S. Senate subcommittee regarding implementation of the Worker Readjustment and Retraining Notification Act (WARN), which requires that certain employers give their workers and state/local governments 60 days' notice of impending plant closures or layoffs. The testimony indicated that, according to an 11-state GAO analysis, more than half of employers employing more than 100 persons and planning layoffs of 50 individuals or more were not even required by WARN to provide advance notices. Even when closures/layoffs did appear to meet WARN requirements, fewer than half of the employers provided advance notice, and only 29% of employers providing notification gave the required 60 days' notice. Of those employers who did give advance notification of closures/layoffs, about 47% believed that advance notice helped their workers find new jobs sooner, 61% reported that advance notification cost less than \$500, and 29% reported productivity declines after issuing advance notification. Lawsuits are the only enforcement tool presently available to workers/local communities under WARN, and few have been filed. It was therefore recommended that Congress consider granting the Department of Labor responsibility and authority to enforce WARN. (A WARN decision matrix is appended.) (MN)

This report, which was written during a project to develop a better understanding of which occupations may relate to agribusiness and to identify employment opportunities in agribusiness, is designed to assist state occupational information coordinating committees and state employment security agencies in developing special reports/lists of agribusiness occupations for use by agricultural education programs. Section 1 is an introduction that provides a brief historical overview of efforts to develop agribusiness-related employment estimates. It includes a review of selected government efforts related to identifying agribusiness-related employment opportunities. Included in the profile of each of the nine agencies reviewed are some or all of the following: description of the agency's activities, its current status, its relationship to agribusiness, and its pertinent publications. Section 2 presents two lists of occupations related to agribusiness competencies and a description of the procedure used to develop them. Included in section 3 are the following support and background materials: list of agribusiness occupational workshop participants, 13-item resource materials list, decision process matrix, summary reports of 12-state agribusiness occupational review and state review meetings, list of meeting participants, and comments/recommendations from the state review meetings. Identifiers—*Military Installation Voluntary Education Review

The Military Installation Voluntary Education Review (MIVER) Project has two purposes: to assess the quality of selected on-base voluntary education programs and to assist in the improvement of such education through appropriate recommendations to institutions, installations, and the military services. MIVER site team members assessed the quality of the voluntary education at 24 installations. They used the "MIVER Model" to review the installation needs assessment, education planning, and implementation process as well as facilities, resources, leadership, climate for learning, and communications that foster effective working relationships among both installation and institutional education personnel. One of the reasons that the MIVER process works so well is the design of the site team assignment structure. Team members have multiple assignments. Horizontal, vertical, and functional involvement provide opportunities for most of them to have a minimum of three assignments. The MIVER staff and governing board have pulled together key "principles" in 12 areas for installations and 10 areas for institutions using the common threads of excellence and concerns in military education observed by MIVER teams among the services over the past 3 years. (Two summaries outline installation and institution commendations and concerns that are examples of MIVER team findings. Names and addresses of contacts are provided.) (YLB)

Identifiers—*Military Installation Voluntary Education Review

This volume was developed with a concern for maintaining both quality and access to education for military servicemembers participating in voluntary education programs. The principles have the following objectives: to define the parameters of excellence; to dispel misunderstandings about the purpose, legitimacy, and worth of voluntary education programs conducted on U.S. military installations; to stimulate dialogue on how to strengthen and improve the quality of these programs and services; and to help the programs evolve as part of the mainstream of adult and higher education. An overview provides a summary of each of the 12 principles. Each principle is then presented in this format: summary, rationale, and listing of subprinciples. The principles cover the following topics: mission statement; command support; personnel; needs assessment; education program planning; education program acquisition; program administration; student services; instructional resources; physical resources; financial resources; and student assessment and program evaluation. Identifiers—*Military Installation Voluntary Education Review

This volume was developed with a concern for maintaining both quality and access to education for military servicemembers participating in voluntary education programs. Ten principles offer guidelines for academic instruction providing education programs on military installations. The principles have the following objectives: to define the parameters of excellence; to dispel misunderstandings about the purpose, legitimacy, and worth of voluntary education programs conducted on U.S. military installations; to stimulate dialogue on how to strengthen and improve the quality of these programs and services; and to help programs evolve as part of the mainstream of adult and higher education. An overview provides a summary of each of the 10 principles. Each principle is then presented in this format: summary, rationale, and listing of subprinciples. The principles cover the following topics: mission statement; education program; personnel; program administration; student services; instructional resources; physical resources; financial resources; student assessment; and program evaluation. Three appendices contain the following: the Servicemembers Opportunity Colleges Principles and Criteria, 1995-1997; Statement on Awarding Credit for Extracurricular Learning; and Joint Statement on Transfer and Award of Academic Credit. Identifiers—*Asia Pacific Region, Bhutan, Thailand, Vietnam

This publication provides the final report of a planning meeting to discuss literacy programs of the Asia/Pacific Cultural Center for UNESCO (APCCU) to be carried out under regional cooperation and other materials from the meeting. The final report describes the purpose of the meeting and summarizes these presentations: opening addresses, reports, presentation and evaluation of newly produced Asian/Pacific Joint Production (AJP) Program of Materials for Neo-Literates in Rural Areas materials, suggestions for improvements and adoption of new draft AJP materials, draft plans for personnel training programs, other programs, future plans of APCCU's literacy programs, and closing addresses. An appendix contains the text of these presentations: "Learning Society: A Myth or a Reality" (Sakya); "APCCU's Regional Cooperative Literacy Programs in Asia and the Pacific: Literacy Materials Development and Personnel Training" (Miyamoto); "Bhutan" (country report by Wangdi); "Thailand" (country report by Kaewsaiah); "Vietnam" (country report by Thang); New Drafts for AJP Materials; Draft Plan of 11th Regional Workshop on the Preparation of Literacy Follow-up Materials in Rural Areas; Draft Plan on the Ninth Sending of an International Mobile Team of Experts on Neo-Literate Materials to the National Workshop in Bhutan; Draft Plan on the Second Sub-Regional Workshop on the Development of Basic Literacy Reading Materials for Adults in Asia and the Pacific; and Draft Prospectus of 1993 Dissemination Scheme of National Versions of AJP Materials; Draft Prospectus of Fourth ACCU Prizes for Fully Illustrated Literacy Follow-up Materials. Appendices include the schedule, list of participants, agenda, general information, and opening speeches by Sakya and Misumi. (YLB)

This final report contains the proceedings and other materials from a workshop to provide training experience in literacy follow-up materials development to participants from UNESCO member states in the Asia and Pacific region. Focus is on practical agricultural training for adults. The proceedings discuss the objectives of the workshop and summarize the following: opening addresses, orientation to the workshop, paper presentations and discussions, group work, planning of national follow-up activities, and closing. Recommendations of the workshop are listed. Chapter I consists of six presentations: "Horticulture and Animal Raising in Vietnam: Problems and Needs" (Tuyen); "Training in Vocational Agriculture: Experiences of the Department of Non-Formal Education, Thailand" (Choomnook); "Development and Production of Literacy Follow-up Materials in the Field of Agricultural Vocational Training" (Hoang); "How To Develop Effective and Attractive Literacy Follow-up Materials" (Sharma); "UNESCO Report: Education for Human Development" (Sakya); and "ACCU Report: ACCU's Regional Cooperative Literacy Programs in Asia and the Pacific—Literacy Materials Development and Personnel Training." Chapter II reports on the field survey, development, and field testing of materials by three groups during the workshop. The three group reports are provided. Chapter III contains the reports of 18 countries (Afghanistan, Bangladesh, Bhutan, Cambodia, China, India, Indonesia, Iran, Laos, Malaysia, Maldives, Mongolia, Nepal, Pakistan, Papua New Guinea, Philippines, Thailand, and Vietnam) and plans of follow-up activities for nine (Afghanistan, China, Indonesia, Maldives, Mongolia, Papua New Guinea, Philippines, Thailand, and Vietnam). An appendix provides general information, schedule of the workshop, list of participants, and opening speeches by Dao, Sakya, and Miyamoto. (YLB)

Identifiers—Linkage, *Ohio

"For the Common Good" was designed as a statewide project to facilitate the formation of local interagency linkage teams throughout Ohio to improve services to at-risk youth and adults. The state team conducted three workshops during which 36 local

interagency linkage teams were trained. A major portion of each workshop was set aside for development of an action plan. Three follow-up meetings provided support and technical assistance and an opportunity for teams to update their action plans. Findings of two local linkage team follow-up surveys indicated teams used a variety of organizational strategies to help them function, the most frequent being information exchange. Forty-one percent characterized the nature of their linkage teams as collaborative; 30 percent indicated it was cooperative; and 30 percent characterized them as both. Sixty-two percent said the accomplishments would not have been possible without the team. Results of a state team survey showed that respondents felt a block of time to develop a plan was the most important aspect of the workshops and follow-up meetings. They did not necessarily characterize the nature of the work of the local linkage teams as collaborative. A number of recommendations were made: workshops to train additional teams; additional follow-up activities for existing teams; a mentoring program matching experienced with newly formed teams; and shared information. (Appendixes include linkage team action plan objectives; response tabulations for surveys; and list of reported team accomplishments.) (YLB)

Identifiers—Indiana, *Secretaries Comm on Achieving Necessary Skills, *Tech Prep

This document contains 50 applications-based lessons developed during the 1993-94 school year as part of the Indiana Region 10 Tech Prep Project. The lessons were developed by 91 secondary and postsecondary educators and are modeled around the SCANS (Secretary's Commission on Achieving Necessary Skills) competencies. The applications-based lessons attempt to bridge the gap between school and work and are designed to encourage students to develop specific content skills in English, math, science, business, and industrial technology while getting better at managing resources, working with others, dealing with information, understanding systems, and using technology. The lessons are built around long- and short-term projects. The format includes a description of the project, activities that take place in each of the SCANS competency areas, a timeline and materials list, and content competencies of which students can demonstrate mastery during the project. Some of the project topics include the following: calculating interest on investments, designing a school lunch menu, school attendance (statistics), broadcast news, creating a business, autobiographies, finding a job, creating booklets on computers, creating a videotape, student store, money management, and payroll and taxes. This publication consists of 14 selected papers prepared for an international workshop on the problems and relationship between producing vocational competencies for skilled-worker level occupations and controlling and certifying these competencies. Part I outlines the production life and labor market contexts of vocational training and certification and discusses some problems of education/employment match in an age of recession and demands for occupational flexibility. The two papers in part I are as follows: "Working Life Background of Occupations and Certification of Vocational Competence" (Mäkinen) and "Society, Education, and Vocational Competencies: Towards Flexible Society of Continuous Adult Education" (Rinne, Kivinen). Part II contains descriptions and analyses of the present status and developments of the vocational training and certification systems in Finland, Germany, the Netherlands, England and Wales, Scotland, and the United States. The seven papers are: "Producing and Certifying Vocational Competence in Finland at Present and in the Future" (Melametsa); "Defining and Producing Vocational Competence—The UK Experience" (Handley); "Vocational Education and Training in Scotland" (Seddon); "Qualification, Competence, and Certification in the Modular Vocational Education in the Netherlands" (Streumer); "Some Essentials of the Dual System of Vocational Training in Germany" (Reisse); "The German System of Assessment and Certification in Vocational Training" (Reisse); and "Certification of Occupational Skills and Standards: The United States Perspective" (Bunn). In Part III, some general and occupation-specific problems of competence-based examinations and certification of vocational qualifications are discussed in four papers: "Function and Dysfunction of the Certification System: Closed or Open Structures" (Volanen); "Problems of Certification and Examinations in Different Occupations" (Taalas); "Problems of Certification in Some 'Soft' Occupations" (Niikko); and "The Corporate Classroom: Is There a Possibility of Increasing In-service Education in the Sectors of Retail Industry, the Hotel Business, and Catering?" (Puurula). Part IV contains some concluding remarks in Finnish on the topics of the workshop. (YLB)

Strengthening the Links: Education and the Private Sector.

Montana State Council and Vocational Education, Helena.

Pub Date—Nov 93

Note—22p.

Pub Type—Information Analyses (070) — Reports — Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Educational Attitudes, *Educational Needs, *Employer Attitudes, Postsecondary Education, *Program Improvement, Secondary Education, Statewide Planning, Technical Education, *Vocational Education

Identifiers—*Montana

The Montana Council on Vocational Education conducted a business and industry survey in February 1993 to recommend initiatives and methods the private sector could undertake to assist in the modernization of vocational education programs. A representative sample of the various types and sizes of Montana businesses were selected. Surveys were mailed to the following: chambers of commerce and Job Service Offices (n=17, 41 percent return); vocational-technical administrators, students, and others involved with education in Montana (n=83, 61 percent return); and business, industry, and labor (n=300, 18 percent return). Survey respondents noted that vocational-technical education programs are stereotyped as less desirable paths to careers. In view of this respondents thought that this image should be dispelled, because vocational-technical education can actually lead to rewarding careers. Respondents agreed that those employers who use vocational-technical programs to find employees are well satisfied, but that many employers do not consider using this source for new employees. Survey respondents frequently mentioned the need for marketing vocational education programs. All of Montana's postsecondary vocational-technical programs offer job training for businesses, but only 14 percent of businesses use the system for retraining

their employees. Employers liked vocational student organizations for their leadership-training roles. Employers were willing to engage in education/business partnerships and to donate equipment. The tech prep initiative recently implemented in the state is valued by business respondents. Recommendations included the following: increasing communication about the vocational education program, providing real-world work experience for vocational students, changing the curriculum to meet current needs, and marketing vocational-technical education. Descriptors—Comparative Analysis, *Comparative Education, Developed Nations, Foreign Countries, Job Skills, *Job Training, Labor Market, Postsecondary Education, Program Effectiveness, *Program Evaluation, Secondary Education, *Vocational Education

Identifiers—Canada, France, Germany, Italy, Japan, United Kingdom, United States

This report examines data and data quality on vocational education and training available from the seven highly developed countries that make up the G-7: Canada, France, Germany, Japan, Italy, the United Kingdom, and the United States. Following an introduction, chapter 2 describes the nature of vocational education and training opportunities at the upper secondary level and beyond in each country, emphasizing programs that fall under the jurisdictions of education ministries. One-page descriptions of the vocational education systems in each country are followed by extensive narratives for each vocational education system that focus on these areas: school-based vocational preparation and training, what the vocational system looked like during the most recent year for which data are available, and the most common ways of obtaining vocational skills. Chapter 3 describes the following: international comparisons of data on vocational education; contextual and programmatic differences; key indicators that one would want to compare across vocational systems; data that international organizations have compiled regarding these indicators; degree to which these key comparisons can be made using existing data; and data improvements necessary to prepare all these key indicators. Appendixes include the following: a description of surveys and studies in each G-7 country that contain information pertinent to assessments of vocational education and training programs, and a vocational education data information sources contact list. Contains 118 references. (YLB)

This 11-page report describes a project wherein a Carl D. Perkins Vocational and Applied Technology Program Improvement Grant was used to develop a curricular bridge between the academic

English-as-a-Second-Language (ESL) area and the vocational-technical business/office systems area of Austin Community College (ACC). The following project activities are discussed: selecting an English-for-special-purposes (ESP) model; publicizing the ESP project within ACC; selecting content courses, content area instructors, and ESP/business advisory committee members; developing ESP course materials; and networking with other community colleges in Texas. Appendixes/exhibits, constituting approximately 80% of this document, include the following: summary of the implications and distinguishing features of the theme-based, sheltered, and adjunct curriculum models; project-related correspondence; project description; study, reading, and writing skills objectives of the two ESP courses developed; diagram outlining the support, transition, and self-sufficiency phases of academic proficiency; project advisory committee (AC) membership list and minutes/agendas of AC meetings; guidelines for ESP course content selection; college skills inventory; activities for language adjunct courses; course descriptions; evaluation issues; project members' resumes; and report on ESL/ESP programs at El Paso Community College. Identifiers—Carl D Perkins Voc and Appl Techn Educ Act 1990, *Texas

A study evaluated previously funded vocational/applied technology programs to provide marketable skills to single parents, displaced homemakers, and single pregnant women throughout Texas. Program assessment questionnaires were sent to the program directors, administrators, high school principals, counselors, and program advisory committee members associated with programs for the target population in 78 Texas public school districts. Questionnaires were completed and returned by 48 (61.5%) of the projects. More than 90% of the program directors felt that they had implemented 33 of the 36 required program characteristics, and more than 84% of the respondents' programs had implemented all 36 required program characteristics. Among the main findings regarding program demographics were the following: 1,885 (98%) of the 1,927 individuals identified as needing a program were being served, 271 program completers received job placement services, 22% of program leavers were currently employed, and 31% were on welfare. Also during the project, a model was developed that school systems can replicate/adopt to evaluate the degree and quality of marketable skill attainment, educational excellence, and equity of programs/activities. (Ten tables are included. Appendixes constituting approximately 60% of this report contain the following: results of the Delphi analysis, survey instruments, project-developed program evaluation model, and third-party evaluation report.) Descriptors—Administrator Attitudes, *Career Education, Consortia, Counselor Attitudes, Demography, High Schools, Instructor Coordinators, *Models, Principals, *Program Effectiveness, Program Evaluation, *Public Schools, Questionnaires, *Sex Fairness, Special Needs Students, State Surveys, Statewide Planning, *Technology Education, Vocational Directors
Identifiers—Carl D Perkins Voc and Appl Techn Educ Act 1990, *Texas

A study examined the extent to which Texas vocational/applied technology programs and statewide and regional services and activities designed to eliminate sex bias and stereotyping are meeting students' needs. Questionnaires were sent to the directors/coordinators of 21 funded sex equity programs, administrators of career and technology education programs of 117 public secondary schools, and directors of Texas' 8 vocational consortia. Usable responses were received from 18 (88%) sex equity programs, 17 (14.5%) school districts, and all 8 vocational consortia. It was discovered that all of the required gender equity program characteristics were being implemented by more than 50% of the funded projects and responding secondary schools. It was concluded that, although progress is being made in eliminating sex bias and stereotyping in secondary career and applied technology programs and in increasing student enrollments in nontraditional programs, Texas' current system for reporting gender equity-related data remains inadequate. A model was developed for Texas' school systems to use in evaluating the extent and quality of programs/activities to eliminate sex bias and stereotyping. (Twelve tables are included. Appendixes constituting approximately 50% of this report contain the following: Delphi questionnaires, survey instruments, lists of responding program directors and school districts, and project evaluation report.) This guide presents ideas and methods for vocational educators to use in informing students about future trends and needs for equity in the work force. The following topics are discussed: (1) the persistent equity challenge and the changing labor force; (2) the awareness process (traditional attitudes, effects of gender bias, and change agents/strategies); (3) planning (understanding legislative intent; needs assessment; suggestions for administrators, counselors, and instructors; identification of areas of desired impact; and coordination with contracted equity specialists); (4) career development (gender-fair counselors; resources; career assessment; and instructor, administrator, and coordinator roles); (5) strategies for improving sex equity in vocational-technical programs (counselors, curriculum development, strategies, and activities); (6) resources (agencies, contacts, regional education service center equity coordinators, articles and periodicals, books/pamphlets, films, videos, and other supplies); and (7) joint planning (discrimination, coordination with tech prep consortia, barriers to coordination, factors facilitating coordination and linkage, the planning process, and joint planning advantages for educational institutions). A total of 175 references are listed in bibliographies throughout the guide. Appended are the following: glossary, 11 learning activities/practices for gender equity submitted by participants in a 1993 workshop on gender equity, and 5 group-developed gender equity

activities developed during the workshop. (MN)

Descriptors—Adult Basic Education, *Allied Health Occupations Education, Behavioral Objectives, Check Lists, Curriculum Development, Guidelines, Hospital Personnel, Individualized Instruction, Inservice Teacher Education, *Literacy Education, *Partnerships in Education, Port-

folios (Background Materials), *Program Development, *Program Effectiveness, *Psychiatric Aides, Records (Forms), Student Evaluation, Teaching Methods, Tutorial Programs, Unions
Identifiers—New York (New York), *Workplace Literacy

This report documents the Workplace Literacy for Psychiatric Health Care Workers project, a partnership between a labor union and the City University of New York through which workplace literacy instruction was provided to mental hygiene therapy aides (MHTAs) employed in five state-operated psychiatric hospitals in New York City. Among the project's major outcomes and accomplishments were the following: conduct of a literacy task analysis, development of a 48-unit (96-instructional hour) curriculum based on the use of tutors' individualized educational plans, and development of four assessment instruments. Appendixes constituting approximately two-thirds of this document contain the following: basic principles underlying the program's implementation, lists of instructional topics and learning objectives, information about the literacy task analysis' purposes/methods, and various project-related correspondence and forms. Also included is the external formative evaluation that found the project to be a model worker education program that addresses the educational needs of MHTAs both as a homogeneous student population having common characteristics and needs and as a student population characterized by diversity of educational and cultural backgrounds and learning styles and goals. Vocational Education in Secondary Schools. A Review of the Literature.

Spons Agency—Curriculum Corp., Carlton (Australia).

Pub Date—Dec 93

Note—43p; A report prepared for the Curriculum Corporation.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Annotated Bibliographies, Educational Needs, *Educational Policy, *Educational Practices, Educational Research, *Educational Trends, Equal Education, Foreign Countries, High Schools, Literature Reviews, *Models, *Vocational Education

Identifiers—*Australia

The literature on vocational education (VE) in secondary schools was reviewed. The main conclusion of the review of international and Australian policy trends and directions in VE was that, to date, Australian attempts to create a more vocationally relevant curriculum have resulted in a system in which the academic curriculum has remained central and vocational options are offered in only a piecemeal manner. It was therefore recommended that policymakers decide whether to pursue VE as a new and inclusive component of the secondary school curriculum or to retain vocational options for less able students. It was further recommended that policymakers consider the following issues when deciding secondary VE's future: equity, certification, supply side economics, the relationship between general education and VE, school-workplace links, the value of part-time work experience to secondary school students, and differentiation of the levels of VE. A model for VE in Australian schools was proposed that outlined the goals, features, benefits, and limitations of VE for students during childhood, adolescence, young adulthood, and adulthood. Implications of the literature review for the following areas of school-level practice were identified: coordination, curriculum, assessment, professional development, students, resources, and evaluation. (A 120-item annotated bibliography is included.) (MN)

Descriptors—Academic Education, Administrator Attitudes, *Articulation (Education), Consortia, Coordinators, Educational Needs, Educational Policy, *Educational Trends, *Integrated Curriculum, National Surveys, Outcomes of Education, Postsecondary Education, *Program Implementation, Program Improvement, Questionnaires, Secondary Education, *Vocational Education Identifiers—*Tech Prep

A study examined tech prep (TP) implementation in the United States. Questionnaires were mailed to a geographically representative sample of 473 of the 855 local TP coordinators identified. Completed questionnaires were returned by 84% of the coordinators surveyed. The study established that as many as 50% of the nation's high schools are participating in a local TP consortium. Coordinators rated student outcomes in 15 of 17 categories as "high" or "very high." Educators, parents, students, and employers were found to be highly supportive of TP, and nearly all consortia had conducted professional development activities for secondary/postsecondary personnel. Lingering challenges facing TP included the following: resource constraints, TP's broad and conflicting goals, and low degrees of implementation of the work-based learning and apprenticeship components of TP programs. Recommendations included calls for increased funding of TP and expansion of the scope/focus of TP beyond the 2+2 concept to include change agents at the elementary, middle school, college, and university levels. (Fifteen tables and 54 references are included. Appended are a table summarizing the survey population, sample, and response rate by state and aggregated responses to the local TP implementation survey.) (MN)

Descriptors—Cognitive Tests, Guidelines, *Leadership, Leadership Qualities, Leadership Styles, *Psychometrics, Records (Forms), Tables (Data), Testing, Test Reliability, Test Validity, *Vocational Education

Identifiers—*Leader Attributes Inventory

This manual, which is designed to assist potential users of the Leader Attributes Inventory (LAI) and individuals studying leadership and its measurement, presents the rationale and psychometric characteristics of the LAI and guidelines for using it. Described in chapter 1 are the context in which the LAI was developed and the conceptualization of leadership that forms its foundation. Chapter 2 explains how the LAI is used. Presented in chapter 3 are the developmental history of the LAI and the measures of its reliability and validity. The process used to establish norm groups and standards for the LAI are outlined in chapter 4. Fourteen tables/figures and 69 references are included. Appended are the following: an LAI rating-by-observer form; information on the development of the Leadership Effectiveness Index (LEI), which provides a criterion used to estimate the LAI's validity; a copy of the LEI; a sample individualized feedback report; 38 tables converting LAI raw scores to normalized t-scores with standard errors of measurement (SEM); a table converting normalized LEI scores to normalized t-scores with SEM; and formulas for predicting leadership performance from the average score of all LAI attributes. Job Satisfaction of Nurse Educators in a Collaborative Baccalaureate Nursing Program in Western Canada.

Pub Date—94

Note—200p.; Master of Education Thesis, University of Manitoba.

Pub Type—Dissertations/Theses - Masters Theses (042) — Tests/Questionnaires (160)

EDRS Price - MF01/PC06 Plus Postage.

Descriptors—Bachelors Degrees, *Cooperative Programs, Coordination, Developed Nations, Educational Cooperation, Educational Research, Education Work Relationship, Foreign Countries, Higher Education, Institutional Cooperation, *Job Satisfaction, *Nursing Education, *Teacher Attitudes, Teaching Conditions, *Teaching Hospitals, Universities

Identifiers—*Manitoba, *Nurse Educators

A study identified the factors that influenced the job satisfaction of nurse educators involved in a change to a collaborative baccalaureate nursing program in the province of Manitoba, Canada. The total population of nurse educators from both hospital-based and university-based institutions (n=42) was surveyed. Data were collected using an investigator-designed questionnaire and the Work Environment Scale. Descriptive statistics were used to present the characteristics and associations; independent t-tests measured the differences between group means. Educators in the collaborative baccalaureate nursing program in Manitoba had a positive perception of the organizational climate and identified an increased level of job satisfaction. Respondents expressed concerns about equity between groups in relation to workload, employment benefits, role expectations, and power in decision making. Hospital-based faculty stressed job security, and university-based faculty emphasized a desire for improved peer relationships and supportive leadership. Improving communication mechanisms was identified as a way to expedite joint planning, foster understanding and respect, and enhance perceptions of equity. Recommendations based on the results were made for nursing leaders, political and postsecondary leaders, and health and education researchers. (Appendixes include 126 references, instruments, and correspondence.) (YLB)

Descriptors—Adult Basic Education, *Educational Practices, *Educational Principles, *Family Programs, *Intergenerational Programs, *Literacy Education, Literature Reviews, *Program Development, Research Projects

Identifiers—*Family Literacy

The prevailing issues in the development of family literacy were reviewed, and assumptions about families, family support, and learning upon which the concept is being developed were examined. A total of 173 studies on the following topics were reviewed: parent-child relationships and reading, parent-child early reading, parent/family beliefs and socialization, family and intergenerational literacy, family-school relationships, family and parent education, and contextual/cultural issues. It was concluded that researchers concerned with the conceptual considerations in developing a framework for the family literacy field focus their attention on the following questions: (1) what constitutes literacy support to families with varied cultural, social, and political histories and (2) how is the concept of family support defined and interpreted by literacy specialists with vastly different notions about the purposes of literacy within families and about who decides what those purposes should be. It was recommended that family literacy learning be conceptualized as a lifelong activity that revolves around the family unit and that integrates cultural, ethnic, and social contexts for learning and principles of intergenerational learning into all instruction and planning activities. (The bibliography lists 116 references. Appended is a table summarizing the seven literature categories reviewed.) (MN)

Descriptors—Adult Basic Education, *Adult Literacy, Beginning Reading, Intelligence, *Learning Processes, *Literacy Education, Literature Reviews, *Reading Skills, *Skill Development, *Transfer of Training

A literature review was conducted to determine the nature and extent of the transfer of literacy learned in one situation to other situations and to identify ways of facilitating literacy transfer. The literature review focused on studies and analyses dealing with three areas: the definition and scope of intelligence, differences between experts and novices, and transfer theory development. Literacy ability was found to transfer to a very limited degree. The basic, automatic, and internalized aspects of reading, including moving eyes over a page and recognizing letter-sound relationships and very basic vocabulary, are most easily transferred. Transfer of mindful strategies (for example, summarizing, problem solving, studying, writing for multiple audiences, and editing) did not appear as automatic as transfer of the internalized aspects of reading did. Transfer of mindful strategies was, however, possible in cases involving transfer to tasks very similar to the original task mastered. In view of the limited nature of literacy transfer, it was recommended that educators place additional emphasis on the degree to which education helps learners change their literacy perceptions and lifestyles along with their current skills. Descriptors—*Cognitive Psychology, Emotional Response, Human Factors Engineering, *Learning Theories, *Motivation, *Performance Factors, Psychological Patterns, *Psychological Studies, Self Esteem, *Training

This book is the third report of the Committee on Techniques for the Enhancement of Human Performance. Based on hundreds of research studies of learning and human performance as reported in the literature, the book consists of 11 chapters organized in five parts. The two chapters of the first part provide the background and summary of the committee's study. The first chapter describes the topics undertaken in this third phase of the study and the relationships between these topics and earlier work done by the committee. Chapter 2 summarizes key findings and conclusions for each chapter. The second part of the book considers a number of issues related to individual training. Chapter 3 focuses on the extent to which training should be provided in a situation similar to which performance occurs; chapter 4 addresses the illusions of comprehension that occur when people do not understand the reasons for the "right" answers to problems. The three chapters of part 3 consider learning and performing in teams. In chapter 5, research on cooperative learning, especially for adults, is reviewed. Chapters 6 and 7 focus on team performance and team training. In the fourth part, the implications of a person's emotional state for performance are discussed. In chapter 8, studies on achievement motivation, career development, health and exercise behavior, an-

xiety disorders, and sport and motor performance are discussed, with a concentration on perceptions of self-confidence. The following chapter focuses primarily on hypnosis, with side studies on restricted environmental stimulation and meditation and sleep learning. The last part of the book presents findings from two relatively new fields in the area of human performance. Chapter 10 considers socially induced affect, and thought suppression is the topic of the final chapter. Contains 1,190 references. (KC)

Identifiers—*Peace Corps

Based on a workshop in Gambia in 1989, this manual was developed to help Peace Corps workers to develop training techniques for teaching women to run businesses producing and selling local products and to manage money. Topics covered include the following: (1) the role of the facilitator in adult learning; (2) problems women face in controlling their finances; (3) project development and marketing; (4) quality control; and (5) numeracy and book-keeping. Simple plans (suitable for use with illiterate persons) for workshop training sessions that can be replicated easily in village settings are offered. The plans include a topic, target group, duration, objectives, procedures, and preparation and materials. An appendix describes three women's projects. Resources include 6 references on teaching numeracy and literacy and 19 references regarding projects for women. (KC)

Pub Date—Aug 94

Note—47p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC02 Plus Postage.

RIE FEB 1995

Descriptors—*Career Education, *Career Guidance, *Career Planning, Elementary Secondary Education, *Program Development, Program Improvement, *School Guidance, *Self Evaluation (Individuals)

This guidebook was developed for schools to use to improve their current career planning efforts by placing career planning in the context of a comprehensive guidance program. The guidebook defines activities that make up life planning and provides the framework for students to conduct self-reviews using these career planning principles. The guidebook is divided into three parts. Part 1 consists of an introductory chapter that focuses on the relationship of career planning to the total guidance program. Part 2 contains seven chapters that elaborate on the following essential components that are used to evaluate coalition-based career planning efforts: clarity of purpose, commitment, comprehensiveness, collaboration, coherence, coordination, and competency. Part 3 provides a self-evaluation process and form designed to help leaders direct a comprehensive self-study. An appendix links career development competencies by area and grade level. (KC)

Descriptors—Adult Basic Education, *Adult Literacy, *Developing Nations, Foreign Countries, *Literacy Education, *Program Effectiveness, Program Evaluation, *Program Implementation

Identifiers—*International Literacy Year 1990

In 1987, when the United Nations proclaimed 1990 as International Literacy Year (ILY), it invited nongovernmental organizations (NGOs) to participate in national and international programs for the year. An evaluation of these programs was done in order to make recommendations for the future battle against worldwide illiteracy. The evaluation procedure followed was primarily future oriented and illuminative. Data were gathered through case studies, interviews, correspondence, content analysis of publications, and questionnaires. Some of the findings of the evaluation were as follows: (1) the media launch of the ILY was a success; (2) projects sponsored in various regions had a great impact; (3) once it was determined that learners should be involved directly in the year, the programs by NGOs made every effort to involve them; (4) successful projects included the Book Voyage, an international newsletter, and various publications, packets, and kits; and (5) funding for the projects was stabilized through several major contributors. The study concluded that the experience of the year's projects offers valuable lessons for moving from awareness-raising to action to reach a goal of world literacy. (The book includes 14 appendixes consisting of the documents from the ILY campaign, case studies, questionnaires, and research reports.) (KC)

Identifiers—*High Schools that Work

The Southern Regional Education Board-State Vocational Education Consortium conducted a Fall

1992 forum as part of ongoing staff development for High Schools that Work leaders. It was devoted to the changing nature of the workplace and the need for upgraded standards of what to teach and what to expect of students in high school vocational courses. The keynote speech (Anthony Carnevale) described how international competition was changing the workplace and emphasized that more and more workers were required to possess broad skills. Increasingly, rank-and-file employees were called on to identify and solve problems, make decisions, negotiate, and learn new tasks. State and school leaders described efforts to work with employers to develop youth apprenticeship programs and ways to combine the apprenticeship initiative with the High Schools that Work program. Business, industry, and school leaders told about using standards developed cooperatively by employers and educators to modernize and upgrade the quality of vocational courses. Educational innovators described organization of academy or school-within-a-school efforts to involve employers in creating an integrated program of high-status vocational and academic studies using school and worksite settings. School leaders and teachers shared information on new and revised vocational courses that required students to use higher-level academic and technical content. (YLB)

The Impact of High School Vocational Education:**A Review with Recommendations for Improvement.**

Research for Better Schools, Inc., Philadelphia, Pa. Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC.

Pub Date—87

Note—60p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Career Counseling, Cooperative Education, Demand Occupations, Dropout Prevention, *Educational Benefits, Educational Improvement, Educational Research, *Education Work Relationship, High Schools, *Job Placement, Job Search Methods, Job Skills, Literature Reviews, *School Business Relationship, School Role, *Secondary School Curriculum, Teacher Responsibility, Teacher Role, *Vocational Education

Research shows that the labor market payoff to vocational education in high school is quite large when graduates work in the occupation for which they trained. Less than one-third of those who learn occupationally specific skills get training-related jobs. The occupationally specific skills learned are seldom used on a job due to lack of emphasis on placement, insufficient involvement of employers, and training for jobs not in demand. High school vocational education has no significant positive or negative effects on the noneconomic aspects of schooling. Vocational education lowers dropout rates, but not dramatically. Basic skills cannot substitute for occupational skills. Skill obsolescence is less important than the risk of not using and forgetting skills. Studying occupationally specific skills does not necessarily lower academic achievement if nonrigorous academic courses are sacrificed. Most occupationally specific skills are best taught on the job. For vocational educators, the five most important policy implications are as follows: taking responsibility for and giving priority to graduate placement; involving employers more directly in vocational education delivery; ensuring that a well-informed career choice precedes entry into intensive occupational training; offering training in occupations for which there is substantial employer demand; and establishing a system whereby the school vouchers for its students' accomplishments. (Appendices include 23 footnotes and 46 references.) (YLB)

Identifiers—Denmark, Germany, Sweden

This report presents findings of seven education and business leaders from the United States who visited Denmark, Germany, and Sweden to examine the role of career guidance in these countries. An introduction provides an overview of education and training in the three countries and sets forth lessons learned. The remainder of the report is organized around three career guidance issues and related questions that commonly arise during planning for school-to-work transition opportunities. Each section begins with a brief overview of how the United States approaches the questions to set the stage for a look at how each nation approaches them. The three issues (and related questions) are as follows: (1) policy framework for career guidance (how career development is defined, what institutional systems need to be in place to keep the process alive and well, how to ensure all decisions and services are equitable); (2) information structure for career planning (how to support personal and career awareness as a starting point, ways to help people explore their options and interests directly, what kinds of information everyone needs); and (3) transition from school to work (how to help each person set a tentative career goal, whether there are clear avenues for gaining the necessary skills, what human support systems are available along the way). The appendixes include short profiles of the 32 sites visited by the team, brief descriptions of individual study team members, and a glossary of terms. (YLB)

Identifiers—Denmark, Sweden, Switzerland

U.S. business, labor, and public policy representatives visited Denmark, Sweden, and Switzerland to study the roles of their counterparts in school-to-work systems. They identified these common strengths: education viewed as an economic investment tool by all partners; strong partnerships of business, labor, and government; voluntary national, industry-driven systems of standards, curricular frameworks, assessments, and credentials; school-to-work transition as part of a broader integrated education and training system; decentralized systems and flexibility; broad and specific skill development; common knowledge, skills, and abilities in the workplace as the basis of common elements or course modules in curricula; consolidation of jobs and industries for defining course curricula; combination of classroom and work-based learning; and compulsory, high quality primary school with technical training available by age 16. Common philosophies also resulted in common concerns: integration of academic/classroom and work component; staff development; communication between educators and industry; tension between broad and specific

skill development; inflexibilities in changing national standards and curricular frameworks; and training without jobs. Each country had distinctive differences: role of labor; mix of classroom and work-based components; importance of work-based pay; employer commitments to hire; use of contracts between employers and youth; and employer incentives. Next steps for the U.S. Government, employers, and labor were identified. (YLB)

Identifiers—Denmark, Germany, Sweden

This report presents findings of an investigation of the design of programs and systems that prepare young people for work in Denmark, Germany, and Sweden. An introduction and overview of investigating programs and options for youth employment preparation are followed by a discussion of indicators embodied in a high quality program in school-to-work transitions: program completers experience high levels of success; quality inputs and up-to-date content and instruction ensure programs meet needs of youth and employers; flexible designs, diverse ways of organizing learning, and program supports ensure the greatest success for the maximum number; the program is structured to provide multiple options and decision points to accommodate changes in plans and emphasis, ensure development of broad-based skills, and provide access to higher education and further training; mechanisms exist for informed decision making by all partners; instruction reflects best practice and knowledge; and mechanisms are in place for ensuring accountability. The next three sections describe the essential elements of systems that support a high quality learning program of career preparation in Denmark, Germany, and Sweden. Each section discusses content and structure of the learning experience and strategies to ensure success and motivation of all youth (Denmark and Sweden) or challenges for the vocational system (Germany). Finally, conclusions and implications for practice and program design in the United States are drawn. (YLB)

Identifiers—Denmark, Great Britain

This report summarizes findings of a team of U.S. business, labor, and public policy representatives that visited Denmark and Great Britain in Fall 1993 to study innovations in the education and training of young people for work. An executive summary and introduction are followed by two main sections that present findings from the visits. Each section addresses the research questions that guided the study. For each question, the report summarizes the Danish approach, the British approach, and the lessons for the United States. The section on standards and credentials focuses on these questions: how standards for vocational education and training are set and updated; how standards shape what is taught; and what the role of standards is in promoting innovation in teaching. The section on assessment covers how the performance of learners is assessed and documented and how the quality of vocational education programs is monitored and improved. A conclusion extracts from these lessons elements of Danish and British vocational education that could be used in constructing in the United States a viable system for preparing young people to be high performance workers of the future: national standards for workplace skills, employer "buy-in" of standards development and training, national board to oversee the setting and quality control of standards, local assessment of student performance, external quality assurance, and training and support for teachers. Exhibits from the countries are appended. (YLB)

Identifiers—Denmark, Germany, Switzerland

A team of U.S. business, labor, and public policy representatives visited Denmark, Germany, and Switzerland to investigate the European approach to preparing young people for the work force. It gathered information on the performance of governance and finance systems abroad and identified their key underlying principles and operations. Six common features were identified across the three countries and offered a sharp contrast to existing U.S. policies and practices: as a national policy, 16- to 20-year-olds in Europe are engaged in mainstream workplaces as both workers and learners; vocational education is industry driven through well-established systems; national frameworks developed through consensus of all partners provide strong direction to the vocational education system without federal bureaucracy; initial training, further training, and retraining are becoming increasingly integrated; the investment in vocational training for youth among the partners is high; and views of accountability and responsibility prevail that contrast significantly with U.S. attitudes. Nine compelling lessons were suggested for the United States: develop national frameworks; build industry-led institutions at the local level; determine the role of the community college; link school-to-work reform with educational restructuring; avoid tracking; think "system," not "program"; upgrade youth jobs; include workers in the process; and develop economic incentives for employers. Identifiers—*Scotland

The Scottish Office Education Department commissioned four interlinked studies of adult education between October 1991 and November 1993. The studies were designed to do the following: provide an overview of provision, progression, and guidance opportunities for adult learners in Scotland; supplement this overview with in-depth pictures of opportunities and kinds of provision; and study adults' reasons for returning to education. Findings indicated that one of the greatest strengths was the range and diversity of educational opportunities available. This diversity was also a weakness since the public lacked knowledge of the nature and extent of available educational opportunities. The organizations providing education for adults used a wide range of strategies to publicize educational opportunities; personal contact was the most effective but also the most expensive. Adults reported a number of reasons for returning to education, but most hoped that enhanced skills and qualifications would help them in the job market. They reported many different gains from participation. In many cases, the main result of these gains was a desire to progress to the next stage in education. Yet strategies for progression appeared to arise in an ad hoc way rather than as a result of clearly thought-out policy. Four issues were seen as important for encouraging and sustaining adults' participation in education: incentives to collaboration, special weighting for risky students, measurement of personal and social gains, and professional development. Identifiers—*Arizona

Resources available to Arizona through the School-to-Work Opportunities Act will not be concentrated in rural communities, although their educational and economic development needs are proportionately greater. Absent from education reform bills pending in the Arizona House and Senate is any reference to school-to-work transition or any explicit recognition of the need to prepare Arizona's work force. Arizona has established a long-range plan for economic growth and development—the Arizona Strategic Plan for Economic Development (ASPED). Although educational reform policy neglects school-to-work issues, economic development policy represented by ASPED does refer to improving school-to-work transitions through expanded cooperative education and/or linkages. In terms of school reform, for a majority of rural Arizona

nans, there is no choice of school, and open enrollment and vouchers are virtually meaningless. Little more than lip service is paid to rural economic development issues. A fundamental dilemma for school-to-work transition efforts in rural areas is the lack of job opportunities for a work-based component. What is fundamentally disturbing about the omission of rural concerns in state policymaking is that Arizona's public policy fails to promote social equality and thereby contributes to the perpetuation of a rural underclass. State policymakers should develop a coherent strategy to address rural issues and the rural-urban dichotomy. (Contains 25 references.) (YLB)

The first of four issues in this volume consists of these articles: "The Fourth 'R'-Relating"; "On Baseball Cards and Literacy"; "On Literacy and Success"; "National Assessments: What They Can and Cannot Do"; and "In the Classroom: The Integrated Journal." It also contains two book reviews and a list of resources on adolescent literacy, at-risk youth, and dropouts. A supplement, Media Focus, contains "Exploding a Myth: TV Watching Is Not Passive" (Emery); "World View on Media Education"; "Commercial Advertising—Does It Have a Place in the Classroom? Two Views on Youth News Network"; and two book reviews. Issue 2 has these articles: "Concerning Literacy and Ethics"; "Ethics and Educators: Traveling in Hope"; "On Bamboo Literacy"; "On the Increasing Importance of Visual Communication"; "Drawing a Link to Literacy"; "Thinking about Writing and Thinking"; "Sponsorship and Education: Asking Some Questions"; and "Business-Education Partnerships that Work." The Media Focus supplement contains the following: "Will the Real Michelangelo Please Stand Up..."; "The Virtual Classroom—A Pilot-Project in Media Education"; "Highlights from 'Constructing Culture: Media Education in the 1990s'; "World View on Media Education"; five book reviews; and a list of conferences and events. Issue 3 contains the following: "Literacy Lessons from History"; "On the Principle of Postmodern Literacy"; "On Pygmalion as a Literacy Narrative"; "On Values in the Classroom"; "Sculpting Gender: Media, Muscle, and the Construction of Fit Bodies"; two book reviews; summaries of presentations from the UNESCO conference on urban literacy; "Copyright: Educators Meet the Policymakers"; "Feminist Literacy Workers Network Holds Inaugural Conference"; and a list of resources on volunteers in education. Contents of the Media Focus supplement are as follows: "Mastermind on Media: Montreal May 1992"; highlights of the International Center of Films for Children and Young People conference, Children, Moving Images, and Their Future"; "Children and Critical Viewing: Media Literacy Conference"; "World View on Media Education"; and two book reviews. In Issue 4 are found the following: "Literacy and Human Rights"; "On Connecting Narrative, Thinking, and Women's Ways of Researching"; "On Something Called Critical Thinking"; "Equity and Diversity—Principles of Good Workplace Education"; "Job Descriptions: Making Expectations Clear to Students"; "Literacy and Street Youth"; two book reviews; and "Beyond the Composition Ghetto." Identifiers—National Adult Literacy Survey (NCES)

This guide, which is intended for use by decision makers, administrators, volunteers, teachers, and other educators in fields related to adult literacy, is designed to assist in the development and improvement of transition strategies for students participating in volunteer literacy and adult education programs. Chapter 1 summarizes the draft report on transitions that was written in preparation for the May 1994 national conference "Transitions: Building Better Partnerships between Literacy Volunteer and Adult Education Programs." Presented in chapter 2 are summaries of the following background papers presented at the conference: "Technology as an Instructional Strategy for Program Transitions" (Eunice N. Askov, Barbara H. Van Horn); "Setting Up Transitional Programs through Effective Collaboration: A Practitioner's Point of View" (Carol Clymer-Spradling); "Learner Portfolios to Support Transitions in Adult Education" (Jane Braunger, Sylvia Hart-Landsberg, Stephen Reder); "Strategies for Building Collaborative Relationships and Articulated Programs" (Judith Alamprese). Chapter 3 reports on the following conference activities: National Adult Literacy Survey preconference, opening plenary, workshops, keynote address, strategic agenda setting, strategic design session, report out session, and closing. Presented in chapter 4 are various strategic planning materials, including guiding questions and exercises in developing a vision. (MN)

Identifiers—Lewins Field Theory

School psychologists must become better acquainted with basic principles of applying and communicating psychological interventions if they are to be accepted in the school setting. Psychological interventions are often ignored or improperly applied by school staff and parents, who perceive them as difficult, of little value, or inappropriate for a particular school setting. Thus it becomes the burden of the psychologist to communicate complex ideas and expected outcomes. School psychologists need to understand how change occurs in complex settings, how to find professional literature that deals with change, and how to incorporate these ideas and techniques into the actual practice of psychology in the school. Delivery of psychological services in schools is suggested as a series of steps: (1) define and clarify the problem; (2) analyze the forces impinging on the problem; (3) discuss alternative strategies; (4) evaluate and choose among alternative strategies; (5) specify consultee and consultant responsibilities; (6) implement the chosen strategy; and (7) evaluate the effectiveness of the

intervention. Actual problem solving rarely follows discrete steps, and communication (genuineness, listening and encouraging consultee verbalizations, empathy, paraphrasing, continuation, etc.) is essential. Lewin's Field Theory is used as a framework for conceptualizing change in schools, and its tenets are applied to the steps in delivering psychological services. Contains 29 references. (KM)

Descriptors—Academic Advising, Career Counseling, *Community Colleges, Counseling, Counseling Effectiveness, *Counselor Characteristics, *Counselor Performance, *Counselor Role, Counselors, *Educational Counseling, Two Year Colleges

Identifiers—*New Jersey

A study of community college counselors was conducted to determine what they actually do at work and what they think their professional responsibilities should be. Professional activities listed in the questionnaire included personal concerns, counseling, academic advising, scheduling classes, and financial aid counseling. To study outcome and process goals, 89 counselors at 15 New Jersey community colleges completed the Community College Counselors Goals Inventory. The categories on this inventory are grouped into general counseling goals, specific counseling goals, counseling qualifications, counseling approaches, and employment conditions and recognition. The weekly median number of clients seen was 30, and the median amount of time spent with each client was 30 minutes. Analysis of the results indicates that counselors spend (using mean percent): 19% of their time on individual academic advising; 18% on administrative work; 14% on personal concerns counseling; 10% on educational counseling; and 10% on career counseling. Overall, counselors would prefer to do less individual advising, administrative work, and transfer counseling, and focus more on personal concerns counseling and group counseling. There was a high degree of consistency in the importance of counselors possessing a Master's degree, adhering to professional ethical standards, advising all new students, and conducting counseling sessions in a private, confidential setting. Identifiers—*Washington

In 1991, a study was conducted to evaluate intake assessment at the various adolescent alcohol and drug treatment centers in Washington State. The three goals of this study were: (1) investigate the level of agreement among drug treatment professionals on the placement of adolescents in different treatment programs; (2) evaluate the existing placement process; (3) identify the most important factors influencing primary treatment placement decisions. Seventy-two assessment files were gathered from various types of treatment facilities. Six major findings emerged: (1) the number of cases for which consensus was attained was higher in the Team Review than in the Independent Review, for both realistic and ideal placements; (2) in both the Independent and Team Review, there was a very high level of correspondence between the realistic and ideal placements; (3) in the majority (68%) of cases in the Independent Review, the recommended

primary treatment duration was the same for realistic and ideal placement; (4) there was a low level of agreement between the panelists' recommended placements and the actual treatment the clients received; (5) drug history factors were identified as paramount in making placement decision; and (6) little standardization of the adolescent assessment process exists. Identifiers—*Washington

The Washington State Department of Social and Health Services (DSHS) subsidizes child care for about 30,000 children each month. In 1992, telephone interviews were conducted with 1,179 child care centers and 1,277 licensed family child care homes throughout the state. An estimated 140,000 children were in licensed care at that time. Three major factors affected rates charged for child care: (1) wage levels and benefits provided to employees in centers; (2) the employment of paid assistants in homes; (3) liability insurance coverage in both centers and homes. Major findings from the study include: (1) between 1990 and 1992, the average rates for licensed child care increased 16.4 percent; (2) geographical differences in child care rates were similar to those observed in the 1987 and 1990 surveys; (3) child care rates varied with the age of the child; (4) on average, child care centers charged more than family homes; (5) in 1992 the DSHS maximum rates varied from the 3rd to the 73rd percentile of market rates; (6) in child care centers, rates tended to be higher when salary levels for teachers and aides were higher; and (7) in family homes, child care rates tended to be higher when providers employed assistants and when they carried liability insurance. The Referral Process of School Intervention Programs in Washington State to Alcohol and Drug Assessment Centers: A Case Study of Four High Schools.

Washington State Dept. of Social and Health Services, Olympia. Office of Research and Data Analysis.

Pub Date—May 92

Note—88p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Adolescents, *Alcohol Abuse, Consultation Programs, Counseling, *Drug Abuse, Guidance, High Schools, *Intervention, Organizational Communication, Prevention, *Referral, *School Role

Identifiers—Washington

This report presents the analysis of a descriptive study of adolescents (n=590) at four Washington high schools who were assessed for substance abuse. Areas of concentration in evaluating referral processes are as follows: (1) general information regarding communication between school staff and Consultation Programs; process within the school to a substance abuse specialist; (2) the assessment process which occurs when students are "at risk"; (3) communication between the school and the treatment agency; (4) the re-entry of students to school and recovery support programs. The study concluded administrative support for prevention/intervention programs is of utmost importance. School counselors found school-based referral and treatment programs to be effective because of easy access to students and the comparative stability of the school in students' lives. Checklists of student behavior patterns are the primary referral tool at each school. While the point of assessment varied among schools, the importance of having a stable referral and assessment process was emphasized. The majority of students in inpatient treatment returned to school, but continuous tracking records were not kept in any of the schools. (KM)

Identifiers—*Canada, Canadian Guidance and Counseling Association, Creation and Mobilization Counsel Resource Youth

Society needs citizens who best utilize their talents, who make informed career choices, and who contribute to the social and economic development of their country. The Canadian organization, Creation and Mobilization of Counselling Resources for Youth (Camcry) partnership, helps young Canadians achieve meaningful careers and helps practicing counselors gain additional skills in career guidance and counseling. The Camcry initiatives demonstrate that career counseling is effective in the individual's personal, educational, social, and career development. This booklet details the status and needs of career counseling in Canada's rapidly changing labor market, and outlines four strategies proposed to address career needs: (1) existing career guidance and counseling services must become more available and more adequate; (2) continuing education and additional training must be made available to counselors; (3) a career development culture must be fostered so as to promote self-sufficiency and to help people cultivate their talents and opportunities; and (4) career counseling must have ongoing research and development of methods to promote the attainment of human potential. These initiatives should foster increased productivity and less reliance on income support and other forms of assistance. Included is a descriptive list of Camcry career development interventions. Sexual Revictimization: A Longitudinal Perspective.

Pub Date—20 Aug 93

Note—10p.; Paper presented at the Annual Meeting of the American Psychological Association (101st, Toronto, Ontario, Canada, August 20-24, 1993).

Pub Type—Speeches/Meeting Papers (150) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Age Differences, Child Abuse, College Students, Family Violence, Higher Education, Interpersonal Competence, Personality Traits, *Rape, Self Concept, Sex Role, *Sexual Abuse, Sexuality, *Victims of Crime, Young Adults

Identifiers—*Victimization

While some researchers question whether women can be more vulnerable to sexual assault because of personal characteristics and/or behavioral styles, typical research designs in this question draw on retrospective comparisons of victims and non-victims, making it difficult to determine whether the observed differences are causes, correlates, or consequences of the victimization experience. This paper reports on a longitudinal research design in which college women were surveyed upon entry into their first year of college and then again at the end of their first year. Findings show that victims of first-year college sexual assault were more depressed and tested lower on general psychological well-being scales than non-victims. Furthermore, victims reported greater use of intoxicants and a greater number of dating partners than non-victims. Victims appeared to have a more negative self-image than non-victims, seeing themselves as more compliant and less instrumental. They also were the most rejecting of traditional gender attitudes, whereas victims of verbal coercion and non-victims were the most accepting of such roles. When consid-

ering victims' backgrounds, it seems that childhood experiences with family violence and sexual abuse, combined with adolescent sexual victimization, made some women at greater risk than others for sexual victimization. (RJM)

Descriptors—Attitudes, Beliefs, *Clergy, Cognitive
Mapping, Cognitive Psychology, Counselor Attitudes,
Counselors, *Depression (Psychology),
Emotional Problems, *Mental Health Workers,
Psychologists

Identifiers—Center for Epidemiologic Studies Depression Scale, Dysfunctional Behavior

This study investigated the influence of specific cognitive factors believed associated with the onset and maintenance of depression. Of specific interest was the relationship of dysfunctional attitudes to levels of depression in a comparison of two research populations of helping professionals: Presbyterian Church (USA) clergy and mental health professionals. Data from 515 respondents (51.5 percent clergy, 54.2 percent female) were utilized in regression analysis procedures. Results of the data analysis confirmed a positive, directional association between the level of dysfunctional attitudes and level of depression. The presence and persistence of these dysfunctional attitudes evidently heightened the development of symptoms associated with depression. This finding emphasizes the importance of attending to the influence of cognitive features in personal and professional life. The results do not support the idea that a significant pattern of cognitive resistance to depression was present by virtue of membership in the clergy sample. Test scores indicated that clergy members were at greater risk for symptoms associated with depression than their counselor counterparts. Further study is needed to explore those variables which may increase the efficiency of belief systems as coping mechanisms and thereby reduce the effect of underlying attitudes which predispose a person to depression. Descriptors—Age Differences, Child Psychology, *Children, *Coping, *Developmental Continuity, Developmental Psychology, *Divorce, Elementary Education, Elementary School Students, *Family Environment, Family Relationship, Foreign Countries, *Parent Child Relationship, Psychological Patterns, Self Efficacy, Self Esteem
Identifiers—Family Environment Scale, Quebec (Montreal)

The impact of divorce upon the children's adaptation has increasingly become a topic of concern in developmental research. This study investigates how specific coping resources (self-efficacy, self-esteem) vary according to age and as a correlate of developmental level in children from divorced and intact homes. Researchers also examined the relationship between family environment characteristics and children's age in both types of homes. Participants included 76 elementary school-age children in Montreal from divorced (N=38) and intact families (N=38). Parents completed a demographic questionnaire and the Family Environment Scale while the children filled out the Harter Self Perception Profile for Children. Results revealed significant within-group differences. A child's age in a divorced family was found to be a meaningful predictor of behavioral self-efficacy and self-esteem. Although youngsters from divorced families revealed more uncontrolled behavior problems than their peers from intact families, older youngsters from divorced homes reported higher levels of behavioral self-efficacy than their younger counterparts: younger children from both groups seemed to

exhibit less effective psychological coping resources. These findings suggest that counseling programs consider developmental differences in psychological and social coping resources of elementary-school children, since younger children may be at greater risk of developmental difficulties. Contains 9 references. (RJM)

Identifiers—*Art Therapists

For several years, researchers have systematically investigated therapeutic communication in the counseling relationship. Although comparative studies have assessed the similarities and differences among various approaches, no one has compared verbal and art therapeutic communication. This study analyzed the demonstrated equivalence of verbal and art therapeutic communication in ten individual interview sessions using a well-explicated model: the SITE (sequential initiating, tracking, and enhancing) skills model. Two men and three women served as voluntary participants for an individual interview session with an art therapist and a separate interview session with a verbal therapist. Investigators recorded 113 observable therapist responses while the total number of SITE responses was 961. Results indicate that art and verbal therapeutic communication used parallel methods and can be evaluated against a common therapeutic standard: the SITE skills model. Although researchers observed differences between these two types of therapy, the pattern of responses was overall more similar than dissimilar. Some other noted similarities included client content control, avoidance of interpretation, and consistent and appropriate responses. Session length and therapist style, especially the art therapist's direct intervention, presented two observable differences in the therapeutic process. It is suggested that verbal therapy and art therapy be used together in a complementary manner. Contains 18 references. (RJM)

Descriptors—Adjustment (to Environment), *Adolescent Development, Adolescents, Behavior Patterns, Cognitive Development, *Coping, Daily Living Skills, Defense Mechanisms, Developmental Stages, Family Relationship, High Schools, Junior High Schools, Peer Relationship, *Psychological Patterns, *Self Management, Sex Differences, *Stress Management, *Stress Variables, Student Attitudes, Well Being

Identifiers—*Avoidance Behavior

In this study, 375 adolescents from the junior high and high school of a Midwestern, semi-rural community were surveyed to investigate: (1) developmental and gender differences in strategies that adolescents use to cope with family, school, and peer stressors; and (2) the relation between coping strategies and outcome. The students were divided into three age groups and completed the Coping Responses Inventory—Youth Form three separate times for each of three stressors that the adolescents themselves generated from the domains of family, school, and peer stressors. Subjects also rated how upsetting each stressor was perceived to be and how whether the stressor was perceived to be controllable. Results indicated that: (1) adolescents use more avoidance than approach coping strategies for family stressors and more approach than avoidance coping strategies for peer stressors; (2) the use of approach coping strategies increased from 7th to 12th grade for family and school stressors; (3) fe-

males used more of both approach and avoidance coping strategies across stressors; and (4) regardless of the type of stressor, approach coping strategies predicted more favorable outcomes and avoidance coping strategies predicted more unfavorable outcomes. (RB)

Although art therapy has traditionally focused on the use of art expression in psychotherapy, the practice of medical art therapy has begun to grow rapidly. This paper provides a brief overview of the emerging specialty of medical art therapy and its importance as a counseling tool with people suffering from serious health problems. The paper examines the theory, practice, application, current research, and directions for this field's future, along with an emphasis on the contributions of medical art therapy as part of the health care of patients with serious and life-threatening physical illness. Healing according to the paper, extends beyond blood chemistry or the eradication of tumors; healing involves becoming whole both physically and psychologically. The greatest impact of medical art therapy could be in art's ability to synthesize and integrate client issues such as pain, loss, and death. The medical art therapist or clinician help patients achieve this synthesis through art making and the creative process. The use of art expression in conjunction with a total medical treatment program may be one of the most viable avenues through which patients can find true healing in their lives. Descriptors—*Academic Achievement, Elementary Secondary Education, *Family School Relationship, Parent Participation, Parents, *Parent School Relationship, Performance, *School Attitudes, School Community Relationship, School Effectiveness, School Involvement, Schools, *Student School Relationship

A study of 310 ninth grade students and their parents in five communities was conducted to look at the relationships between parent-school bonding, student-school bonding, academic achievement, and other variables. Questionnaires were developed for both parents and students asking questions about attachment, commitment, beliefs about school, participation in school events, and communication from the school. Focus groups and telephone interviews provided additional information about family-school relationships. Results indicated: (1) the greater the parents' bonding to school, the greater the student's bonding; (2) student bonding was closely related to academic achievement; and (3) there is no direct relationship between parent-school bonding and students' report of their academic achievement. Overall, the study supported the hypothesis that the greater the parents' bonds of social attachment to their child's school, the greater the student's bonds of attachment. Several limitations were noted. One limitation is the problem of how to measure student success. Another limitation was that different schools were compared (inner city and semi-rural schools, for instance). A third limitation is how parent's socioeconomic status affects their relationship to the school. (KM)

Descriptors—*Alcohol Abuse, Behavior Change, Behavior Rating Scales, Drinking, *Driving While Intoxicated, Drug Abuse, Drug Use Testing, Laws, Performance, Psychomotor Skills, *Traffic Accidents, Traffic Safety

Identifiers—Driver Performance

Alcohol intoxication increases the risk of highway accidents, the relative risk of crash probability increasing as a function of blood alcohol content (BAC). Because alcohol use is more prevalent than use of other drugs, more is known about the relationship between alcohol use and driving. Most states presume a BAC of .10% to be evidence of drunk driving. Drunk drivers tend to be males less than 24 years old. About twice as many men as women are involved in fatal traffic accidents when BAC is above .10%. Being divorced or separated, having a low income, and having a record of previous DWI arrests and moving violations also correlates statistically with DWI. While moderate to high alcohol dosage affects vision, eye-hand coordination, and reaction time, the most relevant driving-related difficulties are divided-attention tasks. Relative traffic accident risk begins to increase at BACs above .05%, and at .10% is about six times greater than when sober. Three behavioral tests, the Nystagmus Gaze, Walk and Turn, and One-Leg Stand tests, are recommended to determine intoxication. Without such specific tests, it is difficult to determine intoxication below a BAC of .15%, when relative risk of accident is about 20 times greater than when sober. (MSF)

Descriptors—Adolescents, Alcohol Abuse, *Athletes, *Athletic Coaches, Competition, Coping, *Drug Education, Drug Use, *Health Education, Performance, Preadolescents, *Prevention, Secondary Education, Self Management, *Substance Abuse

Identifiers—*Steroids

A 1989 National Youth Sports Coaches Association survey of about 1,200 youth aged 10-14 indicated that young athletes identify somewhat with their drug-using athlete models. Forty-three percent of respondents felt that steroids are not harmful if properly used, and 45% felt that steroids were likely to increase their athletic performance. Steroids can improve performance without immediate severe physical harm, and thus are attractive to athletes, who often suffer from anxiety connected with performance in their sport. Significant percentages said they knew where to obtain steroids and might use them to enhance performance; 42%, however, said they look to their coaches as role models and alcohol and drug educators. The influence of coaches on their players is known to be profound and long-lasting. Younger children are likely to be influenced even more than players at the high school and college level. It is important that coaches talk to their players about the deleterious effects of steroids. The coach also needs to explain that other drugs and alcohol do not offer escape from pressure, anxiety, or low self-esteem and, in fact, may lead to decreased performance. Effective use prevention can be based on knowledge and the development of appropriate attitudes and decision-making skills. (MSF)

Residential treatment for alcohol/drug abuse may be a significant event in an adolescent's life. School counselors may further the experience by developing familiarity with available treatment programs. Having all available options at hand, a client or family can make a choice, thereby gaining an investment in the treatment decision. In order to help counselors guide families seeking information about residential treatment programs, this fact sheet lists questions to consider in several areas. Cost, Program Goals, Staff Credentials, Program Components, Aftercare, School-Related Education, Service Agreements, Relapse Programs, and Program Location are the sections covered. (MSF)

Descriptors—Adolescents, Adults, *Alcohol Abuse, Cognitive Ability, *Cognitive Development, Cognitive Processes, *Drinking, Drug Use, *Health Education, *Social Behavior, Young Adults

Cognitive abilities of social drinkers are generally thought to be affected by alcohol only during acute intoxication, but several studies suggest that sober-state performance may be affected by the quantity of alcohol consumed per drinking episode. Although the findings regarding sober-state mental deficits in social drinkers are inconclusive, the possibility that acute intoxication effects may persist into the sober state is important, especially for young drinkers who are developing cognitively. Probably no single, straightforward relationship between high-quantity consumption (more than five drinks per occasion) and decreased mental efficacy exists; rather, the relationship is complex. Other factors requiring further study include the individual's psychological distress level and concurrent use of other psychoactive drugs. Additionally, tests used in past research may not have been sensitive enough to detect subtle mental deficits. Longitudinal studies are needed to detect subtle decreases from previously higher levels of functioning within individuals. Specific knowledge about cognitive effects of certain drinking patterns may enhance prevention efforts, presenting messages that are consistent with users' experience and more valid than current, simplistic analogies comparing the user's brain to a fried egg, for example. After defining HIV and the AIDS disease and outlining symptoms and means of infection, this fact sheet lists the ways alcohol and drugs are involved with the AIDS epidemic, noting that needle-sharing transmits the virus; that alcohol or mood-altering drugs like crack cocaine cause disinhibition, increase sex drive, encourage sex for drugs, and affect judgment; that drugs and alcohol may be biological co-factors causing HIV to progress to AIDS; that many people with HIV infection are diagnosed when seeking treatment for chemical dependence and may have symptoms related to HIV infection, such as pain, anxiety, nausea, and fever; and that HIV is sometimes associated with relapse into alcohol or other substance abuse in people who have had a period of sobriety. The sheet concludes by outlining commonly-used and new blood tests for diagnosing HIV, and by discussing medical, psychological, nutritional, and lifestyle means of managing AIDS infection. Chemical dependency professionals have the expertise necessary to provide supportive, nurturing, and successful health-

care for those with HIV infections and AIDS. (MSF)

Identifiers—Second Chance Programs

Adolescent use of alcohol, tobacco, and other drugs is currently increasing. Three out of four adolescents report regular drinking. Significant alcohol, inhalant, and cigarette use is reported as early as fourth grade, and alcohol experimentation increases from 6 to 17 percent between fourth and sixth grades. Adolescence is a high risk stage for all youth, given the adolescent search for identity. Although patterns of use differ among individuals and according to ethnicity, youth learn drinking patterns from their parents. General factors increasing the likelihood that a youth will abuse substances include being home alone after school, having friends who approve of or use alcohol or other drugs, a history of cigarette use, and frequent delinquency. Substance abuse treatment programs for adolescents cannot simply be scaled-down versions of adult programs, for adolescents differ in significant ways. A "second-chance" treatment model involving a trusting relationship between adolescent and adult within the context of a consistent set of rules and a peer-governed community is often successful. Traditional, often-successful prevention programs for preadolescents, such as information or self-esteem or decision-making skills programs, frequently miss success with adolescents, for whom comprehensive community programs including peer group pressure seem best. Descriptors—*Alcohol Education, *Drug Education, Federal Aid, *Grants, *Grantmanship, *Health Education, Health Promotion, Prevention, Private Financial Support, *Proposal Writing

The passage of the Federal Drug-Free Schools and Communities legislation expands alcohol/drug prevention targets and makes it important that educators and community leaders understand how to seek out and compete for grant dollars to meet legislative mandates. The initial step in seeking grants is understanding which of the two types of sources, public (Federal, state, and local government agencies) or private (foundations and corporations) fund activities like those contemplated. "The Federal Register," "The Foundation Directory," and five other resources listed help identify potential funding sources. Once a potential public source is identified, the applicant completes an application following specific guidelines and criteria. Because private foundations often have no fixed guidelines or require specific application forms, potential applicants should first submit a one to two page concept paper inquiring whether the proposed project falls within the funder's area of interest. Regardless of source or required forms, most applications should contain eight basic elements: (1) proposal summary; (2) introduction; (3) problem statement; (4) objectives; (5) methods of reaching the objectives; (6) means of evaluation; (7) how future funding will be found; and (8) budget of all necessary costs. Success requires patience and the perseverance to seek advice from grantors who have rejected a proposal and to resubmit the modified application. (MSF)

Improving Conflict Resolution Skills of Primary Students through Curriculum Adaptation and Teacher Interventions.

Pub Date—Apr 94

Note—83p.; M.A. Thesis, Saint Xavier University.
Pub Type—Dissertations/Theses - Masters Theses (042)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Aggression, Antisocial Behavior, Conflict Resolution, Cooperative Learning, Group Activities, Interpersonal Communication, Interpersonal Competence, Primary Education, Problem Solving, Questionnaires, Self Esteem, Social Cognition, Social Problems, Surveys, Units of Study

Identifiers—Peace Education

This report describes a program for improving social and conflict resolution skills of primary students in three middle class suburban schools located in a northwest suburb of Chicago, Illinois. This program was recognized by teaching staff who found students lacking in social skills, problem solving strategies and the ability to solve conflicts. Teacher observation and teacher/student surveys confirmed the problem. Analysis of the probable cause data revealed that students demonstrate inappropriate (negative) skills for resolving their own conflicts, and that this lack of skill may come from socioeconomic background, exposure to violence, poor family relations, poor self-esteem and a lack of knowledge of alternative solutions. A combination of solution strategies suggested by research, teacher experience and collegial support resulted in the following interventions: (1) provide lessons on self-esteem; (2) utilize conflict resolution techniques through literature and role playing; and (3) adapt the life skills unit. The outcome of this Action Research Project was that students exhibited an increase in their ability to recognize and resolve conflict by utilizing appropriate resolution strategies. (Author)

Identifiers—Illinois, Stress (Biological)

Job burnout is a condition observed in recent years among a wide variety of helping professions. In this study, burnout was described as emotional exhaustion, job dissatisfaction, and the desire to leave the job and/or profession. To examine burnout in the profession of school psychology, a random sample of members (N=139) of the Illinois School Psychologists Association completed survey materials including a Maslach Burnout Inventory, a School Psychologists Stress Inventory, and specially designed demographic and job satisfaction questionnaires. The primary questions addressed include: (1) What is the extent of burnout among school psychologists?; (2) What principal job-related stressors are associated with burnout?; (3) What relationship exists between certain demographic variables and burnout?; and (4) What best predicts burnout? Results suggested that symptoms of burnout occur frequently among school psychologists. Although job related stressors (e.g. lack of resources, time management) were related to burnout, demographic factors (e.g. satisfaction with supervision, case discrepancy index) were found to be the best predictors of burnout. Results also indicated that supervising psychologists are considered to be primary figures in resistance to burnout. Contains 27 references. (RB)

In the United States, more than 11,500 adolescents' and young adults' lives are taken each year by firearms. Although Federal law prohibits minors from purchasing handguns, they typically get them by asking someone of legal age (18 years or older) to purchase them from one of the 256,771 Federally licensed gun dealers. This pamphlet answers several frequently asked questions about licensed gun dealers in the United States. Among the questions/answers are: how do adolescents who carry and use guns get them; how many gun dealers are in each state; how can the names, addresses and phone numbers of gun dealers in a city, county or state be obtained; and how can the number and types of guns sold in each state be ascertained, etc. It concludes with an order form for a list of federally licensed gun dealers. Identifiers—Adolescent Attitudes, Sexual Attitudes, Sexual Experiences Survey, Sexually Transmitted Diseases, United States

Although sexual activity is common among teenagers, it is not as widespread, and does not begin as early, as most adults believe. This report provides detailed data and analysis of sex among adolescents. Adolescent sexual activity is grouped in ten categories: (1) Rites of passage; (2) The context of adolescents' lives; (3) Sex among teenagers; (4) Risks and prevention of unintended pregnancy and STDs; (5) Incidence and consequences of STDs; (6) Adolescent pregnancy; (7) Outcomes of adolescent pregnancies; (8) Adolescent mothers and their children; (9) Organized responses to adolescent sexual and reproductive behavior; and (10) Where do we go from here? Although young people's sexual behavior today is broadly seen as problematic, no consensus exists as to what the problem is. Most adolescents have always experienced sex, but in the past it was closely linked to marriage, especially for young women. However, over the last century, puberty has slowly moved to earlier ages, as has the initiation of sexual activity, while marriage has been postponed to later years. Adolescents live in a more diverse country than the one their parents knew—society, family, violence, and sexual messages differ dramatically from the standards of the previous generation. Included in this booklet are numerous graphs. Citations appear for all data. (Contains over 200 references.) (RJM)

ment, Childhood Needs, Child Rearing, Children, Elementary Education, Experiential Learning, Family Environment, Human Dignity, Parent Child Relationship, Self Esteem
Identifiers—Affirmation Strategy, Self Concept Enhancing Activities

Every child deserves to believe that she or he is truly a wonder. Together with the children's book, the Leader's Guide provides a complete course on self-esteem for young children. The Guide endorses three core beliefs: (1) All children are inherently valuable without regard to gender, race, religion, family background, economic status, appearance, abilities, health, possessions, or any other factor; (2) All children have the right to feel good about themselves exactly as they are; and (3) A child's value is unconditional. The children's book introduces several important concepts that strengthen and support self-esteem. The Leader's Guide shows how to teach and reinforce those concepts in a hands-on, experiential way. The activities make full use of children's natural curiosity and creativity. The Guide is divided into chapters that correspond to the children's book sections. Each chapter has four parts: (1) an opening statement about the concept being presented; (2) a series of goals that describe the main ideas; (3) activities to try with children; and (4) suggestions for follow-up that reinforce the concepts taught in the lesson. EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Attitude Change, Caregivers, Child Caregivers, Child Rearing, Family Attitudes, Father Attitudes, Fathers, Mother Attitudes, Mothers, Parent Child Relationship, Parent Influence, Parents

Identifiers—Kansas (Decatur County), Parenting Styles, Parent Overprotection

Parenting attitudes have changed over the ages. This thesis examines past and current viewpoints toward parenting. The independent variables analyzed here include parents' gender, age, marital status, number of children, and children's ages. Dependent variables were taken from scores on four subscales of the Parental Attitudes toward Child Rearing Questionnaire: Warmth, Encouragement of Independence, Strictness, and Aggravation. The sample of 95 questionnaires was collected from randomly selected parents in a Kansas school district. Results supported three generalizations: (1) female parents value warmth more than male parents; (2) female parents are more concerned with aggravation than male parents; and (3) parents of children aged birth-5 years old value warmth more than parents with children aged 6-10 years old. The thesis reports significant statistical interactions for gender of parent, age of parent and encouragement of independence; age of parent, number of children, and encouragement of independence; number of children, age of children, and encouragement of independence; age of parent, marital status of parent, and encouragement of independence; gender of parent, age of parent, and strictness; and gender of parent, marital status of parent, and strictness. Included are five comparative tables. Contains 52 references. (RJM)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adolescents, Anger, Child Rearing, Family Life, Father Attitudes, Higher Education, Hostility, Mother Attitudes, Nuclear Family, Parent Child Relationship, Personality Traits, Power Structure, Self Esteem, Social Cognition

Identifiers—Parental Dominance

Research shows that hostility may lead to deleterious consequences for health, anger, aggressive behavior, and interpersonal relationships. This study

investigated the relation of parents' hostility levels to both the self-esteem (SE) of college-aged participants and the adolescents' phenomenological assessments of parental authority. The 199 college students for this study came from two-parent families. Participants completed four questionnaires: (1) a mothers' authority questionnaire, (2) a fathers' authority questionnaire, (3) a SE scale; and (4) a demographic information sheet. Each parent filled out the Cook and Medley Hostility Scale. When comparing fathers' and mothers' hostility, paternal hostility more strongly predicted patterns of authority exercised in the home (both authoritarianism and authoritarianism), and adolescent self-esteem. The psychological disposition of hostility appears to affect the overt behavioral and emotional expressions of men more than of women - hostile fathers seem more apt to interact with their children in abrupt, demanding, and controlling ways. The findings suggest that the behavioral and emotional consequences of hostility are different for men and women, which agrees with previous studies. Included are three tables which summarize the statistical findings. Contains 23 references. (RJM)

Identifiers—*Student Assistance Programs

Recently, educators have initiated programs to help students address the social and emotional problems which can impair academic performance. This paper reviews current knowledge on one such program called a Student Assistance Program (SAP). SAPs were initially designed to intervene with chemically-dependent high school students, but more recently, SAPs have begun assisting students who are at-risk for academic failure. Two broad organizational models of SAP services exist: the Core Team (CT) model and the Counselor (CN) model. In the CT model, the SAP staff members are organic to the school, whereas with the CN model, key SAP staff members come from outside agencies. Research on SAPs remains sparse and the dearth of quality process evaluations is a pressing concern. Implementation of SAPs should progress logically and include needs assessment, community advisory groups, and comprehensive inservices for school personnel. Schools have reported varying degrees of success for their SAPs; some general improvements for SAPs include awareness programs for parents and students, after-school programs, and referral monitoring. The paper closes with seven suggestions for counselors who are planning or are engaged in SAP work. Contains 22 references. (RJM)

An increasing number of children face deteriorating family bonds, out-of-wedlock births, lack of shelter, pregnancy, abortion, and drug or alcohol related crimes. When schools fail to address the immediate family and social needs of students, learning for these students becomes difficult and relatively unimportant. This study promotes the importance and usefulness of middle school guidance

counselors in addressing these social problems. Six middle school counselors were interviewed using a semi-structured format and then the varying student/counselor ratios and the demographics of each counselor's school were incorporated into the responses. Results indicate that the amount of paperwork involved in testing and registration procedures and the high student to counselor ratios left counselors under significant time constraints. These demands prevented counselors from meeting the personal needs of all their students. Understaffed guidance departments should be supplied with para-professionals who would handle the testing procedures and reduce the counselor's amount of paperwork. The paper also lists interviewees' advice and suggestions for their colleagues. (RJM)

Lu, Weichen V.

Parental Attitudes toward Sex Education for Young Children in Taiwan.

Pub Date—1 May 94

Note—61p.

Pub Type—Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Child Rearing, Children, Educational Responsibility, Foreign Countries, Moral Values, *Parent Attitudes, Parent Responsibility, Parents, Parent School Relationship, *Preschool Children, Preschool Education, *Sex Education, Sexuality, Social Values

Identifiers—*Sex Knowledge, *Taiwan

This study investigates Taiwanese parents' opinions on sex education for young children. Participants in the study included 97 randomly selected Taiwanese parents of 3 through 5-year old children at three different preschools in northern Taiwan. Results indicate that subjects' age and education influenced parental views toward sexual issues: younger or well-educated parents professed more liberal views than other groups. Even so, most Taiwanese parents held positive attitudes toward sex education for young children, agreeing that children need sex education, that parents should offer sex education at home, and that preschools should provide sex education. A majority of parents seemed insufficiently prepared to carry on a conversation about sex and most did not believe that sexuality and morality should be separate from each other. Participants expressed dissatisfaction with Taiwan's current sex education, believing it too conservative, and they wished to improve the situation. Although parents have difficulties in dealing with young children's curiosity about sex, researchers have provided little help for teachers and parents to teach children about sex. The author lists four guidelines for parents and teachers to foster proper attitudes toward sex. Included are 27 statistical pie charts, a copy of the questionnaire, and statistical summaries. Contains 26 references. (RJM)

Counseling and Nature: A Greening of Psychotherapy.

Pub Date—94

Note—19p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Adjustment (to Environment), Associative Learning, Attitude Change, *Ecology, Emotional Adjustment, *Environment, Mental Health, Milieu Therapy, Naturalism, Nonverbal Learning, Stress Management, *Therapeutic Environment, *Therapy, Well Being

Identifiers—*Nature

This study promotes the natural world as a resource for personal growth. It stresses how nature may help individuals build responsible and fulfilling relationships and offers sensory activities which show how nature can lead people to emotional health by teaching them its "non-language communication." Once participants identify and differentiate their "natural-sensory" and cognitive "language-reasoning" ways of knowing, a coloring task is presented. This task challenges them to express in words their natural sensory knowledge. The task induces stress which disappears when a new kind of language is introduced - a language which validates a person's sensory way of knowing. This paper analyzes the dynamics of this transaction and examines the technique's implications for stress management and mental health. Also offered are unique, nature-connecting activities which are believed to reduce stress. These nature-connecting ac-

tivities are then analyzed for their mental health and environmental effects. (RJM)

Supportive Counseling for Students Recovering from Substance Abuse.

Pub Date—Mar 94

Note—14p; Paper presented at the Annual Meeting of the National Association of School Psychologists (26th, Seattle, WA, March 4-5, 1994). Pub Type—Speeches/Meeting Papers (150) — Reports - Evaluative (142) — Tests/Questionnaires (160)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Adolescents, Alcohol Abuse, *Counseling Objectives, Drug Abuse, *Drug Rehabilitation, High Risk Students, *Program Attitudes, Program Development, Rehabilitation Programs, Secondary Education, *Social Support Groups, *Substance Abuse

Adults who are recovering from substance abuse usually possess coping skills that adolescents have not yet developed. This paper examines the special needs of adolescents who are recovering from substance abuse. Young people have not had the opportunity to develop healthy social, emotional, and cognitive skills because they are using chemicals at just the time when they are developing these skills. Recovering students may have good intentions when they conclude treatment but they are still developmentally at the age when they started using chemicals. Typically, adolescents move from denial, to compliance, to surrender, and finally, to recovery, as they fight to overcome chemical dependency. Recovery must follow a plan which incorporates physical, spiritual, vocational, and social aspects if the adolescent is to remain drug free. The paper describes the necessary features of recovery groups, such as a focus on fostering insight and support, and outlines desirable steps in forming the group, giving special emphasis to the initiation of members, on maintaining the program, and on evaluating the program (a sample evaluation form is included). Adolescence can be an optimal time for healing because it is a time when developing ideals, values, and morals can be reoriented in positive directions. Contains 24 references. (RJM)

Identifiers—*Los Angeles County Schools CA

This Drug Prevention Training Project focused on teaching school personnel to work with students involved in drugs and/or alcohol. This report evaluates the success of this effort which took place during the 1991-1992 academic year. The Project sought to accomplish six objectives: (1) recruit and train 800 school counselors, psychologists, nurses, and social workers; (2) hold eight half-day follow-up regional training meetings; (3) have at least 80% of the participants express increased confidence in counseling students referred to them for drug involvement; (4) build four regional support networks; (5) develop a script outline for program transmission via satellite; and (6) present to participants a model student database and tracking system. All six tasks were completed and the evaluator judged the program a success. Organizers completed all objectives and participants rated highly the training they received. Included in this evaluation are six appendices which feature copies of meeting announcements and agendas, evaluation results, resources, networking plans, and a networking directory. (RJM)

This Drug Prevention Training Project focused on helping school personnel work with students involved in drugs and/or alcohol. This report evaluates the success of this effort which took place during the 1992-1994 academic years. The Project sought to accomplish five objectives: (1) recruit at least 800 school counselors, psychologists, nurses, and social workers in 15 regional training meetings, and train them in drug prevention and intervention techniques and procedures; (2) have at least 80 percent of the participants expressing increased confidence in counseling students referred to them for drug and alcohol involvement; (3) support four previously established regional networks for school counselors, psychologists, nurses, social workers, and other school personnel responsible for drug prevention and intervention; (4) make participants more knowledgeable about local and regional drug prevention, drug treatment, and drug education resources; and (5) explain the Los Angeles County of Education developed model student substance-abuse database and tracking system to participants and encourage them to use it. Organizers met all five project objectives and the external program evaluator deemed the project successful. Participants also highly rated the training that they received. Included in this evaluation are seven appendices which feature copies of meeting agendas, resources, and samples of drug abuse surveys. (RJM)

I Teach What I Know: An Examination of Teachers' Beliefs about Whole Language.

Pub Date—Dec 92

Note—8p.; Paper presented at the Annual Meeting of the National Reading Conference (42nd, San Antonio, TX, December 2-5, 1992).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

Descriptors—*Classroom Techniques, Definitions, Elementary Education, *Evaluation Methods, Reading Research, Student Evaluation, *Teacher Attitudes, *Teacher Role, *Whole Language Approach

Identifiers—Teacher Beliefs Study, Teacher Surveys

Through an in-depth interview, a study investigated teachers' beliefs and understandings about language learning. Subjects were nine elementary school teachers from a suburban midwest school district where a whole language philosophy was beginning to become infused in the curriculum. Subjects were selected for participation based on the teachers' degree of involvement/experience in whole language instruction (MUCH, SOME, LITTLE) as determined by self report by the teacher, reports from administration, and documented training and participation in whole language. Interviews were transcribed and coded. Results indicated that: (1) the MUCH group talked about the teacher as facilitator, while the LITTLE group talked about the teacher as a director of the learning environment; (2) the MUCH group discussed instructional practices as embedded in the whole, where students as

readers/writers became members of the literacy club; (3) the LITTLE group discussed instructional activities that often focused on the skills needed by students as determined by the teacher; (4) the LITTLE group saw themselves as second-hand diagnosticians, while the MUCH group viewed assessment as an interactive process where the teacher highlights the literacy development of the child; (5) the LITTLE group offered simplistic definitions of whole language, while the MUCH group included in their definition, terms such as ownership, making connections, and facilitating natural learning; and (6) the SOME group expressed diverse opinions on all aspects of whole language. Findings suggest that the beliefs of the teachers fell into a continuum that could be considered a gauge of their understanding and beliefs about whole language. (Contains 19 references.) (RS)

Descriptors—Intermediate Grades, *Reading Achievement, *Reading Skills, *Reading Tests, Secondary Education, *Test Construction, *Test Content, *Test Format

Identifiers—*National Assessment of Educational Progress, Reading Management

This booklet presents the Reading Framework for the 1992 and 1994 National Assessment of Educational Progress (NAEP), which contains the rationale for the aspects of reading assessed and the criteria for the development of the assessment. The booklet notes that the new reading assessment examines students' abilities to construct, extend, and examine the meaning of what they read; assesses student performance in different reading situations; and includes special studies to examine other aspects of reading, including the fluency of students and their reading habits and practices. Chapters of the booklet are: (1) Development of the 1992-94 Reading Framework (with sections on steering committee guidelines and on considerations and principles); (2) The Design of the 1992-94 Reading Framework (with sections on a goal for reading literacy education; constructing, extending, and examining meaning; and constructing the assessment); and (3) Special Studies and Background Information (with sections on special studies of oral reading and response; portfolio and metacognition study; and with information for educational policy makers). Appendixes listing steering and planning committee members, and giving sample readings and test items for 4th, 8th, and 12th grades are attached. (RS)

Whole Language: A Survey of Language Arts Approaches in Cass County Michigan Secondary Schools.

Pub Date—10 Jul 94

Note—57p.

Pub Type—Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—High Schools, *Language Arts, Reading Research, *Teacher Attitudes, *Teacher Behavior, *Whole Language Approach

Identifiers—*Michigan (Cass County), Teacher Surveys, Teaching Research

A study investigated whether whole language principles had "seeped" into secondary language arts teaching in Cass County, Michigan by surveying teachers' attitudes. A total of 14 of the 15 language arts teachers in the four secondary schools in the county returned completed surveys. Results indicated that the language arts teachers (1) had approximately 20 years teaching experience; (2) had both undergraduate and graduate degrees; (3) had one or more hours of training in whole language and "somewhat" understood the concept of whole language instruction; (4) use the traditional approach to instruction, but use other whole language strategies as well; and (5) prefer a combination of tradi-

tional and whole language approaches in the classroom. Findings suggest that most teachers seemed willing to try new strategies but were unwilling to discard "tried and true" methods. (The survey instrument, cover letter, a table of data, and 17 figures of data are attached. Contains 18 references.) (RS)

Identifiers—Authentic Assessment, Ethnic Literature, Multicultural Materials

Organized with integrated teaching in mind, this book offers separate, annotated listings of resources for teachers, recommended literature by grade level and topic, multicultural book lists, and practical material for classroom use. The book represents an updated, expanded and revised section of a 1991 book, "Invitations: Changing as Teachers and Learners K-12," which shared educators' experiences in moving toward whole language and more authentic teaching, learning, and evaluating. The first section of the "Blue Pages" presents annotations of over 500 professional books (almost all published after 1991), journal articles, themed journals, journals, newsletters, and literacy extension resources (organized by subject area) that can support teachers in continued professional growth in teaching and learning. The second section presents annotated lists of recommended literature arranged by grade level (K-12) and supplemental lists (on topics such as wordless books, life stories, and bilingual Spanish books). The last section of the book presents lists of African American/Black Culture, Asian American/Asian Culture, Latino, and Native American books. Numerous appendices present teacher's guides, units of study, advice for communicating with parents, teacher self-evaluation, self-evaluation forms, approaches to teaching reading, reading strategies for unknown words, and examples of authentic assessment. Descriptors—Career Guidance, Career Planning, *Class Activities, College Students, *Critical Thinking, Higher Education, High Schools, High School Students, *Learning Strategies, Student Needs, *Study Skills, *Thinking Skills

Identifiers—*Learning across the Curriculum

Designed to provide students with an applied, portable, and transferable framework for integrating academic and career/occupational studies, this book uses a "whole learning" perspective to teach students to think, read, write, listen, speak, and problem-solve within the context of their academic and career subject matter. The book helps students make lasting connections among the worlds of knowledge, working, living, and achieving—providing students with learner-centered, lifelong intellectual and practical thinking and communication abilities. The book is divided into five parts: (1) How to Think Analytically; (2) How to Read Analyti-

cally; (3) How to Learn Analytically across the Curriculum (includes chapters on humanities, social studies, and sciences); (4) How to Write, Listen, and Speak Analytically; and (5) Managing Your College Career (developing good study habits). Over 125 analytical explorations in the book introduce, explain, and provide practice in whole learning. Appendix A contains templates for analytical displays and narratives; Appendix B discusses whole learning for speakers of English as a Second Language. (NKA)

The Thinking/Learning System: A Brain-Compatible Strategy for Effective Teaching of Higher-Order Thinking and Learning.

Pub Date—Jul 94

Note—13p; Paper presented at the International Conference of Thinking (6th, Boston, MA, July 17-22, 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports — Research (143)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Cognitive Style, *Critical Thinking, Elementary Secondary Education, Higher Education, Instructional Innovation, *Learning Strategies, Models, Teacher Role, Technological Advancement, *Thinking Skills

Identifiers—Conceptual Frameworks

The Thinking/Learning System is designed to provide students at all educational levels with learning experiences based on conceptual frameworks which transcend the limitations of content. The system was developed around four specific thinking skills (information gathering, critical thinking, decision making, and creative thinking) that are essential elements of effective thinking. Independent thinking is addressed through the freedom of choice and mode of expression allowed the individual. The role of the teacher is to guide and direct students to select appropriate and challenging experiences. The system enables teachers to cope realistically with the number and variety of learning materials available to students. The Thinking/Learning System was developed to give students the opportunity to develop the higher-order thinking skills and innovative techniques that will allow them to meet the challenge posed by a complex, technological world. (Contains 14 references and three figures illustrating aspects of the system.) (RS)

Teachers' Beliefs and Practices: Dissonance or Contextual Reality?

Pub Date—Dec 93

Note—16p; Paper presented at the Annual Meeting of the National Reading Conference (43rd, Charleston, SC, December 1-4, 1993).

Pub Type—Speeches/Meeting Papers (150) — Reports — Research (143)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Beginning Teachers, Elementary Education, Longitudinal Studies, *Reading Attitudes, Reading Research, *Teacher Attitudes, *Teacher Behavior, Theory Practice Relationship

Identifiers—New Teachers, Pennsylvania (Philadelphia), Teacher Beliefs Study

Third of a 4-part longitudinal study examining the unfolding reading cognition of novice teachers, a study focused on seven teachers during their first year of teaching in elementary schools in the Philadelphia metropolitan area. The teachers' reading beliefs and practices were identified using a variety of approaches including lesson plan review, informal discussions and a video or audio tape of classroom lessons or activities that the teacher felt exemplified his/her reading beliefs and practices. For five of the seven teachers, stated reading beliefs and actual practices were quite similar. Another teacher indicated that her current understanding of the reading process was "probably very warped" due to the context she found herself in as a teacher in an inner city school with limited resources. The other indicated that he did not have a reading philosophy because he had not been involved in the selection of the new reading program due to a change in position. The teachers also employed various aspects of the model developed as part of their preservice program to guide their decisions. Those teachers who viewed reading as a complex communication process with emphasis on meaning continued to do so, and the two teachers who viewed reading more as a process of decoding symbols continued to hold to this belief. (Contains 13 references.) (RS)

Document Not Available from EDRS.

Descriptors—Case Studies, Classroom Communication, *Classroom Techniques, Elementary Education, Foreign Countries, *Holistic Evaluation, *Language Arts, Models, *Parent Participation, *Student Evaluation, Student Needs, *Teacher Role, Theory Practice Relationship

Identifiers—Australia, *Negotiated Evaluation

Based on the idea that assessment and evaluation have become major concerns in elementary education, this book offers a solution for involving both children and parents in the processes of evaluation. Arguing for a program known as "negotiated evaluation," the book gives practical suggestions for implementing the program; looks at classroom organization; discusses parent interviews and reporting to parents; and considers the role of continual observation and evaluation in the day-to-day practices of the classroom. The book discusses how to enhance each child's development, how to help parents develop an understanding of their children's progress, and how to develop an appreciation of each child's needs. After a general introduction, chapter 1 presents the origins of negotiated evaluation, which takes as its model literacy evaluation in Australia. Chapter 2 outlines the model (pointing out that quantitative evaluation does not work in the primary classroom because "literacy is not a single, monolithic entity which can be represented numerically"). Chapters 3, 4, and 5 discuss, respectively, the teacher's role, parent involvement, and the children's role. Chapter 6 discusses interpretation of evaluation data, and chapter 7 presents a case study of one Australian school. The book contains numerous figures and concludes with an epilogue and a reference list. (NKA)

Identifiers—Controversial Materials, *Educational Issues, Pressure Groups, *Right to Read

Pointing out that censorship is undermining the goals of education and plaguing all areas of the curriculum, this collection of essays considers many areas in which students' right to read is being infringed. The collection offers thought-provoking perspectives on the methods used by protesters to remove books and materials from classrooms and libraries and outlines the rationales behind censors' motivations. The purpose is to help elementary and secondary teachers, administrators, and media specialists learn how to write rationales for textbooks and literature selections, and to help concerned citizens discover ways to take action against censors. The essays are (1) "Dimensions of Critical Reading: Focus on Censorship Elements" (J. S. Simmons); (2) "Critical Literacy versus Censorship across the Curriculum" (J. A. Whitson); (3) "Tactics Used to Remove Books and Courses from Schools" (E. B. Jenkinson); (4) "Censorship and the 'New Age'" (R. J. Marzano); (5) "Censorship in Schools: Three Case Studies" (M. R. Identifiers—Community Ties, Family Communication, *Family Literacy, Reading Motivation, *Shared Book Experience

Predicted on the idea that one of the best ways to support individuals' book sharing with a special child in their lives is to establish a family book sharing group with people in the community, this book offers specific suggestions for organizing such a group and provides plans for at least six gatherings. According to the book, this book sharing practice allows parents to trade ideas with others about books they have enjoyed reading and improves family communication in general. Following a foreword which gives guidelines for organizing a group and answers some pertinent questions, the book is divided into six "gatherings": Gathering 1—Getting Started; Gathering 2—Motivating Children to Read; Gathering 3—Reading Aloud and Book Conversations; Gathering 4—More Book Sharing Strategies; Gathering 5—Looking Back and Looking Forward; and Gathering 6—Celebrate Success. A list of further resources is appended. (NKA)

Descriptors—*Academic Achievement, Affective Behavior, *Cognitive Style, Junior High Schools, Literacy, Reading Research, Sex Differences, *Student Motivation, Writing Research

Identifiers—*Middle School Students

A study examined the relationships among early adolescents' motivational goal orientations (task and ability focus), cognitive processing strategies, self-efficacy, and expectancy-value for literacy activities. These factors appear to vary by gender, academic status (special education, at-risk, and not-at-risk), and grade level. Subjects, 678 middle-school students from a largely "blue collar" district near a major city in the midwest, completed a self-report questionnaire. For students who are learning-focused, findings support use of deep-level cognitive processing strategies such as monitoring of comprehension, paraphrasing, and summarizing; students who are ability-focused tend to use surface-level cognitive processing strategies such as memorization, copying, and rehearsal of information. The relationships between these variables and performance on several standardized measures of language and reading achievement were also measured. Results indicated that (1) self-efficacy was the most powerful predictor of success; and (2) those students who valued literacy activities and were learning-focused tended to do worse on some standardized tests than their peers. Findings suggest that educators should place greater emphasis on the relationships between motivational and affective factors with strategy usage, rather than referring to gender and academic classifications such as "at risk" or "special education" when considering the ways in which adolescents approach reading and writing activities. (Contains 12 references and five tables of data. An appendix presents a list of the constructs and items of the students' scales and four figures of data displaying the motivational, affective, cognitive, and achievement-related belief scales.) Descriptors—Attitude Measures, Content Analysis, Elementary Education, *Literacy, *Parent Attitudes, *Reading Habits, *Reading Materials, Reading Research, *Student Attitudes, *Teacher Attitudes

Identifiers—*Book Clubs, Descriptive Research

A series of three studies investigated how school book clubs fit into the elementary language arts curriculum and how they contribute to children's literacy. Study 1 interviewed 71 administrators, teachers, and parents by telephone and also interviewed parents and students in urban, rural, and suburban schools in different parts of the United States. Study 2 examined the contributions of 12 children in 6 elementary schools over a period of one year. Study 3 analyzed the entire offerings of the three major book clubs (Scholastic, Troll, Trumpet). Results from all three studies indicated that (1) the school book clubs played a large role in the provision of books and other materials to children, teachers, and parents; (2) while book clubs still regarded their primary purpose as supplying children with books and other material, they appear, in the past few years, to have become a major supplier of literacy materials to classrooms; (3) some teachers and parents complained about the presence of what

they call "junk" and "fad" material; (4) some teachers were uneasy about the intrusion of commercial enterprises into their classroom; and (5) lack of parental funds was a major problem for classroom teachers. Results also indicated ways in which book clubs played a role in children's literacy growth: book clubs were putting books directly into the hands of large numbers of children across the country; and book club books were used to promote literacy development among all children in the class, not just those who participated in the clubs. (Contains 12 references, 22 tables, and four figures of data.) (RS)

Descriptors—Concept Formation, Educational Environment, High Schools, Reading Research, Science Curriculum, *Science Education, *Scientific Concepts, *Secondary School Science, Student Motivation, Teacher Behavior, Textbook Research, *Text Structure

Identifiers—*Conceptual Change

A study examined the role of science texts in classrooms and sought to determine how cognition, attitude/motivation, and socioeconomics affect conceptual change learning from texts in those classrooms. Subjects were students in three high-school science classes, one at each level of instruction: general, regular, and advanced. The classrooms were at a school in a university community located in the southeastern United States, and the instructors were experienced in teaching science. Researchers observed classes and documented classroom procedures in field notes and on videotapes. Results indicated that, although students and teachers rated texts negatively, and texts appeared to be ineffective in bringing about conceptual change, texts did play a central role in instruction. Teachers based lectures and labs on texts, and in some cases, used texts as confirmation of information gained from lectures and labs. Findings suggest that the relevance of physics to career goals might be the most important factor in students' willingness to learn counterintuitive concepts in physics. (Contains 14 references and three tables of data.) (Author/RS)

Identifiers—*Literacy Across the Curriculum

This report explores three models for the relation of literacy to larger curricular concerns: a Skills Model, an Instrumental Model, and an Inquiry Model. The paper suggests that after two decades of intense research on reading, a number of teachers and researchers are beginning to ask whether a narrow focus on reading distorts the view of learning and whether a curriculum centered on reading constrains what can be done in the classroom. Because of these concerns many educators have turned to literacy-across-the-curriculum approaches. The paper explores in some depth the Inquiry Model's conception of the role of reading and writing within learning. A possible realization of the model presented in the paper is suggested through a detailed look at one class in an undergraduate preservice teacher preparation program. Contains 44 references, 4 notes, and 5 figures illustrating various models of learning.) (RS)

Identifiers—*Journalism Research, *Multimedia Technology

Anticipating a possible future method of newspaper design (including multimedia content) and delivery, a study examined the interface among people, modality (paper, computer, multimedia), and three types of news story (news, sports, entertainment). The "primacy of print" theory (which predicts that information will be recalled better when presented in print than in other media) was extended to consider a multimedia factor. Subjects, 55 undergraduate students enrolled in journalism classes and 20 university library employees recruited as "expert" searchers, completed recall measure after reading and/or listening to news stories presented in a variety of formats. Results indicated (1) no effects for recall as a function of modality; (2) a significant effect for reading time as a function of modality, with reading time higher for the multimedia condition followed by computer and paper; (3) story type was a significant factor, with the entertainment story having the shortest reading time followed by news and sports; and (4) the news story had the lowest recall score, followed by sports and entertainment. Findings do not support the primacy of print theory. Future studies may be designed to test interactions between variables such as modality and story type. (Contains 30 references, three tables and eight figures of data, and four notes.) (RS)

Identifiers—*Journalism Research, *Multimedia Technology, *News Stories, Technology Utilization

Anticipating a possible future method of multimedia newspaper design and delivery, a study examined the interface among people, modality (paper, computer, multimedia), and three types of news story (news, sports, entertainment). Subjects, 55 undergraduate students enrolled in journalism classes and 20 university library employees considered as "expert" searchers, were asked to search for specific information from three different stacks of stories, each stack containing four stories. The search path was recorded and evaluated to determine the number of search errors. A significant effect was found for search time as a function of modality. The multimedia condition had the longest search times, followed by computer and paper. Yet, only 13% of the subjects chose to view the digitized video as a search strategy. Story type was a significant factor. The sports story had the shortest search time, followed by news and entertainment. The sports story had the fewest search errors, followed by news and entertainment. Findings suggest that locating information in an electronic environment seems to take longer than finding information on paper, and that users need to be convinced that searching digitized

audio and video may be a productive strategy. (Contains 81 references, 3 tables, 11 figures of data, and 4 notes.) (RS)

Descriptors—*Evaluation Methods, Higher Education, Media Research, News Writing, Pilot Projects, *Recall (Psychology), Reliability, Schemata (Cognition), *Text Structure, Validity
Identifiers—Journalism Research, *News Stories, Text Factors

This paper proposes a systematic method of measuring subjects' free recall from printed hard news stories, based on schema theories of cognition. Citing literature that demonstrates the role of text structures and text schemas in the recall of written text, the paper suggests incorporating these processes into the assessment of recall of news. In the paper, the first steps toward developing such a measure are taken; the procedure hinges on parsing stimulus and response passages according to a schematic news structure. A pilot study of the instrument's reliability and validity (involving 69 undergraduate students) is included in the paper, although further work needs to be done to refine the instrument. Contains 63 references and 2 figures illustrating examples of text structures. The comprehension measure is attached. (Author/RS)

Information Recall of Four Newspaper Elements among Young Readers.

Pub Date—Aug 94

Note—26p; Paper presented at the Annual Meeting of the Association for Education in Journalism and Mass Communication (77th, Atlanta, GA, August 10-13, 1994). Reduced and photocopied reproductions of newspaper front pages in the appendix may not reproduce clearly.

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—High Schools, High School Students, Layout (Publications), *Newspapers, *Reading Comprehension, Reading Research, *Recall (Psychology), *Text Structure

Identifiers—Illinois, Journalism Research

A study examined the ability of 204 students in nine Illinois high schools to process and recall information contained in four newspaper elements: story texts, graphics, index boxes and pullout quotes. Students were randomly assigned to read the front page of one of 20 newspapers and answer questions based on information in the stories. Students generally recalled information in pullout quotes most efficiently and information in graphics least efficiently. Overall, subjects did well when information was repeated in stories and other elements (such as pullout quotes). Graphics, on the other hand, may have been too complex for subjects to process efficiently. (Contains 22 references and three tables of data. Examples of three newspapers are attached.) (Author/RS)

Hilly, Patricia
Developing an Early Intervention Reading Program for the Primary Grades of a Public School.

Pub Date—94

Note—59p; M.S. Practicum, Nova Southeastern University.

Pub Type—Dissertations/Theses - Practicum Papers (043)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Cooperative Learning, *Early Intervention, *High Risk Students, Primary Education, Program Effectiveness, Public Schools, Reading Achievement, Reading Aloud to Others, *Reading Improvement, *Reading Programs

A practicum analyzed possible alternatives to identify the most successful reading intervention strategies before a child's development and learning is seriously or permanently impaired. K-3 students were identified for an early intervention reading

program in a public school setting, through the Students Study Team, which was expanded to include specialists, parents, and categorically funded staff, so that students could receive reading intervention long before they had failed sufficiently to require placement in special education. Students read to, and were read to, by teachers and participated in cooperative learning groups for about seven weeks. Although the program took place at the end of the year, staff, parents, and children felt the program was successful and merited expansion from K-3 to K-12 for the following year. (Contains 44 references. Appendixes present pre- and posttest instruments, a parent survey, a calendar of activities, and a description of performance levels for reading.) (Author/RS)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Academic Achievement, *Black Students, Brain Hemisphere Functions, *Lateral Dominance, *Racial Differences, *Reading Comprehension, Reading Research, Secondary Education, *Sex Differences

Identifiers—African Americans

Replicating research completed in 1986, a study determined the relationship among cognitive laterality, gender, and reading comprehension for African-American students, as well as gender differences in cognitive laterality and in reading comprehension. Subjects, 40 African-American males, 41 African-American females, 12 White males, and 17 White females ages 16-18 and from the same school as the earlier study, completed a standardized reading test and a cognitive laterality battery. Results, similar to those of the earlier study, indicated no relationship between reading comprehension and cognitive laterality for either females or males. Nor were there any differences between the reading scores of females and males. However, the laterality of the females was significantly different from the laterality of the males, with the females showing a left-laterality preference; the African-American males only marginally favored right laterality. Results of a post hoc analysis of variance for African-American and White students indicated significant racial and gender differences in laterality and a significant racial difference in reading comprehension. (Contains 28 references and 2 tables of data.) (RS)

Carthey, Joseph H.
Relationships between Learning Styles and Academic Achievement and Brain Hemispheric Dominance and Academic Performance in Business and Accounting Courses.

Pub Date—Nov 93

Note—75p; M.S. Thesis, Winona State University.

Pub Type—Dissertations/Theses - Masters Theses (042) — Tests/Questionnaires (160)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Academic Achievement, *Brain Hemisphere Functions, Business Education, *Cognitive Style, Community Colleges, Educational Research, *Lateral Dominance, Study Skills, Two Year Colleges, Two Year College Students

Identifiers—Northeast Iowa Community College

A study determined if relationships exist between learning styles and academic achievement and brain hemispheric dominance and academic performance in the courses of principles of management, business law, intermediate accounting, and principles of economics. All second-year accounting students (64 students) at Northeast Iowa Community College from 1988 to 1991 took the Kolb Learning Style Inventory to determine their learning styles and the McCarthy Hemispheric Mode Indicator to discover whether students were right-brained, left-brained, or whole-brained. Academic achievement was measured by the students' final grade point averages earned in the courses. Direct and inverse tendencies seemed apparent between particular learning styles and academic achievement. In brain dominance, direct and inverse tendencies appeared to exist be-

tween certain brain hemispheric modes and academic achievement. Findings suggest that post-secondary business and accounting instructors should consider testing their students to determine students' learning styles and brain hemispheric dominance so that the instructors may suggest study approaches and methods that may increase academic achievement. (Contains 16 references and nine tables of data. The learning style inventory and brain hemispheric mode instrument, and a description of four learning styles are attached.) (Author/RS)

Descriptors—*Beginning Reading, *Class Activities, Creative Expression, Literature Appreciation, Primary Education, Reading Writing Relationship, Thematic Approach, *Whole Language Approach

Identifiers—*Nursery Rhymes

This book, which uses nursery rhymes as its literature base, represents a non-threatening approach to beginning reading for children in kindergarten through grade 3. The book uses a variety of cross-curricular activities which are built around four familiar nursery rhymes. The book's introduction describes how each rhyme may be used over a 5-day period, offers suggestions for developing additional units using any nursery rhyme, and includes an index of the skills taught in each activity. Useful background information is provided with each unit, along with descriptions of the activities and the concepts they develop. Blackline masters for the activities are included at the end of each unit. An appendix offers additional rhyme activities; scheduling, evaluation, and record-keeping tips; and sample letters to parents. (NKA)

Identifiers—*Indiana, Portfolio Approach

The Indiana State Assessment System, new for the 1995-96 school year, will emphasize student-constructed answers in both language arts and mathematics in grades 3, 4, 8, 10, and 12. Optional classroom performance assessments will be available for grades 2, 5, 6, 7, 9, and 11. Local diagnostic tests will be available at the same grades as the grades for the mandated assessments, and classroom portfolios will be required at all grades. The assessment system is a carefully planned set of assessments that work together to provide the information needed for understanding outcomes, planning instruction, and helping learners to become assessors of their own progress. Professional development will be needed to assure the assessment program's success. Whatever resources the state provides, Indiana school districts must work to expand those resources to assure that teachers gain the skills and understandings they need to build the program's success. Descriptors—Children Literature, Classroom Techniques, Definitions, Elementary Education, Multicultural Education, Parent Participation, *Parent Teacher Cooperation, Phonics, *Reading Instruction, *Reading Research, *Reading Writing Relationship, Research Utilization, *Student Evaluation, *Whole Language Approach

Written to focus attention on the emerging philosophy and practice of whole language, this book serves as a "portfolio" for the graduate or undergraduate student who is interested in pursuing ideas, considering issues, and thinking about problems related to whole language. The 48 selected articles from 24 major education journals presented in the book provide a broad view of what professionals are thinking and experiencing with whole language. Each chapter includes background information to help focus on pertinent ideas, and key questions, discussions, and activities end each chapter. Chapter 1 (Understanding Whole Language) presents articles by authors such as Dorothy J. Watson, D. Ray Reutzel, and Judith M. Newman. Chapter 2 (Whole Language versus Traditional Reading Instruction) includes articles by Gayle Glidden Flickinger, Maureen Siera, and Jeannette Veatch. Chapter 3 (Instructional Considerations) presents articles by James F. Baumann, Steven A. Stahl, and Gerard G. Duffy. Chapter 4 includes articles on using literature with whole language by Bernice E. Cullinan, Maribeth Henney, and Nancy Larrick. Chapter 5 includes articles on the "writing connection" by Martha Grindler, Julia Shinneman Pulpis, and Linda DeGroff. Chapter 6 presents articles on whole language in the multicultural classroom by authors such as Hwa-Ja Lee Lim, Beth M. Arthur, Pamela J. Farris, and Selina J. Ganople. Chapter 7 includes articles on content areas and whole language by Dixie Lee Spiegel and Elfrida H. Hiebert. Chapter 8 includes articles on assessment by Sheila Valencia, Jane Hansen, and Wayne M. Linek. Chapter 9 offers articles on teachers and parents with whole language by Sean A. Walsmley, Jill Burk, and Philip Vassallo, among others. Chapter 10 includes articles on "research signposts" by Kenneth S. Goodman, Pamela J. Farris, and Vincent E. Hamman. (RS)

Document Not Available from EDRS.

Descriptors—Classroom Techniques, Elementary Secondary Education, Evaluation Methods, Higher Education, Readability, *Reading Achievement, *Reading Comprehension, *Reading Difficulties, *Reading Writing Relationship, Spelling, *Student Evaluation, Study Skills, Writing Evaluation

Identifiers—Strategic Reading

Intended for classroom teachers at all levels and for undergraduate students in teacher education programs that included a practicum or field experience, this book provides both a guide and a resource for meeting the needs of readers experiencing difficulty. This third edition continues to provide teachers with techniques for recognizing readers with difficulties; identifying readers' specific strengths and needs; and planning instruction that takes into account the processes needed to perform a certain reading task. A conscious effort was made to present techniques appropriate to, or easily modified for, any grade level from primary through secondary school. One change in this edition is the inclusion of writing as a means of supporting reading development; more children's literature is also used. Chapters in the book are: (1) Fundamental Aspects of Corrective Reading; (2) Analytic Teaching: Meeting All Students' Instructional Needs; (3) The Analytic Process: Its Nature and Value; (4) Reading-Related Factors; (5) Assessing and Evaluating Reading Performance with Indirect Measures; (6) Assessing and Evaluating Reading Performance with Direct Measures; (7) The Reading/Writing Connection; (8) Word Recognition; (9) Reading Comprehension: Foundations; (10) Reading Com-

prehension and Strategic Reading for Narrative Text; (11) Study Skills; (12) Strategic Reading for Expository Text; and (13) Developing Reading of Linguistically Diverse Students. Contains over 600 references. Appendixes discuss text readability, instructional environments, gathering affective information, stages in spelling development, scoring systems for writing, books to build self-esteem of students in multiethnic settings, Fry's first 300 instant words, and useful phonics generalizations. Descriptors—*Correctional Education, *Correctional Institutions, *Educational Benefits, Literacy, *Role of Education
Identifiers—*Indiana

When people think about "correctional education," they typically think about only the kind that is aimed at inmates, forgetting that the teachers need educating too; and that line officers and department of corrections commissioners and sheriff's deputies need career-long training too; and the general public, which tends to be more than a little knee-jerk on these issues, needs enlightening too. Education works—not only for the general public but for people in prisons and jails too. Time and again, even when the results of this or that study were negative, of this or that project were disappointing, nevertheless, the well-nigh universal opinion of the best minds in the field is that education in prisons and jails works—the "right kind" of education works to lower recidivism; to make a facility a more humane and more tolerable place to live and work, not only for the inmates but also for the officers, staff, and everyone else; the "right kind" of education works to lower the costs of incarceration, to lessen the level of violence and to ease the tax burden on us all, and eventually to rehabilitate many people. The members of this conference have gathered together in their common belief in education to make something special of 1995—a Year of Learning about Prisons and Jails in Indiana. (TB)

Identifiers—*African Americans, Role Shift, *Writing Style

An unconventional writing activity like correspondence between students can, under favorable social circumstances, encourage some college composition students to discover and employ literate, or decontextualized, writing strategies. The African American student will often write, to borrow James Britton's terms, from the standpoint of the "participant" rather than the "spectator"; that is, he or she will write in an immediate, choppy style, without due regard for the reader, rather than in a more complex syntactical structure intended to make reading easier for his or her reader. A study of 12 college writers at a historically Black college exchanging letters with high school students of the same race and socio-economic background showed that students moved naturally from the participant stance to the spectator stance under the right conditions. The participants in the study broke down into basically two groups: those who experimented with the social roles they adopted in their letter writing and those who did not. The former group moved gradually toward the spectator stance regardless of

the quality of their relationship with their correspondent. The latter group, however, moved toward the spectator stance only to the extent that their relationship with their correspondent remained positive. A case study of one student suggests further that for at least some students experimentation with social roles helps them move toward the spectator stance. (Contains two tables, two graphs, and copies of student letters.) (TB)

Descriptors—Adults, Audience Awareness, *Basic Writing, Higher Education, Job Skills, *Writing Achievement, *Writing Attitudes, Writing Instruction, Writing Research

Identifiers—*Basic Writers, Francis Marion College SC, *Workplace Literacy, Writing Contexts

A study examined the writing practices, attitudes, and beliefs about the importance of writing at work of "basic" writers and "strong" writers. Subjects were graduates of Francis Marion College for the years 1984 to 1989. Questionnaires were returned by 119 of the 182 basic writers (identified through placement in remedial English, repetition of required English courses, and lower-than-C averages in required English courses) and by 47 of the 62 strong writers, who earned only A's in required English courses. Results indicated that: (1) most respondents in both groups had sought majors and jobs for reasons unrelated to writing ability; (2) most frequently done types of writing were short and repetitive; and (3) most of the former basic writers believed they were writing adequately for their jobs and felt satisfied with their ability. Examination of writing samples indicated that the former basic writers' purposes for writing are inseparable from the subject matter, audience, writer's persona, and the resulting text. Findings suggest that: (1) writing teachers need to reduce as much as possible the artificiality of the writing class and provide student writers with real audiences and real purposes for writing; and (2) that freshman English courses should not be used as screening devices which cull weaker writers from college during the first year. Writing teachers need to remember that they see only one cross-section of their students' overall abilities. (Two tables and three charts of data, a figure illustrating J. Kinneavy's model of academic communication, a model of workplace writing are attached.) (RS)

Identifiers—*African Americans, *Rhetorical Stance, Text Factors

Drawing on Mikhail Bakhtin's "Dialogic Imagination" and Henry Louis Gates' "Signifying Monkey," an analysis of an African American student's essay reveals codes that are distinct to African Americans. Bakhtin's theory alerts scholars to the extent to which language is a social phenomenon. Ambiguous and heteroglossic, it reflects the ideology, world view, and sense of culture and history of the speaker. A response to Alice Walker's "In Search of Our Mother's Gardens," the student text, "My Mother's Garden," employs several African American tropes: (1) cultural ideographs, such as

"obstacles," "civil rights," and "slavery," all of which have special meaning within the African American community; (2) the talking book, a tradition in which the illiterate speaker must become literate to prove her humanity; (3) call and response, a process through which the student establishes a multi-voiced discourse and signals an intertextual relation between her text and Walker's; (4) signification, a term defined within the African American community as a "mark," an intended victim of a swindle or a taking notice or heed of; and (5) repetition, which is used for emphasis. The point here is that the concept of an academic essay needs to be expanded to make space for different kinds of literacy including that of the African American community. (Student essay is appended.) (TB)

TextProF: A Metacognitive Intervention To Foster Students' Writing Ability.

Pub Date—Apr 94

Note—14p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994). Very small print in some figures may affect legibility. Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Grade 10, High Schools, *Instructional Effectiveness, Intervention, *Metacognition, *Writing Achievement, *Writing Improvement, *Writing Processes, Writing Research

Identifiers—Text Factors

A study examined the effectiveness of a metacognitive intervention that concentrated on eight sub-processes of writing and on executive procedures according to an "Orchestra Model" of text production. Subjects, 90 tenth-grade students, participated in the intervention which lasted for about six months and consisted of about 60 lessons. The intervention consisted of process-oriented and product-oriented training. A series of seven tests and evaluation procedures were used before and after the intervention. Results indicated that subjects in the intervention group paid significantly more attention to the analysis of the writing task and the construction of semantic deep structure. Other improvements concerned the imposition of a chronology on the semantic deep structure; the repertoire of external representation means for representing intermediate results of the text production process; and the evaluation of the evolving text. Subjects of the intervention group not only possessed more elaborate declarative knowledge, but they applied it in real writing situations as well. (A figure illustrating the orchestra model of text production and four figures of data are included.) (RS)

Identifiers—Agency Theory, English Teachers, Postmodernism

In attempting to reach their students, college English teachers must take seriously the postmodern sensibility as it is oriented to a culture of commodification. Instructors should face this commodification head-on, using it to show students that they have agency as consumers. This forthright acceptance of the 1990s orientation does more to help teachers reach students than do other theories such as that of Gerald Graff in "Beyond the Culture Wars." Beneath the superficial differences in musical tastes, clothing and hairstyles, the student today, Graff implies, is basically the same as Graff himself was at that age. In "A Constrained Vision of the Writing Classroom," Louise Wetherbee Phelps criticizes Sharon Crowley for her theories which weaken "our conception of students as agents of their own future." Graff and Phelps notwithstanding, today's

students are fundamentally different in at least one respect: they do not and cannot have the sense of agency that previous generations have had because the political climate is fundamentally different. If students resist traditional "belles lettres" or post-modern theories of empowerment—as Graff and Phelps suggest—this resistance is substantial; it is rooted in a sense that neither system will provide them with agency. However, instructors who acknowledge the real constraints of commodity capitalism might help students to use this culture to their advantage. Using a Taster's Choice television ad to discuss "Dover Beach" would be one approach for teachers. (TB)

Identifiers—Departmental Policies, *Faculty Attitudes, *Professional Concerns

Women who wish to assume full voice in their writing have no choice but to raise questions regarding their status and the status of creative writing within the academy. Tillie Olsen and Elaine Showalter have documented the bias in texts taught at the university in which women have little place, if at all. The effects are devastating: if the voices of other women writers have been neglected, the beginning writer is likely to doubt her own voice as well. Small wonder then that both Susan Griffin and Olsen refer to "all women who write" as survivors. The woman creative writer faces an especially difficult task because creative writing is devalued in English departments. Having attained some degree of professional success outside the academy, the woman creative writer finds in graduate school that the work she does—the fiction and poetry that have earned her place—is by its very nature suspect, regarded as intellectually "soft." Traditional academic study-theory, empirical research—is considered essential, the arts supplementary. Creative work is reduced, then, to an "optional" discipline. As some of the same observations have been made about the field of composition, it is useful to compare the two. Both are concerned with what are traditionally regarded as "feminine" principles—intuition, emotion, self-expression. It must be acknowledged that it is no accident that these particular fields of study have assumed the low hierarchical spaces taken for granted within education. (TB)

Identifiers—*Communication Behavior, Educational Issues, *University of Hawaii Hilo

Because of her unfamiliarity with the culture, an experienced creative writing instructor in her first year of teaching on the big island of Hawaii decided to use the standard writing workshop model. The University of Hawaii Hilo draws a diverse mix of students, returning students, and local students who speak Creole. Some students were uncertain if their dialect was appropriate for the classroom, some were taught not to speak until spoken to, some do not relate to the idea of the individual taking responsibility for the creative work they do, and some from oral cultures were suspicious of writing. The lan-

guage of many of the local students was infused with metaphor, local language, and poetry. The richness of their language sometimes makes it difficult as a reader to know whether a given piece of writing counts as creative writing. The instructor conducted a pilot study in which members of the English department and creative writing and advanced composition students responded to questions concerning the line between creative writing and expository writing. Faculty members defined the distinctions between the two types of writing and offered no metaphors for the distinction. Students were less genteel in their definitions but offered many metaphors. As classrooms become more culturally diverse, educators can no longer make assumptions about what is being said, heard, or written. (RS)

Identifiers—Trade Books

This article reports that curriculum experts see some slow but significant shifts in thinking regarding the role of literature in the K-12 curriculum. The article first discusses changes in elementary classrooms, such as the use of "real" literature in the form of trade books. Also considered is the call for new basal readers or content changes in older readers to reflect new views on the teaching of reading, such as the whole language approach. California has been successful in using literature throughout the curriculum. A continuing trend at all levels of education—elementary, middle, and secondary—is to broaden the scope of the literature curriculum to reflect diverse points of view (especially multicultural) and more contemporary offerings. One of the reasons for making a broader range of literature available to students is to increase the chance that they will "engage" or "connect" with the literature. This is an outgrowth of the widespread interest among teachers in reader response theory. Teachers have taken an eclectic path regarding the teaching of literature: organizing the curriculum around traditional genres, chronologies, or themes; using reader response techniques to foster student involvement; and relying on traditional techniques for studying individual texts. The article quotes Arthur Applebee, who calls for a well articulated, overall theory of the teaching and learning of literature. (NKA)

Identifiers—*Dialogic Communication, Trade Books

Children's understandings about people of color are enhanced when they have opportunities to dialogue. Similarities and differences between people can be identified, appreciated, and celebrated. Jerome Bruner, among others, has indicated that stories lure readers into thinking that what they are receiving is a transparent description of the real world; therefore educators must be careful in selecting a balanced and authentic sample of books about

people of all races, ethnic conditions and cultures. All children need to see themselves as authentically and positively reflected as part of humanity. As multicultural literature comprises only about 2% of all books written for children, however, educators may find it difficult to find literature appropriate to these purposes. Books that depict more than one race interacting are particularly hard to find. "Subject Guide to Children's Books in Print" (R. R. Bowker Publishers) and "Collected Perspectives" (Christopher Gordon Publishers) are two helpful resources. An important part of teaching multicultural literature is encouraging dialoguing about that literature before, during, and after the reading. This dialoguing could take several forms: (1) spontaneous whole-class input after listening to a story or while looking at illustrations; (2) literature study groups; (3) individual conferences; (4) journaling; (5) opportunities for children to respond to characters by recording messages on tape; (6) improvised role plays based on situations from the book; and (7) play writing based on situations from the book. ("Overlays") are included, as well as small group activity sheets.) (TB)

Identifiers—Educational Issues, Multicultural Materials, Response to Literature, Teaching Research

An ongoing study for the National Research Center on Literature Teaching and Learning, conducted by Alan Purves, Sarah Jordan and others aims to identify the problems and challenges facing teachers and students of culturally diverse texts. It is also trying to determine how best to incorporate multicultural literature into the curriculum, grades 7 through 12. Secondly, the project documents some of the solutions teachers and students have come up with. The first part of the study consists of two phases: (1) interviews with teachers and students from schools ranging in socio-economic makeup, size and geographical location to determine what they have been reading both in and outside of class; (2) a multiple choice test asking students to read and respond to multicultural texts. Results have shown that multicultural texts occupy a very minimal place in most curricula, and that students do not generally read for cultural information. In some cases, in fact, they resist multicultural texts. When they like the texts, it is because they have a good ending or the story elicits their sympathy for the characters. The focus of the research in the third and fourth years concerns the ways in which multicultural texts can be taught. The researchers suggest that curricula should include the teaching of cultural responses as well as cultural literatures. Students should be helped to be made aware of the diversity of texts and approaches to texts in this society. (TB)

R1E FEB 1995

Anne Haas Dyson's concept of the "child collective" and Colette Daiute's concept of "youth genres" can be useful observational frameworks for better understanding classroom dynamics. In studying classrooms where children are given opportunities to collaborate, Dyson's "child collective" identifies those behaviors that children use to express their own identity in classrooms, which allow children the freedom and flexibility to communicate and interact freely. Similarly, Daiute observes that children have their own means of communicating among themselves, which include the following approaches: (1) playfulness; (2) experimentation and approximation; and (3) affection (i.e., raising of voices, giggling). In observing their own classrooms, teachers will notice that their students indeed have their own means of communicating among themselves. For instance, one group of kindergarten students who were playing a detective game had developed "secret files," which were coded so that only they could read them. A number of transcribed conversations among students furthermore shows them identifying and sharing common problems as "kids." The challenge to teachers is to structure classrooms so that students have the opportunity to use exploratory language and to construct knowledge. In an important study, William Corsaro emphasizes the importance of teachers setting up boundaries within which a peer culture can develop. (TB)

Identifiers—*Portfolio Approach, State University of New York Coll at Fredonia, Writing Contexts
An instructor of an undergraduate literacy methods course included a portfolio as a component of assessment. Based on a review of the literature and the elements of the portfolio assessment program used in the General College Program at the State University of New York College at Fredonia, the instructor adapted the portfolio process for her course. Students were given a draft of the guidelines for portfolio content and were instructed to make an effort to develop their own portfolios according to personal needs and interests. The first entry in the portfolio was a standard "entry paper" in which students explored past learning experiences, the relevance of these past experiences, and personal goals and expectations for the course. Students were also asked to include a written reflection elaborating their work process for each work sample assigned throughout the course. The final component of the portfolio is a reflective assignment which gives students the opportunity to take stock of what has been learned. Portfolios helped the instructor to "de-center"—to step away from her own perspective as an instructor. Reading the portfolios, the instructor became aware of how the course was influencing students. Identifiers—California (San Francisco Bay Area)

A qualitative study, presented in the form of an analytical narrative, examined children's symbolic and social use of superhero stories—popular media stories that vividly reveal societal beliefs about power and gender, which are themselves interwoven in complex ways with race, class, and physical demeanor. A second-grade classroom in an East San Francisco Bay K-3 school located in the south central part of an urban area and serving a population diverse in race and social class was observed for three months. Through the writing and acting of stories as part of "Author's Theater" (an optional activity during daily writing time), the children let each other witness their imaginations at work and then raised issues about who plays whom in whose story. The dialogic processes thus enacted allowed more complexity in the rigid images of gender relations and of glorified power. There is no simple classroom procedure that will allow children to achieve some sort of critical consciousness and a world of greater imagined possibilities for all. But there are processes, rooted in the social lives and play of childhood, that can help children deal with the contradictory pressures of growing up in a multicultural society where power is not equally distributed. Contains 20 references and 15 notes. An appendix listing the sex and ethnicity of the second-grade children is attached. (Author/RS)

As part of a larger project, a ninth-grade class participated in a year-long exchange of writing with students in an inner-city London classroom. The larger project involved 10 San Francisco Bay Area sixth-through ninth-grade classes exchanging writing with nine inner-city London classes and a Swedish class. Students and teachers in each of the 10 paired classrooms planned a number of writing activities which formed units of work. Some units were completed in a few days; others took months. Students wrote substantial pieces for a distant but real whole-class audience, and exchanged writing. The paired classes worked together to make their writing programs center on the exchange activities, and paired teachers worked collaboratively to decide on parallel topics for writing. The ninth-grade case study classroom was chosen for detailed study because the teacher turned over her entire writing program to the exchange; she and her students (mostly students of color with a long history of doing poorly in school) constructed the exchange collaboratively; and most of her students became highly involved in their writing. Students were interviewed and writing samples were collected. The teacher created a warm and caring community in which students felt comfortable with one another; she allowed different students different ways into learning; she provided support for the students when the British writing arrived; and she took advantage of opportunities to promote metacognitive control. (Contains three writing samples and excerpts from student interviews.) (RS)

Identifiers—Great Britain

A study examined national examinations in Britain and their effects on what and how students learn. A national questionnaire was completed by 695 teachers across grade levels and 702 of their students at the secondary level in both the United States and Great Britain. Observations were conducted in eight English/language arts classrooms in the two countries, across the equivalent grades 6-9. Two case study classes, one in the United States and one in England, were paired and students exchanged their writing with one another for an entire academic year. Observations were conducted in 1987 and 1988, when the national examination system was in a state of flux. The exam classrooms had to adhere to requirements that inhibited the teachers' abilities to build a coherent curriculum with their students and inhibited the amounts and kinds of writing the students did. The high stakes of the examiner audience and the teachers' and students' perceptions of the kind of writing that was appropriate for the exams constricted how and what students wrote. Students in the exam classes, unlike the groups of younger British students who had no exams and unlike their United States partners, showed real involvement in their writing only when they were not writing for the examiner, which was rarely. The British examination system, in 1994, has changed to include more emphasis on terminal exams and less emphasis on portfolios or coursework. Findings suggest that the path to curricular reform through examinations, though tempting, remains elusive. (Contains 10 references.) (RS)

Identifiers—Alternative Assessment, Authentic Assessment

In the mid-1980s, partly through new developments in curriculum and instruction, a new assessment option has arisen under the banner of alternative assessment. The basic idea appears in several guises: "authentic assessment" (implying that standardized tests are not authentic), "performance tests," and "portfolios." The goal of writing portfolios is to provide an opportunity for a richer, more authentic assessment of their achievements, to show their potential given adequate time and resources. A survey of a broad array of portfolio practices around the country finds that: (1) the portfolio approach is energizing the professional standing of classroom teachers; (2) respondents showed a distaste for evaluation; and (3) teachers had little concern about technical matters like validity and reliability. Individual teachers interpret the portfolio concept quite differently in different settings. If portfolios are taken seriously, most students react seriously. One way to connect parents and schools is to place the students in a central role through the portfolio. Barriers to alternative assessments are substantial: time, money, motivation, and institutional support. The greatest hope for realizing the promise of portfolios may spring from the local school and the classroom teacher. Two caveats need to be observed: assessment practice and policies should be consistent for all teachers in a given school; and the audience and purpose for the assessment need to be established. Educators have made great strides during the past 50 years—the portfolio concept is but one example. (RS)

Identifiers—Educational Issues, *First Amendment, *Hazelwood School District v Kuhlmeier, Supreme Court

The Supreme Court has consistently defended the power of secondary school officials in their role as enforcer, even in cases of expression. In spite of the trends of the late 1960s and early 1970s and the movement in the schools toward more freedoms for students and a more contemporary curriculum—including journalism as a legitimate high school course—the Court has continued its insistence that the wisdom of professional educators was better than the Court's wisdom. Many concerned with First Amendment rights for secondary school students believed the 1969 decision of "Tinker v. Des Moines Independent School District" was a signal that high school journalists would experience a new-found freedom of expression, free of censorship. However, "Hazelwood School District v. Kuhlmeier" reaffirmed the Court's commitment to the structure of the public school system in the United States, and the authority of its officials. Issues raised in such court cases are school issues more than they are First Amendment issues, and these issues win when pitted against students' First Amendment rights. (Contains 81 notes.) (RS)

Identifiers—Ableism, *Diversity (Groups)

A study examined to what extent journalism/mass communication education is attempting to sensitize students to covering people with disabilities in comparison to what it is doing in regard to addressing diversity issues concerning race, gender and sexual orientation. Two hypotheses were proposed: (1) that academic institutions accredited by the Association for Education in Journalism and Mass Communication will have done significantly more than non-accredited programs to sensitize students to reporting about people with disabilities; (2) that both accredited and non-accredited programs will have given more emphasis to issues of race and gender than to issues of sexual orientation and "ableism." A 34-item questionnaire was distributed to 392 programs; 216 responses were received. Research results supported both hypotheses. In general, the study found that Journalism/Mass Communication programs were not doing as good a job emphasizing reporting about people with disabilities as they were emphasizing reporting about minorities covered by Standard 12: racial and ethnic minorities and women. Programs were emphasizing ableism even less than they were emphasizing gay/lesbian stereotypes. While accredited programs were doing a much better job than unaccredited schools in furthering the goals of Standard 12, they were not doing much better in emphasizing coverage of people with disabilities and gays/lesbians. Issues about ableism have a long way to go before they get the attention they deserve. (Contains 23 references and 3 tables.) (TB)

Identifiers—Cultural Sensitivity

A study examined what journalism and mass communication programs have done to prepare students to understand and relate to a multicultural, multiethnic, multiracial and otherwise diverse society. Responses to a 34-question survey were returned by administrators of 216 undergraduate journalism/mass communication programs listed in the 1992-93 Journalism/Mass Communication Directory (for a response rate of 55%). Results indicated that (1) most programs were doing a variety of things to increase cultural sensitivity and educate students about biases and stereotypes; (2) faculty at most schools were scrutinizing their curriculum in regard to minority components; (3) most administrators thought their program was having some success in sensitizing their students to racial stereotypes and biases; (4) nearly three-quarters of the courses on the media and minorities were put into place during the 5-year period prior to the survey; and (5) variables important to the development of a multicultural curriculum appear to be the size of the program, number of minorities other than Afro-Americans, and size of the institution. Findings suggest that the accreditation Standard 12 has been somewhat successful in its goal of improving multiethnic and multiracial components of the curriculum. (Contains 48 references, four notes, and eight tables of data.) (RS)

Identifiers—Purpose (Composition), *Self Directed Questioning, Writing Tasks

A question which is essential to writing is—"What am I doing?" The writer and the writing continually adjust to maintain a balance with the exigencies of the task. The question launches the writer into text by forcing a definition of the subject, situation, audience, and other such practical matters. The question, however, also pulls the writer out of the text to a position of self-examination and self-questioning essential to the communicative act. It makes possible a kind of out-of-body experience for the writer in which he or she examines the self in the act of writing in a way that at one time effaces and creates the self in the text. "What am I doing?" posits a kind of resistance to the self that is essential in all acts of communication. "What am I doing?" pushes out of that state of being becalmed back into the wind of inquiry. By valorizing expertise and devaluing inquiry, educators have removed the question from the student's experience. One journal exercise, "Letters to an Imaginary Freshman," helps overcome student resistance to the question. But in allowing the question "What am I doing?" to sit comfortably in the middle of the classroom without causing any trouble, the instructor may be resisting the moment in which her students might learn more from posing the question than they learn from assembling an answer. Authorizing the Individual Voice, Becoming a Citizen: Dialogue Journals as Transitional Sites.

Pub Date—Mar 94

Note—17p.; Paper presented at the Annual Meeting of the National Council of Teachers of English (Portland, OR, March 10-12, 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports — Descriptive (141)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Audience Awareness, Classroom Communication, *Cooperation, Dialog Journals, Higher Education, *Journal Writing, Social Responsibility, Student Writing Models, Undergraduate Students, Writing (Composition), *Writing Instruction

Identifiers—Collaborative Writing, *Voice (Rhetoric)

Dialogue journals serve as a site where students may discover their own voices and learn to interact with each other and respond to ideas in a way that prepares them for their role as responsible citizens. Within the context of the dialogue journal, roles and role relationships are negotiated. The classroom community is decentralized; traditional authority relationships are destabilized. Journals are circulated among a group of three or four students and the instructor, who may also write in the journal but must do so as a co-participant. Each participant writes on average about one entry per week and then passes the journal on to the next student. Dialogue journals were tried out in several advanced composition courses, which were quite different from each other in content. The findings for this experiment concern two overlapping areas: (1) the voices student journal participants assigned themselves; (2) the purposes and meanings these participants construed for the journal. Several sample entries from these journals show students struggling to find an appropriate voice: some are personal and informal; some perfunctorily academic; others talk about matters not related to the task at hand. In some of the better entries, students realize the importance of collegial inquiry as they write, think, ponder, request assistance from other students, and question long-held beliefs. A Survey of Attitudes towards Certain Aspects of the English Curriculum Held by Selected Educational and Non-Educational Groups Designated as Liberal and Conservative.

Pub Date—Mar 94

Note—67p.; Paper presented at the Annual Meeting of the National Council of Teachers of English (Portland, OR, March 10-12, 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports — Research (143) — Tests/Questionnaires (160)

EDRS Price — MF01/PC03 Plus Postage.

Descriptors—*Attitude Measures, Conservatism, *Educational Attitudes, Educational History, Elementary Secondary Education, *English Curriculum, *English Instruction, Liberalism, National Organizations, National Surveys, Political Attitudes, *Political Issues, Professional Associations

Identifiers—*Educational Issues, English Teachers, *Professional Concerns, Teacher Surveys

Noting that many varied organizations have become increasingly politicized and maintain strong interests in the nation's education agenda, a survey of national professional organizations examined to what extent conservatism and liberalism on political matters translated into a similar mind-set on issues in the English curriculum. To survey 23 primarily non-educational national organizations and 20 professional educational organizations, a 4-phase instrument questionnaire was created. Initial mail response was weak, but eventually a 77% response rate was gained. Data indicated that: (1) to teach or not to teach grammar has become an issue intertwined with basic values; (2) lack of awareness of published research and scholarly literature published on the teaching of English during this century surfaced in both groups; (3) a desire to stick with traditional policies and practices in English pedagogy became evident in the aggregate responses of both groups; (4) conservatives demonstrated support for older, more established practices in the teaching of written composition (especially in a commitment to grammar study) than did the more liberal groups; (5) conservatives steadfastly linked memorization with literary appreciation—their "xenophobic" perspective on American culture was

further reflected in their clear preference for Anglo-Saxon literature over any multicultural emphasis; and (6) as they viewed the curriculum as a whole, conservatives expressed support for cultural rather than functional literacy alternatives, supporting English Only referenda and isolated skills testing. (Appendixes contain survey letter and form, language and composition as well as literature and curriculum analysis data, and specific interest groups analysis data. Contains 26 references.) (NKA)

Language, Literacy, and Spirituality in a Quaker Meeting and an AIDS Hospice.

Pub Date—Mar 94

Note—10p.; Revised version of a paper presented at the Annual Meeting of the Conference on College Composition and Communication (45th, Nashville, TN, March 16-19, 1994).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Acquired Immune Deficiency Syndrome, Comparative Analysis, *Cultural Context, Discourse Modes, *Language Role, *Literacy, *Religion, *Writing (Composition)

Identifiers—Discourse Communities, Quakers, *Spirituality, *Text Factors

Examining two very different contexts, a non-pastoral Quaker meeting and an AIDS hospice, offers insight into the complex nature of writing and literacy in spiritual contexts. Such a program is unapologetically comparative, seeking not the "right" view of spirituality but rather a view of how spirituality is expressed through language. Specific considerations were: (1) how the researcher can know when he or she has located a spiritual site of composing; and (2) how a text produced in one mode—whether spoken, written or signed—is related to a text that might be produced or have been produced in another. In a Quaker meeting spoken messages generally contain a narrative of sorts followed by a lesson or observation. Furthermore, bulletin boards, newsletters, tracts, and pamphlets are all forms of literacy circulated at Quaker meetings. As a communal production, the state of the meeting report raises important questions for literacy: How might this text be seen as a manifestation of spirituality? What can it teach us about spiritual sites of composing? The 12 steps that lead to the document's production are worth examining. Similarly, a number of literate activities are at work at an AIDS hospice: keeping of journals, reading silently or aloud, record keeping, labeling of medicines. Should the AIDS hospice be thought of then as a spiritual state of composing? (Contains a copy of state of the meeting report.) (TB)

Images in Language, Media, and Mind.

National Council of Teachers of English, Urbana, Ill.

Report No.—ISBN-0-8141-2281-7

Pub Date—94

Note—255p.

Available from—National Council of Teachers of English, 1111 W. Kenyon Rd., Urbana, IL 61801-1096 (Stock No. 22817-3050: \$18.95 members, \$25.95 nonmembers).

Pub Type—Collected Works — General (020) — Books (010)

EDRS Price — MF01/PC11 Plus Postage.

Descriptors—Elementary Secondary Education, Higher Education, Interdisciplinary Approach, *Language Role, *Mass Media Effects, *Mass Media Role, Psycholinguistics, *Social Problems, Visual Literacy

Identifiers—*Images, *Visual Communication

The essays in this collection discuss the "image" as both product and process. Representing such diverse disciplines as rhetoric, composition, clinical psychology, journalism, photography, communication, education, and sociology, the essays describe how images function and how they are linked with language and explore the role of images in shaping social issues. Following an introduction (overview) by the editor, the essays in Part I, "Images in Language," are: (1) "Image Studies: An Interdisciplinary View" (Roy F. Fox); (2) "People's Image" (Alan C. Purves); (3) "Imaging, Literacy, and Sylvia Ashton-Warner" (Nancy S. Thompson); (4) "Photographs, Writing, and Critical Thinking" (Carol P. Hovanec and David Freund); and (5) "Child Talk:

Re-presenting Pictures in the Mind" (Stevie Hoffman). The essays in Part II, "Images in Media," are: (6) "Where We Live" (Roy F. Fox); (7) "From War Propaganda to Sound Bites: The Poster Mentality of Politics in the Age of Television" (Linda R. Robertson); (8) "Reading Ollie North" (William V. Costanzo); (9) "Instant History, Image History: Lessons from the Persian Gulf War" (George Gebner); (10) "Authorship of Metaphoric Imagery in 'Live' Television Sportscasts" (Barbra S. Morris); (11) "Ad Images and the Stunting of Sexuality" (Carol Moog); and (12) "Don't Hate Me Because I'm Beautiful: A Commercial in Context" (Gerald O. Grow). The essays in Part III, "Images in Mind," are: (13) "Beyond 'The Empty Eye': A Conversation with S. I. Hayakawa and Alan R. Hayakawa" (Roy F. Fox); (14) "The Image Is Not the Thing" (Herb Karl); (15) "Analyzing Visual Persuasion: The Art of Duck Hunting" (Kay Ellen Rutledge); and (16) "The Riddle of Visual Experience" (Vito Signorile). Positioning Personal Discourse Professionally.

Pub Date—Jul 94

Note—10p.; Paper presented at the Annual Penn State Conference on Rhetoric and Composition (13th, University Park, PA, July 13-16, 1994).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Higher Education, *Rhetorical Theory, *Writing (Composition)

Identifiers—Academic Discourse Communities, *Composition Theory, Feminist Criticism, Rhetoric as Epistemic

Although a Ph.D. candidate feels pressured to take sides in the discursive war in academe between social-epistemists and expressionists, he finds it difficult to do so. W. Ross Winterrowd, a "spokesperson" for social-epistemic rhetoric, makes distinctions between the two camps, maintaining a discursive dichotomy between what he calls the New Rhetoricians or collectivist rhetoricians and the Romantic Idealists or individualist rhetoricians, like Donald Murray, Ken Macrorie, and Peter Elbow. In Winterrowd's view, Romantics view writing as "making" something, while New Rhetoricians see writing as "doing" something. "Doing" implies that communication and community are more central, since "convincing, elating, informing" are actions directed toward an audience. Winterrowd faults the Romantics for their individualistic orientation, their investment in truth and honesty apart from human community, and their solipsism. Feminist readings, however, suggest that these two camps need not necessarily be opposed. Feminists argue that men have historically oppressed women by purifying male interests, considering male interests "transcendent," while female interests are "silly" or "impure" because they are myopic. Winterrowd's desire to theorize rhetoric is also the desire to purify, to avoid being polluted by the "messy" expressionists. Feminists assert that social and individual worlds are inextricably bound—thus, they use personal writing to serve as an avenue for inquiry into the ideological constructs of self in relation to other. This ideology suggests that the two rhetorics can be seen as continuous rather than opposed. (Contains 20 references.) (NKA)

Evidence as a Stage of Knowing in Composition.

Pub Date—Mar 94

Note—24p.; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (45th, Nashville, TN, March 16-19, 1994).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Epistemology, Higher Education, *Methods, *Writing (Composition), *Writing Instruction, Writing Processes

Identifiers—Composition Theory, *Evidence, *Prown (Jules)

The study of composition is in need of a methodology to teach students about the creation of evidence and the epistemological role that it plays in all writing. For many students "evidence" is an absolute, an assortment of facts found in encyclopedias, graphs, tables, census studies, surveys, almanacs, and so on. For most instructors, however, the term "evidence" connotes a process by which certain

conclusions are reached. The theory of art historian Jules Prown offers one means of thinking about evidence as process. Prown's methodology is divided into three consecutive inquiry stages centered around an object or painting: a descriptive stage in which observations are made; a deductive stage in which initial realizations, ideas, conclusions and insights are formed; and a speculative stage in which the former deductions are shaped into a whole and the question of "so what?" is entertained. By moving through levels of inquiry in these three stages, Prown has created a set of epistemological moves in which each stage of thought—each an end in itself—becomes evidence for the next stage. An examination of George Stubbs' "The Reapers" illustrates the importance of each of these stages Prown proposes. The point is not to import Prown theory into the classroom but to learn from its implications: surprisingly little attention has been paid, not only by composition scholars but by scholars from all disciplines, to the problem of what constitutes evidence in scholarship. Descriptors—Case Studies, Elementary Education, *English Instruction, Foreign Countries, *Language Acquisition, *Language Arts, *Language Role, *Teaching Methods

Identifiers—Australia, Discourse Communities, *Systemic Functional Model (Language Development)

Noting that a number of Australian states have adopted a functional model of language in their English syllabus documents, this PEN explains the term "functional model" and explores the implications of a functional approach to the teaching of English across all key learning areas in the Australian primary classroom. The paper notes that the term "functional" comes from the systemic functional theory based on the work of Michael Halliday. The paper next discusses the assumptions a functional approach takes, including language as a social process, spoken texts are just as complex as written texts, and the context in which language is used determines its appropriateness. The paper also discusses terms used in the functional model (including "field," "tenor," "mode") and three levels of language (semantic, lexicogrammatical, and graphophonetic). The paper discusses implications for teachers, such as valuing the diversity of language backgrounds, providing meaningful language activities, valuing talk, and using real texts (both literary and factual). The paper then presents a short case study illustrating implications for students. The paper concludes with advice for teachers on how to begin. Contains seven references and a list of five additional resources. (RS)

Identifiers—Educational Issues, *Faculty Attitudes, Inclusive Educational Programs, Teacher Surveys

Academics remain deeply uncertain and divided about their role as practitioners of multiculturalism, inclusion and diversity. As teachers of writing, academics try to offer their students the freedom to express themselves, but they continue to puzzle over how they are to integrate and achieve true inclusion in the classroom. A series of informal interviews with college faculty documents more spe-

cifically the nature of this troubling confusion. Five main questions were asked, which revealed the following results. First, among faculty there is little consensus about what the terms multiculturalism, inclusion, and diversity mean. Of the respondents, 40% thought the terms were interchangeable. Second, all the respondents agreed that racism and sexism continue to exist among student populations but on a less overt level than in previous decades. Some faculty interviewed expressed a reluctance to respond directly to racism or sexism in the classroom; they prefer to stay neutral in classroom situations. Third, most faculty do not see signs of overt racism in the composition classroom probably because students recognize that it is politically incorrect. Fourth, 53% denied having seen any discrimination on the administrative level. One male professor complained of reverse discrimination; all other complaints came from women or minorities. Fifth, faculty rely primarily on their reading lists to further the goals of multiculturalism, inclusion and diversity. (TB)

Descriptors—Access to Education, Case Studies, Comparative Analysis, Economically Disadvantaged, Elementary Education, *Library Collections, Library Research, *Library Services, *Literacy, Rural Education, Urban Education, *Whole Language Approach

A study investigated access to books for children in schools that described their literacy curriculum as "literature-based." Six schools that served economically disadvantaged children exhibited a wide variation in the number of books available in both school libraries and classrooms. Two of the schools depict the influences on children's access to books. George Washington Elementary School is a large, urban school where almost all of the 700 students are from minority families that have incomes below the federal poverty standards. Playfield Elementary sits 50 miles west in a rural community and enrolls approximately 300 children, most of whom are white, and 70% of whom are from economically disadvantaged families. The library at Washington Elementary has only about 10 books per child, very few recently published reference materials, and virtually no computers for student use. The library at Playfield Elementary has about 20 volumes per child, many new books, and a variety of computers and other technological support. Classroom libraries at the two schools showed a similar disparity. Findings suggest the need for the following supportive conditions: (1) children need a plentiful supply of books, a variety of books, and time to read in school; (2) teachers need financial support for book purchases, curricular support for the use of books, and support through professional development; (3) children and teachers need support from the library; and (4) teachers need to use all that is available. Descriptors—Feminism, Higher Education, *Language Role, *Metaphors, Political Socialization, Popular Culture, *Rhetoric, Rhetorical Criticism, *Sex Role

Identifiers—Male Female Relationship, *Rhetorical Stance, *Science Writing

In academia, theorists in rhetoric are interested in viewing how race, gender, and class come into play in the language of literature. The same might be done with popular science texts. A rhetorical analy-

sis of "Sperm Wars," a popular science article published in "Discover" magazine, suggests that cultural assumptions inform the language of science as well as the language of the humanities. In fact, the politically-charged metaphors employed by scientists stand to cause harm as they reinforce certain cultural assumptions as "natural," rooted in biology. The metaphors that dominate this article are: (1) sperm as militaristic entity, combatting and battling its way to victory; (2) sperm as strong, sexual aggressor, staunchly pursuing its goal amidst unspeakable danger; (3) sperm as representative of capitalistic, economic theory, competing against or working as team player with his sperm coworkers. The metaphors used to discuss the egg, however, remain consistent through the article. Whenever an egg is mentioned, which is not often, the language depicts images of nurturance and passivity. While the female metaphors reinforce narrow notions of femininity, the male metaphors naturalize military action. Within a culture whose government spends more money on militaristic endeavors than any other nation in the world, to look at sperm as another militarized zone is to permit and condone militaristic government action. Other metaphors naturalize economic notions such as competition, means of production, cost effectiveness, quality control, and mass production. Science should avoid such evaluative language and metaphor. (TB)

Descriptors—Educational Objectives, Foreign Countries, *Freedom of Speech, Language Role, Political Issues, Political Power, *Rhetoric, *Rhetorical Criticism, *Rhetorical Invention

Identifiers—*Poland

In the wake of the collapse of the Soviet Union and the fall of its satellite regimes, Poland, among other nations, has been engaged in a process of wholesale national reinvention. An analysis of this reinvention is instructive for scholars of language because it is largely a rhetorical process. It is aimed at supplying a new set of collectively validated symbols, at (re)defining the basic terms of national debate, and at inventing a new language for describing—and thus also conceiving and implementing—new political institutions and processes. One of the main challenges facing leaders of the Solidarity movement was what to teach people: Solidarity represented a spiritual as well as a linguistic revolution. Solidarity leaders considered the original political program, not one of institutional change, but rather an educational program. It represented a mixed bag of demands and articulations, or half-articulations: sovereignty, democracy (understood as personal relations in the work place and worker's self-management), independent trade unions, the Katyn massacre (a code word for admitting that Poland was under Soviet domination). According to Lech Walesa, the goal was to build a "Noah's Ark" of popularly accepted terms free from the straightjacket of official sloganeering. The desire for "truth" in the wake of intellectual oppression explains why much that is debated in Poland strikes Westerners as impractical or abstract. Some basic concepts that continue to be under contestation in Poland would include ownership, democracy, and sovereignty. (TB)

*Writing Evaluation, *Writing Instruction
Identifiers—*Westminster College MO

The advent of writing-across-the-curriculum programs at the college level has necessitated the development of institutional measurement schema to internally assess their pedagogical and curricular efficacy and to externally demonstrate to concerned constituents that specific institutions are effectively fulfilling the educational mission for writing instruction. Following a process of writing reform that not only changed course requirements but also educated faculty in all disciplines, Westminster College has developed a writing assessment program consisting of four major components. First is a series of formal writing assessment sessions for which students read articles and write essays about them. They are administered at three critical points in the student's academic career: the beginning of the freshman year; at the end of the first fall semester; and after the student has taken the academic writing course at the end of the Sophomore year. Next comes a portfolio containing 10 written items spanning the student's entire academic career and including a wide range of types of writing. The third component consists of departmental assessment programs, which employ a broad selection of assessment activities, ranging from department portfolios to case studies to senior capstone projects. The fourth component is informational assessment, which consists of a collection of interviews with students in the portfolio sample and with faculty at the end of each academic year. The number of students included in the sampling is about 200. (Contains evaluative schema, departmental guidelines, and an assessment descriptive features grid.) (TB)

Descriptors—Higher Education, Individual Differences, *Persuasive Discourse, Prior Learning, Social Problems, Undergraduate Students, *Writing Processes, Writing Research

Identifiers—Controversial Topics, Pennsylvania (Pittsburgh), Rhetorical Strategies, *Writing Contexts

A study described college student writers as they constructed arguments, creating a picture of school-based argument drawn not from ideal models of arguments as envisioned by educators, but from experiences of students themselves. A three-part framework that synthesizes rhetorical perspectives on argument with a social-cognitive view of the writing process serves as the basis for the description of both larger patterns as well as individual differences in argument. Subjects, nine female students (ages 18-36) enrolled in a developmental English course (part of a college reentry program in an inner-city Pittsburgh campus of a community college), wrote six essays summarizing, responding to, synthesizing, and arguing about issues of racism and prejudice based on an interview with a former Klansman and three articles on the social and psychological causes of racism and prejudice. Subjects' writing portfolios were evaluated. Results indicated that the influential features of the argument situation were not limited to social cues and material resources but also the writer's prior knowledge, values, cultural experience, and personal goals. Results also indicated that: (1) the degree to which writers must construct knowledge via strategies of selecting, connecting, and organizing claims and evidence was never entirely predictable; (2) the students had difficulty translating and managing personal knowledge when putting their arguments on paper; and (3) a great deal of metacognitive knowledge hard to capture with texts or protocols came into view when the students were asked to reflect on their goals, strategies, and conflicts. (Contains 74 references and 9 figures of data. Interview questions are attached.) (RS)

Identifiers—Carnegie Mellon University PA, *Communication Context, *Community Literacy, Literacy as a Social Process, Rhetorical Strategies, Tenants

Part of an account of a community experiment in Pittsburgh trying to address the contested issue of landlords and tenants through explicitly rhetorical strategies for planning and deliberation, a study focused on conflict and how community collaboration handled difference. Four subjects, landlords and/or tenants who represented a range of socioeconomic and educational backgrounds, met for four sessions to explore the causes of landlord/tenant conflicts while representing either a landlord or tenant perspective (as opposed to articulating only their personal beliefs). Subjects were asked to use their analyses and discussions to write a "memorandum of understanding" that could be used as a tool for action. Each session was recorded on audiotape and videotape, and subjects recorded "self-interviews" and participate in a final interview. Results indicated that, knowingly or unknowingly, members of the group used a variety of strategies to transform how their ideas were received by other members of the group. These rhetorical strategies were successful in ensuring that voices were heard. For this group, reaching consensus meant reaching a point where conflicts are hidden to create a solid foundation for moving to action. Findings suggest that the process observed was not a consensus building process, but a constructive one which gave rise to active strategies for negotiating the conflicts the process raised. Descriptors—Case Studies, Educational Research, Educational Trends, Elementary Secondary Education, English Instruction, Higher Education, *Ideology, Professional Development, *Teacher Attitudes, *Teacher Role

Identifiers—*Teacher Researchers

Examining the role played by ideology in a teacher research group, a study focused on the differing ideologies on research, teaching/learning, and writing held and developed by the members of the group. Treatments of teacher research remain directed mainly at clarifying the content, the status, and the boundaries of the research practice engaged in by teachers and describing how teacher research contrasts with "university research" with regard to these elements. The well-supported, university-affiliated teacher research group was comprised of from 19 to 20 teachers representing a wide spectrum of grade levels. All on the high school and college level taught English. Ethnographic participant observation occurred over the span of two years. Case studies of three members of the group illustrate the three global positions taken by members in the teacher research group: a "teacher empowerment" position, a "social change" position, and a "professional development" position. The concept of ideology was utilized to emphasize that beliefs about society, politics, and cognition are intimately bound up in the teacher researchers' different perspectives. Analysis

of the ideological positions that developed within this teacher research group, along with the conflicts and interchanges among the participants, demonstrates that there are important divisions within the teacher research movement that are intellectually creative and socially important. (Contains 42 references, eight notes, and three figures which present a synthesis of the commonalities and differences among the three positions.) (RS)

Identifiers—Journalism Research, *News Stories, *Professional Concerns

A pilot study asked 94 students enrolled in introductory newswriting classes at three separate universities to evaluate 18 news stories. About half the stories concerned topics that proponents of multiculturalism have suggested would receive more emphasis if newspapers employed more women and minorities: topics such as breast cancer, divorce, abandoned babies, interracial marriages, abortions, day care, disabilities, welfare, and a contest considered racist and sexist. Using scales from "1" to "10," the students were asked to rate each story's importance, and also to indicate how likely they would be to publish it. Conclusive judgments are not possible given the limited sampling but results are suggestive nevertheless. In many cases, minorities and women did appraise differently the importance of stories and the likelihood that they would use them in the paper and play them on Page 1. Occasionally, the stories that they differed on were not overtly race or gender related, further suggesting that they were making news judgments based on a different set of life experiences. Also, this study indicated that news-ed majors differ from other communication students in their judgments about the importance of various news items. To follow up the implications of this research, similar studies should be conducted with larger samplings of professional news people and general readers. (Contains 24 notes, a listing of the 18 stories used in the study, and nine tables showing results.) (TB)

Identifiers—*Alabama, Teacher Surveys

In the wake of Alabama's new rules requiring multicultural education in teacher education programs, a study examined whether multicultural literature was actually being taught in all levels of education in the state, how it was being taught, and who was teaching it. The study covered English language arts classes throughout Alabama in levels K through college. Its central component was a 35-question survey (mostly multiple choice) mailed to about 669 teachers. Responses, which were amazingly similar across the board, were as follows: (1) there is strong consensus as to why multicultural literature should be taught (those reasons are numerous and are listed on an attached chart); (2) most do not believe that multicultural literature needs to be taught by a member of the represented minority group; (3) most have not been prevented from teaching multicultural literature by censorship or curriculum restrictions; (4) most believe multicultural literature

increases knowledge of cultures and that students have a positive reaction; (5) most teachers spend from 5-25% of their time on multicultural literature in the classroom. More generally, 83% of the respondents agreed that multicultural literature should be taught because it encourages engagement with other cultures, but only 59% believed it encouraged the development of interpretative and evaluative skills. Further research should address this latter issue of multicultural literature's purpose in the classroom. (Attached are a definition of multiculturalism, a copy of the survey, and a chart summarizing results.) (TB)

Descriptors—Higher Education, *Rhetoric, Rhetorical Invention, *Rhetorical Theory, *Technical Writing, Writing Attitudes, Writing Processes, *Writing Research, *Writing Strategies
Identifiers—*Discourse Communities, *Professional Writing

Recent rhetorical research in professional writing raises the issue of the absence of discussion of "resistance" in professional and nonacademic writing research. A study of a biologist working at the White Sands Missile Range in New Mexico suggests that ideological "resistance" occurs even in the realm of technical writing. Further, it confirms what several theorists have argued, namely, that people reappropriate the dominant culture in producing their own alternative cultural expressions. Michel De Certeau argues that because studies in culture and institutional practices have focused on repressive apparatuses, they overlook, or rather they have made invisible, the heterogeneous practices that resist dominant cultures. Agents resist by using the products of the dominant discourse to insinuate heterogeneous positions and values into discourse. In the case of the biologist, she had to frame her observations about how missile tests could affect the environment around two restrictions: (1) the objective ethos, which requires that all data be quantifiable and presentable in the form of bulleted items; and (2) the rule against "intangibles," aesthetic or spiritual observations that are not reducible to technical terms. She resists by occasionally refusing to comply with expectations, but more often she writes the document as she is asked to do but then attaches to it another one worded so as to further her own concerns. Alternatively, she will talk directly and personally to project managers who she senses might be sympathetic to her ecological concerns. (TB)

Identifiers—*Feminist Criticism, McGill University (Canada), *Women in Literature, Womens History, Womens Literature

This annotated bibliography is an introduction to reference material in Western languages on women's writers, women in literature, and feminist literary criticism available in the Humanities and Social Sciences Library at McGill University in Montreal. The titles cover a wide variety of national, cultural and linguistic groups within all historical periods. Dictionaries, handbooks and encyclopedias, biographical sources, current and retrospective bibliographies, special sources for dissertations and for book reviews are included. However, collections of

introductory essays on women's literature or on feminist literary criticism, anthologies of women's writings and bibliographies on individual women authors are excluded. The annotated bibliography is arranged by the form of reference works and subdivided according to subject categories to facilitate browsing. Publication dates of the 167 items listed range from 1974 to 1994. (TB)

Identifiers—*Emergent Literacy, Nursery Rhymes, Trade Books

Written for teachers who are interested in learning how to use literature to enhance emergent literacy growth, this handbook, in two volumes, focuses on how to implement integrated, literature-based, thematic units that stress the development of effective strategies required of independent, self-directed competent readers and writers. The first section of Volume One discusses research related to sound current theory and practice in the area of emergent literacy. The second section discusses salient aspects of implementing the units and introduces teachers to the Transactive Teaching/Learning Model which provides a daily framework for each unit. The third section of the handbook describes the daily teaching and learning activities for the "Old Favorites" (nursery rhymes and favorite tales) and the "Friendships" (developing social skills and cooperation) units that are of high interest to kindergarten and first-grade students. Included in each chapter are suggested discussion questions and literature bibliographies. An appendix discusses appropriate assessment for this age level and contains assessment instruments. The first section of Volume Two discusses research related to sound current theory and practice in the area of emergent literacy. The second section discusses salient aspects of implementing the units and introduces teachers to the Transactive Teaching/Learning Model which provides a daily framework for each unit. The third section of the handbook describes the daily teaching and learning activities for the "Food from the Farm" (Expanding the Learner's Horizons-Community and Environment) and the "Dragons from East and West" (Expanding the World of Imagination and Fantasy) units that are of high interest to kindergarten and first-grade students. Included in each chapter are suggested discussion questions and literature bibliographies. An appendix discusses appropriate assessment for this age level and contains assessment instruments. (RS)

Descriptors—College Students, *Communication (Thought Transfer), Computers, *Cooperation, *Group Discussion, *Group Dynamics, Higher Education, Vocabulary

Identifiers—Capstone Programs, *Technical Communication

A study looked at four groups of mostly senior graphic and industrial design students in their final semester capstone course—a collaborative studio project intended to give them the opportunity to apply their design expertise to real-world problems for real clients. The study examined the ways in

which one of these groups used arguments to handle the developmental and communication-based difficulties of approaching an open-ended project. Data were collected through structured and semi-structured interviews, direct observations, and archived documents and drawings. The scenario called for the participants to design the next family of Apple computers; the largest computer was to be a desktop sort and the others hand-held or wearable. A vocabulary developed by the observation team proved helpful in evaluating the functioning of the student design team: requirements (features considered necessary for the proposed design); criteria (the norms that are necessary to fulfill the design requirements and the relative weight that should be given to each of these norms); models (prior designs that can serve as potential analogs to the current design); plans (which exist at the confluence of requirements, criteria and models); and prototypes (more costly than plans, they are refined enough to "work"). An examination of how one group worked through these various stages shows the enormous potential for conflict, frustration and confusion. Generally, however, the student group worked smoothly, especially after plans and prototypes were on the table. (TB)

Descriptors—Attitude Measures, Case Studies, Elections, Higher Education, *Newspapers, *Photojournalism, *Political Candidates, Political Influences, Public Opinion, Surveys
Identifiers—Illinois (Alton), Journalism Research, *Mug Shots, Principia College IL, *Visual Communication

A study examining voter responses to mug shots in newspapers found that they have a significant effect on a candidate's success in an election. The study was conducted after an Alton, Illinois, newspaper featured a full-page article on five candidates running for mayor, all but one of whom appeared dressed in a suit in a professional "mug shot." The fifth candidate appeared unsmiling in a windbreaker, though the newspaper had another professional shot of him in a suit and smiling. A number of parents and students at Principia College, none familiar with the details of the local race, were asked a series of questions about two sets of photographs representing the above candidates: one set represented the candidates as they appeared in the newspaper; the other replaced the fifth candidate's mug shot with a professional shot. Knowing nothing about the candidates, 41 respondents were asked to rate the first set according to competence, experience, friendliness, honesty and leadership. A second group of 47 were asked to rate the second set of photographs according to the same criteria. Results showed that the first group rated the fifth candidate lowest, while the second group rated him second to the highest. The first group said he looked "rough," "unfriendly," "like a crook." Conclusions suggest that the newspaper's use of his mug shot lost the race for the fifth candidate. Although many variables were involved, it is suggested that mug shots do influence voters. (Contains 26 notes and the "mug shots.") (TB)

State High School Press Freedom Laws: A Profile of Legislative Sponsors.

Pub Date—11 Aug 94

Note—40p; Paper presented at the Annual Meeting of the Association for Education in Journalism and Mass Communication (77th, Atlanta, GA, August 10-13, 1994).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150) — Tests/Questionnaires (160)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Attitude Measures, Censorship, *Freedom of Speech, *High Schools, High School Students, Journalism, Legislators, National Surveys, *School Publications, State Legislation

Identifiers—Research Suggestions, *Scholastic Journalism, *State Legislators

A survey of 22 state legislators nationwide investigated what attitudes or characteristics distinguish successful from unsuccessful legislators in their attempts to pass free press legislation for high school journalists. Seven legislators successful in passing such legislation were asked 20 questions by phone. Surveys were also mailed to 28 unsuccessful legislators; 15 were returned. Results made two demographic distinctions between (1) those legislators supporting free press legislation and those not supporting it; and (2) those successful in supporting it and those not successful. The first set of results showed that supporters were disproportionately educated, members of the Democratic party, and women. Over half had teaching experience and experience as a high school journalist. The second set of results showed that those who were successful considered this legislation to be more important than other legislation; telephone interviews strongly suggested that successful supporters seemed to be more personally committed. Based on data from this study, the ideal legislative sponsor might have some of the following characteristics: personal experience with journalism; experience as an educator; accurate knowledge of high school journalism; ability to cross party lines; and experience as a legislator (someone with "clout"). Further research could determine how students, teachers, and administrators have helped to pass free press legislation. (Contains four tables of data, 24 references, and appendixes with the phone questionnaire and the mail survey.) (TB)

The Spiritual Traditions of the East: A Bibliography for Elementary and Middle School Teachers.

Pub Date—94

Note—17p.

Pub Type—Reference Materials - Bibliographies (131)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Annotated Bibliographies, *Childrens Literature, Cultural Context, Elementary Education, Elementary School Teachers, *Holistic Approach, Intercultural Communication, Junior High Schools, Middle Schools, Multicultural Education, *Non Western Civilization, *Religious Cultural Groups, Secondary School Teachers, *Thematic Approach

Identifiers—*Multicultural Materials, Religious Practices, Spiritual Development, *Spirituality, Trade Books

Designed to enhance curriculum building for educators who wish to introduce into their classrooms some ideas about Asian philosophy and spirituality, this annotated bibliography centers on Eastern traditions emphasizing holistic or universal consciousness. The bibliography of multicultural literature highlighting holism in the writings of Eastern and Western spirituality presents an alternative to the longstanding trend toward dualistic Anglo-European cultural hegemony in Western education and offers a fresh perspective for interested teachers. Listings are categorized as fiction or nonfiction, with critical discussions of books and materials, and recommendations for classroom use. The six books listed under "fiction" were published between 1955 and 1991. The 11 books listed under "nonfiction" were published between 1977 and 1990. The themes presented in the bibliography can be included in units addressing holistic awareness, respect and compassion for others, environmental preservation through oneness with nature, and other themes, and can be introduced into language arts, social studies, history, or other subject areas by teachers seeking new ideas in values clarification and multicultural instruction. Descriptors—Action Research, *English Teacher Education, Mentors, *Professional Development, Reflective Teaching, Secondary Education, Student Journals, Teacher Alienation, *Teacher Attitudes, *Teacher Evaluation

Identifiers—New Teachers

Beginning teachers' experiences in university-based teacher preparation are rapidly replaced by the norms and expectations of the school setting and teachers with whom they work. To interrupt this pattern by which new teachers are pulled from the practices they have learned at the university, teachers must be encouraged to reflect about their teaching through action research, a process by which a teacher studies his or her own actions in the classroom as a means to improve practice. To explore the possibility of collaborative action research-action research done in teams of at least two—a study examined 35 apprentice English teachers and 22 mentor teachers. Data was collected from journals of both apprentices and mentors, and in the form of observation notes by university faculty, self-assessment, and interviews. Each of the studies began with a guiding question generated by the research group and directly related to instruction such as, "Are guided essays more effective than nonguided?" or "Will creative role playing increase comprehension?" Findings showed five recurrent themes concerning teacher attitudes toward data collected: (1) research questions based on attempts to improve teaching; (2) fear about conducting research; (3) adverse to using their students as potential pawns; (4) confusion over qualitative data collection and analysis; and (5) lack of time and commitment to formal reporting of results. Results revealed two major effects on participants substantiated by triangulation of the data: sustained interaction with peers increased, and the level and quantity of reflection on practice increased. (A table lists action research projects.) (TB)

Identifiers—Controversial Materials, *Educational Issues, *Pressure Groups, Right to Education

Arguing that censorship is not simply an attempt to control what is taught in the schools but also an infringement on the legal learning rights of students, this collection of essays offers insights into how censorship can come about, its impacts and repercussions, and the ways it might be fought. The collection stresses action rather than reaction in guarding the preservation not just of the right to teach, but also of the right to learn. After an introduction by the editor, the essays are, as follows: (1) "In Defense of the Aesthetic: Technical Rationality and Cultural Censorship" (Philip M. Anderson); (2) "Policing Thought and Speech: What Happens to Intellectual Freedom?" (Jean E. Brown); (3) "Academic Freedom: Student Rights and Faculty Responsibilities" (David Moshman); (4) "Self-Censorship and the Elementary School Teacher" (Kathie Krieger Cerra); (5) "Literature, Intellectual Freedom, and the Ecology of the Imagination" (Hugh Agee); (6) "The Censorship of Young Adult Literature" (Margaret T. Sacco); (7) "Censorship and African American Literature" (Jim Knippling); (8) "Intellectual Freedom and the Student: Using Literature to Teach Differentiation of Propaganda and Persuasion" (Mary Ellen Van Camp); (9) "Censorship and the Teaching of Composition" (Allison Wilson); (10) "Freedom and Restrictions in Language Use" (Roy C. O'Donnell); (11) "Intellectual Freedom and the Theological Dimensions of Whole Language" (Ellen H. Brinkley); (12) "Being Proactive, Not Waiting for the Censor" (Jean E. Brown and Elaine C. Stephens); (13) "The Secondary English Teacher and Censorship" (John M. Kean); (14) "Keeping Abreast in the Trenches: In-Service Censorship Education" (Adrienne C. May and Paul Slayton); (15) "What Do I Do Now? Where to Turn When You Face a Censor" (Robert

C. Small, Jr. and M. Jerry Weiss); (16) "Caution, Novice Teachers: The Promotion of Reading, Writing, and Thinking Could Be Grounds for Censorship" (Dee Storey); (17) "Who's Protecting Whom and from What?" (Lynda K. Kapron and Rita E. Paye); (18) "Using Media to Combat Censorship" (Margaret T. Sacco); (19) "Slugging It Out: Censorship Issues in the Third Grade" (C. Jane Hydrick); (20) "Mind-Control Applications of the Constitutional Law of Censorship in the Educational Environment" (Lief H. Carter and Daniel Carroll); (21) "Hazelwood: Results and Realities" (Mel Krutz); and (22) "The 'Hazelwood' Decision: Thought Control in the High School? Or from 'Tinker to 'Hazelwood', to Chance?" (Ken Holmes). (NKA)

glish Teacher Education, Higher Education, Professional Development, *Student Evaluation, Teacher Role, Teaching (Occupation)
 Identifiers—*Teacher Researchers

Growing out of a 1992 conference that attracted teachers and educators from around the world, this book presents 13 essays which share the insights of 16 leading university scholars and teacher-researchers regarding the re-emergence of teacher education as a central focus in the field of English education. The book explores what teachers of the English language arts must know to be effective, how such knowledge can best be assessed, and the impact of cultural differences in the classroom, as well as preservice and inservice training and the roles of the university and the teacher-researcher. The book discusses methods of supporting teacher development such as the study of cases, teacher groups, ethnographic research in the classroom and community, and teacher lore. After some preliminaries concerning teacher thinking, essays in the book are: (1) "Knowing, Believing, and the Teaching of English" (Patricia L. Grossman and Lee S. Shulman); (2) "Producing and Assessing Knowledge: Beginning to Understand Teachers' Knowledge through the Work of Four Theorists" (Anthony Petrosky); (3) "Teacher as Learner: Working in a Community of Teachers" (Judy Buchanan); (4) "Is There a Problem with Knowing Yourself? Toward a Poststructuralist View of Teacher Identity" (Deborah P. Britzman); (5) "Cultural Differences as Resources: Ways of Understanding in the Classroom" (Beverly J. Moss); (6) "Teacher Research: Seeing What We Are Doing" (Glenda L. Bissex); (7) "Teacher Lore: Learning about Teaching from Teachers" (William Ayers and William H. Schubert); (8) "Teacher Change: Overthrowing the Myth of One Teacher, One Classroom" (Sally Hampton); (9) "What's Effective Inservice?" (Richard Beach); (10) "Issues Emerging from the Teacher-Researcher Discussion Group" (Christine C. Pappas); (11) "The Role of Universities in the Professional Development of Practicing Teachers" (James Marshall); (12) "What Followed for Me" (Michael W. Smith); and (13) "In Search of Community within English Education" (Renee T. Clift). (RS)

Descriptors—Adults, Discourse Analysis, *Discussion (Teaching Technique), *Literary Criticism, *Reader Response, Secondary Education, Teacher Behavior

Identifiers—Book Clubs, Interpretive Research, *Response to Literature

Drawing on interviews and on the actual language that readers (students, teachers, and adults) use to interpret and respond to literary texts, this book examines the conventions that shape talk about literature in large groups, small groups, and adult book clubs. By looking across contexts, the four separate but related studies in the book raise questions about the usual ways of talking and thinking about literature and suggest alternatives based on new theories of literary understanding. After an introduction, sections of the book are entitled: (1) A Description of the Project; (2) Studies of Large-Group Discussions of Literature; (3) Small-Group Discussions: Alternatives to and Extensions of Teacher-Led Discussions; (4) Adult Book-Club Discussions: Toward an Understanding of the Culture of Practice; (5) Reading and Talking Together: Responses of Adolescents to Two Short Stories; and (6) Summary and Conclusions. Contains 92 references. An appendix provides excerpts that illustrate the application of the coding system. (RS)

Identifiers—*Trade Books

Suggesting that teachers who encourage students to use many kinds of trade books across the curriculum are likely to be rewarded with students who are excited about learning, this fastback focuses on using children's literature across the curriculum. The fastback discusses reader response theory, connecting the curriculum through literature, guidelines for thematic studies, acquiring children's literature, literature in the content areas (social studies, science, mathematics, music, art), multicultural literature, and selecting multicultural literature. The fastback concludes that the current abundance of interesting informational and fiction books available to support all areas of the curriculum should encourage teachers to select them to enhance the subjects being taught. Contains 25 references. A list of 15 books for teachers and 80 books for children is attached. (RS)

Identifiers—Classics (Literature), *Homer, Indian Literature, *Ramayana

An effective way to expand students' knowledge and enjoyment of noncanonical, or at least unfamiliar, works is by using more familiar works as benchmarks. For example, in a sophomore-level world literature survey course, students have already read a large part of the "Iliad" and all of the "Odyssey" when they are asked to study R. K. Narayan's shortened prose version of an Indian epic, the "Ramayana." Students have no trouble identifying a surprising number of parallels between the epics, in spite of the different religious, cultural, and geographic origins that underlie them. For example, both the "Iliad" and the Indian epic tell of a great war caused by the abduction of a princess, a siege of the abductor's city, the confrontation of the abductor and the aggrieved husband, and the return of the princess to her home city. However, within this framework of similarities, it is the differences that students find so uniquely interesting in Valmiki's epic. For instance, there is the emphasis on asceticism, contemplation, and restraint that the Homeric personage would probably consider odd, impractical, even weak. Furthermore, Homer's warriors have no time for speculation; Rama has 14 years for it. For the Greek warrior, human suffering can be explained simply and easily; the gods are responsible. But to the Indian, such issues are the subject of debate and introspection. (TB)

Descriptors—Higher Education, Instructional Effectiveness, Rhetorical Theory, Student Needs, *Writing Instruction, Writing Processes

Identifiers—*Academic Discourse, Composition

Theory

There is something unfortunate occurring in the discourse of writing instruction—something that requires scholars to present themselves as teachers who have found the answer and have students to prove it. Typically, the paper written by the composition scholar stakes a claim about the teaching of writing; compares that claim with others of related concern; and then substantiates the claim with examples of student work. The problem is that "student work" refers to a few examples from the best students in the class; the significant minority for whom the promoted method did not work are ignored. A more productive approach might use examples from student writing to interrogate the scholar's claims rather than to shore them up defensively. Instead of congratulating themselves by appropriating the prose of their best students, scholars need to look much more carefully at the work of those students their methods have failed—or, at the very least, those whose success is less certain. Take one example: out of 22 students taking a course in basic writing, about half earned a B- or better; about 27% of the class, however, seemed to pass through the semester in limbo. Though they seemed to have positive attitudes, they never illustrated anything resembling discernible improvement. The approach to writing instruction employed in this class—one that acclimates students to academic expectations by requiring them to write a range of discourses—did little to help this group of students. Occupation and Activity Gender Trends in the Berenstain Bear Series.

Pub Date—[93]

Note—34p.

Pub Type—Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Childhood Attitudes, *Children's Literature, Females, *Illustrations, Males, Occupations, *Picture Books, *Sex Bias, *Sex Role, Sex Stereotypes, Student Surveys, Undergraduate Students

Identifiers—*Berenstain Bear Books, Bethany College WV

A study of 74 volumes of the Berenstain Bear Series rated illustrations according to the gender orientation of the activity or occupation the pictured bear is engaged in. Each occupation was assigned a number on the continuum by 32 psychology undergraduates at Bethany College who were given a written survey in a classroom together. Results showed that: (1) male family members were pictured significantly more often than female family members in the book; (2) male nonfamily members were pictured significantly more than female nonfamily members; (3) as the years progress through the 1960s to the 1990s, there is a trend toward a less biased representation of activities and occupations in the Berenstain Bear books; (4) females were depicted in mean neutral occupations, and engaged in counter-gender-typed occupations more often than were males; (5) male occupation scores were significantly lower than the female occupation scores indicating that males' occupations tend to be more masculine than females' occupations are feminine. Males who engage in more feminine or gender-neutral activities may be considered "sissies" and may often feel less accepted than females labeled as "tomboys." Children may need more androgynous role models to provide an example for counter-gender-typed roles in activities and occupations especially during formative years. (Contains 19 references, the survey, and a list of the Berenstain books used.) (TB)

Katz's Five Issues of Psychodynamic Development: The Importance of Theatre Participation to the Collegiate Experience.

Pub Date—[94]

Note—31p.

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Career Choice, College Environment, Higher Education, Peer Influence, Personality Development, Qualitative Research, Role Models, Separation Anxiety, *Student Attitudes, *Student Participation, *Theater Arts, Undergraduate Students

Identifiers—Theater Research

A study examines qualitatively the extent to which college students indicate that occurricular theater activities impact on psychodynamic development in J. Katz's five areas—separation anxiety, peer influence, adult role models, personality development, and occupational choice. Subjects, 15 male and 15 female students involved in the theater program of a midwestern university, were interviewed, and transcripts of the interviews were analyzed. Results indicated that theater does have an effect upon students involved in theater at the collegiate level: (1) with "separation from home," theater tended to provide a surrogate family and a support group; (2) in "peer influence," theater participation provided a large group of friends for those involved; (3) in "adult role models," theater participation instilled a stronger sense of direction and a greater sense of maturity; (4) within "personality development," students realized improvements in their self-worth, self-esteem, and confidence level; and (5) within the area of "occupational goals and values," theater trained students in valuable skills which they could use in their chosen careers. Further research might examine any one of Katz' development areas singularly, compare different schools where theater programs are well established, examine family relations, and examine students over a period of time. (Contains 15 references, a table of data, and a figure illustrating Katz' five areas of psychodynamic development.) (RS)

Descriptors—Acquired Immune Deficiency Syndrome, *Audience Awareness, Discourse Analysis, Federal Government, *Health Education, *Information Dissemination, *Mass Media Role, Media Research, Public Health, Rhetorical Criticism

Identifiers—Health Communication, Message Distortion, *Public Service Advertising, *Public Service Campaigns

To address a need for increased discussion of the dangers of Acquired Immune Deficiency Syndrome (AIDS) and an increased educative effort to prevent people from acquiring HIV infection, a study investigated one element of an AIDS campaign of the past: the "America Responds to AIDS" television and radio public service announcements (PSAs). Taking into account the political climate in which the PSAs were produced, 22 English-language television PSAs and 22 English-language radio PSAs were examined using traditional rhetorical analysis (characterizations, verbiage, tone, etc.) and a textualist approach (establishment of enabled and disabled powers, individuals, and phenomena as identified through the discourse). Analysis showed that "America Responds to AIDS" PSAs produced between 1987 and 1992 supported conservative philosophies by stereotyping male carriers and female victims, using implicit terminology, employing fear appeals, blocking access to helpful information with a government gatekeeper, and empowering AIDS as a social rather than a medical problem. The PSAs supported traditional family and social relationships, denied homosexuals and other disenfranchised groups a voice in the fight against the disease, and failed to address specific behavioral changes which are needed if the spread of HIV infection and AIDS are to be controlled. Findings suggest that if the government hopes to educate people about the issues surrounding AIDS and its consequences to society, it needs to examine past mistakes and see that they are not repeated. (Includes one table of data; contains 50 references.) (NKA)

Power, Narrative and Democracy in Social Theory.

Pub Date—Jul 94

Note—32p; Paper presented at the Annual Meeting of the International Communication Association (44th, Sydney, New South Wales, Australia, July 11-15, 1994).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Democracy, *Discourse Modes, Foreign Countries, Higher Education, Intellectual History, Marxism, Models, *Political Power, *Politics, *Power Structure, Social Theories

This paper conceives of a model of democracy that is tied up with narrative practices, and demonstrates how the initially democratic and radical auspices of one scholar's critique developed into a form of theory that was profoundly undemocratic in its narrative. The paper notes that the contemporary debate about power derives from a series of debates that occurred in the context of different models of democracy in the early 1960s, and that the most theoretically incisive contribution was S. Lukes' innovation of a "radical view" of power. However, the paper notes that the implications of this intervention, and the subsequent development of the debate have not been canvassed in their implications for the models of democracy. The paper also considers the implications of post-Foucauldian moves in the political language game that radical theory has developed. Contains 50 references and 6 notes. (RS)

Descriptors—Chinese Culture, College Attendance, Cultural Differences, Foreign Countries, Foreign Students, Higher Education, *Intercultural Communication, *Interpersonal Communication, Lesson Plans, Multicultural Education, Student Problems

Identifiers—China, Communication Strategies, Cultural Sensitivity

Juxtaposing Chinese and American culture, this paper anticipates problems Chinese students have with their perception of the interpersonal communication course and suggests lesson plans American teachers can utilize. The paper first discusses salient patterns within the American and Chinese educational systems, noting that Chinese students are praised for engaging in collectivist behavior, while the American system emphasizes self-reliance and self-confidence. The paper then presents six complete lesson plans (listing objectives, materials, procedures, discussion questions, and selected references) that teach interpersonal and intercultural communication theory. The themes of the lesson plans presented in the paper are: (1) misconceptions about multicultural education; (2) appropriateness of self-disclosure depending on cultural background; (3) Chinese values and collectivist behavior; (4) greater self-awareness; (5) salience of the power of "disequilibrium"; and (6) perceptions of higher education. The paper concludes that interpersonal communication teachers need to incorporate a more multicultural instructional approach. Contains 22 references. (RS)

Toward Interracial Understanding: Relationships in Athol Fugard's "Master Harold...and the Boys" and "My Children! My Africa!"

Pub Date—Apr 94

Note—13p; Paper presented at the Annual Meeting of the Eastern Communication Association (Washington, DC, April 28-May 1, 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports — Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Apartheid, Cultural Context, Foreign Countries, Higher Education, *Interpersonal Relationship, *Playwriting, *Racial Relations, Racial Segregation, Secondary Education, *Theater Arts

Identifiers—Dramaturgical Role, *Fugard (Athol), *South Africa

Athol Fugard, a white South African playwright/actor/director of international renown, has worked toward the establishment of an integrated, multiracial theater not associated with the white South African establishment. In his plays, Fugard has made racism and the ravaging effects of racial tension come alive as he presents aspects of these problems on a personal level. Fugard studied an-

thropology and philosophy in college, hitchhiked through Africa, and worked on a tramp steamer before marrying an actress and beginning his first theater company in 1956. "Master Harold...and the Boys" was premiered at Yale Repertory Theater in 1982—it was banned for performance in South Africa as being too inflammatory. The play, containing autobiographical elements, explores the relationship between Hally, a white 17-year-old whose mother owns a teashop, and Sam and Willie, black men in their forties who work in the shop. As the play nears its climax, Hally demands that Sam call him "Master Harold," highlighting the fact that relationships between Whites and Blacks in South Africa are those between master and servant. "My Children! My Africa!" was produced in 1989 and deals with an older black teacher who hopes that violence can be avoided and change brought about by working within the system. Fugard's theater presents the universal themes of friendship, family, and the need for intimacy in a South African context. His plays offer examples of interracial relationships in which the individuals find common ground. (Contains 18 references.) (NKA)

Descriptors—*Communication Research, *Communication Skills, *Health Promotion, *Health Services, Literature Reviews, *Models, Research Needs, Systems Approach

Identifiers—Communication Behavior, *Communication Strategies, Health Communication, *Health Outcomes

This paper examines the many assertions made in the health communication literature about the importance of communication as an essential process in promoting effective health care. If these assertions are true then researchers should be able to demonstrate the ways that communication influences the accomplishment of health care goals—how communication influences health outcomes. The paper examines the links between health communication and health outcomes, examines the health outcomes literature, and proposes a conceptual model of the role of communication in achieving advantageous outcomes in health care and health promotion based upon the systems transformation model. The paper concludes that the model can serve as a template for both guiding research on communication and health outcomes and for directing the health communication activities of interdependent participants in the modern health care system to promote desired health outcomes in health care/health promotion efforts. Contains 44 references. A table listing specific health outcomes by category (according to the cognitive, behavioral, and psychological effects on individuals) and a figure illustrating the model are included. (Author/RS)

Challenge Behavior in the College Classroom: What, When, and How Often?

Pub Date—Apr 94

Note—30p; Paper presented at the Annual Meeting of the Central States Communication Association (Oklahoma City, OK, April 7-10, 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports — Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Classroom Communication, Classroom Environment, *College Instruction, Communication Research, Higher Education, *Student Behavior, *Teacher Student Relationship

Identifiers—Challenge, *Communication Behavior, *Communication Strategies

A study explored how students challenged teachers in order to seek information, how often they employ certain strategies, and at what point in the semester they used certain strategies. Subjects were students in four classes with a maximum enrollment of 25 each from two southwestern universities. Half

of the participants were enrolled in a hybrid speech course from a large university and half were enrolled in a basic speech course from a smaller university. Every two weeks for a semester, subjects recorded how often 35 behaviors occurred in the classroom. Results indicated that students challenged teachers to seek information regarding evaluation expectations, practical explanations, procedural rules, and power plays. Results also indicated that students employed these strategies frequently throughout the semester, and that certain types of behaviors became more apparent at certain times. (Contains 28 references.) "Butthead," "Swirlies," and Dirty Looks: Interpersonal Conflict from a Younger Point of View.

Pub Date—Jul 94

Note—43p; Paper presented at the Annual Meeting of the International Communication Association (44th, Sydney, New South Wales, Australia, July 11-15, 1994).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Communication Research, *Conflict, Elementary Secondary Education, *Interpersonal Communication, *Interpersonal Competence, Metaphors, *Student Attitudes

Identifiers—Communication Behavior, Focus Groups Approach

Breaking from traditional adult-centered models of interpersonal conflict by privileging children's experiences, a study examined children's experiences of and reactions to conflict. As part of an assessment for establishing a school-based peer mediation program, focus group interviews were conducted with second graders through high school students (n=47). Analysis focuses on the sites (causes), signs, and aftermath of (or responses to) conflict. Children's impressions regarding fairness, gender differences, as well as the children's metaphors for conflict are addressed. With respect to the sites of conflict, the main themes included conflict as a product of the spoken word, as a dirty look, and as a struggle for equality. The signs of conflict entailed physical acts, name calling, and absence of talk. Aftermath included confronting, seeking involvement of third parties, ignoring others, and treating others with kindness. Two emergent themes regarding fairness were decision making according to the rules, and equality of treatment. Two primary, and in some respects oppositional, metaphors emerged in the group discussions: conflict as explosion and conflict as betrayal. (Contains 52 references, 11 notes, and a table of data. The interview protocol is attached.) (Author/RS)

Communication Faculty Recruitment 1993-1998:

A Survey of Staffing Needs.

Pub Date—Aug 94

Note—22p; Paper presented at the Annual Meeting of the Association for Education in Journalism and Mass Communication (77th, Atlanta, GA, August 10-13, 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—College Faculty, College Students, Departments, Educational Trends, *Faculty Recruitment, Higher Education, *Mass Media, National Surveys, Occupational Surveys, *Personnel Needs, Questionnaires, *Speech Communication

A comprehensive survey analyzed future recruiting in the communications disciplines, including trends in enrollments, faculty retirements, the production of doctorates, and a content analysis of academic position advertisements. A questionnaire was developed to investigate staffing trends in communication studies for the years 1993-1998 and mailed to 312 administrators of institutions offering course or degrees in communication. Response rate was 79% or 246 questionnaires returned. Of the respondents, 53 institutions reported an emphasis on mass media studies; 82 institutions reported a speech communication emphasis. A combined mass media/speech communication study was reported by 105 administrators. Most responses came from administrators in public institutions, and programs were generally reported to be small. Enrollments are expected to increase in the near future, and most institutions also expect some faculty retirements in the next five years. Doctoral degrees are the rule for

new hires, and "on-the-job" experience is also preferred. Research experience and publication are additional qualifications. The most striking finding is that there may well be a shortage of qualified faculty candidates in the coming years combined with rising enrollments. Perhaps the Ph.D. process needs to be evaluated to improve current competition rates. (Contains 7 tables of data and 20 notes.) (NKA)

Resistance to the Adoption of Computer Communication Technology by Communication Faculty.

Pub Date—Aug 94

Note—24p; Paper presented at the Annual Meeting of the Association for Education in Journalism and Mass Communication (77th, Atlanta, GA, August 10-13, 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Communication Research, Computer Uses in Education, Databases, *Electronic Mail, Higher Education, *Online Systems, *Resistance to Change, Sex Differences, *Teacher Attitudes

Identifiers—*Faculty Attitudes, Teacher Surveys

A study examined adoption of computer communication technology by communication faculty in a sample of schools of communication in which online database services and electronic mail were made available to individual faculty members without cost or access barriers. A mail survey sent to 178 faculty at 10 institutions was returned by 115 faculty, for a return rate of 64.6%. Results indicated that: (1) only a little more than half of the respondents reported using the computer services (Mead Data Central's Lexis/Nexis full-text database service) or electronic mail; (2) neither gender nor age nor availability of a computer at the workplace were related to computer use; and (3) almost all of the professors said they used a personal computer for some purpose, mostly word processing. Results also indicated that a scale based on S. Ram's Model of Innovation Resistance predicted usage of Lexis/Nexis. (Contains 39 notes and four tables of data.) (RS)

Descriptors—Audience, Awareness, *Catholic Schools, Educational Research, Elementary Secondary Education, Media Research, *Models, *Organizational Communication, *Public Relations, *Social Values, Student Needs

Identifiers—Educational Issues, Illinois, *Media Campaigns, *Program Legitimacy

A study examined the current legitimacy crisis that faces America's educational system and the efforts of one group, Catholic schools, in addressing this crisis. A legitimization model for educational institutions was developed based on the values society calls for in education, and this model was then applied to Catholic schools to see how their current efforts to legitimate themselves match what society deems important. To assess the data collected, various types of public relations materials (annual reports, recruiting materials, newsletters, etc.) from randomly selected Catholic schools (mostly in Illinois, including the Archdiocese of Chicago) were evaluated. Application of the model indicates that Catholic schools effectively address the dimensions of performance, retention, order, and moral standards in their public relations materials. However, the audience that these materials reach, and therefore the audience that the schools seek legitimacy with, is very narrow in scope. If there is an interest by the Catholic Church in a broader audience, a more in-depth and encompassing public relations campaign needs to be undertaken. Findings also support the idea that any organization which attempts to legitimate itself (as the Catholic Church has done in education) must seek relevant information from its publics concerning the values important to persons within that society. These values are the key link to an effective public relations campaign, establishing common ground between the organization and its publics. (Contains 66 references.) (NKA)

Descriptors—*Cognitive Style, Communication Research, Computer Uses in Education, Higher Education, Instructional Effectiveness, *Multimedia Instruction, *Student Attitudes, Undergraduate Students

A study explored the extent to which students' learning was facilitated by the use of computerized multimedia presentations in a large lecture course. Subjects, 168 students at a midsize eastern university who enrolled in an introductory mass communication course that used computer assisted media presentations, completed questionnaires about their learning experiences. Results indicated that: (1) learning styles and multimedia presentations were not related; (2) two-thirds of the students reported that they learned more when multimedia was used; (3) virtually all of the remaining one-third of the students were neutral and were evenly distributed across all four learning styles (converger, diverger, assimilator, and accommodator); and (4) 94% of the students reported that the use of multimedia segments made the class entertaining. Findings suggest that the pedagogical benefits of computerized multimedia classroom presentations are equally available to students of all learning styles. (Contains three tables of data.) (RS)

Descriptors—*Critical Thinking, Cultural Context, Higher Education, Language Role, Logical Thinking, *Thinking Skills, *Western Civilization

Identifiers—*Evidence, Explicitness, Rhetorical Strategies

Examination of the characteristics of models of Western critical thinking from a different perspective may help educators realize what these models do not allow. Western processes of reasoning are highly Aristotelian, based on Platonic dialectical forms. Relationships of the parts are established upon clearly defined criteria, and the methods tend to be linear. Western logic demands contextual analyses, and critical thinking urges explicitness to achieve a decontextualized analysis. These methods of critical thinking reflect a low context culture in which individuals discern meaning by attending to clear and explicit signals. In a high context culture, extremely important meanings are embedded within the context. Integration of context into critical analyses is not new, nor is it idiosyncratic to a particular cultural tradition. Most critical thinking texts demand explicitness, but explicitness does not guarantee clarity. Limitations are created when explicitness is a criterion by which legitimacy of evidence is judged. Two additional characteristics of Western methods are the propensity to reject experiential evidence and the tendency to focus on the ability to control the future. An alternative view of critical thinking embodies all of the analyses offered by the Western tradition as well as the whole of experience and respect-for-life, for consequences of all action. By denying the legitimacy of other forms of critical analyses, Western methods cannot access powerful and important thought that does not conform to its prescribed forms, and there is no way to evaluate those forms that influence the world in powerful and not necessarily ethical ways. Descriptors—Course Content, Course Descriptions, Ethics, Higher Education, *Interpersonal Communication, *Leadership, Seminars, Undergraduate Students
Identifiers—Capstone Programs, *Educational Issues

This paper presents a series of handouts that were developed for a senior seminar capstone course in communication entitled "Leadership and Communication." The paper pinpoints the increasing interest in the areas of "leadership" and "ethics" as areas of study and research in universities, and suggests that these two areas merge in what the current paradigm of leadership study describes as "principle-centered leadership." The paper presents the course syllabus, the weekly class schedule, quotes on leadership and communication, a list of the characteristics of principle-centered leaders, questions for discussion on a video entitled "The American Story," an interview with James MacGregor Burns, the title page from the premier issue of "The Journal of Leadership Studies," and a 23-item bibliography. The paper notes that materials were selected which focus on a principle-centered approach by exploring different issues of leadership in a variety of contexts, such as values, ethics, diversity, human dignity, and civic responsibility. Descriptors—College Students, Communication Research, Comparative Analysis, Higher Education, *Internship Programs, Interpersonal Communication, *Mass Media, Sex Differences, *Sexual Harassment, Surveys
Identifiers—*Professional Concerns

A study documented, using a telephone survey, the incidence rates of sexual harassment of mass communication interns, and compared those rates to student and professional rates. A probability sample of 44 male and 52 female mass communications professionals was generated using several random sampling techniques from among professionals who work in Tampa, Florida and who completed a mass communication internship program while an undergraduate or graduate student. Results indicated that (1) the percentage of respondents who reported experiencing at least one form of sexual harassment in their roles as students, interns, and professionals were 32%, 49%, and 65% respectively; (2) the majority of self-reported incidents of sexual harassment were most often minor; (3) the hypothesis that more individuals would be harassed as interns than as students or professionals received some support; (4) women experienced more incidents of sexual harassment than men in all three roles, but the difference was only statistically significant for professionals; (5) males were more often the perpetrators of sexual harassment than females; and (6) some support was found for the hypothesis that victims of sexual harassment viewed the overall quality of their student, intern, and professional experience more negatively than those who were not sexually harassed. Findings suggest that sexual harassment is not an infrequent occurrence in internship programs. (Contains 42 references and 16 tables of data.) (RS)

Descriptors—*College Faculty, Communication Research, Factor Analysis, *Faculty College Relationship, Foreign Countries, Higher Education, *Organizational Climate, Organizational Communication, Surveys, *Universities
Identifiers—Faculty Attitudes, *Organizational Culture

A study examined the organizational climate of a university undergoing dramatic change and its relationship to specific aspects of that institution's organizational culture. Earlier research has shown that organizational climate directly affects an organization's communication climate, but it is less clear how organizational climate influences and is influenced by the more pervasive concept of organizational culture. The possibility of a reciprocity between culture and climate was a key focus of this study. A total of 128 of 145 academic staff across six faculties and one center of the new North Coast University (Australia) completed anonymous surveys. Semi-structured interviews were conducted with the Deputy Vice-Chancellor, the Deputy Principal, all seven Deans, and all 15 Center Heads from the various faculties. Results confirm recent findings that culture informs climate in a number of important ways, most notably through the influence of organizational leadership. Data also yielded some new insights as to the ways in which organizational climate and culture intersect, which had particular relevance at the sub-unit level where climate features were perceived to be most positive in those faculties whose subcultures were found to be congruent with the leadership culture. (Contains 63 references, four tables of data, and two figures illustrating aspects of organizational communication models are included. The survey instrument and a factor analysis are attached.) Is Human-Computer Interaction Social or Parasocial?

Pub Date—Aug 94

Note—24p.; Paper presented at the Annual Meeting of the Association for Education in Journalism and Mass Communication (77th, Atlanta, GA, August 10-13, 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports — Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Communication Research, *Computer Attitudes, *Computers, Higher Education, *Interpersonal Communication, Interpersonal Relationship, *Man Machine Systems, Undergraduate Students
Identifiers—Research Suggestions

Conducted in the attribution-research paradigm of social psychology, a study examined whether human-computer interaction is fundamentally social (as in human-human interaction) or parasocial (as in human-television interaction). All 30 subjects (drawn from an undergraduate class on communication) were exposed to an identical interaction with computers. In one condition, subjects were told they were dealing with computers; in another, they were told they were interacting with programmers. Each subject was tutored by two different computers on two topics and evaluated by the computers. The first set of evaluations praised the subject four out of five times, the second set of evaluations criticized the subjects four out of five times. Psychological differences were found between conditions, suggesting human-computer interaction to be social rather than parasocial. Users tended to respond to computers as though the computers were other humans, and dealing with computers is more like interpersonal communication rather than like mass communication. Further research should expand on this study by adding another condition wherein subjects are led to believe that they are interacting with a live tutor/evaluator in another room. Depending on whether this condition is closer to the computer condition or the programmer condition, theories about the socialness of human-computer interaction can be generated. (Contains 25 references and one table of data.) (RS)

Doing Good Is a Hustle, Too: Effects of Motives To

Impression Manage, Communication Style, and Licensing on the Reputation of the Public Relations Practitioner.

Pub Date—11 Aug 94

Note—57p.; Paper presented at the Annual Meeting of the Association for Education in Journalism and Mass Communication (77th, Atlanta, GA, August 10-13, 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports — Research (143)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Adults, *Certification, Communication Research, Higher Education, Media Research, Motivation, Professional Recognition, *Public Relations, Questionnaires, Undergraduate Students

Identifiers—Communication Styles, *Impression Management, *Professional Concerns

A study tested effects of motives, communication style, and licensing (whether the practitioner is licensed or not) on public relations practitioners' reputations. Impression management theory suggests that perceived motives and self-interests may explain the poor reputation sometimes attributed to public relations practitioners. Subjects, 585 undergraduate students and non-student adults, read one of four brief news articles announcing plans of a fictitious manufacturer of laser printers to launch a laser cartridge recycling program in the local community. The four different types of news stories were combined with four different background information sheets on the motives of the public relations person responsible for the story to yield 16 different versions of questionnaires which were randomly distributed to subjects as they presented themselves to participate. Results indicated that (1) perceived motives to impression manage had a strong effect, with prosocial motives seen as a "hustle"; (2) mixed support was found for licensing as a means of enhancing reputation; and (3) communication style had no effect. Findings suggest that the time has come for public relations theorists, educators, and practitioners to shift their focus away from apologizing for the advocacy dimension inherent in public relations toward a renewed emphasis on ways that advocacy can become more effective and reputable. (Contains 137 references, nine tables of data, and 27 notes. Appendixes present the four stories, the four background information sheets, and a debriefing sheet. (RS)

Descriptors—Attendance Patterns, Attitude Measures, Audience Analysis, Audience Response, Churches, Comparative Analysis, Higher Education, *Mass Media Effects, *Mass Media Role, National Surveys, Television Research, *Television Viewing

Noting that several current communication theories suggest that the media have a "persuasive" effect on American society, a study compared the effects of two media (the electronic medium of television and the spoken medium of the homily) and whether these media have different effects on their audience's perceptions of reality. A national phone survey of 552 random residences was conducted. The amount of time each respondent spent per day watching television and the number of times per month each attended church or worship service were found. Respondents were then categorized as to whether they viewed television and attended church more or less than the median. Respondents were also asked what they felt was the most important problem facing America today. The frequency of these responses were compared for heavy and light TV viewers and church attendees. Results indicated that these media were not significant factors in respondents' view of the most important problems facing America today. In fact, results support the value of scholarly consideration of the objective impact of real-world indicators along with the effects of the media. (Contains 20 references and 3 tables of data.) (RS)

Do They Believe It When They See It? Video News Release Effects on Viewer Recall and Attitudes.

Pub Date—Aug 94
Note—19p; Paper presented at the Annual Meeting of the Association for Education in Journalism and Mass Communication (77th, Atlanta, GA, August 10-13, 1994).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Advertising, *Audience Response, Credibility, Higher Education, *Mass Media Effects, Media Research, Recall (Psychology), Student Attitudes, *Television Viewing, Undergraduate Students, Videotape Recordings
Identifiers—Message Perception, *Video News Releases

A study tested responses of viewers (as opposed to news organizations and sponsoring firms) to video news releases (VNRs). Subjects, 81 undergraduate students enrolled in an introductory advertising course, viewed a 30-second message about McDonald's and the Big Mac in a VNR format or an advertisement about the Big Mac special "Meal Deal" embedded in a videotape of a recent local newscast. Subjects completed questionnaires measuring the credibility of the information in the video. Results indicated that viewers assign significantly more credibility to VNR-based messages than to similar advertisements. Further, the level of credibility given to newscasts was a significant predictor of VNR recall. (Contains 14 references, 1 table, and 1 figure of data.) (RS)

Keyton, Joann
Examining Flirting in Social and Work Contexts: Are There Implications for Harassment?

Pub Date—Nov 93
Note—19p; Paper presented at the Annual Meeting of the Speech Communication Association (79th, Miami Beach, FL, November 18-21, 1993).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—College Students, Higher Education, *Interpersonal Communication, *Organizational Communication, Sex Differences, *Sexual Harassment, *Social Environment, *Work Environment

Identifiers—*Flirting, Message Responses, Superior Subordinate Relationship

Based upon B. M. Montgomery's operationalization of flirting, a study tested flirting behaviors and interpretations of those behaviors in two contexts—social and work. Subjects were 27 students at a medium size southern private university, 43 non-student full-time employees from the same geographical area, 22 students in a large midwestern public university, 30 students at a midsize public university, and 51 nonstudent, full-time employees from the same geographical region. Subjects completed a questionnaire concerning flirting behaviors and flirting interpretation items. Results indicated that sex did not account for differences on either scale in either context. The behavioral cues of flirting did not appear to be confined to flirting interaction, thus creating an ambiguous interpretation of the interaction. Knowing the flirting target predicted flirting behavior in the work context while having a romantic/sexual interest in the target predicted flirting in the social context. Findings suggest that flirting in the work setting does occur and that most targets flirt back, but less than 40% of the flirts had a romantic/sexual interest in their targets. The game playing motive of flirting in the work place has a bearing on the occurrence of sexually harassing behavior. (Contains 31 references, 1 figure, and 1 table of data.) (RS)

The Adoption of Digital Imaging Technology at Daily College Student Newspapers and the Credibility of News Photos.

Pub Date—Aug 94

Note—19p; Paper presented at the Annual Meeting of the Association for Education in Journalism and Mass Communication (77th, Atlanta, GA, August 10-13, 1994).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Adoption (Ideas), *Credibility, Higher Education, Media Research, National Surveys, *Photography, *Photojournalism, *School Newspapers, *Student Publications, Technological Advancement

Identifiers—*Digital Imagery, Journalism Research, Professional Concerns, Scholastic Journalism

A mail survey of 86 daily college newspapers (91% of the population) measured the adoption rate of digital imaging technology for the routine processing of news photographs to establish the stage of adoption and to assess possible effects of the technology on students' perceptions of newsphoto credibility. Results indicated that 63% reported having published at least one photograph using digital imaging technology and 33% reported using it on a routine basis. Adopters used more new technology

in general than non-adopters and printed color photographs more frequently though their average circulation size was similar. Almost 64% of all student photo editors said the technology would eventually decrease the credibility of newsphotos. Editors at adopting papers were even more likely to say this than editors at non-adopting papers. Findings suggest that the adoption of digital imaging technology at daily college student newspapers is occurring at a rate similar to that predicted by Rogers, et al. and that adoption has recently entered the "early majority" stage. (Contains 22 notes, 2 tables, and 1 figure of data.) (Author/RS)

Descriptors—*Children's Television, *Definitions, *Federal Legislation, *Federal Regulation, Mass Media Effects, Mass Media Role, *Programming (Broadcast)

Identifiers—*Children's Television Act 1990, Federal Communications Commission, Historical Background

This paper argues that the Children's Television Act of 1990 (CTA) required television broadcasters to air educational and informational children's programming, but Federal Communications Commission (FCC) policy did little to clarify the definition of "educational and informational." The paper first examines the historical usage/definitions of the phrase in children's programming debate since the 1960s, noting that the FCC refused to actively regulate programming. The next section of the paper discusses what has happened to the numerous bills regarding children's programming introduced beginning in 1977 designed to require greater quality and quantities of children's programming, leading up to President George Bush allowing the CTA to become law in 1990 without his signature. According to the paper, the FCC definition of educational and informational is "any television programming which furthers the positive development of children 16 years and under in any respect, including the child's cognitive/intellectual or emotional/social needs." The paper concludes that the FCC should provide a better operational definition of "educational and informational" if it expects broadcasters to comply with CTA. Contains 68 references. (RS)

Images of Science and Scientists on Children's Educational Science Programs.

Pub Date—Aug 94

Note—41p; Paper presented at the Annual Meeting of the Association for Education in Journalism and Mass Communication (77th, Atlanta, GA, August 10-13, 1994).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—*Children's Television, Content Analysis, Educational Television, Elementary Education, *Mass Media Role, Popular Culture, *Science Education, Sciences, Scientific Methodology, *Scientists, Television Research

Identifiers—Images

A qualitative study analyzed images of science and scientists in children's educational science programs on television to determine whether they conveyed the images found in other media. Four episodes of each of four 30-minute, non-animated programs ("Beakman's World" broadcast on CBS, "Bill Nye, The Science Guy" shown on independent stations, "Mr. Wizard's World" which airs on Nickelodeon/MTV, and "Newton's Apple" broadcast nationally on PBS stations) were analyzed. Results indicated that the programs perpetuated the image of science as truth, while providing little evidence for the image of science as magical and mixed evidence for the image of science as dangerous. Results also indicated that the programs perpetuated the image of scientists as omniscient and elite, and they did not promote the image of scientists as evil. Four other images of science and scientists

emerged: science as fun, science as part of everyday life, science is for everyone, and scientists as benign. (Contains 28 references.) (Author/RS)

Product News versus Advertising: An Exploration within a Student Population.

Pub Date—Aug 94

Note—23p.; Paper presented at the Annual Meeting of the Association for Education in Journalism and Mass Communication (77th, Atlanta, GA, August 10-13, 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports — Research (143)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Advertising, Comparative Analysis, Higher Education, *Information Sources, Mass Media Effects, Media Research, News Reporting, *Student Attitudes, Student Surveys, Undergraduate Students

An exploratory survey (part of a larger study) examined the relative effectiveness of news versus advertising as sources of product information. Subjects, 140 undergraduate students enrolled in an introductory public speaking course or a course in visual communication, completed a 5-page media interest survey. Results indicated that news rates favorably, based on belief and attitudinal measures. However, mixed results were obtained when respondents were asked to specify which sources of information they were likely to use when purchasing a product or service. Findings suggest that although individuals might be positively predisposed toward news versus advertising, the effect is probably conditional in nature. The next stage of the research project is designed to test claims about the superiority of news within the context of a variety of variables that might moderate its effects in a controlled setting. Identifiers—*Texas

Educators are very concerned about the problem of students dropping out of school. The reasons for students dropping out vary from social to economic causes. Alternative programs or schools have been used since the 1960s to try to keep students in school. This study involved a literature review of research on the identification and remediation of at-risk students. It also investigated alternative programs for such students in the Dallas-Forth Worth, Texas, area schools. Research on dropouts has recognized it as a historical problem since compulsory education, but has failed to clearly define the problem. Minority and non-English speaking students have had higher dropout rates. Research has shown that alternative education programs vary in size, structure, and goals. Successful programs separate dropout students from other students, offer vocational training, provide out-of-class learning opportunities, and have a low student-teacher ratio. A review of the Dallas-Forth Worth area found alternative programs at all levels of education serving dropouts and working toward dropout prevention. Students early on showed signs of being at risk and potential dropouts. Appendices A through D include questions, surveys, and results. (Contains 29 references.) (JPT)

Descriptors—*Democracy, *Democratic Values, Elementary Secondary Education, Organizational Climate, Organizational Communication, *Participative Decision Making, Power Structure, *School Restructuring, *Theory Practice Relationship

Identifiers—*Praxis

Is the work of democracy too hard for schools to implement? This paper presents findings of a study that examined the dialectical relationship between the espoused values of democracy in schools and the actual practice of equity and inclusion in site-based decision making. Specifically, it examines the lived experience of the people inside schools who experience participation or lack of participation. The two schools participating in the case study were part of a nine-site network in Oregon, dedicated to school restructuring. Methodology involved document analysis, videotaped interviews with principals and teachers, interviews with principals and site-team chairs, a demographic survey of all staff, and a schoolwide sociogram analysis. Four understandings about democratic praxis emerged: (1) the conscious construction of democratic values in schools does contribute to increased democratic practices in schools; (2) democracy is extraordinarily hard work; (3) democratic praxis can be attained, but only if educators recognize that changes in language/ideas do not change peoples' fundamental values; and (4) democratic praxis in schools can succeed only if the dialogue attends to issues of access, status, and hierarchy. To sustain democratic

praxis, educators must understand and integrate the following concepts—the social construction of democratic practices in schools, micropolitical behaviors, a systems perspective, and metacognition. Eight figures and five tables are included. (LMI)

Descriptors—*Academic Achievement, Culture Fair Tests, Educational Change, Elementary Secondary Education, Ethnic Groups, Institutional Autonomy, *Participative Decision Making, *Public Schools, *School Based Management Identifiers—Seattle Public Schools WA

The Schools for the 21st Century (C21) Consortium was created in 1988 to produce change within 30 schools in a zone of the Seattle School District. Changes in four areas—staff development, networking among the schools, school-community linkages, and school restructuring—were implemented under "School Focused Leadership," a move toward school-based management. This paper presents findings of a study that sought to: (1) categorize the kinds of decisions that school sites make; and (2) determine the effect of shared decision making on student achievement outcomes, both in terms of overall gain and ethnic gap reduction. To determine the extent to which "School Focused Leadership" was really occurring in the schools, a group of teachers on the C21 advisory council developed a questionnaire and administered it to teachers in 19 C21 elementary schools in 1992. A revised version was administered to teachers in 13 of the C21 schools in 1993. The data show a curvilinear relationship between shared decision making and student achievement. As the C21 schools moved at different rates toward participative decision making, they showed a drop in the ethnic gap reduction (EGR). As they reached a point of greater influence in decision making, EGR scores rose. The data are consistent with other research findings that have found that reduction in student outputs occur as change is initiated and that outputs increase as change is institutionalized. Three figures and one table are included. (LMI)

Descriptors—Change Strategies, *Educational Change, Educational Planning, Elementary Secondary Education, Faculty Workload, Scheduling, School Restructuring, Teaching Conditions, *Time Management, *Time on Task, Work Environment

Parents, teachers, and government officials agree that America's schools must be reformed. However, new research suggests that most reforms will not work without closer attention to one critical resource—time. This document presents findings of a study conducted by the Rand Institute on Education and Training, which found that any reform takes time to formulate, plan, implement, and institutionalize. Because teachers must give first priority to classroom teaching, they must accommodate the new demands of reform into their already tight schedules. Reform conducted on the fringes of the school day, however, will never amount to fundamental change. Four principles for creating the time that staff members need are offered: (1) readjust priorities by removing old demands and resisting other reforms that divert time and attention; (2) provide time and resources for teachers; (3) recognize change as a long-term process requiring patience; and (4) create shared time for groups to work together. Drawing on these four principles, specific implications for the roles of the following groups are identified: state education agencies and legislatures should apply a realistic time frame; teachers' unions should advocate a wider range of job descriptions

for teachers; foundations and business partners should extend their support over a number of years; school boards should make staff planning time a routine part of the school calendar; school administrators should institutionalize common planning time and provide staff; and teachers and other staff should abandon some existing commitments, and use time slots appropriate to the purpose. Descriptors—Codes of Ethics, *Curriculum Guides, Educational History, Elementary Secondary Education, *Ethical Instruction, Moral Development, *Moral Values, Socialization, *Values Education Identifiers—*Character Education

Character education is a contentious and fractionated topic, yet one that has been revisited with stubborn persistence in the history of American education. To explore the complexity of the character-education debate, this theme issue presents interviews with three national figures. First, a broad perspective is provided by Theodore R.Sizer, who directs the Coalition of Essential Schools and the Annenberg National Institute for School Reform at Brown University. He believes character and intellect are inseparable, describes what good character must be, and discusses the need to restructure education in order to accommodate small communities where a dialogue among staff and students is necessary. He describes the structural constraints that impede educative efforts, such as the press for "coverage" that dominates a school day, and the lack of a sense of community among staff. In the second interview, Kevin Ryan, director of the Center for the Advancement of Character and Ethics at Boston University, seeks a return to a classical curriculum. He believes that study of the great works of literature and history can provide a "moral compass" that is lacking in today's public schools and society. In the third article, James Leming, professor of curriculum and instruction at Southern Illinois University, provides a historical overview of character-education efforts in the United States. He explains why in times of social unrest public attention turns to schooling and character development, and examines the issue of indoctrination. Finally, Florence L. Johnson, director of the National Center for Effective Schools, argues that schools, rather than focusing on character education, should establish strong nurturing support systems for all students, particularly those already at risk. Descriptors—*Access to Education, *Educational Change, Elementary Secondary Education, *Equal Education, Grouping (Instructional Purposes), Racial Discrimination, School Restructuring, Sex Discrimination, *Social Stratification, Socioeconomic Status

Efforts in the United States to provide a higher quality education for everyone regardless of race, class, and gender have had, at best, a very modest effect. This paper suggests that the effect of a change strategy depends on the discourse (how things are talked about when teachers solve problems, plan their work, create policy, and explain things to one another). Discourse I in schooling cultures is a discourse about how to do the present work of schools better. Discourse II is a discourse about how to create demystified schooling. Discourse I relates to conventional and traditional teaching and organizing of schools. Discourse II relates to creating a transformed school that is about learning-learning for everyone there: an organization whose purpose is to educate so the results no longer correlate with social class, race or gender. It is argued that traditional education is based on the cultural myth of the American Dream, which legitimizes stratification

by race, class, and gender. The challenge is how to change the work of schools. This requires a fundamental change in the way schools are restructured, teachers developed, and leadership provided. New conditions and relationships must be created through substantive systemic change, which begins with a new and different discourse. (LMI)

This paper describes the role of gender in the politics of American education, as carried out in Philadelphia and its suburbs from 1905 to 1930. It discusses volunteerism as a way of life for middle-class American women in the 19th century, particularly within the realm of education. Women were able to act as advocates of school reform through involvement in the Parent Teachers Association (PTA) and the Home School League of Philadelphia. The gradual inclusion of women on school boards is described, as well as the patterns of women's involvement in educational issues in Hadonfield, New Jersey. In conclusion, gender and class intertwined to gird the home and school in Philadelphia and its suburbs. Within the limits set by middle-class culture, men and women could exercise influence, but each was forced to play a different role. Men served on boards of education; women belonged to the Parent Teacher Association. Women, however, learned to use cooperation and collaboration, rather than direct confrontation, to gain more leverage for the home at school and in the community. Two tables and one figure are included. (LMI)

Descriptors—*Academic Achievement, *Educational Environment, Elementary Secondary Education, Leadership, *Leadership Qualities, *Leadership Styles, Parent Participation, *Principals

Identifiers—Kentucky

This paper presents findings of a study that examined the influence of the principal's leadership style on school climate and student achievement. Three survey instruments—the Leadership Behavioral Matrix, the Tennessee School Climate Inventory, and the Group Openness and Trust Scale—were administered to 20 principals and 506 teachers in 20 Kentucky elementary schools. The achievement scores (the California Test of Basic Skills) of 2,834 third- and fifth-graders in the 20 schools were also analyzed. Using analysis of variance procedures, comparisons between school climate and leadership style revealed a statistically significant difference between leadership style and the involvement subscale of the school climate instruments. There were no significant differences for any of the other eight subscales of school climate for leadership style, nor were there any significant differences between school achievement and leadership style. Twelve of the principals, however, used a "promoter" leadership style, which involved meeting people's needs and involving parents and community in decision making. A conclusion is that schools with higher levels of parent/community involvement and principals with "promoter" styles may enhance their students' achievement. Seven tables and appendices

containing three data matrices are included. Contains 38 references. (LMI)

Identifiers—*Education Consolidation Improvement Act Chapter 2

Chapter 2 of Title I of the Elementary and Secondary Education Act is a formula grant program designed to support educational improvement. The intent of the Chapter 2 program is to make funds available for state education agencies (SEAs) and local education agencies (LEAs) to improve elementary/secondary education, meet the special educational needs of at-risk students, and support innovative school programs. Under the Chapter 2 program, LEAs receive block grants and have wide discretion over how they allocate funds. This paper assesses the effectiveness of the Chapter 2 program, with a focus on how successfully it promotes educational improvement. The data were collected through: national surveys conducted at the state and local levels; and case studies of 6 LEAs (Colorado, Indiana, Maryland, Mississippi, Texas, and Vermont) and 18 school districts (3 in each case-study state). If educational improvement is defined as addressing states' and districts' specific priorities, then Chapter 2 has been an effective strategy, especially when these priorities relate to educational reform as they often do. However, Chapter 2 has an uneven record in other respects. Findings show that these funds are used in much the same way as they were before the program's reauthorization: to support the purchase of instructional materials. As a strategy to focus funds on school improvement, the target areas have been less than successful. Recommendations include: (1) eliminate the targeted assistance areas; (2) focus both state and local Chapter 2 funds on educational reform initiatives and/or educational priorities; (3) eliminate materials and equipment as allowable expenditures unless they are directly related to reform; and (4) require that LEAs concentrate Chapter 2 funds on one specific activity/program related to reform or on educational priority. One figure and six tables are included. (LMI)

Descriptors—*Causal Models, Elementary Secondary Education, Factor Analysis, Multiple Regression Analysis, *Organizational Climate, *Organizational Effectiveness, Reliability, *School Effectiveness, *Supervisory Methods, Validity

This paper presents findings of a study that developed, measured, and tested the Organizational/Supervisory (O/S) Model of Instructional Supervision. The six dimensions of the Organizational Supervisory Climate Inventory (OSCI)—organizational structure, professional autonomy, collaborative sharing, district supervisory climate, reflection, and centralization—served as independent variables. The dependent variables were three recognized indices of effectiveness—school effectiveness, organizational effectiveness, and school holding power. Methodol-

ogy involved a survey of 7,358 professional staff (primarily teachers) and 452 administrators in 1 state and interviews with 2 randomly selected teachers and the principal in 20 of the schools that participated in the survey. Findings indicate that the OSCI instrument is a highly reliable and stable measure of the organizational/supervisory climate, which indicates that the relationship between school effectiveness and school climate can be conceptualized and measured multidimensionally. The O/S model shows the usefulness of subscribing to a richer view of school instructional supervision as a fundamentally organizational phenomenon. Appendices include information on the research-design process, the O/S Model of Instructional Supervision, and statistical data. Contains 29 references. (LMI)

Descriptors—*Advisory Committees, *Educational Cooperation, Elementary Secondary Education, Interprofessional Relationship, *Organizational Change, *Organizational Communication, *Partnerships in Education, Program Evaluation

The Cooperative Alliance, funded by the U.S. Department of Education in 1990, is a partnership among three agencies—Kent State University (KSU), Cleveland Public Schools' (CPS) Center for School Improvement, and International Business Machines (IBM) EdQuest Corporation—to enhance educational planning for minority and/or educationally disadvantaged students in both regular and gifted K-12 education. This paper presents findings of a 3-year study that examined participants' perspectives about the development of the educational partnership. In the third year of the study, interviews were conducted with all 16 members of the partnership's advisory body, the Joint Partnership Advisory Council (JPAC). Conclusions are that, first, an educational partnership must focus on helping partners to understand the project and to learn from each other. Second, the following key issues remained constant—careful communication, strong leadership, diversity, and focus on project goals. Third, partnerships must learn to accommodate change. Fourth, participants' concerns were related to their partnership roles. Finally, assessments of the partnership process should be built on the assumption that meaning is socially constructed and context dependent. Partnership designs should acknowledge that participants' perceptions will change as the partnership matures. One figure and two tables are included. Contains 21 references. (LMI)

Descriptors—Communication Skills, Decision Making, *Educational Improvement, Elementary Secondary Education, *Leadership Qualities, *Needs Assessment, *Planning, *Principals, School Based Management, *Teamwork

In providing leadership for school improvement teams, principals must employ group communication and decision-making skills. In this study, a planning procedure called Quality Function Deployment (QFD) was modified for use with school-based administrators. Teams of school leaders used QFD to generate the top priority needs of school customers (students, parents, and teachers) for school improvement goals. Burton and Merrill's taxonomy of needs sources and Kaufman's Organizational Elements Model were used to classify and

analyze the perceived needs identified by the principals. Results indicated that school leaders were adept at using the QFD process and that assuming the customer's perspective enabled principals to identify needs beyond those typically identified for school improvement. Several patterns of needs were observed across the categories of the Burton and Merrill and the Kaufman systems, suggesting that both analysis procedures can provide school improvement teams with valuable insights for their needs analysis and eventual needs assessment activities. The emphasis on students' personal needs and teachers' professional needs serves to remind educators of their highest priorities. Contains 28 references and 2 tables summarizing participants' perceptions of their customers' needs. (Author/MLH)

Identifiers—*Faculty Senates (Elementary Secondary Schools), *West Virginia

The West Virginia education reform legislation of 1988 and 1990 mandated greater involvement of school personnel, parents, and community in site-based decision making. This paper examines the operations and activities of faculty senates, which are composed of all full-time educators in each school, for the years 1990-91, 1991-92, and 1992-93. A survey administered to delegates who attended the 1991, 1992, and 1993 West Virginia Education Association Delegate Assemblies yielded 176, 129, and 212 responses, respectively, an approximate 75 percent compliance rate. Respondents indicated increasing faculty involvement in school-based decision making; however, they expressed declining support for decisions and less satisfaction with senate operations within the 3-year period. They most frequently mentioned the need for training, role clarification, and greater support from the school and district administrations. Eight tables are included. (LMI)

Descriptors—Educational Change, *Educational Environment, Elementary Secondary Education, *Institutional Environment, *Organizational Climate, *Organizational Development, Participative Decision Making, Productivity, Teacher Administrator Relationship, *Total Quality Management, *Work Environment

This paper presents the initial findings of a comprehensive 28-school multi-site case study, which sought to identify patterns in schools that are changing bureaucratic work patterns to those found in quality-management systems. The schools are located in Florida, Virginia, Minnesota, and Louisiana; all are led by principals who are trainers in the Managing Productive Schools (MPS) training program. Data were derived from interviews with the 28 principals and from two surveys of all staff at 25 schools (N=1,235). Findings indicate that principals utilized visionary leadership, strategic planning processes, and a systems approach. They also sought new ways to gather information and focused on continual improvement and human resource development. In the highest performing schools, the four subscales of planning, staff development, program development, and assessment tended to function more interdependently. The more mature working cultures were characterized by participative decision making, clear communication, and

support for teaching innovations and teacher teams. The less mature schools displayed autocratic decision making and fragmented communication. Teachers in less mature schools lacked financial support and recognition, felt isolated, and worked in a disciplinary context. A conclusion is that developing a common focus and shared vision of success for all students takes time. It requires innovative, nurturing leadership. Five tables and three figures are included. Contains 26 references. (LMI)

Identifiers—*England, *Wales

England and Wales introduced a site-based management system in 1988, which delegated the responsibility for strategic planning from school boards to individual schools. This paper describes the kinds of planning approaches used by schools in this new context. Data were obtained from a survey of 106 teachers enrolled in a graduate-level education management and administration course. The teachers represented 15 different school boards. Findings indicate that approximately one-half of the schools: (1) utilized an ad hoc planning approach; (2) failed to consciously link the school's strategic-planning objectives with resource allocation; and (3) lacked a systemic process for evaluating progress toward policy implementation. In about two-thirds of the schools, action plans were incomplete. If schools are to grasp the strategic initiative offered by further decentralization, the central government should conduct a thorough review of the probable systemwide impact of the English government's increasingly "laissez faire" attitudes toward site-based planning. Descriptors—*Administrator Education, *Administrator Qualifications, *Educational Administration, Effective Schools Research, Elementary Secondary Education, *Graduate Study, Higher Education, Organizational Climate, *Principals, *Professional Development, School Effectiveness

This paper examines the consequences of principals' graduate training in educational administration for school effectiveness and asks: Are schools led by administrators with extensive, formal preparation more effective than schools led by principals with little or no graduate training? The data were derived from the School and Staffing Survey (SASS), sponsored by the National Center for Educational Statistics (NCES) and conducted by the U.S. Bureau of the Census during 1987-88, a nationally representative sample of the public and private elementary and secondary schools at that time. Of the total sample of 12,830 schools, a subsample of 6,341 elementary, junior high/middle, and high schools was analyzed. Five measures of school effectiveness were created. Then multiple analysis of variance and covariance was used to relate these measures to the level and type of training principals had received, controlling for several confounding influences. No evidence was found to suggest that principals' graduate training in educational administration improves the effectiveness of public elementary and secondary schools. It is recommended that further evidence be gathered before requiring graduate training for school administrators. Five tables are included. Contains 31 references. (LMI)

Descriptors—College School Cooperation, *Costs, Elementary Secondary Education, Expenditures, Higher Education, *Partnerships in Education, Professional Continuing Education, *Professional Development Schools, *School Restructuring, Teacher Education, *Teacher Education Programs

In 1989, West Virginia University initiated a project to create a new vision for teacher education and for schools in West Virginia. With the support of the Claude Worthington Benedum Foundation of Pittsburgh, the school partnership is based on the Holmes Group concept of professional-development schools (PDSs), which provides a vehicle for school restructuring and teachers' active engagement with teacher education. This paper describes the first-year experiences of two participating schools—one elementary and one high school—to illustrate the average activities and costs of PDS implementation. Costs were incurred for the following cross-site project activities: teacher education centers, a cross-site steering committee, professional-development networks, a research team, and overall project administration. Findings suggest that restructuring is an expensive enterprise, involving a variety of resources and costs, some of which are difficult to calculate. In the first year, the high school spent \$58,000 and the elementary school spent \$48,000 to fund activities related to restructuring. These are conservative estimates of how much reform may cost annually, though it is difficult to generalize the amounts to all schools. Seven sample budgets are included. (LMI)

Descriptors—Educational Improvement, Educational Policy, Elementary Secondary Education, *Policy Formation, Politics of Education, *Public Opinion, *Public Schools, *Public Support, *School Restructuring, Social Attitudes

During the last decade, the discovery that most voters believed that public schools were in need of improvement fueled the educational reform movement. This paper examines the public's role in education, with a focus on reasons for the public's failure to actively support educational reform. A review of recent surveys indicates that although most American citizens are uninformed, uninterested, and not actively engaged in the major educational reform issues, they may still play important, but less direct, policy-shaping roles. First, the public can be counted on to provide general support for almost any issue promising school improvement. Second, they believe strongly in the need for school improvement and can electorally punish political leaders. Third, public opinion may more directly affect the resolution of school issues stemming from broader societal and religious differences. Fourth, citizens can thwart the implementation of reforms. Fifth, citizens may become more directly engaged in local school-improvement issues than in national issues. Although most citizens are concerned about the state of American schools and support reform proposals aimed at improving schools, there is little evidence that they would demand a fundamentally restructured curriculum or school organization especially when costs became apparent. One figure and three tables are included. (LMI)

Marketing, Parental Choice and Strategic Planning: An Opportunity or Dilemma for UK Schools?

Pub Date—May 94

Note—16p.; Paper presented at the Conference of the International Intervisitation Program (Buffalo, NY, May 1994).

Pub Type—Opinion Papers (120)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Decentralization, *Educational Planning, Elementary Secondary Education, Foreign Countries, Government School Relationship, *Long Range Planning, Organizational Theories, *School Based Management, *School Choice, School Restructuring, *Strategic Planning Identifiers—*England, *Wales

Site-based management, parental choice, and accountability for the efficient, effective, and economic use of public resources in England and Wales were key themes of the 1988 Education Reform Act. The 1993 Education Act opened the way for greater choice in the marketplace by encouraging specialization and/or selection by aptitude/ability in existing new schools. As a result of the 1993 Education Act, schools will now have to make long-term strategic marketing choices. This paper attempts to answer the following questions: (1) As schools in England and Wales face the realities of a second, and potentially radical wave of market forces, will they advertise and sell an increasingly parent-determined product to attract resources in order to survive? (2) Or will schools adopt a philosophy of societal marketing, with a client rather than product focus that will integrate their strategic planning and marketing? The paper briefly considers some of the dilemmas that parental choice presents to a decentralized education service. It suggests a role for marketing theory in exploring the needs and perceptions of parents, and then describes a possible role for strategic educational marketing planning as a means of informing professional judgment and educating parental choice. Preliminary findings of the Parent and School Choice Interaction Study (1993) suggest that schools continue to respond to choice and competition by increasing their focus on promotional activities. Unless schools actively develop a marketing approach that shapes a coherent program of change and educates client perceptions of need, they will increasingly be driven by a middle-class planning agenda, which will further sharpen the divisions within British society. This paper presents the insights of superintendents about the school restructuring process in Kentucky and its likely effects. Data were derived from a focus group held with 24 members of the Kentucky Educational Development Corporation (KEDC), and from a survey of 48 superintendents, of which 35 responded. A majority of respondents expressed widespread frustration with the Kentucky Educational Reform Act of 1990. They were unwilling to wholeheartedly embrace the restructuring agenda for the following reasons: unrealistic expectations, lack of support, the diminishing role of the superintendent, the relinquishing of power to untrained groups, conflicts with the state, and a focus on structure rather than content. If restructuring is to be successful, a number of issues must be addressed. First, there must be across-the-board fidelity to the basic operating philosophy of the prevailing reform ideology. This requires reform through empowerment rather than control. Second, policymakers and administrators need to have realistic expectations of reform. Finally, support must

be provided to superintendents so that they can successfully transform their roles. (LMI)

Identifiers—*Kentucky, *Kentucky Education Reform Act 1990

Little research has investigated the effects of school restructuring on the roles of central office administrators, particularly the superintendent. This paper presents findings of a study that examined the perceptions of superintendents in Kentucky, whose State Legislature passed a statewide systemic reform initiative, the Kentucky Education Reform Act of 1990. A survey of 176 Kentucky superintendents elicited 74 usable responses, a 42 percent response rate. Three themes emerged from the data that defined the changing role of the superintendency: (1) developing community; (2) coaching from the sidelines; and (3) struggling to meet the KERA standards. The findings do not support the view that superintendents will evolve into "stewards of a radically expanded and more complex enterprise" (Cunningham 1990). Nor do the data support the belief that superintendents are unaffected by restructuring activity, or that they are being pushed off the main stage of school leadership and management. Rather, it appears that new superintendent roles are emerging. Contains 88 references. (LMI)

Descriptors—Administrator Responsibility, *Administrator Role, Educational Change, *Educational Environment, Elementary Secondary Education, Foreign Countries, Personal Autonomy, *Principals, *School Restructuring, *Work Environment

This paper analyzes the empirical evidence available to date concerning the evolving role of the principal. First, it briefly describes the effects of fundamental reform measures on the work environment of school principals, with a focus on work overload and role ambiguity. The second section unpacks the available body of empirical research to determine how the principal's role is changing as a result of school-improvement efforts. It draws on research from seven countries—Australia, Belgium, Canada, Great Britain, Israel, the United States, and New Zealand. These role changes are categorized as: leading from the center; enabling and supporting teacher success; managing reform; and extending the school community. Finally, the third section examines the dilemmas confronting educational leaders in their quest to restructure schooling. These dilemmas, or areas in which principals have considerable doubt, are described as the complexity dilemma, the search dilemma, the self dilemma, and the accountability dilemma. Descriptors—*Action Research, *Administrator Education, *Educational Administration, *Educational Cooperation, Graduate Study, *Interprofessional Relationship, Mentors

This paper describes how two people, a professor in educational administration and a graduate student who acted as coach, used the coaching process as a part of collaborative action research. It focuses on the professor-coach interpersonal issues of mutual trust, new learning, and autonomy. The graduate student was an expert in coaching methods and a central-office administrator, who observed the professor's teaching behaviors over two semesters. These coach's learning concerns were also shared by students and the professor: the lessening needs for clarity and structure; the resolution of tension associated with new learning; the working toward mutual respect; the learning to trust of adult autonomy; and the recognition that change needs time. The coaching-learning process, which initially led to stress, pain, and lack of clarity, evolved into flexibility, an acceptance of complexity, and a renewed appreciation for other ways of teaching and learning. Descriptors—*Educational Environment, Effective Schools Research, Elementary Secondary Education, Institutional Environment, *Organizational Climate, Organizational Communication, Organizational Effectiveness, *School Effectiveness, Systems Approach, Values

Although educational researchers are beginning to recognize the influence of organizational culture on organizational productivity, the term "organizational culture" has been defined from a variety of perspectives. This paper presents findings of a case study that investigated the cultural characteristics of a junior high school recognized for its effectiveness. The school was located in an urban school district with a 40-50 percent dropout rate. Data were collected through document analysis, observation, and interviews with 25 students, 11 teachers, and 2 administrators (a random sample from a population of 771). Kluchohn and Strodbeck's organizational-cultural paradigm (1961) is used to describe the school's basic assumptions about: (1) humanity's relationship to nature; (2) the nature of reality and truth; (3) the nature of human nature; (4) the nature of human activity; and (5) the nature of human relationships. Teachers expressed the following core values—trust, achievement, openness, innovation, networking, involvement, and recognition. A conclusion is that school culture is a sequence of complex shared behavior patterns that connect the artifacts, core values, and underlying assumptions that form a cultural paradigm. This culture will sustain itself over time as long as the linkages help the school survive. (LMI)

Choice, Competition and Equity: Lessons from Research in the UK.

Pub Date—Apr 94

Note—19p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Access to Education, Educational Change, Educational Equity (Finance), *Educational Opportunities, Elementary Secondary Education, Foreign Countries, *Free Enterprise System, Parent Involvement, *School Choice, Social Stratification, *Socioeconomic Status

Identifiers—*United Kingdom

This paper evaluates the recent education reforms in the United Kingdom (UK) in terms of their con-

tribution to the establishment of an equitable system of education income distribution. The UK education market as it exists today was set in motion by a package of reforms introduced as a result of the 1988 Education Reform Act. That legislation was designed to deregulate both the demand and supply sides of state-provided education—to empower the customers and to make schools more responsive to consumer demand. This case study of three adjacent local education agencies (LEAs) in London obtained data from interviews with: 130 parents in the process of deciding on a secondary school for their children; and key informants in 15 schools, including administrators, teachers, union representatives, and bursars. Four key findings emerged: (1) the market is a middle-class mode of social engagement; (2) parental choice of school is class- and race-informed; (3) schools are increasingly oriented toward meeting the perceived demands of middle-class parents; and (4) the cumulative impact of the first three findings is the "de-comprehensivisation of secondary schooling." Across schools, there is an intensification of status hierarchies, provisional differentiation, and segregation within the state system. Choice, however regulated, is not the solution to inequity. From a needs-based perspective, priority should be given to establishing comprehensive pupil intakes, to allocating resources in ways that will facilitate the realization of children's learning potentials, and to making schools responsive to the values and cultures of the children who attend them. Nongraded Programs: Opinions and Aspects of Change.

Pub Date—Nov 93

Note—15p; Paper presented at the Annual Meeting of the Mid-South Educational Research Association (New Orleans, LA, November 10-12, 1993).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Developmental Programs, *Educational Change, Elementary Secondary Education, Faculty Development, *Nongraded Instructional Grouping, School Restructuring, State Legislation, *Student Development, Teacher Attitudes, Teacher Participation

As part of the restructuring drive toward a developmentally appropriate curriculum, restructuring has begun to be implemented through a nongraded organizational structure. After Kentucky mandated a nongraded structure for primary education, the Tennessee General Assembly passed legislation to allow nongraded primary schools. The Tennessee Department of Education implemented a nongraded pilot program in several schools; in most districts, teachers shared in the decision whether or not to participate. This paper presents findings of a study that compared the attitudes and characteristics of teachers who worked in a developmentally appropriate, nongraded curriculum. Data were obtained from a survey mailed to 127 Kentucky teachers and 103 Tennessee teachers in schools with a nongraded program. Sixty-six percent of the Kentucky teachers responded, compared with 60 percent of the Tennessee teachers. Findings indicate that mandates do not assure that people will change. Those teachers not compelled by mandate demonstrated a greater understanding of nongraded education. In addition, extended staff development was effective in promoting understanding of the nongraded concept. The successful implementation of a nongraded program requires a common philosophy among those involved in the change, should allow some teacher choice, and offer incentives rather than mandates. Descriptors—Administrator Responsibility, *Administrator Role, Elementary Secondary Education, *Family School Relationship, *Parent

Participation, Parent Role, Parents, Parent School Relationship, *School Administration

This paper presents a theory to guide administrative practice in establishing and maintaining strong, positive school-home collaboration. It calls for the principal to take an active leadership role in developing and implementing a comprehensive parent-involvement program. It is argued that student academic achievement is more apt to improve through school-home collaboration when the school administrator takes the lead in planning and implementing parent-involvement strategies and activities in three major categories—school-home communication, at-home learning, and at-school participation. Examples of activities for each category are briefly described. When implemented in a systematic fashion, these three kinds of activities foster positive home-school collaboration. (LMI)

Parental Involvement in High Schools.

Pub Date—Apr 94

Note—46p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Elementary Secondary Education, *High Schools, *Parent Participation, Parent Responsibility, *Parent Role, *Parent School Relationship, School Involvement

Although parental involvement is recommended at all levels of schooling, involvement of parents at the secondary level has not been well defined in the literature. This paper presents findings of a case study that examined three high schools with varying levels of parental involvement—the first, a large high school with a predominantly working class student body; the second, a small, innercity magnet school; and the third, a medium-sized suburban school. Research methods included interviews with a total of 100 students, parents, teachers, and administrators; an analysis of unobtrusive data; and informal interviews with school staff. Epstein's (1987) typology of parent involvement is used to compare the combined views of interview respondents regarding appropriate roles for parental involvement in high schools. Findings indicate that school climate as it related to parental involvement had more influence on the views of interview respondents than did any other factor. Teens unanimously said that parents should be involved in their education. Some implications are as follows: (1) parental involvement programs are as desirable at the high school level as the elementary level; (2) parents need to be educated about the benefits of involvement; (3) programs should provide parents with a variety of ways to participate; (4) programs should fit the individual school's needs; and (5) involved parents often contribute to school improvement efforts. Two figures are included. (Contains 105 references.) (LMI)

Brief Encounters: Researching Education Policy Making in Elite Settings.

Pub Date—Apr 94

Note—30p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Access to Information, Educational Policy, Elementary Secondary Education, Foreign Countries, *Policy Formation, *Power Structure, *Qualitative Research, Research Methodology, Research Problems

Identifiers—*United Kingdom

Ethnographers have traditionally encountered problems in conducting qualitative research in elite settings. The powerful, in this case, the administrative and political elite in the United Kingdom, have considerable constitutional, legal, and cultural resources that enable them to deflect or channel any research in which they are the objects of inquiry. The United Kingdom, unlike the United States, has no framework of rights that compels the state to disclose information to its citizens. This paper presents findings of a study that examined the policy-making process for grant-maintained (GM) schools in the United Kingdom, which a focus on the obstacles encountered in interviewing the policymaking elite. Interviews were conducted with two groups

that had considerable influence on the GM schools' policy: (1) six civil servants who were directly involved in drafting policy details; and (2) two male Conservative education ministers. One obvious danger to researchers is that they will simply reproduce the discourse of the powerful. However, narrative accounts can be analyzed to illustrate the rules they create and reproduce, and the context within which they were generated. (LMI)

Identifiers—*United Kingdom

Since 1988, the governance and organization of education in England and Wales have moved decisively in the direction of decentralization and site-based management. Under the Education Reform Act of 1988 and the Education Act of 1993, local education agencies (LEAs) have acquired new responsibilities via local management of schools (LMS) and grant-maintained (GM) or "opted out" status. In addition, the moves toward school autonomy must be placed in a framework that requires schools to compete for pupils within local educational markets. However, in England and Wales, there is a tension between managerial decentralization and educational centralization. This paper describes how this tension arose and its implications for the scope and direction of grant-maintained schools' policy. The first section discusses the five different principles of school autonomy—state control, community responsiveness, management, curriculum and pedagogy, and pupil identity. The second section describes the background of the GM schools' policy. Recent developments in the policy are highlighted in the third section. The concluding section reviews the extent to which GM schools are state or community regulated and responsive, and identifies trends for 1989-94 in the areas of the five principles of school autonomy. Descriptors—Administrator Role, *Educational

Administration, Elementary Secondary Education, Enrollment, Foreign Countries, *Organizational Climate, School Size, Time on Task, Vertical Organization, Work Environment

Identifiers—*Ontario

This paper presents findings of a study that utilized Elliott Jaques' theories of organizational depth structure and time span of discretion in administrative work to examine administrators' responsibilities in two Ontario (Canada) school systems. The theory predicts that the time-span of discretion associated with the administrative tasks will increase with the hierarchical rank of incumbents. Specifically, the study examined the effects of organizational size and enrollment (measures of school size) on administrators' time span discretion. The pilot study was conducted in two medium-sized school systems in Ontario. Interviews were conducted with a total of 38 participants—the principals and vice-principals at eight selected schools (two elementary and two secondary in each system), the district director (CEO), and all supervisory officers. Both superintendents and principals were found to be working at or close to the 2-year time-span level, with the directors of both systems engaging in work with a maximum time span of 3 years. Clearer hierarchical distinctions were evident in the work of vice-principals and department heads. These findings imply that the administrative responsibilities of principals are of equal weight and complexity to those of assistant superintendents, and thus the formal subordination of the former to the latter may be nonrequisite. Findings also indicate that school size, rather than school type, may be a more powerful determinant of the level of principals' administrative work. Overall, enrollment may serve as the best measure of a school's organizational size; however, the total number of employees is a more appropriate measure of organizational size for school systems. Five figures and four tables are included. (Contains 96 references.) (LMI)

Identifiers—*Cleveland Public Schools OH

This paper describes ways in which the public school district can cut costs, similar to those utilized by the private sector in a shrinking economy. One strategy is to generate new revenue and protect old revenue from erosion through "ad valorem" taxation of real property. Between appraisal years, schools districts can actively seek out undervalued commercial property and challenge its valuation and thereby obtain additional operating revenue. This process, under way in Cleveland, Ohio, annually nets the Cleveland School District about one to two million dollars in new revenue. A second cost-cutting strategy is to make legal challenges to state funding of education. This approach bypasses the need for voter approval, but involves time, expense, and conflict with the state legislature. The third strategy is to treat gas and electricity (utilities) as commodities. In its contract with the Public Utility Commission of Ohio (PUCO), the Cleveland School District pays 21 percent less for electricity. Appendices contain a copy of one of two complaints challenging the funding of public education in Ohio and a copy of the complaint before PUCO. (LMI)

Descriptors—Accidents, *Bus Transportation, Death, Elementary Secondary Education, *School Buses, Service Vehicles, *Student Transportation, *Traffic Accidents, Transportation

This document provides a summary of selected school bus crash statistics for 1989. Information was obtained from the following data sources: the Fatal Accident Reporting System (FARS), the General Estimates System (GES), and the School Bus Fleet Annual Fact Book. The data are organized into four sections: (1) a summary of national and selected state use statistics; (2) a summary of the total school-bus accidents reported to police in 1989; (3) a profile of fatal school bus accidents; and (4) statistical information on fatalities. When available, data are provided for three types of vehicles—school buses, school vehicles, and private buses. The data for 1989 indicate that school transportation-related fatalities continue to represent only a small portion of total motor vehicle-related deaths. Of the 45,555 motor vehicle related fatalities occurring in 1989, only 33 involved occupants of vehicles used to provide transportation for these purposes. There is no evidence to suggest that either the character or magnitude of crashes involving school buses, private buses, or school vehicles changed significantly in 1989 when compared to their experience over the time period 1977-1989. School-related transportation continues to remain a very safe form of ground transportation. Twenty tables are included. (LMI)

Despite the serious efforts of the decade-long school reform movement, there is little indication that American students are making dramatic gains in academic achievement or mastering the skills they need for productive lives. Can companies support education reform in ways that both "make a difference" and are compatible with the financial, human, and material resources they have available? This publication considers how the business community can structure its involvement in elementary and secondary education in order to promote system-based strategies for reform. Following the in-

roduction, chapter 1 describes the need for schools and communities to reaffirm their focus on increased student learning, suggesting how business can help educators define educational expectations. Chapter 2 summarizes the apparent consensus on how to produce better outcomes. It briefly describes the kinds of changes needed in the education system, key strategies for change, and ideas for measuring their effectiveness. The third chapter describes strategies to help schools sustain their capacity for change at five different levels—the classroom, school, district, community, and policy arena. The final chapter outlines how individual companies can identify appropriate actions and develop an effective role for supporting comprehensive, long-term reform. Lists of resource organizations and precollege advisory board members are included. An enclosed handout/poster maps strategies for involvement. (LMI)

Effective meeting leaders—people who know how to manage meetings, not just hold them—understand the two main arenas of any meeting: content issues and process activities. These two arenas are interdependent upon each other. This book is designed to help educators lead more effective meetings through increased process awareness. Chapter 1 offers suggestions for preparing for the meeting, which include defining its purpose, determining if the meeting is necessary, and selecting participants. The second chapter provides guidelines for developing the meeting agenda. Components to be considered are time, location, desired outcomes, persons responsible, and materials. Tips for facilitating the meeting are presented in chapter 3, such as opening the meeting, establishing ground rules, encouraging participation, and dealing with disruptive behavior. The concluding chapter discusses the importance of reviewing the action plan that was developed during the meeting. Nine figures are included. The appendix contains a meeting planning reference guide. (LMI)

Descriptors—Conflict Resolution, Contracts, *Educational Policy, Elementary Secondary Education, Lobbying, *Policy Formation, *Political Influences, Political Issues, *Politics of Education, Problem Solving, *State Legislation, Teacher Rights, *Tenure, Unions

Identifiers—*Colorado

When Colorado's Tenure Reform Bill, House Bill 1159, was signed into law, the work of teachers was not significantly changed. However, the law did make some significant inroads in the work of administrators and streamlined the due process accorded to teachers in the event that dismissal becomes necessary. This paper addresses whether the legislative process worked in 1990 to bring about a policy that significantly changed education, and whether the problem-definition step in the policy-formulation process was the key piece to facilitating effective policy. Drawing from John Kingdon's (1984) conceptual framework of policy formulation, the paper examines the evolution of the tenure problem, the intensification of the problem, the opening of the

policy window, the actions of key players, special interest agendas, the formulation of the policy, and finally, the lessons that can be learned from the process. A conclusion is that, in the past, policy-formulation models described policy as a process comprised of four steps: (1) general awareness; (2) generation of alternatives to solve the problem; (3) formulation of a solution; and (4) justification of the solution. Findings of this study suggest that the success of this model depends on several critical aspects. A revised problem-definition policy-formulation model and its specific stages is outlined. (LMI)

Descriptors—*Child Advocacy, Child Welfare, Civil Rights, Discipline Policy, Elementary Secondary Education, *Peer Relationship, *Public Schools, *School Role, Sexual Abuse, *Sexual Harassment, *Student Behavior, Student Needs, Victims of Crime

Peer-to-peer sexual harassment is rampant in elementary and secondary schools. While sometimes identified and curtailed, it is usually tolerated and characterized as normal. Regardless of the ways school authorities regard sexual harassment, it interferes with a student's right to receive equal educational opportunities and violates Title IX. This paper describes the experiences of students who have experienced sexual harassment by their peers and discusses its ramifications. A conclusion is that, ultimately, a strategy to attack sexual harassment in schools needs to aim at a transformation of the broader school culture. The problem must become a public concern. Finally, action should be taken in conjunction with efforts to reduce other practices that promote inequalities, such as tracking, standardized testing, biased curricula, and classroom pedagogies. Descriptors—Compliance (Legal), *Court Litigation, Elementary Secondary Education, Employment Interviews, *Legal Problems, *Legal Responsibility, Personnel Policy, *Personnel Selection, Private Schools, *School Personnel

The torts of negligent hiring and negligent retention occur when an employer breaches a duty in hiring or retaining an employee who is incompetent or unfit for the job to which the employee is assigned; and consequently, the actions of that employee proximately cause injuries to a third party. This paper examines legal issues regarding negligent hiring and retention and employer liability in the nonpublic schools. Following definitions of terms, the paper covers the following topics: elements of the prima facie case, respondent superior distinguished, liability for acts outside the work day, the crux of the cause of action, the extensiveness of a background check, and limitations on liability. Theory is also applied to "Scott v. Blanchet High School." Recommendations for avoiding liability for negligent hiring or retention include: (1) any hiring protocols should include careful background checks; and (2) school administrators should develop a uniform screening/hiring procedure. Although these procedures are time-consuming, being involved in extensive judicial proceedings is even more so. (LMI)

A Comparative Career Profile in 1985-1990 Female and Male Graduates of Educational Admin-

istration from a Midwestern Research University.

Pub Date—Apr 94

Note—11p.; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Speeches/Meeting Papers (150)—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Career Development, *Educational Administration, Elementary Secondary Education, Employment Opportunities, Females, *Graduate Study, Management Development, Occupational Mobility, Sex Bias, *Sex Differences, Sex Discrimination, *Women Administrators

In education, women are outnumbered by men four to one at the administrative level. This paper presents findings of a study that sought to determine the association between advanced degrees in educational administration and the careers of those holding such degrees. Data were obtained from questionnaires that were mailed to a total of 210 former educational administration graduates who received degrees from a midwestern research university during 1985-90. The sample included 122 graduates at the master's level, 56 at the advanced certificate level, and 32 at the doctoral level. A total of 170 responses were received, an 83 percent response rate. Findings demonstrate an increase in the number of women pursuing administrative careers and greater involvement of women in educational administration preparatory programs. Despite their academic credentials, however, they struggle to achieve administrative positions, particularly those of superintendent, associate/assistant superintendent, and secondary school principal. More so than for men, graduate work in educational administration is essential for the advancement of women in school leadership. It is recommended that universities and other preparatory institutions: (1) design and offer graduate programs that reflect the needs of women and minority leaders; (2) intensify recruitment efforts of women and minorities into such programs; (3) strengthen or establish a mentor system; and (4) provide job enrichment experiences for women. Additionally, women need to develop their own support networks. Two figures are included. (LMI)

How Teachers Empower Superordinates: Running Good Schools.

Research for Better Schools, Inc., Philadelphia, PA. Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC.

Pub Date—88

Note—17p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Effective Schools Research, Elementary Secondary Education, *Organizational Climate, Participative Decision Making, *Power Structure, School Effectiveness, Teacher Administrator Relationship, *Teacher Influence, *Teacher Role

Teachers in "good" schools often provide considerable input into curriculum decisions and other types of school policies. They are considered to be "empowered." This paper argues that the apparent empowerment of teachers in these situations is actually the opposite: In good schools superordinates do not empower teachers; instead, teachers empower their superiors. Methodology involved analysis of the practices of 30 secondary schools recognized as excellent by a panel convened by the Office of Educational Research and Improvement (OERI) for the Secondary School Recognition Program (SSRP) during the school years 1982-83, 1983-84, and 1984-85. Data were derived from the written comments of principals and site visitors. Findings indicate that for teachers, the shift in power is one of kind rather than degree. Many of the strategies intended to empower teachers actually empower their superiors by giving superordinates a greater amount of information about classroom activities upon which to act. In return, teachers gain a different kind of influence, that of authorized power. In the process, the organization is more likely to become typified by common understandings and how best to achieve them. (LMI)

This paper discusses the findings of a United Kingdom study that examined the impact of the 1988 Education Reform Act (ERA) on a group of parents whose children would be most affected by the changes. Between the fall of 1989 and the summer of 1992, five rounds of interviews were conducted with the same sample of 138 parents from 11 different primary schools in a local education agency (LEA) in southwestern England. At the beginning of the study, over 80 percent of respondents were satisfied or very satisfied with their children's schools and felt that teachers were doing a good job. They also did not see themselves as consumers with regard to their children's education. Although they became more familiar with the concept over time, they did not enthusiastically embrace the role. When choosing schools, they were more concerned with the schools' social attributes than with its academic results. Initially, parents felt that standardized assessment would give them more information about their children's progress even though very few understood how it would be carried out. However, by 1992, many parents said that the process was too time-consuming and disruptive to classroom activities. In conclusion, parents' attitudes concerning their children's education have not been dramatically changed by the implementation of the ERA, nor did they wholeheartedly welcome the new legislation. Spaulding, Angela McNabb

The Politics of the Principal: Influencing Teachers' School Based Decision Making. Draft.

Pub Date—Apr 94

Note—40p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).
Pub Type—Speeches/Meeting Papers (150) — Reports — Research (143)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Administrator Role, Elementary Secondary Education, *Group Dynamics, Interaction, Interpersonal Relationship, Leadership, *Leadership Styles, Organizational Communication, *Participative Decision Making, *Principals, *Teacher Administrator Relationship
Identifiers—*Micropolitics

This paper presents findings of a case study that explored the micropolitical strategies used by a principal to influence teachers in a school-based decision making context. The selected suburban school was located in the south-central area of Texas and had utilized school-based management for five months. The principal was recommended as effective in facilitating participative decision making. Data were collected through extensive interviews and participant observation. Findings indicate that the principal influenced teachers through the manipulation of teacher suggestions, the use of voting techniques, the planting of information, the exchange of principal favor and support for desired teacher behaviors, and the use of expert knowledge. This paper hopes to contribute to an understanding of the political nature of principal-teacher relationships, and to address other educational administration issues, such as professional role expectations, role transitions, and role strain. Contains 42 references. (LMI)

Administrative Policy as Myth.

Pub Date—May 94

Note—24p; Paper presented at the International Interinstitutional Program in Educational Administration (8th, Toronto, Ontario, Canada, and Buffalo, NY, May 15-27, 1994).
Pub Type—Speeches/Meeting Papers (150) — Reports — Research (143)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Educational Policy, Elementary

Secondary Education, Epistemology, Foreign Countries, Hermeneutics, Institutional Administration, *Mythology, Organizational Communication, *Policy Formation, *School Restructuring, Social Control
Identifiers—*Australia

This paper examines the proposition that administrative policy has the properties of a myth, with myth defined as a grand narrative of explanation and justification. It illustrates the proposition with an example of radical restructuring in a large education system, the Department of Education in New South Wales, Australia. It reviews the testimony of a significant policy maker in education, the Scott Report (1989), and the findings of international research that examined the restructuring of nine education systems. In terms of their attributes, administrative policies appear to be largely societal myths about social order and service, although many examples of identity, eschatological, death-of-god, and other myths were found. When these myths cohere with institutional rules, formal structures, and the external policy context, they appear to generate legitimacy, resources, stability, and the survival of institutionalized organization. Where they do not, the converse appears to be the case and could account for intervention. It is concluded that because myths mediate existential, structural, social, and political perspectives on the "best way to be organized," mythic analysis should be developed as a way of comprehending organization. Descriptors—*Accountability, Decentralization, Elementary Secondary Education, *Epistemology, Foreign Countries, Participative Decision Making, Policy Formation, School Based Management, *Theory Practice Relationship
Identifiers—*Australia (Tasmania)

The current literature on school restructuring emphasizes cooperative learning, collaborative planning, teacher empowerment, and participative policy making. This literature tends to set aside client and technical perspectives and to exhibit a professional view, which deems accountability to be a politically incorrect issue. The literature on system restructuring shows that the decentralization of pedagogical, administrative, and governance power, with a simultaneous recentralization of control functions, has led to a consensus of cynicism among professionals and low policy legitimacy. This paper argues that responsibility in education implies accountability and that such accountability implies formative evaluation, educative reporting relationships, and politically critical planning. It mounts a case for the production of educative accountability policies. It proposes a policy research methodology that will both employ and test non-foundational epistemology. In sum, this paper reports policy research that is: (1) driven by a consequentialist moral theory; (2) attempting to reconcile professional, client, and technical perspectives through the active engagement of school, district, and state-level stakeholders in Tasmania; and (3) intended to apply and evaluate non-foundational epistemology. (Contains 96 references.) (Author/LMI)

Descriptors—*Business Responsibility, Corporate Support, Education Work Relationship, Elementary Secondary Education, Organizational Climate, *Organizational Development, *Partnerships in Education, *Rural Education, Rural Schools, *School Business Relationship

This paper describes the various types of school-business partnerships that exist in rural America. Data were derived from an extensive review of literature and limited field observations and interviews. Findings indicate that little formal research has been conducted on reform-model, school-business partnerships. Two strands of thought regarding the organizational and personal interactions between schools and businesses are identified—the partnership domain and the relationship domain. The partnership domain is characterized by a static process, a well-defined organizational structure, a focus on organizational needs, insulation from self-evaluation, a defined power base, one-way benefits, and status-consciousness. The relationship domain has the following traits: a dynamic process, an organizational structure based on interpersonal relationships, a focus on meeting individual needs, self-examination, multiple power bases and benefits, and a task orientation. Descriptors—*Educational Change, *Educational Improvement, *Effective Schools Research, Elementary Secondary Education, Incentives, Participative Decision Making, *School Effectiveness, *State Programs
Identifiers—*New Jersey

This paper describes second-year outcomes in three New Jersey schools that participated in the Effective Demonstration Schools Project, a grants program that encouraged school-based improvement. The purpose of the three-year grants, awarded during the 1985-86 school year, was to improve students' basic skills performance through the application of principles associated with effective schools research. Data were obtained from site visits and interviews with teachers, administrators, and parents. The three schools included the Red Bank Primary School, Elizabeth School #2, and Atlantic City High School. Findings indicate that the schools differed in their project implementation approaches, but each utilized the principles of inclusion, information and imagination, and incentives. The schools included people in decision making, gathered information about the situation, imagined what could be, and utilized the incentives of success and money to sustain a vision of their schools as effective schools. Law, Trauma, and Sexual Abuse in the Schools: Why Can't Children Protect Themselves?

Pub Date—Nov 93

Note—23p; Paper presented at the Annual Meeting of the National Organization on Legal Problems of Education (39th, Philadelphia, PA, November 1993).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Child Abuse, Child Advocacy, Children's Rights, *Child Welfare, *Court Litigation, Elementary Secondary Education, Legal Problems, *Legal Responsibility, *Sexual Abuse

Legal suits concerning sexual abuse of students in the schools have increased since 1987. This paper examines recent cases involving child abuse in the schools from two perspectives. First, it reviews a line of federal cases that have considered whether school districts have an affirmative constitutional duty to protect children similar to the duty that the state owes prisoners and mental patients who are unable to protect themselves. Most federal courts hold that students are not in state custody and can act on their own behalf. Second, the paper reviews factual allegations in recent cases involving sexual abuse in the schools and concludes that the sexual exploitation of students by school employees often occurs for long periods of time. Next, the paper reviews recent research on child abuse and trauma. Findings indicate that children who are victims of

physical or sexual abuse often lack a supportive network of peers and adults. In addition, profound psychological trauma often renders children vulnerable to further abuse and diminishes their ability to get help. These findings suggest that the federal courts are wrong to assume that child abuse victims have the capacity to defend themselves or summon aid. (LMI)

Finnan, Christine R. Hopfenberg, Wendy S. Becoming a True Middle School: Cultural Transformation of Accelerated Middle Schools. Stanford Univ., Calif.
Pub Date—94
Note—23p; A product of the Accelerated Schools Project.

Pub Type—Reports - Descriptive (141)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Acceleration (Education), *Educational Change, *Educational Environment, Intermediate Grades, Junior High Schools, *Middle Schools, *Organizational Climate, Resistance to Change, *School Restructuring
Identifiers—*Accelerated Schools

The Accelerated Schools Project is based on the premise that all children can learn and can learn at high levels. It provides both a philosophy and a process for schools interested in making radical change. The philosophy is built on the following three principles: unity of purpose, empowerment coupled with responsibility, and building on strengths. This paper describes the experiences of one middle school with two reform efforts. In the first instance, reform was imposed on the school when it was designated as a desegregation magnet school. In the second situation, the school community chose to reform itself by deciding to participate in the Accelerated Schools Project. The experiences of Drayton School demonstrate that true middle school reform will occur when schools are perceived as culture-bearing institutions. Rather than viewing schools as resistant to change, educators must understand how to build capacity within schools to achieve the goals within their school culture. Reform will also occur when change is not forced on schools. Finally, reform will flourish when it is guided by a philosophy that makes sense to all members of the school community and a process in which all members participate to implement and sustain the changes. Focus groups are conducted each year within the mid-Atlantic region of the United States to gather information on school restructuring to help Research for Better Schools (RBS) in its planning process. This document reports on the round of focus groups held in spring 1994 to determine the ways in which partnerships might further school restructuring efforts. Data were collected at six focus-group sessions, one held at each of the following locations: Baltimore, Maryland; Dover, Delaware; Lancaster, Pennsylvania; Philadelphia, Pennsylvania; Trenton, New Jersey; and Wilmington, Delaware. A total of 24 participants included representatives from state and local education and social-service agencies, institutions of higher education, professional associations, and businesses. Despite individual frustrations, participants were enthusiastic about the potential of partnerships to facilitate broad change. Factors that hindered effective partnerships included an institutional culture that encourages competition rather than cooperation and the categorical nature of state and federal funding. To ensure successful partnerships, participants recommended: (1) stay focused on clients; and (2) provide resources for staff development time, technology, equipment, and expertise. RBS was encouraged to continue to play the role of partnership

advocate, sponsoring meetings and disseminating information. One table is included. (LMI)

Focus groups are conducted each year to gather information to help Research for Better Schools (RBS) in its planning process. This document reports on the latest round of focus groups held in spring and fall 1992. Eight focus-group sessions composed of parents, teachers, and students were conducted at one elementary and one high school in Greensburg, Pennsylvania, in their second year of restructuring. The following themes were identified: the development of connections between students and the school, new collaborative roles for teachers, new active student roles, and the importance of communicating and sharing the vision. The following problems of implementing school restructuring were identified: (1) teachers need significant staff development and support; (2) students who are less entrenched in traditional learning environments present less resistance to restructuring; (3) students often rebel against the vehicle designed to link them to both school and learning; and (4) efforts should be made to inform and include all members of the school community. Identifiers—*Maryland, *Pennsylvania
A Carnegie Foundation survey, conducted in 1988, found that teachers were critical of the education reform movement in general and standardized statewide testing in particular. This paper presents findings of a study that examined the impact of state-mandated testing programs on the work lives of teachers and students. It compares two states' testing programs—Pennsylvania's program with "low stakes" consequences attached to student performance, and Maryland's "high stakes" program. Data were collected in 3 phases: (1) interviews with administrators, teachers, and students at 12 sites (6 school districts in each of the states); (2) a survey of the central office administrator, principal, and teachers from 207 Pennsylvania districts and 23 Maryland districts; and (3) followup fieldwork. In each state, teachers perceived that the statewide testing programs offered relatively few benefits for students, particularly because they provided information that schools already possessed. Educators in Pennsylvania districts reported that they began to take the tests more seriously for political reasons but had reservations about whether the tests actually improved the lives of teachers or students. Under high stakes conditions, the following occurred: increased attention to improving test results; greater disruption of teacher work lives; decreased reliance on teachers' professional judgment; and heightened concern about liability. Despite such programs' questionable educational value, they are politically popular because they are publicly available and easily understood. However, the press for uniform, quick success contradicts the nature of the school-improvement process. Three tables are included. Contains 18 references. (LMI)

Since 1988, considerable state and school/district energies have been devoted to implementing Re: Learning in Pennsylvania. This paper describes the experiences of Cycle I project directors who implemented Re: Learning in late 1988 or early 1989. Re: Learning is a national effort to redesign the total school system, based on TheodoreSizer's (1984) nine common principles of the Coalition of Essential Schools. It reflects the belief that participants at all levels of education must be engaged in a focused and coordinated effort. Data for this paper were obtained from interviews conducted with Pennsylvania's eight Cycle I project directors. They identified the following major tasks involved with implementing Re: Learning: (1) providing leadership and a management structure; (2) building understanding, involvement, and commitment; (3) deciding on a focus and engaging in planning, development, and implementation; and (4) dealing with potential concerns and barriers. Three figures are included. The appendix contains resources provided by Cycle I schools. (LMI)

Identifiers—*Maryland

Four Maryland middle schools, the Maryland State Department of Education (MSDE), and the Carnegie Corporation are collaborating to develop models of early adolescent education that: (1) improve overall student and school performance; (2) coordinate comprehensive service delivery to students requiring such care; (3) stimulate collaborative development of appropriate instructional programs; (4) actively promote educational success for special student populations; and (5) institute systematic professional development opportunities for adults. This paper describes the progress made by program participants during the 1991-92 school year. The three-stage research process involved: (1) interviews with 64 students and observations of 44 classrooms conducted in spring 1992; (2) informal followup interviews with 46 teachers, 7 administrators, 8 support staff, and 2 parents in fall 1992; and (3) document analysis. The data identified three indicators of a shared vision of student success: a shared vision that is locally determined and based on research and experience; students who view themselves as active learners; and intensive, open dialogue across all levels. In summary, systemic restructuring takes considerable time, energy, and courage on the part of everyone. It is also an inherently messy process. If substantial, systemic change is to occur, all key stakeholder groups must be engaged in a very time-consuming process. (LMI)

 Identifiers—*Maryland

In 1985, Maryland became one of 45 states that enacted new and tougher graduation requirements. This document presents findings of a 4-year study that examined the effects of the new requirements on local schools and the students and staff who work in them. Three site visits each were made to five selected high schools. Data collection included: (1) a total of 850 interviews with administrators, staff, teachers, and students; (2) student transcript analysis (a comparison of the cohort of 1986 with that of 1989); (3) school document analysis; and (4) interviews with state Department of Education staff and High School Commission members. Findings indicate that schools varied greatly in their responses to the policy changes. Students in higher academic tracks appeared to benefit more from schooling than did those in the general track, and the student sorting systems did not decrease as a result of the changed requirements. Neither did the new requirements positively affect the existing patterns of student exclusion by race, gender, and academic performance. Finally, the higher education and business communities did not perceive the positive impacts of the new standards. Recommendations are as follows: (1) fully consider local context needs when implementing policy goals; (2) establish information flow that improves and promotes equity; and (3) specifically address at-risk students in the policy. Fifty-one tables and two figures are included. Appendices contain a copy of the high school graduation bylaws; information on research methods and sample sizes; samples of the interview protocols and the transcript coding form; and statistical data. (Contains 104 references.) (LMI)

 Identifiers—*Maryland

As part of a larger study of policy implementation, this paper discusses the changes in five Maryland high schools regarding the reform of graduation requirements. The study hypothesized that tracking systems have a powerful influence on educational experiences and that reform intended to change those experiences would be mediated by track. In 1985, the Maryland State Board of Education mandated new graduation requirements, which included: (1) the addition of a third credit in mathematics and (2) the addition of an advanced high school diploma called the Certificate of Merit. The study sought to describe the student stratification systems in place prior to the implementation of the new policy and then to document any changes in those systems. Data were obtained from an analysis of student transcript records (which compared those of the class of 1986 with those of the class of 1989) and from interviews with a total of 343 teachers and 403 students. Findings indicate that, overall, students took more mathematics credits. Students in higher tracks persistently took more courses that would further their education and careers. However, the failure rates for lower track students increased. Also, there was some evidence that teachers did not uphold standards of high expectations for all. The unevenness in teacher knowledge about the Certificate of Merit helped to perpetuate inequities in access to educational opportunities. Three tables are included. Appendices contain frequency distributions of student transcripts by track and of student and teacher interviews by school and year. (LMI)

Wilson, Bruce Natriello, Gary
Teacher Evaluation and School Climate.
 Research for Better Schools, Inc., Philadelphia, Pa. Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC.
 Pub Date—Feb 89

Note—32p.; Earlier version of this report was presented at the Annual Meeting of the American Educational Research Association (Washington, DC, April 1987).

Pub Type—Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
 Descriptors—*Educational Environment, Elementary Secondary Education, Institutional Environment, *Organizational Effectiveness, *Teacher Evaluation

Could the establishment of extensive teacher-evaluation practices prove counterproductive if effective school climates are not created and maintained? This paper attempts to answer this general question by investigating two more specific questions: (1) Is there an inherent conflict between the activities associated with teacher evaluation and those elements typically associated with good workplace climate? and (2) What activities associated with evaluations and what elements of good climate lead to evaluation systems that are useful to teachers? Methodology involved analysis of data from 102 schools that participated in the School Assessment Survey (SAS), which used teachers' perceptions to measure key organizational characteristics of a school. Bivariate correlations and multiple regression analysis were used to analyze the relationship among five key dimensions of school climate—evaluation, influence, goal consensus, leadership, and communication. The four elements of evaluation (task assignment, criteria setting, sampling, and feedback) and two outcomes of the evaluation process (soundness and utility) were also analyzed. Findings indicate that there appears to be no inherent conflict between the activities associated with the evaluation of teachers and good workplace climate. Second, the key evaluation activities that promote the perceived soundness and utility of the evaluation process appear to be criteria setting, feedback, and facilitative leadership. One figure and two tables are included. (LMI)

 Identifiers—*Maryland

A common way to control curriculum at the state level has been to implement changes in high school graduation requirements. This paper documents the variation in responses across five diverse high schools in Maryland, as the schools implemented new high school graduation requirements mandated by the State Board of Education. In 1985, the board mandated two high school diplomas—the regular high school diploma and an advanced diploma, or Certificate of Merit. As part of a larger longitudinal study, this paper presents findings derived from: (1) in-depth interviews with students, teachers, counselors, and building administrators; and (2) analysis of individual student transcript records. Findings show that the five schools framed the new graduation requirements differently: interview participants construed the changes as having unique meaning for their particular school, its faculty and students, its organizational structures, and its departmental resources and curricula. The data suggest that challenging responses to state-initiated mandates flourish in the local schools and that perhaps decisions about what constitutes "improvement" are best reserved for those who best know and understand the local context. Five tables are included. (LMI)

 Descriptors—*Educational Change, High Schools, *Program Implementation, *School Restructuring, State Programs, State School District Relationship
 Identifiers—*Lancaster School District PA

Since 1988, considerable state and school/district energies have been devoted to implementing Re:Learning in Pennsylvania. This paper summarizes Re:Learning activities in the school district of Lancaster, in particular, McCaskey High School, which was recognized for the scope and quality of its implementation efforts. Re:Learning is a national effort to redesign the total school system. Based on Theodore Sizer's nine common principles of the Coalition of Essential Schools (CES), it reflects the belief that participants at all levels of education must be engaged in a focused and coordinated effort. Data were collected through interviews with the principal, district science program coordinator, Essential Studies (ES) teacher, higher education liaison, and eight teachers participating in program teaching teams. The school's systematic focus on modifying the curriculum as the way to bring about change was the most crucial aspect of the ES initiative. Recommendations are made to consider ways to distribute the principal's leadership responsibilities; examine the issue of shared power to determine whose needs should be represented and in what manner; address divisions between the faculty and community; involve the entire faculty; consider providing teaching teams with more formal training experiences in team building; and allocating more time for reflection. Overall, McCaskey's accomplishments were impressive. However, the issues faced by the school illustrate that major school reform, even when well-conceived and designed, is complex and problematic. Appendices contain information on McCaskey's program goals, ES proposal, curriculum design, and planning process. (LMI)

Nationally set indicators of performance have increasingly become a medium for exercising choice and decision making in the new education market place. Contributors to this book suggest that such a framework is not unproblematic. This book offers some insights into the general debate about performance indicators in education. It explores the background of the debate; the differing perspectives of policy makers and practitioners; and the purposes, audiences, and values of education indicators, both in the United Kingdom and international context. The chapters focus on four major themes: why policy makers require information about performance; how such information relates to national contexts; the limitations of performance measurement; and the challenges in applying such information at the district level. Chapters include the following: (1) "The Framework" (Kathryn A. Riley and Desmond L. Nuttall); (2) "Education Indicators: Officials, Ministers, and the Demand for Information" (Alan Ruby); (3) "Choosing Indicators" (Desmond L. Nuttall); (4) "How Indicators Have Been Used in the USA" (Ramsay Selden); (5) "Quality, Surveillance and Performance Measurement" (Kieron Walsh); (6) "Performance Indicators: Flourish or Perish?" (John Gray and Brian Wilcox); (7) "Following the Education Indicators Trail in the Pursuit of Quality" (Kathryn A. Riley); (8) "A Role for

Parents, Students, and Teachers in School Self-Evaluation and Development Planning" (John MacBeath); and (9) "Measuring Performance-National Contexts and Local Realities" (Kathryn A. Riley and Desmond L. Nuttall). Notes on contributors and an index are included. (LMI)

The concentration of numerous case studies of British appropriation of U.S. education and training (ET) policies in a brief period of time (1986-90) provides a unique opportunity to improve understanding of the ET reform process and the role that international comparisons can play in shaping the domestic ET policy agenda. In this book, political science and education experts consider Britain's policy borrowing from the United States during the final years of the Thatcher government. The contributors look at American programs that have served as models for the United Kingdom, including magnet schools, school choice experiments, business-education compacts, and the federal student loan program. The book maintains that despite problems associated with transplanting one nation's policies into another country's historical and institutional setting, international borrowing is likely to become more common. In part 1, authors draw from various social science resources to create an analytical framework for the study of policy borrowing. Articles include: (1) "Introduction" (David Finegold, Laurel McFarland, and William Richardson); (2) "Borrowing Educational Policy" (David Phillips); and (3) "The Politics of Policy Borrowing" (David Brian Robertson and Jerold L. Waltman). Part 2 examines the specific context in which the transfer of policies has occurred. It includes: (4) "The Changing International Economy and Its Impact on Education and Training" (David Finegold); (5) "Postschool Training of British and American Youth" (Hong W. Tan and Christine Peterson); (6) "USA and UK Government Policy in Youth Training for the New International Economy: Lessons from Abroad" (Sarah H. Cleveland); and (7) "Education and Training for 16-18 Year Olds in the UK and USA" (David Raffae and Russell W. Rumberger). Part 3 examines individual cases of ET reforms in the United States and United Kingdom. Articles include: (8) "The Mission of TECs and Private Sector Involvement in Training: Lessons from Private Industry Councils" (Thomas Bailey); (9) "Employers as an Instrument of School Reform? Education-Business 'Compacts' in Britain and America" (William Richardson); (10) "Top-up Student Loans: American Models of Student Aid and British Public Policy" (Laurel McFarland); (11) "Magnet Schools, Choice, and the Politics of Policy Borrowing" (Anthony G. Green); and (12) "Choice and Market Forces in American Education: A Revolution or a Non-event?" (William Lowe Boyd). Notes on contributors and references are included. (LMI)

Improving the Quality of Work Life in Public Schools.

Research for Better Schools, Inc., Philadelphia, Pa.
Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC.
Pub Date—Feb 86
Note—24p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Educational Change, Elementary Secondary Education, Job Satisfaction, Organizational Climate, *Organizational Effectiveness,

*Productivity, *Public Schools, *Quality of Working Life, *School Effectiveness, *Work Environment

This paper offers a traditional but often neglected view of schools as places of work. It argues that schools are best understood as places where people work and face problems similar to those encountered in other work organizations. Good schools are places where the quality and quantity of work are greater and the work is integrated more effectively. Since learning is the joint product of the work of staff and students, increasing learning requires more or better work by one or both groups. The productivity of workers is affected by the characteristics of work tasks and the work setting. Effective schools share with productive organizations the following characteristics—clear goals, a high task orientation, feedback on performance, high levels of employee discretion, adequate resources, and effective leadership. Achievement, recognition, professional autonomy, and participative decision making also affect employee productivity. In conclusion, understanding how more and better work can be done in the schools is essential to successful reform. (LMI)

Descriptors—Citizen Participation, *Community Involvement, Community Programs, Educational Trends, Elementary Secondary Education, High Schools, *Personnel Policy, Personnel Selection, Recruitment, *School Personnel

This document was prepared for participants of the 1986 Invitational Conference for Boards of Education in Maryland. It contains three sections that present scenarios dealing with the following issues: staffing, interest group involvement, and secondary schools. Each section includes: (1) a definition or discussion of the issues currently surrounding the topic; (2) a scenario, set in 1995, suggesting one way in which some of these issues might be addressed; and (3) a set of questions that a school board or superintendent might ask to determine what is being done or might be done to address the topic. Scenarios are hypothetical "future histories" that help to focus attention on the details, consequences, or inconsistencies of a critical topic. Three tables are included. (LMI)

Descriptors—*Academic Achievement, *Administrator Effectiveness, Educational Administration, *Educational Environment, Elementary Secondary Education, Family Financial Resources, *Family Status, Principals, Socioeconomic Influences, *Socioeconomic Status

The school effects literature is replete with discussions of whether any factors, beyond socioeconomic status (SES), contribute to an explanation of student achievement. Recent attention has focused on the role of the school administrator. One argument is that a strong, controlling principal is a key to improved student performance. Another argument is that, through supportive efforts, administrators can facilitate teachers' work, which in turn affects student achievement. This paper presents findings of a study that examined two related issues—the administrative factors that influence student achievement and the effect of family SES on the working of those factors. Data were obtained from a survey of 175 elementary and 118 secondary southeastern Pennsylvania schools. Findings indicate that, independent of SES, supportive administrative behavior was positively associated with achievement at both the

elementary and secondary levels. Tight administrative control over teaching was negatively associated with achievement, but only at the elementary level. In conclusion, school conditions do influence what students learn. Three figures are included. Appendices contain two statistical tables (LMI)

Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC.

Pub Date—Jan 87

Contract—400-86-0003

Note—13p.

Pub Type—Information Analyses (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Administrator Effectiveness, Administrator Responsibility, *Administrator Role, Elementary Secondary Education, Group Unity, *Leadership, *Leadership Styles, *Principals, School Effectiveness

This paper summarizes research findings related to the performance behaviors of effective school principals. It identifies eight characteristics of effective schools: (1) schoolwide measurement and recognition of academic success; (2) high emphasis on curriculum articulation; (3) support for instructional tasks; (4) high expectations and clear goals for student performance; (5) collaborative planning with the faculty; (6) instructional leadership; (7) an orderly, studious environment; and (8) parental support for student education. Principal behaviors to promote the eight characteristics are outlined. The broad dimensions of the principal's role—the administrative-managerial role and the educational leadership role—are also discussed. The educational leadership dimension seeks to change the behavior of those involved in teaching-learning toward achieving school goals, and to build a cohesive social system within the school that is committed to school goals. Coupled with the supervisory functions of the administrative-managerial dimension, the educational leadership dimension is crucial for school effectiveness. (LMI)

The Secondary School Recognition Program: A First Report on 202 High Schools.

Research for Better Schools, Inc., Philadelphia, Pa.
Spons Agency—National Inst. of Education (ED), Washington, DC.

Pub Date—Jul 85

Note—48p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Educational Environment, *Effective Schools Research, *Excellence in Education, High Schools, *Organizational Climate, *Organizational Effectiveness, Productivity, *School Effectiveness

During 1983 and 1984, 202 high schools were selected for national recognition as exemplary institutions through the Secondary School Recognition Program (SSRP) of the United States Department of Education. This paper identifies factors common to successful secondary schools and develops propositions about secondary school effectiveness. Data were analyzed from the following sources: school applications, site report visits, and transcripts of discussions between site visitors and SSRP panelists. Successful secondary schools exhibited the following characteristics: clearly defined and agreed-upon goals; high expectations; a high level of professional collaboration; positive and open student-teacher relationships; management of change; strong instructional leadership; a high level of community involvement; a high level of extracurricular participation; and a balance between control and delegation. The data suggest that the two competing theories of organizational success—the school effectiveness model and the excellence model—are partial theories that may complement each other. High productivity best described the SSRP schools, in that they combined effective techniques with strong work cultures. Nine tables are included. (LMI)

Should We Restructure Our Schools? A Resource Book To Help Educators Explore the Idea of Restructuring.

Lehigh Univ., Bethlehem, PA. School Study Council; Research for Better Schools, Inc., Philadelphia, Pa.

Spons Agency—Office of Educational Research

and Improvement (ED), Washington, DC.
 Pub Date—Mar 91
 Note—52p.
 Pub Type—Guides - Non-Classroom (055) — Reports - Descriptive (141)

EDRS Price - MF01/PC03 Plus Postage.
 Descriptors—*Accountability, *Decentralization, *Educational Change, Elementary Secondary Education, Instructional Improvement, *School Choice, School Community Relationship, *School Restructuring

For two and one-half days in November 1990, members of the Lehigh University School Study Council met in retreat to explore the idea of restructuring and to reflect on its relevance for their schools. Participants included superintendents, principals, teachers, and faculty from institutions of higher education. This resource guide was developed by the meeting participants to help members of the council and other interested educators undertake activities similar to those that occurred during the retreat. The guide is organized into two parts. The first part describes the five activities around which the retreat was organized. The activities addressed the following questions: (1) What is meant by "restructuring"?; (2) What forces are pushing toward achieving a different order of results with the changing student population?; (3) What are the nature and scope of the principal restructuring proposals?; (4) What is involved in restructuring a school?; and (5) How does one create a design for a school that will achieve a different order of results? The purpose of each activity is described, as well as a suggested process to achieve that purpose. Finally, examples of materials to implement the process are listed. The second part provides two examples that illustrate how the activities and materials in part 1 were implemented. The first example describes the origins, participants, and outcomes of the three-day retreat. The second example describes how a superintendent and principal of one district adapted part 1's activities and materials to an intra-district program. (LMI)

Corbett, H. Dickson. Wilson, Bruce L.

The Central Office Role in Instructional Improvement.

Research for Better Schools, Inc., Philadelphia, Pa. Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC.
 Pub Date—May 91
 Note—23p.

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Administrator Effectiveness, Elementary Secondary Education, *Information Dissemination, *Instructional Improvement, Organizational Climate, *School Districts, Teacher Administrator Relationship

The quality of education offered by a school district is measured by the extent to which all of its students become successful learners. Students' chances for success are often dependent on the district's assignment process. This paper presents findings of a study that identified the ways in which central offices encouraged administrators and teachers to seek access and use important instructional knowledge. Specifically, the study examined how five central offices: (1) organized instructional improvement efforts; (2) led those efforts; (3) developed normative support for improvement; and (4) affected the extent of teachers' and administrators' access to and use of the instructional knowledge related to those activities. Four suburban and one rural school system in the mid-Atlantic region were examined. Methods included: (1) interviews in 3 districts with 176 central office administrators, 138 principals, and 190 teachers; and (2) interviews in 2 districts with 9 principals, 7 central office administrators, and 123 teachers. The five districts exemplified the following approaches to school improvement: school choice, top-started/bottom-run, evolutionary change, bottom-started/bottom-run, and countering diversity. In conclusion, the central office's role in instructional improvement is most effectively enacted through giving a clear and consistent message that instructional improvement is the primary expectation for adults in the system. Second, the consistency of the message is a function of involvement, support, and communication. One table is included. (LMI)

Identifiers—*Goals 2000

On March 31, 1993, President Clinton signed into law the Goals 2000: Educate America Act. The Goals 2000 Act sets educational improvement and participation as national priorities to be achieved through local and state ingenuity, not federal control. This document offers general information on the Act and provides questions to help educators and parents plan courses of action in their communities. Information is provided on how the partnership works and how to get started. The following 10 elements for developing the local action plan are described: (1) teaching and learning, standards and assessment; (2) opportunity-to-learn standards and program accountability; (3) use of technology; (4) governance, accountability, and management; (5) parent and community involvement; (6) system-wide improvements; (7) the promotion of grassroots efforts; (8) dropout prevention strategies; (9) school-to-work programs; and (10) milestones and timelines. Suggestions are offered for developing partnerships with the state, procuring federal assistance, and sharing information. Appendices contain elements of the State Goals 2000 Action Plan, a list of voluntary model standards and standards projects, and the National Education Goals and Objectives. (LMI)

Democratic Value Incultation in Public Schools:

The Role of the Constitution and the Courts.

Pub Date—Apr 94

Note—33p.; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Academic Freedom, *Constitutional Law, Court Litigation, Democracy, *Democratic Values, Elementary Secondary Education, Equal Protection, Freedom of Speech, *Public Schools, *Role of Education, *Values

This paper argues that the fundamental purpose of public education is preparation for citizenship and democratic participation through the incultation of American democratic values. These values are codified by the Constitution and are further illuminated by the nation's courts and other public institutions. The paper calls for a recommitment to the American common school and a return to its democratic foundations that hold the most potential for improving children's lives. Democratic values upheld by the Constitution and the courts include religious freedom, freedom of speech, and equal protection. What is needed is not a rejection of the concept of the common school, but a revitalization of American public education consistent with America's democratic heritage. American public schools must model and promote the highest ideals of the Constitution and inculcate these values of American democracy for the safe protection of succeeding generations. Identifiers—*Norway

This paper describes the dilemmas of leadership

experienced by principals and superintendents in Norway. The term "dilemma" refers to contradictory orientations that these educational leaders experienced in their job activities. Dilemmas are categorized in terms of legality, which pertains to the formal steering of the schools, or in terms of legitimacy, which refers to those informal control mechanisms rooted in tradition and culture. The paper presents outcomes of an action research project in which the principals and superintendents in three Norwegian cities participated. Project elements included observations, counseling, peer review, journal writing, and reflection. Data were collected through field notes from the observations, peer reviews, and group meetings; analysis of journal entries; and interviews with participants. The following dilemmas were analyzed in terms of state legality versus social legitimacy: (1) administrative control versus professional autonomy; (2) confrontation versus individual autonomy; (3) challenge versus support; (4) change versus stability; (5) ad hoc problem solving versus reflection and long-term planning; and (6) loyalty to students and parents versus loyalty to teachers. To understand educational leadership, local activities must be related to broader political, social, and cultural issues. In addition, the hierarchical structure and the ways in which micropolitical activities within schools both steer and restrict activities and perceptions must be examined. (LMI)

Descriptors—*Content Analysis, Curriculum Design, Curriculum Development, *Educational Policy, *Mathematics Curriculum, Secondary Education, *Social Studies, *State Curriculum Guides, *State Standards

Only in the last several years have state curriculum guides become prominent in education reform discourse and policy. This paper focuses on the organization and content of curriculum guides in four states regarded as leaders in education reform—Florida, Texas, California, and New York—in an effort to develop a way of comparing and contrasting various state approaches to the design of such documents. The review focuses on the rationales and degrees of prescriptiveness in secondary education curriculum guides for mathematics and social studies. A conclusion is that state leadership in education reform is not well served by curriculum guides that embody no clear rationale or standards. Clear, detailed, and well-organized guides may be an effective instrument of reform if they are part of a coherent policy framework. However, to have impact, they must have curricular validity in the eyes of local educators. The state must also provide significant support and incentives. The question of whether guides can substantively improve curriculum and instruction remains unanswered. Four figures and a list of state curriculum resources are included. (LMI)

Assessment's Conflicting Purposes, Conflicting Politics: Impact on Local School Systems.

Pub Date—Apr 94

Note—28p.; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports - Evaluative (142)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Accountability, Educational Assessment, *Educational Policy, Elementary Secondary Education, Local Issues, *Political Influences, Public Schools, *School Districts, *Standardized

Tests, State School District Relationship, *State Standards
 Identifiers—Wake County Public School System NC

This paper examines political influences on assessment programs and their effects on local school systems. Specifically, it describes North Carolina's political climate and examines the impact of political influences on educational assessment in the state. The political climate in North Carolina has produced a plethora of state-mandated tests, some of which include the End-of-Grade (EOG) Test; Writing Assessment; and the High School End-of-Grade Test in algebra or geometry. Problems with the testing system are described in detail. Clearly, the purpose of local assessments—to improve instruction—may differ from the purposes of externally mandated assessments. To reduce conflicts with state policy makers, local educators are advised to: (1) maintain their own professional integrity; (2) organize to voice concerns; (3) make noise; and (4) deemphasize the importance of test scores. State officials can help by including more teachers and local education staff in developing report formats and test frameworks and ensuring that tests accurately measure expectations for student performance. Ideally, future state and national assessments will be based on what is best for students and teachers. Six exhibits are included. The appendix contains a review of research that explored the effects of accountability efforts on instruction. (LMI)

Sexual Harassment and Molestation in Education.

Pub Date—Nov 93

Note—8p; Paper presented at the Annual Meeting of the National Organization on Legal Problems of Education (Philadelphia, PA, November 1993).

Pub Type—Speeches/Meeting Papers (150) — Reports — Research (143)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Educational Environment, Elementary Secondary Education, Females, *Legal Responsibility, Rape, School Safety, *School Security, *Sexual Harassment, *Victims of Crime, *Violence

Sexual harassment in schools is a public event, which means that there are witnesses, bystanders, and spectators to many of these occurrences. This paper argues that because sexual harassment is a public event, it is very damaging to its targets as well as bystanders by teaching others that schools are not safe or just. Schools may also serve as training grounds for domestic violence. A review of two surveys of sexual harassment in schools—a "Seventeen" magazine survey (March 1993) and the Harris Poll/American Association of University Women survey (June 1993)—revealed that sexual harassment is public, extensive, and routine. Most girls reported that they resisted their harassers and that schools did not respond 45 percent of the time. Disseminators of these findings encountered a "backlash," which downplayed the seriousness of the situation. Finally, symmetry and parallels existed between what girls' narratives said about their school experiences and the experiences that were revealed by lawsuits and depositions. Quotations from female students describing their encounters with and feelings about sexual harassment are included. (LMI)

Diversity and Equity in Educational Administration: Missing in Theory and in Action.

Pub Date—Apr 94

Note—30p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports — Research (143)

EDRS Price — MF01/PC02 Plus Postage.

Descriptors—*Diversity (Institutional), *Educational Administration, Elitism, *Equal Education, *Feminism, Higher Education, *Leadership, Power Structure, Social Stratification

This paper argues that the texts, conversations, writings, and professional activities that construct our understanding of leadership come from an embedded, privileged perspective that has largely ignored issues of status, gender, and race. This perspective insidiously perpetuates a view of leadership that discourages diversity and equity. Two different lenses, or perspectives, are used to challenge

the embedded assumptions and norms of educational leadership—feminism and privilege. A critique of current literature on educational leadership reviewed the following sources: (1) textbooks used in educational leadership programs; (2) texts for professors of educational leadership programs; (3) a leadership knowledge and skill base from the National Policy Board for Educational Administration; and (4) selected professional journals. The data illustrate the lack of discussion about diversity and equity that occurs throughout the education and professional development of school leaders. To achieve a balanced education about leadership that constructs an inner eye capable of seeing hidden assumptions about leading, the rethinking of this concept must include more diverse examples of leaders and the work of people from many perspectives. The study of leadership must include a multiplicity of perspectives in order to understand how the deeply embedded assumptions of privilege constrain the conversations about diversity and equity. One table is included. (LMI)

Descriptors—*Civil Rights Legislation, *Compliance (Legal), *Disabilities, Employers, *Employment, Federal Legislation, Legal Responsibility, Psychological Evaluation, *Psychological Testing, Standards

Identifiers—*Americans with Disabilities Act 1990

This paper assesses the impact of the Americans with Disabilities Act (ADA) on preemployment psychological testing. The paper discusses rules and related guidelines of the Equal Employment Opportunity Commission (EEOC) and relevant case law under the Rehabilitation Act. EEOC rulings clarify the scope of what is intended to be included in the definition of mental impairment, indicating that the only limitation on the use of any preemployment psychological test is that the test may not disclose a mental or psychological disorder. The definitive resource on what constitutes a mental or psychological disorder is the "Diagnostic and Statistical Manual of Mental Disorders" (Third Edition, Revised). Tests or scales whose purpose is to disclose an impairment may only be used after a conditional offer of employment has been made. However, tests used to assess personality traits, behavior, attitudes, or propensity to act, when these are not symptoms of a mental disorder, may be used at the pre-offer stage. As commonly used psychological tests are not medical in nature and are not utilized to identify disabilities when used for employment screening, the specific time when such tests may be administered is not controlled by the ADA. (JDD)

The Americans with Disabilities Act: Using Job Analysis to Meet New Challenges.

Pub Date—Jun 92

Note—8p; Paper presented at the International Personnel Management Association Assessment Council Conference (Baltimore, MD, June 7-11, 1992).

Pub Type—Speeches/Meeting Papers (150) — Guides — Non-Classroom (055)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Adults, Civil Rights, *Civil Rights Legislation, *Compliance (Legal), *Disabilities, Employment, Federal Legislation, *Job Analysis, Job Skills, Legal Responsibility, Occupational Information, Qualitative Research, Statistical Analysis

Identifiers—*Americans with Disabilities Act 1990

This paper focuses on the role that job analysis plays under the Americans with Disabilities Act (ADA). The most obvious use of job analysis data is in defining the essential functions of each job. The job analysis technique used should: list the functions

of the job, define which functions are essential rather than marginal, and offer proof of essentiality. A quantitative approach to job analysis distills information into objective, empirical data that are amenable to analysis across positions, jobs, or job families. In a qualitative approach, narrative descriptions are obtained from public sources, commercial sources, or written by personnel administrators or employees. It is doubtful that any qualitative technique would produce the kind of information necessary for compliance with ADA. The job analysis should define the functions of the job in such a manner so as not to confuse "what" is accomplished with "how" it is typically accomplished. The job analysis should also examine work schedules, machines, equipment, or devices used; and the work environment or facilities. Not all job analysis techniques are equally suited to ADA requirements for job information. The cost of choosing the wrong technique could be substantial, ranging from failure to establish proof of essentiality to obfuscation of means of reasonable accommodation. There is probably no one job analysis technique that can meet all the requirements of ADA. (JDD)

The Work Inventory for Severely Disabled (WISd): A System for Meeting Job/Client Match and Accommodation/Redesign Diagnostic Needs for Workers with Severe Disabilities.

Pub Date—Jun 92

Note—25p; Paper presented at the International Personnel Management Association Assessment Council Conference (Baltimore, MD, June 7-11, 1992).

Pub Type—Speeches/Meeting Papers (150) — Tests/Questionnaires (160)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Adults, *Diagnostic Tests, *Disabilities, Employment Problems, Entry Workers, Job Analysis, *Job Development, *Job Skills, Labor Force, Occupational Information, Severe Disabilities, Test Reliability, Test Validity, *Vocational Evaluation

Identifiers—*Job Matching Systems, *Work Inventory for Severely Disabled

This paper outlines the increasing need for low-skilled entry level workers, documents business and industry's response to the resulting labor shortage by tapping the resources of individuals with physical and mental disabilities, and reviews problems in job placement of workers with severe disabilities. The Work Inventory for Severely Disabled (WISd) is then presented as a job analysis/work analysis instrument that can be used to improve the worker/job fit for individuals with moderate or severe disabilities, across a diverse set of entry-level jobs. The WISd is intended to improve the level of information available to job placement personnel when attempting to make the match between an individual's skill and potential and the requirements of specific jobs. It can also be used to diagnose specific activities and working conditions in the job that warrant accommodation or job redesign. Use of the 81-item instrument involves a work site supervisor rating the extent to which each of the activities and/or working conditions pertains to the job, and supported employment staff rating the extent to which the worker is capable of performing these activities or working under these particular conditions. Discussion of the WISd's development and its validity and reliability assessment are included. (Contains 18 references.) (JDD)

The family-based practicum experience of the University Affiliated Program of Vermont provides early intervention interns with an in-depth experience with the family of a child with special health care and/or education needs. Through this experience, interns acquire an understanding of the elements of a family-centered approach, incorporate the elements of a family-centered approach into all aspects of their practicum experience, and demonstrate a knowledge of the ways in which existing systems and policies can become more responsive to family concerns. Intern responsibilities include spending 48 hours with the family over the course of a semester, identifying and implementing mutually beneficial goals and activities to engage in with the family, and reflecting on the experience. Activities may include providing child care, assisting a family in applying for funding, developing child care guidelines for the family to share with babysitters, or making a videotape of the child to acquaint elementary school staff. Each intern has a Parent-to-Parent supervisor who is available to provide resources and support. A table listing characteristics of family-centered practitioners is appended. (JDD)

Bredenkamp, Caroline M.

The Gifted/Learning Disabled Student: A Contradiction in the Classroom.

Pub Date—Jul 93

Note—95p.; Master's Thesis, University of Northern Iowa.

Pub Type—Dissertations/Theses - Masters Theses (042)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Ability Identification, Case Studies, Disability Identification, *Educational Strategies, Elementary Secondary Education, *Gifted Disabled, High Schools, *Learning Disabilities, *Student Characteristics, Student Placement

This study reviews literature concerning identification processes and appropriate learning strategies for gifted/learning disabled students. The literature review addresses current trends for identification and inclusion, student characteristics, and suggested placements. The analysis continues with an examination of the needs of a 17-year-old potentially gifted/learning disabled male, including a medical, social, emotional, and academic overview. The case study concludes that the boy's academic development seems to have been hindered by a lifetime of special education services that overemphasized weaknesses, while failing to recognize strengths. The paper concludes that such "paradoxical learners" are not being identified and included in appropriate educational settings, and that many educators find it difficult to accept the idea that gifts and deficits can exist in a single student. Recommendations are offered for serving gifted/learning disabled children more effectively, along with areas for further research. Appendices contain a glossary of terms, comprehensive student characteristics lists, and consent forms. (Contains 21 references.) (JDD)

This manual provides information to assist individuals in working together more effectively to provide comprehensive services and improve outcomes for children with special health care needs. The

manual emphasizes the need for a union of services that places the child and family at the center and exists to provide educational, medical/health, and human services. The manual also emphasizes that promoting such services requires collaboration and commitment from parents, health professionals, educators, administrators, state agencies, elected officials, and concerned citizens. The objectives of the partnership-building process include: (1) strengthen commitment to the development and expansion of family-centered, community-based, coordinated services for children with special health care needs; (2) design services that promote transition from childhood to full functional adulthood; (3) define leadership roles; (4) provide training and support to facilitate the development of services; and (5) facilitate and support community level teamwork. Chapters of the manual provide information on the components of a system of services, types of support needed, transition and related issues, parent's role, health and medical services, nurse's role, early and periodic screening, educator's role, and public education laws. The manual concludes with a list of educational terminology and medical terminology. Contains 34 references. (JDD)

Descriptors—Behavior Modification, *Classroom Techniques, Educational Methods, *Educational Strategies, Elementary Secondary Education, Eligibility, *Emotional Disturbances, Humanistic Education, Individualized Education Programs, *Student Evaluation

Identifiers—*Wisconsin

This guide defines the state of the art in Wisconsin's programming for students with emotional disturbances (ED). The guide begins with an overview of the ED assessment process, including screening, referral, multidisciplinary teams, eligibility criteria, and individualized education programs. A chapter on setting up service programs discusses facilities, scheduling, selecting materials, adapting and modifying materials and instruction, student records and confidentiality, communication, working with special education program aides, and stress management. Behavior management information and guidelines for affective education are presented. A section on academic instruction outlines teaching strategies, use of time, strategies for grouping students, grades, supporting students in the general education environment, and career and vocational education/transition. A final chapter of miscellaneous items covers homebound students, disciplinary exclusion, and inclusion. Lists of references and suggested resources accompany many chapters. Appendix A provides tips from teachers on dealing with 13 frequently encountered situations. Other appendices provide a school intervention checklist, eligibility criteria, state regulations, and reprints of several issues of a Wisconsin bulletin titled "Exceptional Education Information Update." choeducational Methods, *Sign Language, *Student Evaluation

Identifiers—*Francophone Education (Canada), Non European Francophone Areas, *Ontario

This report discusses an approach for the psycho-educational evaluation of students with deafness in the Francophone population of Ontario, Canada. An introduction describes the historical context of education of deaf students and presents the idea that learning a sign language, ideally while the child is very young, furnishes a foundation for subsequently learning to read and write in a second language, French. The report contends that a revision of evaluation strategies is needed, in order to determine: the child's potential, the level of performance achieved, and which teaching strategies will best reduce the gap between the two. Subsequent chapters deal with: (1) the goals of evaluation and the evaluation process; (2) mediation as a central element of evaluation as well as teaching; (3) components of dynamic evaluation including philosophy, preparation, implementation, instruments, and interpretation of results; (4) particular concerns relating to students with deafness, including learning processes and dominant cognitive style and the impact of these concerns on teaching strategies and materials; (5) personalized intervention plans; and (6) integration of evaluation into the service system. Identifiers—*Oklahoma

This trainer's manual was developed to provide a consistent knowledge and skill base (i.e., a "foundation") for all individuals employed in programs funded by Oklahoma's Developmental Disabilities Services Division. They include van drivers, recreation workers, residential staff, administrators, case managers, secretarial/clerical staff, vocational staff, advocates, physicians, psychologists, and others. The goal is to create an environment in which all people with developmental disabilities are valued and treated as normally as possible. The training is composed of four modules of instruction: (1) "People Are People" defines developmental disability and describes some of the disabilities included in that term; (2) "Changing Times" traces historical events that influenced how services for people with developmental disabilities developed, emphasizes an understanding of what didn't work and why, and introduces the principle of normalization; (3) "Systems and Policies" provides a snapshot of the Oklahoma service delivery system, including public and private service providers, families, advocates, and others; and (4) "The New Frontiers" offers a vision of the future and examines technological trends. Instructional methods include large and small group activities, the use of videos, transparencies, and other audiovisual media; handouts; and exercises. The manual provides camera-ready masters for making transparencies. (Contains 30 references.) (JDD)

Identifiers—Attitudes toward Disabled

This participant's manual covers "People are People," the first module of a four-module training program for all individuals employed in programs funded by Oklahoma's Developmental Disabilities Services Division. This includes van drivers, recreation workers, residential staff, administrators, case managers, secretarial/clerical staff, vocational staff, advocates, physicians, psychologists, and others. The primary objective of the module is to have the participant understand and apply the concept of looking at individuals with developmental disabilities as people rather than as products of their disability. Secondary objectives include defining and using "People First" language, identifying criteria involved in the term "developmental disability," describing common developmental disabilities, and listing three statistics concerning people with developmental disabilities. The module includes the primary and secondary objectives, a text and question format that allows participants to become actively involved in the learning process, information from transparencies used in training, and copies of handouts. This participant's manual covers "Changing Times," the second module of a four-module training program for all individuals employed in programs funded by Oklahoma's Developmental Disabilities Services Division. This includes van drivers, recreation workers, residential staff, administrators, case managers, secretarial/clerical staff, vocational staff, advocates, physicians, psychologists, and others. The primary objective of the module is to have the participant understand and apply the principle of normalization to the concepts of rights and values of people with developmental disabilities. Secondary objectives focus on perceptions of individuals with developmental disabilities through various periods of history, congregate settings, legislative rights and other rights, types of abuse and neglect, values of individuals with developmental disabilities, the importance of the principle of normalization for improving public images for people with developmental disabilities as well as promoting their social integration within the community, and methods of recognizing and eliminating barriers to normalization. The module includes the primary and secondary objectives, a text and question format that allows participants to become actively involved in the learning process, information from transparencies used in training, and copies of handouts. This participant's manual covers "Systems and Policies," the third module of a four-module training

program for all individuals employed in programs funded by Oklahoma's Developmental Disabilities Services Division. This includes van drivers, recreation workers, residential staff, administrators, case managers, secretarial/clerical staff, vocational staff, advocates, physicians, psychologists, and others. The primary objective of the module is to have the participant understand the system that shapes service delivery in Oklahoma for people with developmental disabilities. Secondary objectives focus on specific services provided and people responsible for delivering those services, basic services provided by state employees and private provider agencies, members of interdisciplinary teams, elements of successful habilitation programs, and the process an interdisciplinary team goes through in developing an individual plan. The module includes the primary and secondary objectives, a text and question format that allows participants to become actively involved in the learning process, information from transparencies used in training, and copies of handouts. This participant's manual covers the fourth module of a four-module training program for all individuals employed in programs funded by Oklahoma's Developmental Disabilities Services Division. This includes van drivers, recreation workers, residential staff, administrators, case managers, secretarial/clerical staff, vocational staff, advocates, physicians, psychologists, and others. The primary objective of the module is to have the participant understand future trends, both technological and environmental, influencing the delivery of services to individuals with developmental disabilities. Secondary objectives include discussing influences on the policies of the State of Oklahoma in the provision of services to individuals with developmental disabilities, listing areas in which the power of self-advocacy is important, describing the role of the State in relation to supporting families, and listing technological advances that aid individuals with disabilities in achieving greater independence. The module includes the primary and secondary objectives, a text and question format that allows participants to become actively involved in the learning process, information from transparencies used in training, and copies of handouts. This paper was designed to provide background information for participants of the "Statewide Evaluation of Programs and Services with Students with Disabilities" Policy Forum scheduled for August 30

and 31, 1994. The paper provides information regarding program evaluation issues, to stimulate discussion and to give examples of resources available to assist State education agencies in planning and implementing program evaluation procedures as required annually by Federal law. Twenty-eight documents and reports are abstracted to provide specific perspectives and recommendations regarding the range of special education program evaluation issues and challenges. The reports include, among others, products of the National Center on Educational Outcomes, the National Center for Policy Options in Special Education, and Project FORUM of the National Association of State Directors of Special Education. Descriptors—Auditory Perception, Case Studies, *Child Rearing, Classroom Techniques, Cognitive Processes, *Dyslexia, Elementary Secondary Education, *Intervention, Parent Participation, *Parent Student Relationship, Reading Difficulties, Self Concept, *Self Esteem, Skill Development, Student Development, *Symptoms (Individual Disorders), Teaching Methods, Visual Perception

This guide for parents of children with dyslexia begins with case summaries of several children who exhibited reading and other academic problems that were later diagnosed as dyslexia. Misconceptions about dyslexia are refuted, and developmental problems in the areas of auditory perception, visual perception, and language processing are discussed. Activities to strengthen each of these three areas are listed. Problems arising from having dyslexia are explored, especially the problem of poor self-image. The emotions that parents often experience in dealing with the child who has dyslexia are examined. Some of these include denial, guilt, martyrdom, anger, and acceptance. Subsequent chapters focus on the hope that comes from perseverance. Suggestions are offered for parents who want to help their child develop a positive self-image and a sense of security. Suggestions are also offered for helping the child to perform better in school by developing his or her organizational skills, homework skills, and test-taking skills. The final chapter recounts the outcomes for those children whose case summaries were presented in the first chapter. An appendix offers positive phrases parents can say to praise their child, time management forms and checklists, a sample of teacher rules and requirements, a self-concept assessment form, and suggested classroom modifications. Descriptors—*Academic Achievement, Grade 8, Intervention, Junior High Schools, Junior High School Students, *Learning Disabilities, *Organization, *Self Esteem, Study Skills

An intervention was implemented to improve academic success and self-esteem of eighth grade students classified as learning disabled in a district northwest of Chicago, Illinois. Major elements of the intervention included strategies to increase teacher awareness of the students' inability to use and process information, intervention to improve organizational skills, and a plan to assist students in understanding the use of an organizational tool and how it is related to academic success and self-esteem. Inservice training was provided to the two teachers of students with learning disabilities who

were going to implement the intervention. Students then learned to separate their notes and handouts according to subject areas, to organize them into a binder, and to complete a weekly checklist. As a result of the intervention, students' self-esteem improved, students' academic achievement increased, and students increased their awareness of the importance of using organizational skills. Appendices contain various survey forms and assessment instruments. (Contains 17 references.) (JDD)

Descriptors—*Court Litigation, *Disabilities, *Educational Legislation, Elementary Secondary Education, *Federal Legislation, Legal Responsibility, *Mainstreaming
Identifiers—Inclusive Schools, *Individuals with Disabilities Education Act

Because the Supreme Court has not interpreted a case pertaining to the least restrictive environment (LRE) mandate of the Individuals with Disabilities Education Act (IDEA), Supreme Court cases interpreting the Act's other requirements guide any analysis of LRE. In addition, federal appellate court decisions related specifically to LRE are considered persuasive in LRE litigation. The IDEA leaves decisions regarding what is a free appropriate public education up to the members of the multidisciplinary team and declines to require execution of services to a "maximum" standard. On the other hand, the IDEA requirements for LRE do require execution of LRE to the maximum extent. Issues in IDEA cases include the Act's preference for mainstreaming, placement of the burden of proof, and interpretation of least restrictive environment. Specific cases that have interpreted IDEA's least restrictive environment requirement include *Daniel R. R. versus State Board of Education* (1989); *Greer versus Rome City School District* (1991); *Board of Education, Sacramento City Unified School District versus Holland* (1992); and *Oberlin versus Board of Education* (1993). In summary, the federal appellate courts have recognized the following factors when making placement decisions for a child with disabilities: educational and noneducational benefits, effects of the presence of the child on the regular class, the costs of supplementary aids and services, and the extent of the modifications necessary. (Contains 13 references.) (JDD)

Descriptors—*Adaptive Behavior (of Disabled), *College Bound Students, College Students, *Coping, Higher Education, High Schools, *High School Students, *Learning Disabilities, Student Personnel Services, *Study Skills

This study assessed the level of academic coping skills being employed by 59 college-bound high school students with learning disabilities (LD), assessed the college-related expectations of these students, and compared these skills and expectations with those identified as essential by successful college students with learning disabilities. Administration of a high school modification of the College Student Experience Questionnaire and another questionnaire revealed that: (1) approximately 85 percent of the students expected to use at least one type of ancillary service, such as extended time for tests, tape recorded lectures, and personal help from faculty; (2) subjects initiated few contacts with faculty outside the classroom and over 50 percent had never talked with a counselor; (3) many students did not apply consistent study techniques such as outlining, underlining major points, or reading supplementary materials; (4) papers were frequently written without the aid of a style manual, dictionary,

or thesaurus; (5) students anticipated academic problems in college, most commonly in reading, mathematics, and English; and (6) while successful college students consistently stressed the importance of putting forth extra effort, high school students were not consistently doing so. Implications for the development of college preparatory courses for LD students are outlined. (Contains 12 references.) (JDD)

Cannon, Kent Wesley
Developmental Factors Associated with the Formation of the Antisocial Personality: A Literature Review.

Pub Date—23 Mar 94

Note—53p; Doctoral Research Paper, Biola University.
Pub Type—Dissertations/Theses - Doctoral Dissertations (041)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Adults, *Antisocial Behavior, Attention Deficit Disorders, *Behavior Disorders, Biological Influences, Children, Developmental Stages, *Intervention, Mental Disorders, Parent Child Relationship, *Personality Traits, Prevention, *Psychopathology, Research Methodology, Research Needs, Social Influences, Symptoms (Individual Disorders)

Research on factors which contribute to the development of antisocial personality disorder is reviewed. Methodological issues are critiqued, including major assessment instruments and frequently used research designs. Factors which current research indicates might lead to the continuation of antisocial behavior from childhood into adulthood are discussed. Issues examined include biosocial research, attention-deficit hyperactivity disorder, and psychosocial research. The psychosocial research focused on three variables: parent-child attachment, parental discipline and monitoring, and problem solving skills. Implications for further research and treatment are also discussed. The paper concludes that there is professional acceptance that childhood conduct disorder is a feature in the development of antisocial personality disorder, and that individuals with a history of antisocial personality disorder perpetuate a disproportionate amount of murder, rape, arson, robbery, drunk driving, and child and spouse abuse. These individuals are also disproportionately represented in the mental health and criminal justice systems. Early and accurate identification of children who are at risk for development of a conduct disorder is required, followed by enrollment in preventive treatment. Assessment devices used in research and intervention need to better control for observer bias, and research designs need to better account for confounding variables. (Contains 54 references.) Identifiers—*Inclusive Schools

This project, implemented collaboratively between a research/teaching university and a mid-western special education cooperative, gathered data from 317 regular education teachers regarding self-evaluation of skills for teaching students with disabilities, satisfaction with existing special education services, and attitudes toward an "inclusive" model of special education service delivery. Results revealed significant differences in teachers' perceptions of their skill level for serving regular versus special education students. The majority of respondents were pleased with in-service education sessions and other professional development options available. Feelings were generally positive regarding existing collaboration between regular and special educators and regarding social acceptance of students with disabilities by nondisabled students. Approximately two-thirds of respondents indicated that existing special services were effective overall. Teachers strongly felt that traditional service delivery options should be available in addition to inclusion, and that placement decisions should be made on an individual basis. The majority felt that inclusion was being "forced" on them. Fifty percent of respondents stated that they were personally supportive of inclusion, and 37 percent said they were not. Teachers felt that improved services would result from smaller class size, more time for collaboration between regular and special educators, modifying assignments and tests for students with disabilities, and building principal support for inclusion. Identifiers—Captioned Media, *CC School Project

The CC School project, which included 18 elementary students with deafness enrolled in the TRI-POD program within the Burbank (California) Public Schools, applied a personal video captioning technology in a workstation setting to a weekly writing experience that involved translating short American Sign Language video stories into written English captions. A typical workstation setup includes a personal computer, two video recorders, a character generator, and a video monitor. The equipment is configured to allow a student to watch a videotape, develop captions, and insert them at the appropriate place on the videotape. Students translated 40 stories over 2 academic years. The pilot project resulted in students demonstrating increases in fluency of writing and improvements in their knowledge of the structural properties of En-

glish. This led to a subsequent project in which personal captioning technology is being designed for students with different types of language-related learning needs. Six school programs (three serving students with deafness and three serving students with learning disabilities) are implementing the program to design and evaluate personal captioning experiences pertinent to the learners' needs. Goals for the 3-year project and planned activities for each of the 3 years are listed, emphasizing plans for implementing a computer communication network for electronic mail and conferencing. (Contains 10 references.) (JDD)

Training Special Education Teachers to Write Appropriate Goals and Short Term Objectives with Measurable Student Outcomes for Individualized Education Plans.

Pub Date—18 Feb 94

Note—60p.; Ed.D. Practicum Report, Nova Southeastern University.

Pub Type—Dissertations/Theses - Practicum Papers (043)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Behavioral Objectives, Compliance (Legal), *Disabilities, Elementary Secondary Education, *Individualized Education Programs, *Inservice Teacher Education, Parent Participation, Program Effectiveness, Special Education Teachers, *Student Educational Objectives, Identifiers—Bloom's Taxonomy, Mager (Robert)

The school district in this practicum report was found to be out of compliance by the State Department of Education in the area of writing individualized education plans (IEPs) that contained goals and short-term objectives with measurable student outcomes. Informal workshops were held to provide the special education teachers training for writing IEPs using Robert Mager's model for writing goals and objectives. In addition, the teachers were given Benjamin Bloom's taxonomy and a programmed instruction on how to write appropriate goals and instructional objectives. After the training, analysis of randomly selected IEPs suggested that the writing of objectives improved. Results of a pretest/posttest also indicated that the training was successful. A parent-teacher meeting was held to encourage the parents' participation in the IEP process and brought about many positive interactions among staff, administrators, and parents. Appendices contain copies of questionnaires, teacher pretest and posttest scores, and sample IEPs. (Contains 23 references.) (JDD)

This book is intended to be a comprehensive work that answers the myriad of specific legal questions engendered by special education statutes. The book attempts to give guidance on particular legal questions, to collect and evaluate caselaw and other authoritative materials, and to put forward the positions that seem best supported in reason and precedent. The book analyzes and evaluates authorities rather than simply describing them, and attempts to enable readers to see through the fog of legalese that sometimes surrounds education of children with disabilities. The book is addressed to generalists such as administrators, teachers, and parents as well as their attorneys. The book's chapters address: statutory background; eligibility for special education; appropriate education; evaluation; individualized education programs; placement; free education; related services; least restrictive environment; Child Find and public notice requirements; early childhood and preschool programs; monitoring and complaints; student discipline; parental status and related issues; records; residency; state advisory panels; submissions of plans and receipt of funding; personnel development; due process procedure; and court proceedings—individual and systemic. Appendices provide the text for the Individuals with Disabilities Education Act, Code of Federal Regulations text concerning assistance to states for education of handicapped children, Code of Federal Regulations text concerning early intervention programs for infants and toddlers with disabilities, discussions of pertinent Supreme Court cases, and discussions of unpublished cases noted in the book. A table of cases and index are also provided. (JDD)

Promising Classroom Interventions for Students with Attention Deficit Disorders.

Research Triangle Inst., Research Triangle Park, NC. Center for Research in Education.

Spons Agency—Special Education Programs (ED-OSERS), Washington, DC.

Pub Date—Jul 94

Contract—H023S10005

Note—215p.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC09 Plus Postage.

Descriptors—Aggression, *Attention Deficit Disorders, Career Education, Classroom Environment, *Classroom Techniques, Cooperative Learning, Earth Science, *Educational Practices, Elementary Secondary Education, *Intervention, Literacy Education, Mainstreaming, Peer Teaching, Self Management, Study Skills, *Teaching Methods, Tutorial Programs, Videodisks, Writing Strategies

This report presents school-based interventions that teachers can employ in regular classrooms to educate students with attention deficit disorders (ADD). The report attempts to compensate for the limitations in the ADD research literature by extrapolating from research on other difficult-to-teach students to identify and describe academic and social skills interventions that are likely to be effective in regular classrooms with students who have ADD. The first chapter provides an overview of the interventions and explains procedures followed in selecting the interventions. Each of the remaining eight chapters focuses on a single intervention program. These include: (1) classwide peer tutoring, (2) early literacy program, (3) "Tribes," (4) self-regulated strategy development in writing, (5) earth science videodisc program, (6) skills for school success, (7) aggression replacement training, and (8) life-centered career education. Each of the eight chapters provides a description of the intervention's purpose, its content and activities, implementation requirements, impact on teachers, significant costs, testimonials of effectiveness, limitations, research support, contact point for more information, and a list of references. To a large extent, the program developers, as well as the teachers and administrators who are using the programs successfully, describe the interventions in their own words. (JDD)

Improving Communication Skills with an Augmentative Communication Program for Primary Severely Physically Impaired Students.

Pub Date—27 May 94

Note—93p.; Master of Science Practicum Report, Nova University.

Pub Type—Dissertations/Theses - Practicum Papers (043)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Augmentative and Alternative Communication, *Cerebral Palsy, *Communication Disorders, Communication Skills, Expressive Language, Motor Development, *Nonverbal Communication, Physical Disabilities, Primary Education, Program Effectiveness, *Psychomotor Skills, Severe Disabilities, Skill Development

This practicum aimed to provide nonverbal students with a communication program to increase expressive language for daily living skills. Target students were four children (ages 6 to 7) with cerebral palsy. The practicum involved introducing children to pleasurable activities that encouraged communication behaviors, showing the children photographs of each activity before and after the activity, assessing the students' ability to alternate eye gaze between the activity and the service pro-

vider, teaching students a communicative signal to initiate an activity, teaching students to activate a switch to operate a computer program, having occupational and physical therapists position the students in equipment that facilitated head and trunk control to enhance vocalization and eye gaze, and conducting a group language lesson using a communication board with sequenced pictures of the story. The target group was involved in daily classroom activities over a 12-week period. Students increased their ability to eye gaze at pictures from one out of four attempts to two out of four attempts and increased the ability to give a positive response for an activity to continue by 25 percent. Students did not meet the objective concerning motor skills for computer use. Appendices provide weekly behavioral charts. (Contains 22 references.) (JDD)

Rockwell, Judith Marlene

Increasing Grades and Improving the Quality of Writing of 8th Grade Home/Hospital Students with a Comprehensive Writing Curriculum.

Pub Date—1 Jul 94

Note—67p.; Master of Science Practicum Report, Nova University.

Pub Type—Dissertations/Theses - Practicum Papers (043)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Chronic Illness, Grade 8, *Hospitalized Children, Instructional Effectiveness, Junior High Schools, *Writing (Composition), Writing Achievement, *Writing Difficulties, Writing Improvement, *Writing Instruction

This practicum involved developing and implementing a comprehensive writing program to improve the academic achievement and increase the writing ability of five home/hospital students in a central Florida county. The target group of home/hospital students was assigned to an eighth grade language arts class. Writing techniques used to build writing skills via teleclass instruction included: students created an expository essay on a topic of their choice, a "Who am I?" essay, different types of paragraphs, expository and persuasive essays, and biographical compositions; students were introduced to writing resource books; students discussed skills involved in reading to others, listening skills, note-taking skills, and skills for cooperative learning; students learned about the writing process, thinking skills, and types of essays; and students shared their essays and discussed with each other their strengths and weaknesses. Student success was measured by comparing first and second semester grades and scores from the Florida Grade 8 Writing Assessment. An anticipated score of three points or higher on the holistic scoring rubric was not achieved, but a score equivalent to the average score of other eighth grades in the district was achieved, and grade point average increased from 1.8 to 2.75. Appendices provide assessment results and a writing syllabus. (Contains 21 references.) (JDD)

Dikowski, Timothy J.

Educational Interventions for Visual-Motor Deficiencies That Affect Handwriting in School-Aged Children.

Pub Date—10 Aug 94

Note—73p.; Ed.D. Practicum Report, Nova Southeastern University.

Pub Type—Dissertations/Theses - Practicum Papers (043) — Tests/Questionnaires (160)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Computer Assisted Instruction, Elementary Education, *Eye Hand Coordination, *Handwriting, Perceptual Motor Coordination, *Perceptual Motor Learning, Psychomotor Skills, *Remedial Instruction, Sensory Integration, Spatial Ability, *Writing Difficulties, *Writing Instruction

This practicum was designed to remediate handwriting skills in school-aged children who displayed visual-motor deficiencies that affect mechanical skills. Practicum goals were to: (1) identify and diagnose children with handwriting delays; (2) involve school and parent interaction by involving them with pre- and post-program assessment; (3) involve identified children in a visual-motor program to develop mechanical abilities; and (4) measure data to assess effects of training on individual children. Ten students referred to a private clinic providing educational, psychological, rehabilitation, visual, and medical services served as subjects. Practicum activities included using computer programs to develop visual tracing, closure, pursuits, and spatial integra-

tion and using haptic writing and visual auditory tactile kinesthetic integration to reinforce the visual-motor process. Results indicated that 8 of 10 children showed improvement in visual-motor integration skills, 5 children showed improvement in visual skills related to handwriting functioning, and parents and teachers reported significant improvements in children's handwriting abilities. Appendices contain a referral form, a case history form, a handwriting checklist, a handwriting inventory, and a discussion of remediation techniques for improving handwriting. (Contains 40 references.) (JDD)

Improving Communication and Collaboration between Health Care and Education Professionals by Increasing Understanding of Common Issues Concerning Medically Fragile and Special Needs Children.

Pub Date—30 Aug 94

Note—57p.; Ed.D. Practicum Report, Nova University.

Pub Type—Dissertations/Theses - Practicum Papers (043) — Tests/Questionnaires (160)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Agency Cooperation, Cooperative Programs, *Disabilities, Early Childhood Education, *Early Intervention, Educational Legislation, Health Personnel, Inservice Education, *Interpersonal Communication, *Interprofessional Relationship, Medical Services, Parent Attitudes, *Physicians, *Special Health Problems, Teachers, Teamwork

Identifiers—*Medically Fragile

This practicum was designed to improve communication and collaboration between health care providers and early childhood intervention educators who provide services to children (ages 7 months to 4 years) who are medically fragile or have other special needs and their families. The lack of communication or collaboration is documented, and a causative analysis is provided. In-service seminars were developed and presented by a licensed Clinical Nurse Specialist in pediatrics to both professional groups, separately, on topics concerning special needs children. Education laws were used as a frame of reference, with discussions emphasizing the significance of the laws to both professions in dealing with special needs children and their families. Informal interviews were conducted with families of special needs children to assess their perception of communication and collaboration between health care providers and educators involved with their children. Results indicated that the exposure to the in-service seminar resulted in communication and collaboration, as evidenced by documentation in the medical records of the special needs children. Appendices provide a copy of the medical records review instrument, family interview questions, an outline of the inservice seminar, and an inservice evaluation form. (Contains 23 references.) (JDD)

Strategic Planning and Implementation of a Project that Supports an Early Childhood Special Education Team in Their Implementation of Recommended Practices.

Pub Date—1 Jul 94

Note—129p.; Ed.D. Practicum Report, Nova Southeastern University.

Pub Type—Dissertations/Theses - Practicum Papers (043)

EDRS Price - MF01/PC06 Plus Postage.

Descriptors—*Disabilities, Early Childhood Education, Early Intervention, Educational Methods, *Educational Practices, Inservice Education, *Program Development, Program Implementation, Special Education, Staff Development, *Strategic Planning, *Technical Assistance

Identifiers—*University Affiliated Training Programs

This practicum aimed to facilitate development and implementation of recommended practices by an early childhood special education team working with a University Affiliated Program (UAP). A site development project was being developed in response to the recognition by UAP center staff that their activities were not sufficient in helping early childhood programs implement recommended practices. The practicum was designed to close four gaps that had been identified in the site development project: (1) the absence of an organizing structure; (2) the need to gather information about the site team; (3) the need to identify and implement effective staff development strategies; and (4) the need to identify barriers to implementation of recommended practices. A strategic plan was developed by the project team, including a vision, values, operating principles, goal, objectives, and time line of activities. Although delays impacted project implementation, a strategic plan was developed, a self-study by the site team was nearly completed, procedures and forms for selecting staff development strategies were drafted but not tested, and barriers to implementation of recommended practices were identified but plans to resolve them had not yet been made. Appendices contain various practicum administration materials. (Contains approximately 65 references.) (JDD)

Reblin, Patricia A.

A First-Grade Inclusion Model That Trains Classroom Teachers To Modify and Develop Curriculum for Language-Learning Disabled Students.

Pub Date—6 Jun 94

Note—73p.; Ed.D. Practicum Report, Nova Southeastern University.

Pub Type—Dissertations/Theses - Practicum Papers (043) — Tests/Questionnaires (160)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Generalization, Grade 1, *Language Acquisition, *Language Impairments, *Learning Disabilities, *Mainstreaming, Primary Education, Resource Teachers, Social Integration, *Speech Therapy, *Team Teaching, Therapists

Identifiers—Inclusive Schools, Teacher Collaboration

This practicum determined that students with language learning disabilities were not experiencing success in the regular classroom, and skills acquired in a pull-out program were not generalizing to the regular classroom. The practicum piloted a first-grade inclusion program which called for the resource room teacher and speech language pathologist to co-teach with the classroom teacher for 8 hours weekly. The three educators cooperatively modified curriculum for all language levels and co-taught lessons for the whole class along with daily small group cooperative learning lessons with teachers as facilitators. Data indicated that the number of referrals for speech and language services dropped somewhat, and staff felt that students had done better in the regular classroom than they would have in a pull-out program. Achievement increased along with social and pragmatic skills though not all students met the practicum objectives. Because learning experiences were connected, there was no problem with skills taught in the resource room generalizing to the classroom. The study concludes that implementation of such a co-teaching arrangement requires staff who are compatible, initial training, ample planning time, and a low teacher/student ratio. Copies of questionnaires used to assess staff attitudes toward the program are provided in appendices. (Contains 19 references.) (JDD)

A Program Designed and Implemented To Alleviate Feelings of Isolation for the Extended Families of Primary, Severely Emotionally Disturbed Children through an Educative and Social Support Network.

Pub Date—26 Jul 94

Note—64p.; Ed.D. Practicum Report, Nova University.

Pub Type—Dissertations/Theses - Practicum Papers (043) — Tests/Questionnaires (160)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Child Rearing, Emotional Adjustment, *Emotional Disturbances, Family Involvement, Networks, *Parent Education, *Parent Participation, Primary Education, Program Development, *Social Support Groups, Workshops

This practicum was designed to alleviate feelings of isolation experienced by parents and extended family members of 17 primary students with severe emotional disturbance (SED). Practicum activities included biweekly educative and social support workshops for the parents and extended family members; an educative newsletter; pre-implementation and post-implementation surveys of all participants; a library of books and periodicals for participants; facilitation of a peer "buddy system"; and dissemination of information about medical, psychological, and social resources within the community. The practicum resulted in 15 extended family participants receiving information and support

pertaining to issues surrounding the child's disability. The participants exhibited an improved attitude in coping with the disability, and 11 of them demonstrated an improvement in their emotional reactions to the disability. Appendices contain copies of various survey forms. (Contains 36 references.) (JDD)

Descriptors—Advocacy, *Change, Community Programs, *Deinstitutionalization (of Disabled), *Delivery Systems, *Developmental Disabilities, Human Services, *Normalization (Disabilities), Qualitative Research, *Social Integration, State Programs, Systems Approach, Systems Development

Identifiers—*New Hampshire

This qualitative research study aimed to examine the nature of systems change and to identify practices and strategies that states, specifically New Hampshire, use to promote community integration and deinstitutionalization of people with developmental disabilities. The study describes the New Hampshire system, including state practices, characteristics, issues and problems, and historical and thematic areas. Thematic areas include the role of the courts, the role of state institutions, structural factors in community services development, family support, and self advocacy and guardianship. Community integration service practices have focused on family support, supported employment, community living and home ownership, self advocacy, case management, guardianship, and aging and developmental disabilities. The study highlights comparative roles of groups in the change process, including families, external advocates, state and community administrators, media, litigators, and legislators and policymakers. A framework for thinking about systems change is presented, which views community integration as a slowly evolving process with key "events" occurring along the way which significantly altered or shaped others that followed. Selected research areas and hypotheses are outlined. (Contains 95 references.) (JDD)

Identifiers—*Garrity v. Gallen, *Laconia Developmental Services NH, Laconia State School NH, New Hampshire

In 1978 a complaint was filed by New Hampshire Legal Assistance against Laconia Developmental Services, New Hampshire's only public institution for children and adults with developmental disabilities. The decision from the Federal district court judge in August 1981 ordered the state to devise a plan for: institutional improvement; development of community service options within available resources; and special education responsive to children with severe disabilities. An implementation plan was developed by the state, calling for significant community placements and the building up of important community infrastructure. Factors that contributed to the positive outcomes of the litigation included poor institutional conditions, few community services, timing, the development of a model for nondiscrimination against people with severe disabilities in the Pennhurst case in Pennsylvania, the public nature of the trial, the influence of outside experts, the maintenance of the state's role in planning services rather than assignment of a

court monitor, courage and tenacity of the parents, the wisdom of the judge, and minimal organized opposition. Highlights in the litigation process, effect on state administration and planning, and the decision to not apply for special education certification are also discussed. (Contains 19 references.) Identifiers—*Laconia Developmental Services NH, New Hampshire

This case study shares the perspectives of two individuals who worked from within Laconia Developmental Services (a state institution in New Hampshire for people with developmental disabilities) to close it. One individual was institutional superintendent and the other served as a liaison officer among the state government offices, Laconia Developmental Services, and the community service system represented by area agencies. The institutional superintendent identified four major areas as critical in the internal process of closing Laconia: (1) revisions in the personnel system; (2) caring for and about staff members; (3) restructuring and reorganizing the institution as it became smaller; and (4) maintaining institutional quality during the closure process. The liaison officer helped people from the community and institution to "get to know each other," in order to facilitate community placements by improving relationships between the community and institutional staff. Primary strategies for facilitating changes included: finding the window of opportunity, building trust and sharing expertise between the community and institutional system, reinvigorating the internal process by building on the knowledge and skills of institutional staff, shifting the attention of the area agencies to the people left in the institution, and focusing on individuals. Other critical issues included finances, the advantages of not having a formal closure plan, working with parents, developing individualized placements, and developing a capacity to make compromises and solve problems. Descriptors—*Advocacy, Caregiver Role, Case Studies, *Developmental Disabilities, Qualitative Research, *Self Actualization, Self Determination, *Self Help Programs

Identifiers—*Guardianship, New Hampshire, *Self Advocacy

This qualitative research case study includes a brief overview of the status and development of self-advocacy in New Hampshire, describes the state's guardianship program, and highlights areas of concern to people with disabilities. Self-advocacy is described as having three primary components: (1) enabling people with developmental disabilities to speak for themselves; (2) joining together with others to achieve systems changes through advocacy strategies; and (3) sharing social and personal support offered by local self-advocacy groups. The desired outcomes of self-advocacy are listed: a marriage and family, jobs one likes to do with good pay, a "dream" career, a comfortable place to live, freedom to come and go, housing, adult education, results on individual services plans, clothes and equipment, and transportation. The study describes the role of local self-advocacy groups, roles within groups, roles of advisors and supporters, and future issues. (JDD)

Identifiers—*Education for All Handicapped Children Act, *Marfan Syndrome

Intended for physical educators, this manual provides guidelines for providing safe and effective physical activity programs for children with Marfan syndrome, a congenital condition involving the connective tissues and the probable cause of sudden death by heart failure of some young competitive athletes in recent cases. The manual includes information regarding: Public Law 94-142, the Education for All Handicapped Children Act; physical characteristics associated with the disorder and resultant physical needs; potential psychosocial implications; the establishment of educational goals to address these implications; and competencies and/or sensitivities needed by involved professionals.

Suggested guidelines for physical activity, instructional methods and strategies, and approved curricular activities are included. In addition, contraindicated activities are identified as well as implications for safety and effectiveness in physical activity programs. The importance of applying these guidelines only under the supervision of the treating physician is stressed. Additional features of the manual include a list of Advisory Panel members of the National Marfan Foundation, a list of organizational resources, and a glossary. Contains 78 references. (DB)

Descriptors—Adults, Agencies, Community Programs, *Disabilities, *Evaluation Methods, Group Homes, *Normalization (Disabilities), *Outcomes of Treatment, Personal Autonomy, Residential Programs, Social Integration, Social Services, *State Standards

Identifiers—*Illinois, *Outcome Based Performance Measures

This manual presents suggested measures which are designed to examine the outcomes of support and service provision on the lives of people with disabilities in Illinois. Included are 30 measures for people and 16 measures for organizations. The measures were developed after initial input from people with disabilities participating in a Community Integrated Living Arrangements program and are intended to be used in the evaluation process by review teams during on-site visits. The measures and the accompanying questions are designed to obtain information from either the individual involved and/or those who know the person best. Outcome measures for people address the following areas: personal goals, choice, social inclusion, relationships, rights, dignity and respect, health, environment, security, and satisfaction. The measures for organizations cover the areas of health and safety, fiscal management, human resource management, planning, and evaluation. For each measure the guidelines address interview questions, checking of documentation, observation, outcome questions, organizational process questions, and special considerations. (DB)

Descriptors—Curriculum Development, *Disabilities, Educational Needs, High Schools, High School Seniors, *Independent Study, *Learning Strategies, Postsecondary Education, *Public Schools, Secondary School Curriculum, *Self Management, Special Education, *Special Needs Students, Study Skills, Transitional Programs

This study was developed to examine some possible reasons for the poor transition outcomes of students with exceptional needs even when provided with the structure and support of an Individualized Education Program, certified teachers, limited class sizes, and transition support. An extensive review of the literature precedes the research report. The report notes that postsecondary adult education theory assumes that high school graduates possess the basic competencies for self-directed learning. The study used the Self-Directed Learning Readiness Survey with 10 graduating seniors identified as either learning disabled or emotionally disturbed. All student scores fell in the lower 16th percentile range on self-directed learning readiness. Discussion of results focuses on the lack of "mesh" between secondary and postsecondary educational theory and the need to include the development of self-directed learning skills in the secondary special education curriculum. Contains 35 references. (DB)

Descriptors—Agencies, Compliance (Legal), Costs, *Disabilities, Educational Finance, *Educational Legislation, Elementary Secondary Education, *Federal Aid, *Federal Legislation, Financial Support, Preschool Education, *Program Proposals, *Proposal Writing, Recordkeeping, Records (Forms), School Districts, Special Education

Identifiers—Elementary Secondary Education Act Title I, *Individuals with Disabilities Education Act, Preschool Grant Program, Wisconsin

These guidelines are designed to assist public agencies in Wisconsin to apply for education funding under the Individuals with Disabilities Education Act (IDEA), the Preschool Grant Program, and Public Law 89-313 (amendments to Title I of the Elementary and Secondary Education Act of 1965). After an introduction which briefly describes each of these three funding programs, specific project application guidelines are offered for the following: (1) IDEA flow-through funds; (2) IDEA discretionary projects; (3) IDEA preschool entitlements for 3-5 year olds; (4) IDEA preschool discretionary projects; (5) Public Law 89-313 local education agency transfer funds; (6) general information/procedures; and (7) directions for completing application form PI-2111. Extensive appendices include the following: a list of acronyms; Division for Handicapped Children and Pupil Services staff listing; eligible handicapped certification codes; financial management handbook excerpt; information on copyrights and record retention; procurement standards; allowable and unallowable costs; indirect cost rates; rules on obligation of funds; uniform property management standards; carry-over and excess cost rules; guidelines for distinguishing between capital/non-capital objects; sample claim form (both completed and blank); blank application form; and end of year report. Descriptors—Agencies, *Child Abuse, Child Caregivers, Child Neglect, *Chronic Illness, Community Services, Delivery Systems, *Disabilities, Family Involvement, Family Problems, *Guidelines, Program Administration, Quality Control, *Respite Care, Social Services, Special Health Problems, *Standards

Identifiers—*Family Needs

These guidelines are intended to assist states and local communities in developing quality respite services that meet the diverse needs of families and children with disabilities, with chronic and terminal illnesses, or at risk of abuse or neglect. The guidelines support the philosophy that all families can benefit from temporary intervals of rest and relief (respite) from caregiving responsibilities. Respite reduces family stress, helps preserve the family unit, supports family stability, and prevents possible abuse situations. The guidelines address the following broad areas: (1) family involvement; (2) care needs of the child; (3) care providers; (4) community involvement; (5) service delivery; (6) administration; and (7) evaluation. Descriptors—*Child Abuse, Child Caregivers, Child Neglect, Chronic Illness, *Community Programs, Community Services, Crisis Intervention, *Disabilities, Family Problems, *Program Development, *Respite Care, *Rural Areas, Social Services, Special Health Problems

Identifiers—*Crisis Child Care, Family Needs

This fact sheet offers basic information on developing and implementing rural respite and crisis nursery programs. It first defines "respite" as temporary relief for caregivers and families of children with disabilities, chronic or terminal illnesses, and/or for children at risk of abuse and neglect. It also defines "rural" and notes unique qualities and challenges of rural areas as well as common characteristics of successful rural respite programs. Suggestions are then given for recruiting and training local care providers, for obtaining funding, for dealing with transportation issues, for building trust, and for putting it all together. (DB)

Descriptors—*Disabilities, Elementary Education, Inservice Teacher Education, *Mainstreaming, Physical Disabilities, Regular and Special Education Relationship, Resistance to Change, Staff Development, Student Evaluation, *Teacher Attitudes, *Transitional Programs, Videotape Recordings

Identifiers—*Inclusive Schools

This report describes a process for improving the

transition of special needs students from their special education setting to that of the regular education classroom in their neighborhood elementary schools. Analysis suggested that parents, administrators, and receiving teachers were apprehensive about the move to total inclusion for special needs children and that current methods of implementing the transitional process were inadequate. Four major strategies were developed to facilitate the transition process: (1) videotaping of individual special needs students and related staff; (2) systematic visitations and meetings involving everyone in the inclusionary process; (3) development of consistent methods of documentation; and (4) staff development. Results suggested that the symptoms of the original problem were not significantly reduced by implementation of the strategies. Acceptance of students with physical disabilities requiring no content modifications in the regular classroom was better than for those students requiring an individual curriculum. Results support the need for a clear philosophy statement about inclusion, more time for staff development, and more uniformity in the delivery system. Teachers' attitudes appeared to be the greatest factor in the success of the inclusive process. Appendices include administrator, teacher, and parent questionnaires; sample letters and forms; and teacher responses. Contains 29 references. (Author/DB)

Identifiers—Developmental Disabled Assist Bill of Rights Act, *Mississippi

This report offers an executive summary and further analysis of a 1990 report that presented a comprehensive picture of service delivery for persons with developmental disabilities in Mississippi. The 1990 report, which was mandated by the Developmental Disabilities Assistance and Bill of Rights Act Amendments of 1987, analyzed federally assisted and state agency programs and consumer satisfaction and offered recommendations. This executive summary traces the history of Mississippi special education services, integration of students with disabilities, and results of interviews with 300 individuals with disabilities. These individuals represented 17 locations, 14 centers, 11 cities, and 9 counties from the State of Mississippi. Tables accompany text that discusses: Mississippi expenditures on education, health, and social services; special education growth from 1962 to 1992; growth in special education by specific disability groups; racial composition of special education enrollment; educational environments by disability; comparisons of percentages of students in different educational environments among different states; similar comparisons by specific disability groups; consumer satisfaction with residential and vocational services; participation in community and leisure activities; services needed; and employment and income. Recommendations focus on supports to individuals and families, employment and income, aging, education, housing, and prevention. (Contains 28 references.) (JDD)

Identifiers—Individuals with Disabilities Education Act, *Project Head Start

This issue of the "Quarterly Resource" focuses on Head Start's role in complying with federal regulation concerning Individualized Education Programs (IEPs) for young children with disabilities. The report spells out the responsibilities of the local education agency and of the Head Start program. It discusses membership on the multidisciplinary evaluation team, elements of the Head Start IEP, parent involvement requirements, and the need for annual goals and behavioral objectives. An appendix compares Head Start regulations for children with disabilities and provisions of the Individuals with Disabilities Education Act, Part B, Subparts D and E. Other appendices list parent training and information centers and offer a sample IEP. The "Quarterly Resource" report concludes with updates on conferences and workshops relating to education of young special needs children, which took place in Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin. Descriptors—*Access to Education, Accountability, Competition, Decentralization, Educational Legislation, Elementary Secondary Education, Foreign Countries, *Free Enterprise System, *School Based Management, *School Choice, School Restructuring, *Special Needs Students
Identifiers—Education Act 1981 (England), *Education Reform Act 1988 (Great Britain), *Great Britain, Market Systems Approach

The emphasis in recent British educational legislation (primarily the 1988 Education Act) has been on the creation of an "internal market" to stimulate improvements in educational outcomes and provide efficiency and accountability. The internal market mechanism allows schools to manage their own budgets and personnel and to create competition by extending parental choice of schools. The creation of a market system within education will increasingly disadvantage pupils with special educational needs. The notion of equality of educational opportunity has been sacrificed for a system where over-subscribed schools have the power to choose pupils and less popular schools have to accept those pupils rejected by other schools. Special needs children may be less attractive to schools competing for pupils to enhance their test score rankings. Four annual surveys have been conducted since 1989 on the impact of Local Management of Schools and other aspects of recent legislation on provision for pupils with special educational needs. Their findings indicate that the pressures of reduced central funding and increased demands on schools to demonstrate good results has meant that more pupils than ever are being given Statements of Special Educational Needs (SEN), who receive some services from the local education authority. There is a lack of clarity and a fragmentation of responsibilities for children with SEN. (Contains 28 references.) (JDD)

Descriptors—Case Studies, Cooperative Programs, Educational Cooperation, Elementary Secondary Education, Foreign Countries, *Partnerships in Education, *Program Effectiveness, School Districts, *Shared Resources and Services, *Special Needs Students

Identifiers—*United Kingdom

This study looked at the possibilities and practice of partnerships between "clusters" of mainstream schools in the United Kingdom collaborating to meet the special educational needs (SEN) of their students. Collaboration between schools can take many forms, from infrequent and short-lived interactions such as course-work moderation, to long-term intensive relationships such as sharing staff or equipment. Distinctions are drawn among the many terms used to describe collaboration, including networks, federations, and clusters. Clusters have emerged as a form of organization for meeting students' special educational needs. Case studies of four clusters are reported here, based on interviews with educators and pupils supplemented by "focus group" discussions in three regional locations. Some clusters had been initiated "top down" by the Local Education Authority (LEA), while a small number had been initiated "bottom up" by the schools themselves. Optimum size for effective clusters was found to be between six and eight schools. Clusters focusing on one aspect of SEN provision were more effective than clusters that became large and complex. Identification of a coordinator of the cluster was a key factor in maintenance of cluster activity. Outcomes for pupils, teachers and other professionals, schools, and LEA are discussed. (JDD)

Descriptors—Data Collection, *Disabilities, *Educational Assessment, Evaluation Methods, Grade 4, Intermediate Grades, Measurement Techniques, Models, *Outcomes of Education, *Student Educational Objectives, Student Evaluation
Identifiers—*Performance Indicators

This document presents a model of educational outcomes for learners in grade 4 and the indicators of these outcomes for all students. This includes students identified as having disabilities or developmental delays. The document begins with a presentation of the conceptual model, with Educational Resources (Inputs and Contexts) influencing Learning Opportunity and Process. These, in turn, influence the Outcome Domains, which have a return influence on both the Educational Resources and the Learning Opportunity and Process. The Outcome Domains include Presence and Participation, Family Involvement/Accommodation and Adaptation, Physical Health, Responsibility and Independence, Contribution and Citizenship, Academic and Functional Literacy, Personal and Social Adjustment, and Satisfaction. The conceptual model is extended by identifying outcomes within each outcome domain, with "outcomes" being defined as the results of learning experiences or interactions between children and the educational process. Indicators, which are numbers or other symbolic representations that can be used to determine whether desired outcomes are achieved, are then presented. Finally, examples of possible sources of data for the seven indicators within the Physical Health domain are provided. (JDD)

Descriptors—*Disabilities, *Educational Assessment, Evaluation Methods, Grade 8, Junior High Schools, Measurement Techniques, Models, Outcomes of Education, *Student Educational Objectives, Student Evaluation

Identifiers—*Performance Indicators

This document presents a conceptual model of educational domains and outcomes for learners in Grade 8 (or approximately 13 years of age) and possible indicators for each outcome for all students, including students with disabilities or developmental delays. In the model, educational resources (inputs and contexts) influence learning opportunity and process. These, in turn, influence the outcome domains, which include presence and participation, accommodation and adaptation, physical health, responsibility and independence, contribution and citizenship, academic and functional literacy, personal and social adjustment, and satisfaction. The conceptual model is extended by identifying outcomes within each outcome domain and then indicators of the outcomes. Examples of possible sources of data for the seven indicators within the domain called "contribution and citizenship" are provided. An annotated list of six supporting documents concludes the document. (JDD)

Identifiers—*Conductive Education, *New Zealand

This study sought to determine whether there are national training needs among staff of conductive education programs in New Zealand. Conductive education is a unified system of education for children and adults with a motor disorder whose disability has been caused by damage to the central nervous system. The study, which focuses primarily on programs employing Hungarian-trained conductors, shows conclusively that there are clearly defined training needs among coordinators/managers, program chairpersons and committees, conductors, specialists, parents, and other staff. An approach to training that would fulfill these needs is presented, with three levels including short courses, undergraduate courses, and postgraduate courses. Recommendations are made for developing a national curriculum, while recognizing that each program is responsible for its own in-house staff training and development. Recommendations are addressed to the New Zealand Foundation for Conductive Education, which is regarded as the appropriate organization to oversee the development of a national curriculum plan. The report provides an overview of conductive education, a research review, the status of conductive education in eight countries, descriptions of nine New Zealand conductive education programs, interview forms, the curriculum of the Andras Peto Institute for Conductive Education of

the Motor Disabled in Hungary, and a conductive education graduate training curriculum from the University of Melbourne (Australia). (Contains approximately 100 references.) (JDD)

Identifiers—*Inclusive Schools

This paper offers recommendations for establishing meaningful integration opportunities for preschool children with disabilities, derived from the work of the Research Institute on Preschool Mainstreaming, a 5-year federally funded project of St. Peter's Child Development Centers, Inc., in Pittsburgh, Pennsylvania. The knowledge base on preschool integration is summarized, indicating that segregated environments have not been found to be superior for developmental outcomes, that frequent interaction among children with and without disabilities is needed for positive social outcomes to occur, and that parents want their children to have typically developing or neighborhood friends. Eight markers for quality practices are listed, emphasizing that children need to be educationally integrated and socially integrated with their peers to achieve integration's positive impact. Policy issues that prevent administrators from providing integrated preschool services are categorized, as are attitudinal barriers. Strategies for changing policy and attitude barriers are listed. The critical role of the school administrator in developing integrated preschool services is cited. A model of systems change for preschool inclusion is presented. An appendix lists seven resources for information on early childhood policies and programs. (JDD)

Identifiers—New York City Board of Education

The Adaptive Technology Program established five Adaptive Technology Centers (ATCs) in each of the five boroughs of New York City in 1990. These centers house various state-of-the-art technologies designed to enhance the functioning of students with severe disabilities. Equipment includes assistive devices, augmentative communication systems, adaptive computer hardware, peripherals, and software. The ATCs also provide technological support and training in the use of the equipment to school system staff responsible for the educational development of these students. The program also operates a Vision Resource Center, a Hearing Resource Center, and the Access Tech component, which provides on-site environmental assessment in the classroom, workplace, and home. Evaluation of the 1992-93 program via a survey of 110 users re-

vealed that 3,380 students had benefitted from services provided by the ATCs. Teachers, therapists, paraprofessionals, and parents used the ATCs for information and training and to borrow equipment. In general, respondents were very satisfied with the responsiveness of the ATCs to their needs. ATC training workshops were perceived as well-organized and thorough. Users evaluated the ATC workshops positively. (JDD)

Identifiers—Elementary Secondary Education Act Title VII, New York City Board of Education, *Project SHARE NY

Project SHARE (Staff Helping Attain Relevant Education), a project funded by Title VII of the Elementary and Secondary Education Act, was in its third and final year of operation in 1992-93, in eight primary schools in the Bronx, Brooklyn, and Manhattan (New York). The project served 141 limited English proficient students from low-income families in 1992-93 by providing English-as-a-Second Language (ESL) instruction using total physical response and multisensory and literature-based approaches and providing native language arts instruction (in Spanish) using language experience, whole language, and literature-based approaches. Project SHARE offered training to teachers, paraprofessionals, supervisors, administrators, and parents on issues related to multicultural assessment and bilingual instruction in special education. The project also provided workshops and training activities on consultation and assessment processes and on instructional techniques. Project SHARE provided parents with materials and information to enable them to assist their children at home and offered parents a variety of workshops. Project SHARE met all seven of its staff development objectives and all three of its parental involvement objectives. It did not meet its ESL objective or its objectives for the mastery of English, Spanish, and social skills. Appendices provide a list of instructional materials, a class schedule, and a staff questionnaire. (JDD)

Surviving Gifted Attention Deficit Disorder Children in the Classroom.

Pub Date—Oct 90

Note—26p.; Paper presented at the Annual Conference of the National Association of Gifted Children (Little Rock, AR, October 1990).

Pub Type—Speeches/Meeting Papers (150) — Guides - Non-Classroom (055)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—*Attention Deficit Disorders, Behavior Modification, *Classroom Techniques, Drug Therapy, Elementary Secondary Education, Etiology, *Gifted Disabled, *Hyperactivity, Intervention, Self Management, *Student Characteristics

Identifiers—Behavior Management

This paper examines characteristics of a typical 6-year-old and characteristics of attention deficit hyperactivity disorder (ADHD), including distractibility, impulsiveness, inattention, and hyperactivity. The occurrence of ADHD in gifted students is discussed. Possible causes of ADHD are noted. The 5 "M" program of treatment is presented, which involves: (1) medication with stimulants to help the

student pay attention; (2) management using behavior modification techniques, which included acknowledging adherence to classroom rules, teaching self-monitoring of behavior, allowing children to help design classroom rules, and using rewards and punishments to reinforce rules; (3) modification of the classroom environment to meet student needs; (4) modeling appropriate behavior; and (5) mothering (and fathering, too!), which calls for unconditional love and acceptance of the child, as ADHD children must perceive that they are loved if they are to accept themselves. The paper concludes that through steady support and management, the gifted ADHD child is not only teachable, but can provide a great deal of positive stimulation to the classroom environment. (JDD)

Descriptors—Constructivism (Learning), Elementary Education, *Journal Writing, Language Arts, *Learning Disabilities, Literacy Education, Motivation Techniques, *Sociocultural Patterns, *Student Journals, *Student Motivation, Teaching Methods, *Writing (Composition), Writing Processes

Identifiers—*Zone of Proximal Development

This study utilized a sociocultural approach to writing instruction and examined its effects on the motivation of students with learning disabilities. The concept of the Zone of Proximal Development was used to measure changes in fifth and fourth grade students' motivation toward literacy activities. Students wrote in journals daily and participated in weekly "feedback" sessions, where they read their stories to the teacher and other students. Data indicated that journal writing became more communicative over time, as children spent more time writing stories and letters rather than lists. Data also showed increases in creativity, a broader understanding of the uses of writing, greater persistence at writing tasks, and more conventional uses of writing over the course of the academic year. As journal writing was always a "free" writing activity (students were never told what topics to write about), the paper contends that the students' continuing desire to write, as well as the development of their writing abilities, is a result of the sociocultural/emergent literacy curriculum. Students did not receive any formal instruction in writing; thus, changes are attributed to the new meaning children constructed for writing, through their interactions with other members of the classroom writing community. A sample of one student's writing is included. (JDD)

Beware the Gifted.

Pub Date—Jun 94

Note—42p.

Pub Type—Opinion Papers (120)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—Ability Identification, *Academically Gifted, Administrator Role, *Anti Intellectualism, *Change Strategies, Educational History, Elementary Secondary Education, *Elitism, Equal Education, *Grouping (Instructional Purposes), Private Schools, Social Discrimination, Teacher Role, *Teaching Methods

This paper discusses how elitism and anti-intellectualism have affected the teaching of intellectually gifted students. It examines methods of identifying the intellectually gifted child. It traces trends in education of the gifted through history and discusses the issues of equity, elitism, and anti-intellectualism which have resulted in discrimination against gifted children. The purpose of education is addressed, concluding that an anti-intellectual approach to education has been developed which sees children as a form of capital to be developed rather than allowing them the luxury of developing their minds without a specific or practical purpose. Methods of educating gifted students are outlined, including acceleration, pull-out programs, and homogeneous and heterogeneous grouping. The role of teachers and administrators in educating the intellectually

gifted is analyzed. Three proposals to benefit public education are presented: (1) look carefully at the successes of the private schools and incorporate ideas that have worked; (2) have preservice teachers follow a rigorous course of study in liberal arts or math and science before studying for a graduate degree in education; and (3) encourage the growth of private schools. The paper also advocates small schools in which students work with a relatively small number of teachers, with some heterogeneous grouping and some homogeneous grouping in accelerated programs that are relevant to the curriculum. Descriptors—*Consultation Programs, *Cooperation, Demonstration Programs, Elementary Secondary Education, Intervention, *Language Impairments, Mainstreaming, Models, *Regular and Special Education Relationship, School Restructuring, *Speech Impairments, Speech Therapy, Therapists

Identifiers—Florida (Lee County), *Inclusive Schools, *Teacher Collaboration

This paper examines collaboration and consultation relative to the current restructuring and inclusion movement in education. It presents the advantages of the collaborative consultation model for serving special students, particularly those with speech and language impairments and outlines the role of the speech language pathologist in collaborative consultation. The paper then describes the implementation of a pilot collaborative consultation model at three public schools in Lee County, Florida. This case study collected data from 13 teachers, in the areas of communication, personal growth, professional development, academic aspects, social/emotional student variables, program variables, parent variables, and formal documentation. The case study found that the collaborative consultation model is a model of best practice for all children and particularly for students with language and speech impairments. The implementation of a collaborative consultation model requires more teacher flexibility and planning time, reduces polarization between regular and special education teachers and students, and reduces the need for intervention with severe problems in the latter grades. Recommendations are offered for future collaborative models. Appendixes contain various forms and data from the survey forms. (Contains 30 references.) (JDD)

Identifiers—*Norfolk City Schools VA

When legislation extended vocational assessment services to limited English proficient and economically/educationally disadvantaged students, which comprise 72 percent of grade 8-12 students in Norfolk (Virginia) Public Schools, innovations were needed to offer expanded services without additional personnel. A multiphase model of vocational assessment for special populations was developed, based on interviews with leaders in the field of vocational evaluation, a statewide survey of vocational evaluation centers, and a review of the literature. The Management Information Systems office tabulated information on students to identify those who met federal and state definitions of special populations. The middle school guidance and testing per-

sonnel added the Differential Aptitude Test to their testing program. Thus, the practicum resulted in all eighth grade students receiving a vocational aptitude and interest test, students with disabilities receiving streamlined vocational evaluation services, and fewer students needing a comprehensive vocational evaluation. The model has been cost-effective and complies with regulations. Appendixes provide survey forms, survey data, and administrative documents. (Contains approximately 60 references.) (JDD)

Descriptors—*Attitudes, *Bioethics, College Students, *Education Majors, Elementary Secondary Education, Ethics, *Health Personnel, Higher Education, Infants, *Medical Services, Nurses, Opinions, Premedical Students, *Severe Disabilities, Special Education, Student Attitudes, Undergraduate Study

Identifiers—*Euthanasia

This study compares attitudes and opinions of premedical, nursing, regular education, and special education undergraduate students regarding whether life-sustaining treatment should be withheld from newborns with severe disabilities. The paper begins with a review of the literature, which reveals that the amount of experience an individual has with people having disabilities may influence the individual to recommend providing life-sustaining medical treatment, that it may be rare for pediatricians to have any professional experience with individuals having severe disabilities, that special educators were less likely than regular educators to recommend withholding maximum medical treatment, and that the legal decision to administer life-sustaining treatment is left to the individual states. A survey of 131 undergraduate students enrolled at the College of Charleston (South Carolina) or the Medical University of South Carolina is then reported. Results indicate that statistically significant differences among various academic majors occur when comparing views on withholding life-sustaining treatment. Attitudes were affected by choice of major, by experience with individuals having disabilities, and by subject age, but not by gender. Appendixes contain a copy of the survey instrument and statistical data. (Contains 22 references.) (JDD)

Identifiers—National Longitudinal Transition Study Spec Educ, Office for Civil Rights

This report offers a synthesis of the current knowledge and theoretical positions concerning the disproportionate representation of minorities in special education. It is divided into five broad sections: (1) an introduction which clarifies the terminology and purpose of the report; (2) an overview of the position of minority students in the nation's education system; (3) a description of the pervasiveness and patterns of disproportionate placement, including an analysis of data from the Office for Civil Rights and the National Longitudinal Transition Study of Special Education Students; (4) an outline and discussion of the various explanations or interpretations that have been offered for this phenomenon (including characteristics of the students, biases in the assessment process, and characteristics of students' homes and communities); and (5) recommendations. The report finds no single reason for disproportionate representation but does find that continuing educational and social inequities combine to place poor minority students at particular disadvantage. Recommendations address: the collection and use of data on disproportionate representation; disbanding the classification system; restructuring for a unified system of special and regular education; restructuring for prevention of failure and the redress of disadvantage; assessment in context, for the purpose of modifying and improving services; curriculum and instruction in context; grouping students in schools; and schools as community resources. Descriptors—*Accessibility (for Disabled), Architecture, *Building Design, Design Requirements, *Disabilities, Facility Requirements, Legislation, Physical Mobility, Safety, *Standards, Transportation

This updated annotated bibliography of 93 items is intended for people who design spaces and facilities to be accessible for people with disabilities and for those who assure that such facilities are in compliance with regulations. It cites books, chapters in books, articles, and pamphlets, most of which were published from 1988 to 1993. It also includes audiovisual materials, most of which were produced from 1991 to 1993. References usually include bibliographic information, availability information and cost (if available), and a brief annotation. References are arranged alphabetically by author within the following categories: (1) bibliographies and general information; (2) children's environments; (3) home design; (4) legislation and standards; (5) public facilities and the workplace; (6) safety and evacuation; (7) transportation; and (8) audiovisuals. A final section lists 20 sources for further information, including addresses, phone numbers, and brief descriptions. (DB)

Descriptors—Adults, Agencies, Children, Curriculum Development, Daily Living Skills, *Decision Making, *Developmental Disabilities, *Educational Strategies, Elementary Secondary Education, Lesson Plans, Models, *Personal Autonomy, Residential Programs, Self Care Skills, *Self Management, Social Services, Teaching Methods, Vocational Rehabilitation

Identifiers—*Choice Behavior

This curriculum is intended to provide social service agencies, schools, vocational programs, and other groups concerned with persons having developmental disabilities with guidelines and practical techniques for developing training and support services that encourage choice-making. Emphasis is on allowing people with disabilities to take as much responsibility for their own decision-making as possible, without forcing them into situations where they are unprepared to cope. The first section looks at the agency's role in such areas as staffing patterns, behavior management, and development of a policy on choice-making. A section on beginning to teach choice-making skills considers learned helplessness, a variety of assessment approaches, a case study, and seven sample lesson plans. The following section provides a step-by-step procedure for identifying the individual's communication mode, identifying available options, evaluating options, developing a "plan of action," and evaluating the experience. A choice-making model worksheet is included. Next, ways to implement the curriculum in residential, vocational, and school settings are detailed. The final sections examine choice-making in sexuality and relationships, self-advocacy, and families. Some sections contain references. (DB)

The program of instruction described in this monograph is intended to help prepare high school students with educable mental retardation or per-

ceptual/neurological impairments with basic skills necessary for employment success. The focus of instruction is on practical living skills, with group and individual instruction in such areas as taxes, banking, applications and forms, computer data entry, driver's education, want ads, job interviews, work attitudes and habits, use of tools, time clocks, budgets, and more traditional academic skills such as reading and math. The program uses a multi-sensory approach and integrates academic and vocational learning. The program also includes a weekly field trip for hands-on training. An inventory of job competency indicators is used to evaluate program participants. (Contains 12 references.) (DB)

Descriptors—Consumer Education, *Curriculum, *Daily Living Skills, Field Trips, High Schools, High School Students, Instructional Materials, Lesson Plans, *Mild Mental Retardation, Money Management, Multisensory Learning, *Prevocational Education, Teaching Guides, Vocational Evaluation

This combined teacher/student instructional manual is part of a life skills curriculum which focuses on development of practical skills to improve employment success of high school students with mild mental retardation. An introductory section describes the program. The program's focus is on group and individual instruction in such areas as taxes, banking, applications, forms, computer data entry, driver's education, want ads, the use of tools, budgets, work attitudes and habits, and job interviews. Academic and job skills are constantly integrated. Weekly field trips provide students with hands-on training. An outline of the curriculum for students with educable mental retardation covers the following areas: study skills, vocabulary development, written expression, computation, mathematics for practical use, social awareness, development of recreational and physical skills, career orientation, career preparation, career implementation, consumer education, social environments, the United States government, and general knowledge. The manual itself explains the program's philosophies, offers guidelines for using the program, and presents nine sample lesson plans: (1) writing a check, (2) reading want ads, (3) shopping for food, (4) preparing income taxes, (5) using coupons, (6) completing applications and forms, (7) budgeting, (8) using a time-clock, and (9) using clothing labels. Suggestions for the field trip program are also offered, as is a list of publishers. (DB)

Developing Higher Cognitive Skills through Interpretive Writing.

Pub Date—Apr 94

Note—14p.; Paper presented at the Annual Meeting of the Central States Conference on Foreign Language Teaching (Kansas City, MO, April 21-24, 1994).

Language—English; Spanish

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Higher Education, Instructional Effectiveness, *Literary Criticism, *Literature Appreciation, Second Language Instruction, *Second Languages, Skill Development, Spanish, Spanish Literature, *Thinking Skills, Writing (Composition), *Writing Instruction

One teacher's experience suggests that interpretive writing stemming from the reading and discussion of a literary work, in a second language, promotes development of higher-level cognitive skills. College students in an upper-division Spanish course in one institution are engaged in a writing process with three phases: preparatory; interpretive; and summative. The preparatory stage seeks to establish a common denominator of historical, linguistic, and cultural background for the reading. The interpretive phase allows students to express their own personal confrontation with the literary text, through writing about it. After reading and discussing modernist poetry by several Latin American authors, students write their own poem using specific modernist elements. After reading another text, students are asked to imagine themselves as a main character and write their own extension of events in the text. In other assignments, students are asked to contrast and compare perspectives on a problem posed in a text, assess authors' expressive techniques, and persuade others of their personal interpretation of a text. Examples of students' writing, all in Spanish, are included, with translations appended. A brief bibliography is also included. (MSE)

The Logic of Language: A Paradigm for Multicultural Literacy.

Pub Date—May 93

Note—11p.; Paper presented at the Annual Conference on Bilingual and Multicultural Education (13th, Cleveland, OH, May 1993).

Pub Type—Reports - Evaluative (142) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Classroom Techniques, Cultural Pluralism, Educational Strategies, Elementary Secondary Education, *English (Second Language), *Intercultural Communication, *Language Role, Literacy Education, *Multicultural Education, Second Language Learning, Self Expression, *Teacher Attitudes

It is argued that in the culturally rich communities developing in the United States, educators can do much more to develop literacy programs that reflect real student needs, differences, and talents. Widespread dependency on pre-defined curricula and assessment is seen as perpetuating outdated classroom strategies and techniques that do not work. A new paradigm for multicultural literacy that acknowledges the role of language as a cognitive and affective factor in human development and learning is proposed. In this approach, schools should be "linguistic zones" in which students and teachers learn to listen to different voices. Empowerment of each individual, by providing a social and cultural context for the use of language to solve problems, is the objective. It is suggested that to make this occur: (1) every classroom must be filled with varied voices

for communication, (2) all students must enter into a critical dialogue with those outside their cultural communities, and (3) educators must create literature with the people in the communities they teach. Examples of programs in which these things are being done are offered. A brief reference list is included. (MSE)

This theme issue, devoted to the relationship between language, culture, and identity, contains three articles, all by Anne Turnbaugh Lockwood, and a commentary by Florence L. Johnson. The first article, entitled "The Heart of Culture," reports on an interview with Henry T. Trueba, an educator specializing in the roles of language, culture, and identity in the schooling of language minority children. In it, the experience of immigrants in a new society is examined and the ideal bilingual education experience is discussed. "Coming to America" profiles a Mexican immigrant boy who grows to manhood in the United States and copes successfully with the challenges of maintaining his native language and learning and new language and culture, and then became an elementary school teacher. "Language, Culture, and Education" presents the story of one elementary school teaching an increasingly diverse student population, using creative solutions to difficult challenges. Florence Johnson's commentary and review of literature focuses on three concerns about schooling in the United States: (1) how teachers' perceptions, expectations, and educational practices are influenced by children's race, culture, language, and social class; (2) the effects of these on student outcomes; and (3) what schools can do to create positive experiences for children. Discourse Analysis: Why Do We Need It?

Pub Date—Mar 94

Note—13p; Paper presented at the Annual Meeting of the Teachers of English to Speakers of Other Languages (28th, Baltimore, MD, March 8-12, 1994).

Pub Type—Reports - Evaluative (142) — Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Classroom Communication, *Communication Skills, *Discourse Analysis, *English (Second Language), Error Analysis (Language), *Foreign Students, Graduate Students, Higher Education, Instructional Effectiveness, Instructional Improvement, Intercultural Communication, Second Language Instruction, *Teaching Assistants

A discussion of discourse analysis focuses on its usefulness as a framework for analyzing and improving the communication skills of international teaching assistants (ITAs). The discussion is based on the transcript (appended) of a native Chinese-speaking ITA conducting an organic chemistry class in English. Using discourse analysis at one level, that of language beyond the sentence level, the errors in phonology (pronunciation), grammar, coherence, and cohesion can be perceived more clearly. A second level of discourse analysis can be used to examine utterances in terms of communication intention and appropriateness to the social content, i.e., to interpret them. It is concluded that in the context of the interactions of ITAs and students, discourse analysis can serve an important function in helping ITAs improve communication on more than one level. (MSE)

Descriptive information and supporting documents for courses taught in the language center of a school of mines are presented here. The first is a four-semester engineering practices introductory course sequence that incorporates professional-level technical problem-solving, cooperative learning, and the preparation of written and oral presentations to real-world clients. It is designed to help students learn to define complex problems, continue self-education, think creatively and critically, work in teams, evaluate evidence, make judgments, and communicate to a variety of audiences. The second outline is of components of projects in English for Science and Technology (EST) and English for Special Purposes (ESP) courses at levels five and six.

The projects consist of interviews with individuals who are professionals in a particular area, background research, and preparation of an oral presentation, to be videotaped, and a written report. A list of oral and written student research project topics and an evaluation form for oral presentations are also included. (MSE)

Identifiers—*Union County College NJ

Library use instruction designed specifically for limited-English-proficient (LEP) students is discussed briefly and library skill activities used with this population at Union County College (New Jersey) are described. It is noted that many students from other countries have had little or no exposure to libraries because of either limited schooling or the more limited role that libraries play in education in many countries. Typical college-level library orientation lectures may be inappropriate for LEP students, and even alphabetization may be unfamiliar. Close collaboration of English-as-a-Second-Language (ESL) instructors and library professionals is recommended. Activities used at Union County College are divided into three broad language proficiency levels. At the lowest level, card catalog organization lessons, handouts in different languages on the Dewey decimal system, and use of public libraries is recommended. At the intermediate level, encyclopedias are used to provide practice in skimming and note-taking, use of periodical indexes is taught, and regular newspaper of magazine reading is often required. Advanced students summarize their weekly articles, use computers more, study research strategies, and often have segmented assignments to learn more complex research procedures. A brief list of references is provided. (MSE)

Descriptors—Cohesion (Written Composition), Computer Assisted Instruction, *Determiners (Languages), Discourse Analysis, *English (Second Language), Foreign Countries, Japanese, Language Research, Pragmatics, *Second Language Instruction, Second Language Learning, *Sentence Structure, *Syntax, *Teaching Methods

The purpose of this paper is to describe the function of English articles in a functional-pragmatic perspective, to clarify how the functions of the articles are reflected in the discourse, and to give some pedagogical implications for teaching English as a foreign language (EFL). Deixis is a grammatical category involving reference to characteristics of the situation where an utterance takes place; also referred to as "indexicality." The use of English articles is deeply connected with the way cognition is acquired. Articles in English function as old and new information markers in certain contexts, with the definite article used for old information and the indefinite article used to introduce new information. A text-mapping system based on an analysis of cohesion is described that can serve as an important tool in teaching Japanese students the use of the

definite article in English. Used in conjunction with a computer text editor, this system has the advantage of presenting cohesive relations in a highly visible way. (Contains 30 references.) (MDM)

This paper seeks to determine the essential qualities of proper nouns and to determine the differences between proper and common nouns by reviewing research and writings on the subject. Both proper and common nouns are found to connote the attributes of objects as their content. Common nouns, however, are those that identify a certain substance on the common side with the same kind of reference, while proper nouns are those that show a certain substance on the peculiar side. The differences between plural and singular nouns are also discussed. Contains four references. (MDM)

Descriptors—Error Analysis (Language), Foreign Countries, Instructional Materials, *Interlanguage, *Language Research, Learning Processes, *Linguistic Theory, *Research Methodology, *Second Language Instruction, *Second Language Learning, Teaching Methods

This paper outlines a comprehensive approach to uncovering the process of second language acquisition, entitled Interlanguage Analysis (IA), and defines the features and aims of this analysis. IA regards the transitional linguistic system from the learner's first language (L1) to the target language (TL) as interlanguage (IL). Language acquisition research needs to examine the common and differing elements of L1, TL, and IL as they relate to the learning and communicative strategies employed by learners. Error analysis needs to focus not only on mistakes but successes as well. The goals of IA include: (1) the establishment of a well-knit theory of foreign language acquisition; (2) the elucidation of teaching and learning methods and materials; and (3) the establishment of a data-bank of universal grammar. Contains 10 references. (MDM)

A Comparative Study of the Sequence Effect in Learning Japanese Kanji Characters: Mathematical vs. Logical Sequences.
Pub Date—89

Note—13p; Journal published by Kanagawa University (Japan).

Journal Cit—Journal of Psychology & Education; n7 p103-113 1989

Pub Type—Journal Articles (080) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Academic Achievement, Comparative Analysis, Elementary Education, Foreign Countries, Intermediate Grades, *Japanese, Language Research, Learning Theories, *Logic, *Native Language Instruction, Non Roman Scripts, *Sequential Learning, *Teaching Methods
Identifiers—*Kanji Script, *Mathematics

The purpose of this study was to compare the Gilbertian mathematical sequence (MS) with the Skinnerian logical sequence (LS) methodologies in their effectiveness for language teaching. A series of 3

experiments were designed to investigate the effect of MS and LS on the teaching of Japanese Kanji characters to 24 Japanese fifth-graders. The students were divided into two groups and received instruction on three consecutive Saturdays following either the MS or LS method. During each session, the students learned three Kanji characters. The study found that after the first session students in the MS group recalled fewer characters than the LS group. After the second and third sessions, however, the MS group recalled more characters than the LS group. These findings suggest that MS might be preferable to LS as a potential method for language teaching. (MDM)

Descriptors—Bilingualism, *Color, Cultural Differences, Cultural Influences, Elementary Education, *Elementary School Students, *English, Foreign Countries, *Japanese, *Language Attitudes, Language Research, Lexicology, *Semantics

Identifiers—New York (New York)

The purpose of this study was to examine Japanese children's lexico-semantic development in English. Twenty-one bilingual Japanese 10- and 11-year-olds who resided with their families in New York City for an average of 2 years and 5 months participated in the study. The children were asked to write down as many Japanese color names as they could think of in 30 seconds. The obtained order of the color terms was interpreted within the framework of Berlin and Kay's (1969) universal hierarchy of color terms. The children were then asked to respond to the emotive tone of Japanese and English color terms. The children showed certain systematicity in their responses to the emotive tone of the color words. It is argued that their responses may have been triggered by universal sensations inherent in a given color, cultural transmission, area-specific socio-cultural conditions, or idiosyncratic experiences. Identifiers—Japan

A study investigated the motivation and perceptions of 16 Americans teaching English as a Second Language in Japan. Data were gathered by oral interview, and the questions asked focused on: initial motivation for coming to Japan; motivation to extend the length of stay; proficiency in Japanese at the beginning of the stay and currently; reasons for studying or not studying Japanese; working conditions and attitudes; lifestyle outside work and satisfaction with this aspect of life; attitudes toward Japan and the Japanese; cultural adaptation strategies, or strategies for existing without significant adaptation; feelings about one's role as a foreigner in Japanese society; and reactions to the strategies, attitudes, and behaviors of other foreigners living in Japan. The research was not quantitative, but trends emerged among interviewees. Responses are summarized and illustrated with comments and stories told by the interviewees. Overall, it was found that most were relatively satisfied with their situations, and that factors unrelated to Japan or Japanese culture were often most significant in determining satisfaction. The interview questionnaires, some culture-related quotations, and brief reference lists are appended. (MSE)

Descriptors—Definitions, Descriptive Linguistics, Diachronic Linguistics, *Dictionaries, *English, *Error Correction, *Grammar, *Grammatical Acceptability, Language Patterns, Language Usage, *Language Variation, North American English, Reference Materials, Standard Spoken Usage, Trend Analysis

The choice of a reliable authority for use in decisions of grammatical acceptability in English is discussed. It is argued that commonly-heard "rules" of English grammar offer advice that is either prescriptive or proscriptive, not descriptive, and often based on inaccuracies or flawed linguistic analyses. This is illustrated in the case of adverbs with the suffix "-ly." Arguments for use of such rules include the prediction that without them, in the long term, the language will suffer. Controversy over the use of dictionaries for grammatical information is traced to the introduction in 1961 of a revised version of a respected dictionary, which included language commonly used but not adhering closely to accepted rules. The further evolution of American English dictionaries, and controversy surrounding their design and content, is chronicled briefly. It is proposed that the only two sources of reliable advice on points raised in prescriptive grammar are the traditional dictionaries and Merriam-Webster's Dictionary of English Usage, which provides analytic accounts of each grammatical issue, recounts the history of the dispute, surveys prescriptivist opinion, and describes current practice, with quotations and examples. However, it is also argued that ultimately, individuals must be their own authorities on language standards. (MSE)

Descriptors—Cultural Pluralism, Diachronic Linguistics, Geographic Distribution, *Language Attitudes, *Language Patterns, Language Research, *Language Variation, Maps, *North American English, *Regional Dialects, *Standard Spoken English, Stereotypes, Trend Analysis

Patterns of dialect shift and language standardization in the United States are examined and illustrated with regional dialect maps. In particular, the relationship between the disappearance of regional accents and negative attitudes about accents is discussed. It is concluded that there is a long-term trend toward a more uniform accent among educated individuals, a national standard of pronunciation, in all regions of the country and that the standard regional dialects are in decline. Syntax and morphology are already virtually uniform, and vocabulary differences are largely restricted to terms for local phenomena. It is also predicted that the prominent dialect differences within the country will eventually correlate with social class and be perceived not as neutral but as deviant, supporting stereotypes. The only solution to this situation seen as feasible is a popular movement to counter negative stereotypes of regional accents and slow down the trend toward cultural homogeneity. (MSE)

Identifiers—Japan

The purpose of this paper is to examine the process of interlanguage development in Japanese adult learners of English as a Second Language (ESL) in acquisition-poor environments. A total of 353 subjects were divided into 9 groups based on their level of English proficiency and tested to determine: (1) what types of errors Japanese adult ESL learners make as they acquire the English article system; (2) when these errors appear and disappear in the developmental process of interlanguage; and (3) why such errors especially occur in Japanese adult ESL learners in acquisition-poor environments. The study found that co-occurrence and word-order errors sharply decreased once students reached proficiency level three. Underextension and substitution errors were sharply reduced from levels one to four, and persisted in the interlanguage at level nine. Overextension errors were predominant above level four and persisted in the interlanguage. Substitution errors were sharply reduced from level one to level four and persisted at level nine. These findings have important pedagogical implications regarding the organization of the English-language syllabus in Japanese schools. (Contains 63 references.) (MDM)

The Effect of Formal Grammar Teaching on the Improvement of ESL Learners' Writing: An Experimental Study.

Pub Date—94

Note—40p

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—College Students, Education Majors, *English (Second Language), Foreign Countries, *Grammar, Higher Education, Instructional Effectiveness, Second Language Instruction, *Sex Differences, *Writing (Composition), *Writing Skills

A study investigated the effectiveness of teaching formal grammar and grammatical structures on development of writing skills of learners of English as a Second Language (ESL), and examined possible differences between males and females in this regard. Subjects were 97 university ESL students, 48 males and 49 females enrolled in a school of educa-

tion; two groups were formed, approximately matched in gender composition and English language skills. The experimental group (24 males and 22 females) received intensive grammar instruction for 12 weeks, during an ESL composition course. The control group (24 males and 27 females) was given only the composition instruction. Grammar and composition post-tests were administered to all participants. Results indicate the experimental group males and females performed better on grammar than control group males, but there was no significant difference between experimental group members and control group females. Significantly better writing test performance was found for experimental group subjects overall, but not between experimental group females and control group males or between experimental group males and experimental group females. The Development and Validation of a Multiple-Choice Translation Test for ESL College Freshmen.

Pub Date—93

Note—95p

Language—English; Arabic

Pub Type—Reports - Descriptive (141) — Tests/Questionnaires (160)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Arabic, *College Freshmen, *English (Second Language), Foreign Countries, Higher Education, Item Analysis, Language Proficiency, *Language Tests, *Multiple Choice Tests, Second Language Instruction, *Test Construction, Test Items, Test Use, Test Validity, *Translation, Uncommonly Taught Languages

The development and validation of a test of English-as-a-Second-Language (ESL) proficiency are described. The measure is a multiple-choice test based on translation of a literary text from English to Arabic and vice versa. Intended for rapid student placement, it is seen as overcoming most of the defects inherent in traditional translation tests. The development process is summarized, including text selection, preparation of items, pilot testing with 240 university ESL students, to generate distractors appropriate to ESL students, and item analysis based on an administration of the test's final form to 92 freshmen ESL students in Egypt. Analyses of test reliability and validity, and item analysis indicate that both English-to-Arabic and Arabic-to-English sections of the test provide good assessment of ESL learners' translation ability. The piloted test, final version, answer sheet and key for the latter, and a revised form are appended. These items are in both Arabic and English. (MSE)

Whole Language: Philosophical Belief, Theory and Practice.

Pub Date—24 Jun 94

Note—39p; Figure 1 may not reproduce well.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Annotated Bibliographies, Case Studies, *Classroom Techniques, *Educational Philosophy, Elementary Education, Foreign Countries, *Language Attitudes, Literacy, Parent Role, Reading Processes, Second Language Instruction, Second Language Learning, Self Actualization, Student Evaluation, Student Role, Teacher Role, *Teaching Methods, Theory Practice Relationship, *Whole Language Approach

This paper discusses the origin and philosophy of the whole language movement, focusing on the learning theory, language attitudes, language acquisition, and reading processes employed by the approach. The roles of teachers, learners, parents, and student evaluation in the whole language approach are then examined. The paper then addresses how these philosophical and theoretical principles are practiced in the classroom through descriptions of whole language practice at Sunnyslope Elementary School in Phoenix, Arizona. The paper concludes that the whole language approach can be a highly effective technique for first- and second-language instruction. Its ultimate goal is to foster the self-recognition, self-growth, and self-development of individuals to the fullest extent. A 30-item annotated bibliography is included. (MDM)

Descriptors—Academic Achievement, College Faculty, *College Students, Cultural Differences, Economics Education, *English (Second Language), Foreign Countries, *Foreign Students, Higher Education, *Lecture Method, *Listening Comprehension, Student Attitudes, Teacher Student Relationship, Transparencies

Identifiers—Australia

This study sought to determine what a group of first-year English as a Second Language (ESL) university students learned from a series of lectures in English, how the students learned what they appeared to learn, and what features of the lecturer's presentation most affected the learning of the students. Twelve international ESL business students at an Australian university and their instructor in an economics course participated in the study. Students were given pre- and post-tests based on key points covered in the lectures, which were audio- and video-taped. The lecturer's and students' notes were also compared, and students responded to questionnaire based on their perceptions of the lectures. The study found that the students learned relatively little from the lectures themselves, but relied almost exclusively on copying the instructor's overhead transparencies of the key points in the lectures. An analysis of the lectures found that they presupposed a great deal of background knowledge on the part of students of Australian history, current events, and colloquialisms, something that international ESL students would not have. The Dis-Equalizing Impact of Standardized Testing on Language-Minority Children.

Pub Date—94

Note—14p

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Cultural Awareness, Cultural Differences, Cultural Pluralism, Educational Attitudes, Educational Policy, Elementary Secondary Education, English (Second Language), Equal Education, *Language Proficiency, *Language Tests, *Limited English Speaking, Minority Groups, Politics of Education, *Standardized Tests, *Student Evaluation, Student Placement, *Test Bias

Identifiers—*Language Minorities

This paper maintains that many language-minority children in the United States are being given dis-equalized services by schools through inappropriate test screening. It is asserted that schools often use inappropriate standardized instruments to determine the English language fluency of limited English proficient (LEP) and language minority children, and that these instruments are often administered by school employees with little or no knowledge of the child's first language or culture. The interrelationship between test bias, test discrimination, and test fairness are also discussed. The paper concludes that schools need to address the cultural diversity of their student population and ensure that children's language proficiency is evaluated in an unbiased, non-discriminatory, and fair manner. Different Mind, Different Rhetoric: An Investigation of the Role of Set Phrases in the Chinese Rhetorical Art.

Pub Date—91

Note—63p; Master's Thesis, Iowa State University.

Pub Type—Dissertations/Theses - Masters Theses (042)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Chinese, *Cliches, Contrastive Linguistics, Cross Cultural Studies, Cultural Differences, *Discourse Analysis, Educational Attitudes, Educational Practices, *English, Foreign Countries, Language Attitudes, *Language Usage, Oral Language, *Rhetoric

Identifiers—China, United States

This thesis attempts to explain, in light of contrastive rhetoric, the Chinese preference of set phrases and the American disapproval of cliché. It asserts that because society and culture shape the way individuals use their language, Chinese and Americans hold different rhetorical expectations and observe different conventions in forming their discourse. After analyzing the driving forces behind the popularity of set phrases in Chinese discourse, it argues that the nature of the Chinese educational system explains the enduring role of set phrases in Chinese culture. This is due to the fact that education in China still relies heavily on memorization and recitation. The thesis concludes that the Chinese preference for set phrases conforms to the rhetorical theory and practice of the culture, whereas the American disapproval of set phrases represents the changing values of American society. Pub Date—Mar 94

Note—14p; Paper presented at the Annual Conference of the International Listening Association (Boston, MA, March 3-6, 1994).

Pub Type—Guides - Non-Classroom (055) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Auditory Discrimination, English (Second Language), Higher Education, Instructional Materials, Language Laboratories, Language Proficiency, Language Research, Language Tests, *Listening Comprehension, *Listening Skills, *Second Language Learning, *Second Language Instruction, *Second Language Learning, *Teaching Methods

Identifiers—ACTFL Proficiency Guidelines

This paper discusses the importance of listening comprehension in the learning of English as a Second Language (ESL). It is argued that more emphasis needs to be given to the neglected skills of listening comprehension, since most training in oral communication at the secondary and college level focuses on effective speaking. The paper outlines the American Council on Teaching Foreign Languages' (ACTFL) guidelines for listening proficiency for second language acquisition, and reviews research on the relationship between listening comprehension and language learning, auditory identification and discrimination, listening materials, and the testing of listening skills. The importance of the language laboratory in developing listening skills is emphasized, and several teaching methods that can be used to emphasize listening skills are discussed. (Contains 24 references.) (MDM)

This paper describes the development and implementation of an after school program designed to introduce the Spanish language to children between the ages of 5 and 9. The program consists of 8 to 10 weekly units, each lasting 50 minutes, that provide students with basic vocabulary and grammar in an interesting and motivating format. Each unit consists of a list of vocabulary and grammatical structures, an introductory activity for the unit, procedures for teaching the vocabulary and structures, and procedures for motivating and integrating the vocabulary and structures into the children's experience. Unit vocabulary themes include the names of toys, animals, and colors. Suggestions for games, songs, and other activities that teachers can use to engage children in the vocabulary are provided. An appendix contains the first two units of the program. Contains seven references. (MDM)

A Reflection on Reflective Practice in Teaching English to Speakers of Other Languages.

Pub Date—[94]

Note—10p.

Pub Type—Reports - Evaluative (142) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Classroom Techniques, *English (Second Language), Language Teachers, *Limited English Speaking, *Reflective Teaching, Second Language Instruction, Student Needs, *Teacher Attitudes, Teacher Education, *Teacher Role, Teaching Methods, *Teaching Skills

Identifiers—Fordham University NY

A small-scale study of Fordham University (New York) English-as-a-Second-Language (ESL) teacher trainees (n=11) investigated the extent to which the teachers, in a practicum, reflected on issues that are the focus of the ESL teacher education program. Specifically, it asked: whether teachers have a thorough understanding of theory and research on second language learning and teaching; what philosophy is manifested in their teaching; how their teaching philosophy is reflected in practice; perceived teaching strengths and weaknesses; overall knowledge of limited English-proficient (LEP) students' language and cognitive development; and the strategies planned and implemented for students' English development and academic achievement. Results indicate that the teachers, while demonstrating varied and strong philosophy of learning and teaching, believed teaching consists mainly of management and social roles and were less geared to issues of language and cognitive development. Discrepancies were found in the teachers' stated philosophies, written reflections, and classroom practice. Better instruction concerning reflective teaching at all stages of preservice teacher education is recommended. (MSE)

Descriptors—*Adjectives, *Bantu Languages, Form Classes (Languages), *Grammar, *Language Patterns, Language Research, Linguistic Theory, *Nouns, *Uncommonly Taught Languages

Identifiers—*Nweh

The discussion of Nweh, a Bantu language, focuses on a group of adjectives that can occur in positions where one would expect a noun, and which appear to enter noun classification. Specifically, the reasons that these adjectives have noun properties and that the pronominal class marker for the adjective is invariant are investigated. First, the adjective structure of the language is examined and three classes of adjectives (pure, intransitive, transitive) are distinguished. The first of these, pure adjectives, is the class in question. These differ from others in that they: cannot be modified by adverbs or take comparatives; have noun-like properties; can take number (singular/plural) morphology; can occur independently in nominal positions; take possessive pronouns; and when combined with any noun to form an attributive construction, take a possessive pronoun determined by the adjective rather than the noun. In explanation of these phenomena, it is proposed that these adjectives take these patterns because they have incorporated a null noun, and the agreement is determined by the same empty nominal. Contains 23 references. (MSE)

Identifiers—*California

California's new system for the preparation and certification of teachers for the state's limited-English-proficient (LEP) population is discussed. The paper describes (1) the primary participants in development of the new system (the California Commission on Teacher Credentialing and its Bilingual Crosscultural Advisory Panel); (2) the skills and knowledge needed by teachers of LEP students; (3) the need for reform, including information on the demography of California's student population and the shortcomings of the previous policy; and the new system itself. Under this system, teachers can qualify for crosscultural, language and academic development (CLAD) or bilingual crosscultural, language and academic development (BCLAD) emphasis credentials, certificates, examinations, and specialist credentials. The BCLAD segment incorporates all the requirements for CLAD plus additional training in methodology for primary language instruction, culture of emphasis, and language of emphasis of the teacher. Ways of earning the CLAD/BCLAD emphasis credentials and certificates and the types of instructional services to LEP students authorized by CLAD and BCLAD emphasis credentials and certificates are outlined. Contains 21 references. (MSE)

culty Level, English, Foreign Countries, German, Innovation, *Language Acquisition, *Language Patterns, Language Research, *Learning Processes, Linguistic Theory, Morphology (Languages), Pragmatics, Romance Languages, *Vocabulary, *Vocabulary Development

A discussion of language acquisition assumes that lexicon plays a central role, and that the principles of conventionality and contrast are also essential. It examines the hypotheses children draw on about possible word meanings and how they map their meanings into forms. This process begins with children's emerging knowledge of conventional words and their meanings, then proceeds to their growing knowledge of word structure as reflected in their formation of new words, showing that children learning different languages follow similar patterns as they learn about words and word structure. The book emphasizes the principles children rely on as they analyze complex word forms: transparency of meaning; simplicity of form; and productivity. Examples are drawn from children's innovations, in a variety of languages, in these functional areas: words for things, words for agents and instruments, words for actions, and words for undoing actions. Descriptors—Adjectives, *Case (Grammar), Descriptive Linguistics, Foreign Countries, *Form Classes (Languages), *Language Patterns, Languages, Linguistic Theory, Morphology (Languages), *Nouns, Phonology, Structural Analysis (Linguistics), Uncommonly Taught Languages Identifiers—Markedness

The discussion of case in grammar focuses on the ways relationships between words in sentences are marked. It describes the familiar systems of suffixes, from languages like Latin, and also the roles of prepositions, postpositions, and the use of the pronominal elements on verbs. One feature of case, the recurrence of apparently idiosyncratic patterns and devices in otherwise unrelated languages, is examined. The study provides background against which the case marking of particular languages can be understood, and discusses theoretical problems in identifying cases and the basis for distinguishing case relations from cases. A final chapter looks at the origins and development of case-marking devices. Examples are drawn from a wide variety of commonly- and uncommonly-taught languages, modern, older, and classical. (MSE)

Descriptors—College Instruction, Contrastive Linguistics, *Educational Strategies, Foreign Countries, Higher Education, Instructional Materials, Language Attitudes, Language of Instruction, *Linguistics, *Second Language Learning, *Second Languages, Syntax Identifiers—Fossilized Language

This paper discusses some of the problems that arise for students and instructors in the teaching of the linguistics of a language to students in the process of learning that language as a second language (L2). Because non-native speakers may not have reached terminal competence in the L2, the language being presented in linguistics classes as examples of linguistic phenomena may be used by the student as a form of input to the acquisition process. Another difficulty is that non-native speakers may have reached a stage of acquisition in the L2 where their knowledge has become fossilized—when new linguistic forms are no longer being acquired. The question of linguistic intuition in first-language (L1) and L2 students is also considered. Linguistics in-

structors can help alleviate these difficulties by: (1) informing students that their knowledge of the L2 will not necessarily be improved by learning about the language from standard texts; (2) setting up courses that enable comparisons of the linguistic characteristics of the L1 and L2 to be made; and (3) trying to use material that is familiar to the students. Contains 10 references. (MDM)

Descriptors—Classroom Techniques, *Cognitive Processes, Educational Research, *Educational Strategies, Epistemology, Foreign Countries, Language Research, *Learning Processes, *Learning Strategies, Linguistic Theory, Second Language Learning, *Second Languages

A study of learning strategies in second language learning, of both English and other languages, presents a theory of the role learning strategies play and uses it to examine specific studies and to integrate research results. The research and theory described here are based on a cognitive information processing perspective of human thought and action, viewing language as a complex cognitive skill that can be described within the context of cognitive theory. An introductory chapter introduces some early studies on learning strategies in second language learning, and related theoretical background. This is followed by a rationale for cognitively-based theory in second language acquisition, and application of cognitive theory to a set of prevalent constructs emerging in the second language learning literature. Drawing on this theoretical foundation, methods of research on learning strategies, particularly collection of data, are then discussed. Four studies of strategies used by second language learners are analyzed, and conclusions are drawn. The issue of instructing learners in the use of learning strategies is addressed in a separate chapter, with reference made to two related studies. Finally, instructional models and materials for teaching learning strategies are outlined. A glossary and substantial bibliography are included. (MSE)

Descriptors—College Faculty, College Students, *English (Second Language), Evaluation Methods, Foreign Countries, Higher Education, *Language Proficiency, *Language Tests, Measures (Individuals), Native Speakers, *Nonverbal Communication, Oral Language, *Role Playing, Second Language Learning, Statistical Analysis, Testing

Identifiers—Japan, Japanese People, Speaking Proficiency English Assessment Kit, Test of English as a Foreign Language

This paper discusses a study that sought to design an instrument for assessing the nonverbal ability of foreign language learners. The subjects were 28 educated Japanese non-native speakers (NNS) of English and 20 educated North American native speakers (NS) of English. Materials used were the institutional Test of English as a Foreign Language (TOEFL) for linguistic proficiency, the SPEAK test for oral proficiency, and a series of four role plays for the collection of nonverbal data. Proficiency tests were administered to NNS subjects paired according to the results of the TOEFL. NNS and NS subjects performed the three plays in pairs and the fourth with the researcher's NS assistants. Role plays were transcribed and coded for three nonverbal behaviors, head nods, gaze direction changes, and gestures. Descriptive statistics, including reli-

ability and standard error of measurement for the proficiency tests were calculated for the two tests and three nonverbal behaviors in role plays 2 and 3. A significant difference was found for head nods in role play 4. A set of scales for assessing nonverbal ability was constructed on the basis of the quantitative and qualitative analysis of the nonverbal behaviors in the role plays. Results of the study indicate that it is possible to define degrees of nonverbal ability. (Author/JL)

The Foresee Approach to Content-Based ESL Instruction.

Pub Date—Mar 94

Note—39p.; Paper presented at the Annual Meeting of the Teachers of English to Speakers of Other Languages (28th, Baltimore, MD, March 1994).

Pub Type—Reports - Descriptive (141) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Classroom Techniques, Cognitive Processes, *English (Second Language), Foreign Countries, *Learning Strategies, Lesson Plans, Linguistic Theory, Models, *Second Language Instruction, *Teaching Methods Identifiers—*Content Area Teaching, *Foresee Approach

This paper describes the Foresee Approach, a recently developed model for integrating content, language, and learning strategies instruction in the English-as-a-Second-Language (ESL) or part ESL classroom. The Foresee model is an extension of Chamot and O'Malley's Cognitive Academic Language Learning Approach (CALLA), resembling the latter in comprising both theoretical and practical components. The Foresee theoretical model guides the formulation of instructional objectives in the three categories above, while the Foresee application process provides a general formula for designing integrated lessons to accomplish these desired objectives. These two complementary aspects of the model are explained in as much detail as space permits, with emphasis on the general application process. To assist teachers in implementing their approach in their classrooms, the greater part of the paper is devoted to a description of five specific instructional techniques, called Foresee lesson techniques, that teachers can utilize with relative ease to plan the procedures sections of effective Foresee lessons. Although illustrative examples are drawn from elementary-level sources, the approach is applicable to other levels as well. (Author)

Error Correction in L1 and L2 Language Learning.

Pub Date—Aug 93

Note—13p.; Revised version of a paper presented at the World Congress of Applied Linguistics (10th, Amsterdam, The Netherlands, August 12, 1993).

Pub Type—Reports - Research (143) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—College Students, English (Second Language), *Error Correction, *Feedback, Higher Education, Native Speakers, Revision (Written Composition), *Second Language Learning, *Spelling, Testing, *Written Language

This paper addresses the effect of error correction on second language learning by focusing on feedback and its effect on language acquisition. The paper deals specifically with the written form of the target language and looks at how the second language teacher can address errors that interfere with written communication in such a way that the student can benefit from the experience. A study is described that looked at: (1) how a student's ability to spell is affected by the level of correction (direct, indirect, no correction at all), and (2) if different forms of correction affect first- and second-language learners differently. Seventy-two students at Montclair State University (New Jersey) took part in the experiment, 36 of whom were native speakers of English and 36 of whom had English as their second language. Data collected for the study included results of a test a post-test. All students scored similarly on the measures, regardless of the form of feedback provided. It is suggested that the results could have been different if the study had focused on the long-term results of feedback as well as the short term. (JL)

Hierarchical Collaboration in the Revision of Text: Constructing Perceptions of Editorial Conferences in the News Laboratory.

Pub Date—Apr 94

Note—33p.; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Reports - Research (143)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Case Studies, *Dialogs (Language), *Discourse Analysis, Editing, Higher Education, Interviews, *News Writing, *Revision (Written Composition), Self Esteem, Speech Acts, *Teacher Student Relationship, Writing Processes

This study of editorial conferences in a university news laboratory examined the connections between dialogues about revision and the interpretations of dialogues by reporters and the editor in this journalism culture. The editorial conferences of two reporters with varying experience in publication and employment settings were analyzed, and the analysis was triangulated with interviews. In addition, seven other reporters were interviewed in order to interpret the editorial conferences as meaning-producing events in this culture. In order to describe the degree of engagement of reporters in conference dialogue, the discourse was analyzed for topic initiation and elaboration and speech acts, including elicitation, response, reaction. The cases and interviews suggest that collaboration and negotiation facilitate construction of alternate text choices and socialization of students in this discourse community. However, student interpretation of the editorial conference varies across four factors: the appropriateness of disagreement, the nature of the writing process, the objectives of the lab, and the degree of self-confidence of the learner. Increasing Levels of Interest and Motivation of Sixth-Grade Junior High Foreign Language Students through Curriculum Redevelopment and Innovative Teaching Methods.

Pub Date—Apr 94

Note—72p.; M.A. Thesis, Saint Xavier University. Pub Type—Dissertations/Theses - Masters Theses (042)—Tests/Questionnaires (160)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Curriculum Development, Elementary School Students, Grade 6, Instructional Innovation, Intermediate Grades, *Learning Motivation, Middle Class, Second Language Learning, *Student Attitudes, *Student Motivation, Surveys, Teacher Attitudes, *Teaching Methods

This paper describes an agenda for expanding interest and motivation among sixth-grade foreign language students in a middle-class suburban community located in northeastern Illinois. The problem was originally noted by the teaching staff/researchers who found students unable to focus and maintain attention during class. Administration of surveys to students and teachers confirmed the problem and its extent. Investigation of the probable cause data disclosed that the curriculum was out-dated and inappropriate. It did not address real-life situations and lacked continuity. Teaching methods were deficient in creativity, and the program did not speak to the academic needs of a heterogeneous group of students. Solutions suggested by professional experts, in conjunction with an investigation of the problem setting, indicate two compatible teaching methodologies that would offer successful outcomes. The two strategies served as a basis for designing the curriculum. Student levels of interest in foreign language increased, as did their motivation. These changes appeared to be related to curricular modifications and revised teaching practices. Appendixes contain the sixth-grade schedule and four survey instruments. (Author/JL)

Identifiers—*Nicaraguans

Guidelines for taking oral histories are presented in this guide. The guide was developed for a project to teach Nicaraguan literacy teachers how to record personal narratives for the purpose of preserving cultural history and heritage. An introductory chapter discusses the distinction and relationship between "testimony," which generally requires interviewing, and "history," which is largely archival, and emphasizes that this form of oral history is being recorded from the point of view of ordinary people, not the dominant classes. The second chapter offers specific techniques for taking oral histories, including the preparation stage, development of questionnaires, interviewing, using a tape recorder, taking notes, transcription, creating an archive, and ethical considerations. Chapter three addresses the gathering of complementary information, such as supporting documents and materials and graphic material, including photographs. Montage or assembly of the testimony is the subject of the next chapter. Editing and the inclusion of the interviewer in the testimony are discussed here. A brief final chapter offers suggestions for evaluating the work and the product. A brief bibliography is included. (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

Descriptors—*Acculturation, Class Activities, Classroom Techniques, Cultural Awareness, Daily Living Skills, *English (Second Language), *Immigrants, Information Sources, Language Teachers, Lesson Plans, *Limited English Speaking, *Literacy Education, Second Language Instruction, Sociocultural Patterns, Student Characteristics, Teaching Guides, Telephone Usage Instruction, Tutors, Volunteers, *Volunteer Training

This guide is designed for new volunteers and tutors giving English-as-a-Second-Language (ESL) instruction to limited-English-proficient (LEP) individuals in the United States. An introductory section looks briefly at the demography of LEP populations and the urgency of ESL learning. Five chapters follow. The first offers basic guidelines in planning the content and organization of lessons and includes a sample lesson plan. The second chapter encourages awareness of cultural and ethnicity issues in the classroom and makes specific recommendations for teacher behavior. Chapter three suggests lesson topics to facilitate learners' acculturation, and contains a sample lesson on telephone usage instruction. The fourth chapter contains sample lessons on cultural diversity, holidays and celebrations, filling out employment applications, calling for information, using the local newspaper, and other lesson ideas appropriate for any group. The fifth chapter contains a glossary, a listing of print and organizational resources, and a bibliography. (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

tion, Vocational English (Second Language)

A discussion of second language literacy (SLL) looks at various contexts in which language minorities in the United States attempt to become literate in English, and the effects of conflicting agendas on the individual and the second language classroom. Six areas influencing literacy agendas are discussed. In the first chapter, differing concepts of literacy are outlined. The second chapter examines sociopolitical influences on SLL, in national language policy, immigration/naturalization requirements, literacy campaigns, and choice of public schools' medium of instruction. Chapter three focuses on the relationship between literacy and economic rewards, examining how political and business leaders and also workers determine both who will have opportunity to develop English literacy and who will benefit economically from it. In chapter four, the link between literacy and the family is explored through the ways in which families promote various literacy practices. The fifth chapter examines how literacy program funders, curriculum designers, and teachers all set SLL agendas, sometimes establishing goals not shared by the learners. The final chapter argues that rather than approach language minorities as a social and educational problem, political leaders and educators should focus on ways to aid language minorities in attainment of their own English literacy goals. Indicators of Program Quality: An ESL Programming Perspective.

Arlington County Public Schools, VA. REEP, Arlington Education and Employment Program.

Spons Agency—Pelavin Associates, Inc., Washington, DC.

Pub Date—17 Feb 92

Note—20p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Adult Basic Education, Curriculum Design, *English (Second Language), Evaluation Criteria, *Instructional Materials, *Literacy Education, *Program Design, Program Development, Program Effectiveness, Program Evaluation, *Teacher Qualifications

Indicators of program quality for adult basic education programs, developed by consultants, are assessed as they might be applicable to English-as-a-Second-Language (ESL) program evaluation. Sample quality indicators were developed in the areas of program context (i.e., organizational structure of service delivery, participant characteristics), program process and content (including planning, curriculum and materials, staff qualifications), and program outcomes. This paper examines Pelavin Associates' sample outline of proposed areas in which indicators as well as sample data elements for the indicators will be offered. For each program area in which quality indicators are recommended, the following questions are addressed: (1) Are there unique aspects of ESL programs that should be taken into account in development of indicators, and what adjustments and adaptations to generic indicators may be necessary?; (2) Are the indicators appropriate for ESL programs, unnecessary, incomplete?; and (3) What problems or other issues would confront ESL programs when using these or similar indicators? Responses to the questions are appended to the main text. (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

Identifiers—*Canada, Language Instruction for Newcomers to Canada

This bibliography is intended as a resource for teachers and service-providers who work with participants in LINC (Language Instruction for Newcomers to Canada) programs of basic English-as-a-Second-Language education. It lists and describes Canadian teaching materials appropriate for adult immigrants' English language learning and their orientation to, settlement in, and active participation in Canadian life. Its content and organization reflect three levels of language proficiency and cultural adaptation, is comprehensive in its coverage of Canadian print materials, and is accessible to both specialists and lay persons. Bibliographic information provided includes title, author, date, LINC level, length, source, price, supplementary or related materials, subject area, and a brief annotation. The first three sections cite materials for each of the three proficiency levels, and a fourth lists materials for all three levels. Appended materials contain citations according to theme (anti-racist education; citizenship; ESL literacy; vocational English; general language study; grammar; life skills and community resources; speaking and conversation; teacher references; vocabulary), addresses of publishers and distributors, LINC level descriptions, a list of individuals consulted for the project, and correspondence used in consultation. These 18 issues of a newsletter designed for teachers and tutors of adult English as a Second Language, represent three volumes spanning the three-year period May/June 1991 through March/April 1994. Each issue contains brief articles, editorials, and materials reviews on classroom instruction, professional trends, and special projects. Typical content includes ideas for group work, notes on tools and techniques for instruction, grammar activities, cultural activities, reading activities, writing exercises, critiques of new books, texts, and instructional materials, discussions of classroom management and language-related issues, crossword puzzles and games, letters from readers, and classified ads and professional news. A combined index for the three volumes is included. (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

A cooperative literacy education program involving Mexico and the United States' border states is documented. The project has three objectives: to (1) implement the Mexican literacy agency's approach to promoting literacy among native Spanish speakers; (2) coordinate U.S./Mexico literacy task force activities; and (3) develop an immigrants' rights curriculum. This final report consists of an outline of the three objectives, sub-objectives, and measures of achievement of them, and supporting documentation in the form of eight exhibits. The exhibits include: the agenda for the 2-day meeting on selection, training, and support of literacy volunteers; a directory of literacy project pilot sites and contact persons; the agenda for a review of immigrant issues curriculum modules; sample administrative report and record forms; handouts used in a June 1993 presentation on the adult literacy project "Educacion Sin Fronteras"; sample correspondence; an analysis of Mexico's adult basic skills curriculum; and the 15 modules of the immigrant issues curriculum prototype. Most materials are in English; some are in Spanish. (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

Descriptors—Adult Basic Education, Competency Based Education, Curriculum Design, *Daily Living Skills, *English (Second Language), Grammar, Language Proficiency, *Literacy Education, Second Language Instruction

An adult education curriculum integrating language and life skills instruction for students of English as a Second Language, based on the English Language Matrix (ELM) model, is presented. The curriculum is designed to meet the adult language learner's life competency needs, integrating communicative language skills of listening, interpreting nonverbal language, speaking, reading, and writing, while adjusting to individual learning styles and communicative needs. It is divided into 10 or 11 thematic units in 7 levels of competency-based learning modules. Introductory sections give an overview of the project, define student performance levels, and list competencies by level. Subsequent sections present the modules for each level. Each module includes student general and grammar competency check sheets, a tutor guide sheet, and instructional material on these topics: personal information; describing (at levels 1-4) or housing (levels 5-7); relationships; environment; health; shopping; money/banking; directions/transportation; occupations; community services/responsibility; and at levels 5-7, current events. The next seven sections present the grammar segments for each level. An instructional materials bibliography, grammar instructional materials bibliography, and list of publishers complete the volume. glish (Second Language), *Grouping (Instructional Purposes), Intonation, Language Tests, Lesson Plans, *Limited English Speaking, Listening Skills, *Literacy Education, *Multilevel Classes (Second Language Instruction), Skill Development, Student Evaluation, Teacher Education, Time Factors (Learning), *Time Management, Visual Aids

This guide is designed for teachers of multilevel classes in English as a Second Language (ESL) at the adult level. The first section discusses principles, methods, and techniques for classroom instruction, including student grouping, appropriate ESL teaching methods (audiolingual, vocational, language experience, natural approach, grouping/layered learning, sheltered English, grammar/translation, and Total Physical Response), designing an effective lesson plan; time factors in the multilevel classroom, evaluation of adult ESL students, and seven unusual techniques for the ESL class. The second section consists of three instructional modules for ESL teacher training: problems and solutions in the multilevel ESL classroom; the bilingual approach in multilevel classes; and developing effective listening skills for non-English speakers. Two lesson units are: intonation of the English language: singing English; and sample lessons designed for the multilevel ESL classroom. (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

onal Language), Instructional Materials, Interpersonal Communication, *Language Skills, Lesson Plans, North American Culture, Resource Materials, Teaching Guides, Textbooks, *Verbal Communication, Workbooks

Identifiers—Authentic Materials, Basic English Skills Test

LifePrints is a program that helps adult English-as-a-Second-Language learners develop language skills and cultural understanding they can use immediately in managing their daily lives in the United States. The approach is appropriate in large groups, small groups, and one-to-one teaching settings. This set of core instructional materials has three levels: low beginning, high beginning, and low intermediate. There are four components for each level: a student book and accompanying audiotape, a teacher's edition, and a teacher's resource file. The Student Books feature authentic, natural language and provide a balance of natural communication and structured practice. Interviews, listening tasks, matching exercises, games, and other activities help learners practice and manipulate language in learning situations typical of their everyday lives. Illustrations stimulate discussion and characters from the student books appear in dialogs on the audiotapes, which are also models for natural speech. The Teacher's Editions support lesson planning with reduced student pages paired with recommended steps for working with the student material. They also contain the audio transcripts. Lessons include the following: neighborhoods, families, keeping in touch, feelings, costs, getting well, asking for help, etc. The Teacher's Resource Files contain reproducible worksheets, strip stories, games, cards, and board games. The LifePrints program is correlated to the Basic English Skills Test (BEST). (LB) (Adjunct ERIC Clearinghouse on Literacy Education)

Descriptors—Acculturation, Adult Education, Audiotape, Recordings, Citizenship Education, Clothing, Continuing Education, *Daily Living Skills, Elementary Secondary Education, *English (Second Language), Grammar, Health Services, Instructional Materials, *Interpersonal Communication, Job Search Methods, Land Settlement, Language Patterns, Language Skills, Leisure Time, *Limited English Speaking, *Literacy Education, Money Management, Second Language Instruction, Teaching Guides, Verbs, Workbooks, Writing Instruction

Materials for adult English-as-a-Second-Language (ESL) instruction are presented. They are designed to enable adult ESL learners with limited oral and/or written competence in English to handle most everyday survival, social, family, and job-related situations independently, using oral and written English. Stage 2 materials, presented here, are intended for learners at student performance levels 3 and 4 (of 6 levels). Twelve instructional units cover these topics: getting a job; behavior on the job; making choices about money; driving a car; leisure time; grammatical constructions; clothing and shopping; health needs and services; attending school (all levels); becoming a citizen; and getting used to a new country. Lists of common abbreviations and a U.S. map are included. Components of these materials include the student workbook, an audiotape (not included here), the teacher's edition of the workbook, and the teachers' resource file, which contains reproducible masters for a wide variety of complementary activities, consisting of exercises, problem-solving activities, simulations, and games relevant to the individual unit topics, and generic games and game boards. The materials use authentic language, adult contexts relevant to the lives of learners, their families, and friends, and visual stimuli when appropriate, and emphasize paired and

group work. (MSE) (Adjunct ERIC Clearinghouse on Literacy Education)

Expanding the Biomedical Model: Case Studies of
Five Medical Schools.

Spons Agency—Pew Health Professions Commission, Durham, NC.

Pub Date—Apr 94

Note—12p.; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Case Studies, Curriculum Design, Higher Education, *Institutional Characteristics, Institutional Mission, *Integrated Activities, *Medical Education, Medical Schools, Medical Services, Models, *Teaching Methods

Identifiers—*Biomedical Model

This study examined five representative medical schools for approaches to teaching integrated approaches to health care. Traditionally medical schools have taught from a biomedical, technological approach. The study used a qualitative, multiple case study design to explore which medical schools were attempting integrated health care education. On site visits to the five medical schools, data were collected through interviews with administrators, faculty, and students and review of documents.

Analysis involved examining the data from each school and then integrating these data across schools. The study was based on ideas about curricula (i.e., integrated, patient-centered, developmental, and population based) thought to help students learn an integrated approach to patient care. Findings suggest that teaching an integrated approach to care involves attention to four relationships within medicine and medical education: (1) the physician-patient relationship; (2) the physician-community relationship; (3) the relationship of physician to other practitioners; and (4) the faculty-student relationship. Several institutional factors, including a shared mission or philosophy, effective leadership, and increased attention to primary care facilitate the maintenance of programs that address an integrated approach to care. Descriptors—*Academic Achievement, *College School Cooperation, Elementary Education, *Elementary School Teachers, Foreign Countries, Higher Education, *Inservice Teacher Education, Management Development, Principals, Program Descriptions, Program Design, Program Evaluation, Teacher Participation, Teacher Workshops

Identifiers—Israel, *Professional Development Schools

This study describes a school-university collaboration involving a number of professional development schools in Israel and examines the efficacy of such collaborations. A government agency requested that a university researcher plan and implement collaborative programs. The program determined to include a heterogeneous group of schools, selected in part with the help of district superintendents and where at least 80 percent of teachers expressed interest in the program. The final list of participants consisted of 10 elementary schools with 120 teachers teaching about 3,000 students. The project's focus on pupils' academic achievement was intended to relieve teachers from feeling that they were not good enough. Professional development included workshops on assessing pupil achievement, heterogeneous groups, and other topics dictated in part by teacher input. The program included lectures at the university, weekly workshops held at the school during school hours, and teacher observations. Principals attended workshops which focused on supporting teachers' work and on principals' professional development. The program included planning for perpetuation and continuation in part by preparing teachers to become workshop and educational leaders. All project activities were documented by audio-taped interviews which were later transcribed and workshop documentation. Project evaluation in an action research approach covered the nature of the collaboration, professional development of participants, and pupil academic achievement. Contains 23 references. (JB)

The California Academic Partnership Program: A
Case Study of Retrenchment from Two Different
Perspectives.

Pub Date—Apr 94

Note—32p.

Pub Type—Reports—Research (143)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—College Faculty, *College School Cooperation, Higher Education, Partnerships in Education, *Program Administration, *Retrenchment, Secondary School Teachers

Identifiers—*California Academic Partnership Program, *Functionalism, Radical Structuralism
This case study analyzed the management of the retrenchment for the California Academic Partnership Program (CAPP) from two perspectives: the functionalist perspective and the radical structuralist view. CAPP is a program supporting higher education faculty-secondary school teacher partnerships to improve secondary education. The California recession caused modest funding reduc-

tions for the program in 1991 and 1992 and perhaps more drastic reductions in 1993. The functionalist position which emphasizes the status quo, harmony and the social order and views conflict as transient and pathological, emerged from the CAPP program in various statements and actions of the CAPP director who recommended across-the-board cuts in proposed budget scenarios. The radical structuralist view targets attention on conflict and contradiction and were expressed by other CAPP participants who saw continued program reductions as changing the essential nature of the CAPP program. These individuals advocated radical program change rather than reductions. Overall, both perspectives illuminate and expand understanding of value-laden decisions revolving around the retrenchment response. An appendix lists key acronyms. Contains 16 references. (JB)

Quinn, Jennifer Woods

Faculty Perceptions of a Teaching Norm at Five Institutions.

Pub Date—8 Apr 94

Note—34p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—Behavior Standards, *College Faculty, *College Instruction, Community Colleges, *Diversity (Institutional), *Faculty Development, Higher Education, Liberal Arts, Norms, Policy Analysis, Private Colleges, Research Universities, *School Policy, Teacher Attitudes

This study sought to identify a norm for teaching development at five different higher education institutions. Identifying institutional norms is important because much of individual behavior in an institution is governed by such norms. Faculty (N=145) at five institutions (a community college district, two liberal arts colleges, a comprehensive university, and a research university) completed a survey about the teaching expectations they perceive from their respective institutions. A perceived norm for teaching development existed at only one of the liberal arts colleges. Examination of the policies at the five institutions revealed that the one institution that exhibited a teaching development norm was also the institution with the strongest policies supportive of the teaching role. Analysis and scoring of institutions on their policies found that only the liberal arts colleges had hiring policies that required a teaching demonstration during the interview process; that two institutions weighed teaching heavily in the tenure granting process; and that all but the urban liberal arts institutions had teaching development activities in place. Results suggest that teaching norms are closely associated with institutional type, but institutional type does not completely explain the differences in teaching norms. (Contains 30 references.) Deliberation on Teaching and Curriculum in Higher Education.

Pub Date—10 Apr 94

Note—27p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—*College Curriculum, *College Faculty, College Instruction, Course Content, *Curriculum Design, *Decision Making, Educational Philosophy, Higher Education, Interviews, *Teacher Attitudes, Universities, Values

This study examined curriculum deliberation and decision-making in higher education through selected interviews with 11 university teachers in 11 different disciplines. All were full-time and tenure-track or already tenured. After completing individual interviews the participants gathered for a culminating discussion. Examination of the data found that faculty used highly textured, nuanced, and unique methods and processes to decide about curriculum. Patterns did emerge and individuals indicated a general preference for ways in which they initiate conceptualization of a course and the development of a syllabus. Individuals also changed their approaches to teaching and development dependant on the context. The deliberative process about teaching and curriculum was linked with individual

and disciplinary values which informed teaching, decision-making, and planning. These values are linked to reasons for teaching and thoughts on the aims and purposes of education. Invariably there was synchrony between these elements and professors' efforts to enact their beliefs through their practices either implicitly or explicitly. A copy of the interview protocol is included. Contains 46 references. (JB)

Mann, Mary Pat

The Role of Outside Work in Academic Careers.

Pub Date—Apr 94

Note—14p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Career Development, *College Faculty, Employment Experience, Higher Education, Military Service, *Multiple Employment, Professional Occupations, Public Schools, Sex Differences, State Universities, Teaching Experience, *Work Experience

This study examined the role of college faculty work outside their higher education institution. The study took place at a mid-sized comprehensive state university in the rural Midwest. Faculty (N=400) were surveyed regarding the critical events in their careers. Analysis of the 179 usable questionnaires involved grouping of career events according to the settings in which they took place: schooling, academic career, work outside academia, and life away from work. Outside work was examined in relation to three sets of variables: personal, academic, and chronological. Findings included the following: (1) faculty listed between one and 19 career events with the average being 7.33 and older faculty tending to list more; (2) 23 faculty listed 31 military service events; (3) 21 faculty listed 51 public school teaching or administration events; (4) 27 participants listed 61 business or industry events; (5) 34 people listed 70 professional practice or performance events with women listing more events in this category. Overall, half of the faculty listed outside work events that they considered significant in the development of their academic careers. Experiences in business and industry were more likely to occur before the final degree was received. Public school experiences often represented a career step toward academia. (Contains 21 references.) (JB)

Wells-Lawson, Marcia I.

The Effects of Race and Type of Institution on the College Experiences of Black and White Undergraduate Students Attending 30 Predominantly Black and Predominantly White Colleges and Universities.

Pub Date—8 Apr 94

Note—37p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—Academic Achievement, *Black Colleges, Black Students, Colleges, Diversity (Institutional), Higher Education, Racial Attitudes, *Racial Differences, Racial Discrimination, Racial Relations, *Student Attitudes, *Student Experience, Teacher Student Relationship, *Undergraduate Students, Whites

This study looked at whether white students at predominantly black colleges are as likely as black students at white colleges to report lower grades, less satisfactory relations with faculty, perceptions of accommodation of diversity in the campus environment, and feelings of discrimination. Data consisted of student responses to questionnaires distributed to 7,428 students at 30 institutions. Respondents numbered 4,094. Results suggested that, when student background characteristics are taken into account, race, school type, and their interaction make a difference in the prediction of academic performance, feeling of discrimination, and student perceptions of diversity accommodation. When background characteristics were controlled there was no difference in academic performance between black and white students at black institutions. But with the same controls, at white institutions, blacks earned significantly lower grades. Black students on predominantly white campuses reported higher ratings on feelings of discrimination than did white

students on black campuses though such feelings were also reported by white students at predominantly black campuses. While black students on black campuses experienced better relationships with faculty than did black students on white campuses, there was no difference in the quality of faculty-student relationships reported by white students on the two types of campuses. (Contains 27 references.) (JB)

Using Writing Samples To Predict Success in a Graduate College of Education.

Pub Date—Apr 94

Note—7p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, Grade Point Average, *Graduate Students, Graduate Study, Higher Education, *Prediction, Predictor Variables, *Schools of Education, Scores, *Success, Teacher Education, Teacher Education Programs, *Writing Skills

Identifiers—Miller Analogies Test

This study tried to determine how well a combination of junior/senior undergraduate grade point average, standardized test scores, and writing sample scores can predict a student's success in a graduate College of Education. The study used data on 164 students selected to have a slight over-representation of students with lower Miller Analogies Test (MAT) scores. University administrative offices were able to supply a writing sample for 151 of the 164 students limiting the sample to those 151 students. Writing samples were scored by 3 readers with several years experience scoring essays. Predictor variables were undergraduate grade point average from the junior and senior years, the MAT score, and the writing sample score. Dependent variables were student teaching grade, graduate grade point average, and graduation success. Data analysis indicated that although none of the variables could accurately predict student teaching performance or graduation success, the writing sample, in conjunction with the junior/senior undergraduate grade point average could be used with moderate success to predict a student's graduate grade point average. Contains six references. (JB)

Becoming a Multicultural Organization: A Pilot Study of Colleges of Education in the Major Research Universities.

Holmes Group, Inc., East Lansing, MI.

Spons Agency—Ford Foundation, New York, N.Y.

Pub Date—8 Apr 94

Note—47p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—Cultural Pluralism, *Diversity (Institutional), Higher Education, Multicultural Education, Recruitment, *Research Universities, *School Demography, School Holding Power, School Policy, *Schools of Education, *Self Evaluation (Groups)

Identifiers—Holmes Group

This pilot study explored the efficacy of a concept of multicultural organization and of a survey self-study guide designed for colleges of education in research institutions. The survey study guide was distributed to Holmes group board members who are generally deans of colleges of education at the 27 institutions targeted. Sixteen surveys were returned. Analysis showed that most institutions were not very diverse and that only five of the respondents' schools, colleges, or departments of education came close to mirroring the racial and ethnic makeup of the geographical region they served and two of those serve regions that are more than 90 percent white. The institutions whose demographics were least diverse were more likely to have adopted policy statements that signal their intention to become more diverse. Respondents whose school/program demographics were most diverse tended to pay more attention to multicultural issues and activities in their faculty's efforts in research, teaching, and service. The data supported one theory of the stages of development toward becoming a multicultural

tural organization finding that institutions have attended to recruitment, retention, and multiculturalism in core activities in that order. Data also show a relation between diversity of the people in the institution and multiculturalism in core activities. Overall, feedback from respondents indicated that the study guide will be helpful with a few refinements. (Contains 12 references.) (JB)

Descriptors—Academic Achievement, Academic Persistence, Cognitive Processes, Foreign Countries, Higher Education, Learning Processes, Metacognition, Nursing Education, Path Analysis, Preservice Teacher Education, Schools of Education, Student Characteristics, Student Development, *Undergraduate Study. Identifiers—Australia, *Flinders University of South Australia.

A study was designed to investigate the complex interrelationship of factors that affect university students' academic achievement. The study used a sample population of 72 students who were enrolled in first year Nursing and Teacher Education courses in 1991 at the Flinders University of South Australia. From data gathered over 2 years, a two-wave path model was constructed to permit examination of the development of the student's learning processes over time and in conjunction with other antecedent predictors of achievement. Analysis indicated that it is the older students who possess many of the attributes that will equip them for future success. As a group, these older students demonstrated an internal locus of control and a learning style profile that reflects characteristics valued by graduate educators including high levels of motivation, persistence and responsibility, along with adaptability to varied learning environments and independent study skills. Results suggest that older students already have highly developed meta-cognitive processing skills. However, in most universities it is likely that the majority of first year students are not older students. Emerging evidence suggests that learning processes do play an important early role in directing student progress through the university. (Contains 33 references.) (JB)

Identifiers—United Kingdom

In an effort to further explore the experience of understanding from the university perspective, this study examined how British students' understanding was refined and committed to memory during preparation for final examinations. After piloting an interviewing procedure, in-depth interviews were conducted with eleven students from psychology (including two pre-med students taking a year out) and zoology. Through a flexibly structured interview schedule, students were taken through their revision strategies, with a particular focus on how they developed understanding and used visualization in its recall. Another 11 psychology students were asked to provide written responses describing their experiences of understanding. As the results of this first study related only to the context of revising for examinations, and as the sample was restricted in both size and range of discipline, the work is

currently being extended through two hour-long interviews with twelve final year historians. The current study concerns understanding not just during revision, but also through writing essays as course work (term papers) and in Finals. The analysis found that the experience of understanding involved strong feelings of coherence and connectedness, together with confidence about explaining or using the knowledge acquired. Students differed in terms of the breadth of their understanding and in the depth or level of understanding which was a function of the effort put into making connections within the material and with related ideas and experiences. Only two students studied without any use of structure. Several students relied on the structure they had in their lecture notes. Other students developed structures designed to fit perceived requirements of previous years' examination questions. Only two types of structures drew on wide, active reading and involved an independent transformation of what was being learned. The five different kinds of structure, allied to parallel variations in breadth and depth, were described as "forms of understanding" (Entwistle & Entwistle, 1991) and depended on differing approaches to learning and studying. Descriptors—Academic Achievement, Achievement Need, College Faculty, *College Students, Foreign Countries, Higher Education, Individual Differences, *Learning Motivation, Learning Strategies, Student Attitudes, *Student Characteristics, Student Evaluation of Teacher Performance, Student Motivation, *Teacher Effectiveness, Teaching Methods. Identifiers—University of Manitoba (Canada)

This study examined the effects of individual differences, attitudes, past performances, and teaching behaviors on 286 undergraduate college students' achievement, attribution, affective, and motivational outcomes. The study was conducted at the University of Manitoba using a theoretical model based on Weiner's theory of achievement motivation. The students, all in an introductory psychology course, completed a questionnaire which covered: gender, anger-proneness, test anxiety, locus of control, high school grade point average, and last introductory psychology test score. Students then saw one of four video tapes on effective instruction where presentations maintained a high lecture content density while expressiveness, organization, and clarity were varied and manipulated. Students then completed a teaching behavior inventory to assess the lecture's presentation for expressiveness, organization, and clarity. Students also took an achievement test to assess retention and conceptual understanding of the lecture. Structural equation modeling was used to examine the relationships among variables. Results indicated that student differences and teaching behaviors differentially influenced student learning and learning related outcomes depending on where these latter variables were included in the model. Both clarity and expressiveness were directly related to students' perceptions of amount learned, whereas organization was directly related to actual achievement outcomes. Student perceptions of success also significantly affected student learning experiences. One figure and five tables of data are appended. (Contains 18 references.) (Author/JB)

ship, Higher Education, Institutional Mission, Long Range Planning, Planning Commissions, Policy Formation, Program Termination, *Public Colleges, Reduction in Force, Retrenchment, State Colleges, *Strategic Planning

Identifiers—Enterprise, *Rowan College NJ

Rowan College of New Jersey has adopted an "enterprise model" for strategic planning that is seen as central to attaining the mission of the college during a time involving a substantial decline in state support. Rowan pursued a strategy termed "growth by substitution." This new process was cast in a more entrepreneurial mold and led to greater innovation. The basic premise was to generate funds for new initiatives by reducing or eliminating outdated or less productive programs. New initiative financing would be balanced by reductions and phase-outs among academic programs and administrative units for which there was marginal need and quality as well as projected retirement savings. The plan provides for phasing out of 23 degree, teacher certification, and specialization programs and reducing 5 others. It reallocated \$2.7 to \$3.5 million and called for personnel reduction through the layoff or retirement of 51 full time employees over 5 years. The plan's biggest accomplishment in financial terms was in academic support, with emphasis on developing technological capabilities within the library and academic computing, and computerizing the advisement process. The 17-member strategic planning steering committee included faculty, staff and management. None were to act as "representatives" of their units or groups. Members were not permitted to participate in discussions about their program nor to vote on priorities regarding that program. (Contains 30 references.) (JB)

Identifiers—Program Characteristics

This collection reports on the Gerontology in Theological Education (GITE) project developed at the Gerontology Center of Georgia State University, which was designed to introduce curriculum on aging into theological education. Part I presents an introduction to the project and the results of a survey of 113 seminaries designed to find out what theological schools were doing in gerontological education. Part 2 provides descriptions of innovative gerontological programs at the following theological seminaries and universities: (1) Interdenominational Theological Center (Georgia); (2) Luther Northwestern Theological Seminary (Minnesota); (3) Nashota House (Wisconsin); (4) Pittsburgh Theological Seminary (Pennsylvania); (5) Presbyterian School of Christian Education (Virginia); (6) Saint Paul School of Theology (Missouri); (7) Southwestern Baptist Theological Seminary (Texas); and (8) Baylor University (Texas). Part 3 is an annotated bibliography containing 133 items on gerontology and religion. (MDM)

This collection reports on the Gerontology in Theological Education (GITE) project developed at the Gerontology Center of Georgia State University, which was designed to introduce curriculum on aging into theological education. It focuses on the experiences of the Gerontology Center and three seminars involved in the project: Candler School of Theology at Emory University, Columbia Theological Seminary, and the Interdenominational Theological Seminary, all in Atlanta, Georgia. Part 1 discusses the integration of gerontology education into seminary curriculum in general and at the 3 seminars in particular. Part 2 contains nine essays on gerontological and theological disciplines and practices, adapted from presentations given at the Gerontology Center. They include: (1) "Aging and a Meaningful Future" (Theodore H. Ryan); (2) "A Historical Perspective on the Church and the Elderly" (Catherine Gonsalus Gonzalez); (3) "Gerontology and the New Testament" (Lindsey P. Phiergo); (4) "Pastoral Care and Models of Aging" (Charles V. Gerkin); (5) "Christian Education and Older Persons in Congregations" (Edward A. Trimmer and Betsy Styles); (6) "Worship and Gerontology" (Melva Wilson Costen); (7) "Spirituality in the Later Years" (Ben C. Johnson); (8) "Gerontology in Urban and Rural Congregations and Communities" (George B. Thomas); and (9) "Preaching and Aging" (Fred B. Craddock). Individual papers contain references. (MDM)

Identifiers—Program Characteristics

This report discusses the activities of the Gerontology in Theological Education (GITE) project developed at the Gerontology Center of Georgia State University, which was designed to introduce curriculum on aging into theological education. The project was designed to develop and conduct a basic gerontology course sequence and modules for three Atlanta, Georgia, seminars: the Candler School of Theology, Columbia Theological Seminary, and the Interdenominational Theological Seminary. The project also reviewed and developed library holdings in gerontology and theological disciplines, conducted a national survey of gerontology programs in theological schools, produced a resource guide for developing content on aging in seminary curricula, convened a national conference in innovative gerontology programs in theological education, and produced a newsletter reporting on the project's activities. Four appendices contain: (1) copies of the newsletter; (2) a questionnaire used to survey local seminary faculty; (3) the questionnaire used in the national survey of theological schools; and (4) a list of seminary library acquisitions. A Study of the Historical Academic Control Measures in Intercollegiate Athletics.

Pub Date—94

Note—17p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Academic Standards, *Administration, *College Athletics, *College Role, Educational History, *Extramural Athletics, Higher Education, *Institutional Role

Identifiers—National Collegiate Athletic Association, Regulatory Agencies, *Regulatory Programs, Sport History

This paper traces the regulation of intercollegiate athletics from the late 19th-century to the present and discusses current trends in the supervision of intercollegiate athletics. It examines the emergence of faculty control of athletics and the concept of faculty athletic committees in the late 1800s due to the inability or unwillingness of students to control their own athletic programs. The founding of the National Collegiate Athletic Association (NCAA) in the early 1900s and the results of several inquiries into the nature of college athletics are reviewed. The activities of the American Council of Education (ACE), its Commission of Collegiate Athletics, and the Knight Foundation's Commission on Intercollegiate Athletics to develop minimum academic standards for college athletes are also discussed. The report concludes that in recent years there has been a concerted effort to restore integrity to intercollegiate athletics from within higher education, fueled largely by public criticism of college sports and the threat of governmental intervention. Such efforts have favored a return to institutional control, under uniform NCAA criteria, that would place accountability and responsibility for athletic programs under academically qualified campus personnel. Descriptors—Academic Advising, Community Colleges, Degree Requirements, *Degrees (Academic), Dropouts, *Educational Attainment, *Educational Improvement, *Graduation, Higher Education, *State Colleges, State Legislation, Student Costs, Telecommunications, Telecourses, Universities

Identifiers—*Colorado, *Time to Degree

This report discusses measures taken in response to Colorado Senate Bill 92-155, which requests institutions of higher education in the state to ensure that students have the opportunity and needed assistance to complete degrees in a reasonable time. The report also examines degree completion times at Colorado colleges and universities, and advances specific proposals to help improve degree completion times. The effects of the reduction of the number of degree programs, increased students costs, and core curricula on timely degree completion are addressed, as well as student- and institution-caused delays. The report recommends that colleges and universities: (1) survey dropouts and stopouts to determine how institutional policies affected their decision to leave; (2) examine and redesign current academic advising programs to help solve student scheduling problems; (3) review baccalaureate and associate programs that require more than 128 and 64 semester hours, respectively, in an effort to reduce the hours needed for such degrees; (4) utilize telecommunications to address the problem of over-subscribed courses; and (5) review faculty rewards policies to ensure that academic advising and the development of technology-based courses are duly rewarded. (MDM)

Colorado Commission on Higher Education, Denver.

Pub Date—Apr 94

Note—21p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—College Role, Consortia, Elementary Secondary Education, F L E S, Foreign Students, *Global Approach, *Government Role, Higher Education, Institutional Role, *International Education, International Educational Exchange, International Programs, *Partnerships in Education, Private Sector, Program Development, *Program Improvement, Public Relations, School Business Relationship, *Second Language Programs, State Colleges

Identifiers—*Colorado

The purpose of this report is to promote further development of international education in Colorado through the expansion of foreign language instruction, student and faculty exchanges, enrollment of international students, collaboration with state and private sector entities in international commerce, and the establishment of consortia agreements. It also addresses the need to convince the public that international education is a worthwhile goal, and reviews the current status of international education

programs at various colleges and universities in Colorado. The report recommends that: (1) higher education institutions develop more consortial arrangements; (2) institutions put a greater emphasis on international education; (3) the state promote international education; (4) the state provide increased support for foreign language instruction at the elementary and secondary level; (5) regulations on international credit transfer be eased; (6) the Colorado Commission on Higher Education (CCHHE) work with other agencies to promote international education; (7) elementary and secondary schools utilize "Model United Nations" programs to promote international education; (8) international exchange programs be expanded; (9) all undergraduates complete at least 1 year of foreign language instruction; and (10) CCHHE work with other organizations to increase the number of international education partnerships with the private sector. Faculty Instructional Workload.
Colorado Commission on Higher Education, Denver.

Pub Date—May 94

Note—83p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*College Faculty, *College Instruction, College Students, Community Colleges, Credits, Full Time Faculty, Higher Education, Part Time Faculty, *State Colleges, State Surveys, State Universities, *Teacher Student Ratio, *Teaching Load, Universities

Identifiers—*Colorado, Contact Hours

This report provides data on instructional workloads at 28 Colorado public universities, colleges, and community colleges during the 1992-93 academic year. The workload data includes classroom and laboratory instruction (Type A), as well as individual instruction (Type B), such as independent study, thesis hours, and dissertation hours. It does not include research, public service, and student advising. Comparative data measure: (1) total instructional full-time (FT) faculty and full-time equivalent (FTE) students; (2) distribution of total student credit hours; (3) teaching load per FTE FT faculty; (4) average number of students per Type A class; (5) average weekly contact hours per FTE FT faculty; (6) average Type A students per credit hours FTE FT faculty; (7) average Type B student credit hours per FTE FT faculty; (8) overall distribution of contact hours by type of instructor; and (9) distribution of lower division, upper division, and graduate contact hours by type of instructor. Detailed information on each institution is also provided, as well as comments by individual institutions on the nature of instructional workloads at their institution. Copies of the data collection form, definitions of terms, and institutional groupings are also included. (MDM)

Determining University Goals in an Institution of Higher Education in Mexico.

Pub Date—[94]

Note—37p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Classification, *College Faculty, College Role, Comparative Analysis, Foreign Countries, Goal Orientation, Higher Education, *Institutional Evaluation, *Needs Assessment, *Organizational Objectives, School Surveys, Teacher Attitudes, Universities

Identifiers—*Faculty Attitudes, Goal Analysis, Mexico, *University of the Americas (Mexico)

This study sought to determine the most important goals of the University of the Americas-Puebla (Mexico) through a needs-analysis survey of the faculty. A survey instrument was developed which included a series of 58 goal statements. The university's 168 faculty members were asked to rate the degree to which each goal is being met, rate the degree to which each goal should be met, and indicate the relative importance of each goal. Overall rankings and rankings according to faculty affiliation (schools of engineering, social sciences, humanities, or business administration) are presented. The study weighted each of the three criteria to determine the "weighted need" or importance of each goal, combining the discrepancy between "is" and "should be" with the relative importance of the goal. Through this method it found that the most impor-

tant individual goals were the conduct of basic and applied research and contribution to the general advancement of knowledge. By combining the goals into 10 related categories, it found that research-related goals were classified as most important, followed by academic goals, student personal development and learning commitment, and academic-organizational climate. The least important categories were extracurricular and the professional development of students. (Contains 30 references.) (MDM)

Tang, Thomas Li-Ping

Teaching Evaluation in the College of Business: Factors Related to the Overall Teaching Effectiveness.

Pub Date—94

Note—26p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Business Education, *College Faculty, College Instruction, *Course Evaluation, *Faculty Evaluation, Higher Education, *Instructional Effectiveness, Student Attitudes, *Student Evaluation of Teacher Performance, *Teacher Effectiveness, Teacher Role, Teacher Student Relationship

This study sought to identify major factors of teaching evaluation as related to professors' overall teaching effectiveness. Undergraduate and graduate students at a university in the southeastern United States were asked to rate 126 business faculty through anonymous course evaluations. Students rated faculty on 12 specific items related to teaching performance; responded to 5 items about class standing, grade point average, reason for taking the course, attendance, and expected grade; and rated the instructor on overall teaching effectiveness. A total of 6,395 evaluations were collected and analyzed. The results of a multiple regression analysis demonstrated that 12 factors were predictors of overall teaching effectiveness, including: (1) instructor presents material clearly; (2) instructor answers students' questions; (3) instructor treats students in a courteous and professional manner; and (4) instructor appears to be well-prepared for class. These data suggest that students are fairly reasonable in considering important aspects of the learning process when they evaluate professors' overall teaching effectiveness. The results are discussed in light of the faculty reward system in place at U.S. universities, the balance between teaching and research, and the changes in management education. (Contains 40 references.) (MDM)

A Small College in Maine: Two Hundred Years of Bowdoin.

Bowdoin Coll., Brunswick, Maine.

Report No.—ISBN-0-916606-24-4

Pub Date—93

Note—294p.

Available from—Bowdoin College, Brunswick, ME 04011 (\$29).

Pub Type—Reports - Descriptive (141) — Books (010)

Document Not Available from EDRS.

Descriptors—Alumni, *College Administration, *College Role, *Colleges, College Students, *Educational History, Higher Education, Local History, Role of Education, Social Action, Social Change, Student Attitudes, United States History

Identifiers—*Bowdoin College ME, *Maine

This book examines the history of Bowdoin College, chartered in 1794 by the General Court of Massachusetts and endowed by James Bowdoin, the school's namesake. Nine chapters address: (1) the movement to establish the college in the district of Maine in the late 18th century; (2) the opening of the college in 1802 and its early development; (3) the role of the college in the new state of Maine, (established 1820); (4) the activities of the college in the mid-19th century; (5) student life and culture at Bowdoin in the mid-19th century; (6) the role of Bowdoin College, its alumni, and its students in the American Civil War and Reconstruction; (7) the transformation and reform of the college in the late-19th century; (8) the effects of the two World Wars and the Great Depression on the college, its alumni, and its students; and (9) the arrival of coeducation in the early 1970s and recent trends at the college. Four appendices contain the Charter of Bowdoin College, the Laws of Bowdoin College, excerpts from the college catalog, and Henry Wad-

worth Longfellow's poem "Morituri Salutamus." Each chapter contains a list of references. (MDM)

Identifiers—*University of North Dakota

The Teaching Support Center (TSC) at the University of North Dakota was established in 1992 to provide faculty and graduate assistants with a wide range of pedagogical, professional, and technological assistance in order to improve the quality of instruction. A 3-year plan was developed to implement 13 goals, which are: (1) determining the needs of faculty; (2) collecting resource materials and documenting their use; (3) publicizing faculty development; (4) providing opportunities for training in issues of faculty development; (5) promoting the writing intensive component of the university curriculum; (6) developing culturally diverse teaching activities; (7) facilitating the use of student and peer assessment of faculty; (8) promoting student-centered learning; (9) improving specific methods in teaching, such as test construction and grading; (10) improving faculty-student interaction and advising; (11) improving classroom management; (12) promoting high standards of faculty ethics; and (13) developing a data base for faculty involvement in faculty development activities. Specific activities to implement each of the goals are outlined, and a summary of activities undertaken by and in cooperation with the TSC is provided. (MDM)

Identifiers—*Connecticut

This booklet outlines the requirements in Connecticut for gaining approval for educational programs enrolling veterans. Any educational institution which enrolls, or is likely to enroll, veterans in postsecondary programs must be approved by the Connecticut Department of Higher Education (DHE) in order for veterans to receive government education benefits. The institution's publications, programs, and policies must be approved. Programs and institutions are subject to periodic re-approval, and must seek revised approval for any new programs or changes in existing programs. Accredited institutions are evaluated in 17 specific areas, while non-accredited institutions must meet additional requirements. Institutions must appoint a certifying official as a point of contact with the DHE, and are subject to annual visits to review their compliance with approval requirements. The address and telephone number of the DHE are provided, as well as a glossary of terms. (MDM)

Cultural Awareness, Cultural Background, *Cultural Literacy, Educational Attitudes, Higher Education, *Knowledge Level, Minimum Competencies, *Recognition (Psychology), Schools of Education

Identifiers—*Cultural Literacy Test, *Hirsch (E D)

This study sought to analyze the cultural literacy of a college of education faculty and compare it to the cultural literacy of undergraduate and graduate students at the same institution. A 100-item instrument, based upon a New York Times book review of "Cultural Literacy: What Every American Needs to Know" (E. D. Hirsch, Jr., and others, 1987), was developed and administered to 104 faculty, 54 undergraduates, and 82 graduate students. Respondents were asked to indicate if they had a strong association with each item. The study found that the faculty reported that an average of 72 percent of the items elicited a resonance, while student responses ranged from 57 to 62 percent. The most difficult items for the faculty were eminence grise, annus mirabilis, xylem, Danton, jeremiad, and noble gas. Since Hirsch believed that high school graduates should be familiar with nearly all of the terms on the list, the study raises questions about the cultural literacy of college faculty or the expectations of Hirsch. Identifiers—*New York State University Construction Fund

This report presents the results of an 1990-93 audit of the New York State University Construction Fund (SUCF) to assess the need for service efforts and accomplishments (SEA) indicators that address overall construction efficiency, economy, and effectiveness issues. The audit also assessed the reliability of SUCF's construction project data and determined how the data were used to manage construction activities. The audit interviewed SUCF staff, surveyed related agencies, and reviewed SUCF records and procedures. The audit found that while SUCF has processes to manage individual projects and the construction program in total, it did not utilize performance measures or SEA indicators to report how well it performed in fulfilling its mission. The audit also found that SUCF's construction project data were reliable. The report recommends that SUCF: (1) work with other construction agencies to identify key construction performance indicators; (2) assess the availability of the data required for the identified indicators and develop systems needed to collect appropriate data; and (3) publicly report the identified performance indicators on at least an annual basis. Three appendices list the contributors to the report, and offer the comments of SUCF on the report. Contains 28 references. (MDM)

Descriptors—Christianity, *College Administration, *Educational History, Educational Trends, Foreign Countries, *Government Role, *Higher Education, Islamic Culture, *Modernization, *Traditionalism, Traditional Schools, Western Civilization

Identifiers—*Iran, Iranian Revolution 1979, Islam, Missionaries

This paper examines the development of higher education in Iran in the 19th and 20th centuries. It examines the role of Christian missionaries in the creation of Darolfunun, the first Western-style Iranian college, founded in 1851. The University of Teheran, based on French models, was founded in

1934. While Western influence on education in Iran was increasing, the traditional schools of higher education, the madrasahs, continued to flourish, albeit with declining government support. Even in the 1970s, with oil wealth providing the impetus for the creation of many Western-style universities, madrasahs continued to expand and attract students to their traditional Islamic curriculum. Since the Iranian Revolution of 1978-79, the government has tried to cleanse universities of their Western values and curriculum, and unite the university- and madrasah-systems. Other recent trends in the administration of higher education in Iran are also discussed. Contains 29 references. (MDM)

Powers, Patrick James Toffler's Powershift: Creating New Knowledge Bases in Higher Education.

Pub Date—13 May 92

Note—15p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Cognitive Structures, *College Role, *Educational Change, Educational Trends, *Higher Education, Information Literacy, *Information Management, *Information Science, Intellectual Disciplines, Social Change

Identifiers—*Knowledge Bases, Toffler (Alvin)

This paper examines the creation of new knowledge bases in higher education in light of the ideas of Alvin Toffler, whose trilogy "Future Shock" (1970), "The Third Wave" (1980), and "Powershift" (1990) focus on the processes, directions, and control of change, respectively. It discusses the increasingly important role that knowledge bases, the body of knowledge and structure of a discipline, play in higher education. The increasingly rapid change that such knowledge bases are undergoing in light of the technological and information revolutions brought about by computers are also reviewed. The ultimate effect of a knowledge base is seen as increased legitimacy for higher education as well as reaffirmation of higher education's control, authority, and influence over specific disciplines while responding to the new power brokers of knowledge and requests for accountability in a rapidly changing world. Descriptors—Comparative Analysis, *Educational Finance, *Expenditures, *Higher Education, *Income, Longitudinal Studies, National Surveys, Nonprofit Organizations, Private Colleges, State Colleges, Statistical Data, Tables (Data), Two Year Colleges

Identifiers—Consumer Price Index, *Higher Education General Information Survey, *Integrated Postsecondary Education Data System

This report presents 22 tables of revenue and expenditure data on the nation's accredited institutions of higher education over the 9-year period from fiscal year 1984 through fiscal year 1992. Data are from the Integrated Postsecondary Education Data System (IPEDS) "Finance" surveys from fiscal year 1987 (FY 87) through fiscal year 1992 (FY 92) and the Higher Education General Information Survey (HEGIS) from fiscal year 1984 (FY 84) through fiscal year 1986 (FY 86). These surveys collected information on revenues and expenditures, expenditures on scholarships and fellowships, and other financial data. Tables cover: sources of revenues and purposes for expenditures for all institutions, public institutions, and private institutions for fiscal years 1984-1992; revenues and expenditures of 4-year institutions and 2-year institutions for fiscal year 1992; revenues and expenditures of all institutions, 4-year, and 2-year institutions by selected categories and state; comparison of fiscal year 1991 and 1992 revenue and expenditures of all institutions, public institutions, and private institu-

tions by state; revenues and expenditures of private nonprofit institutions for fiscal year 1992; revenues and expenditures by control of institution and source or purpose for fiscal years 1984 through 1992; and consumer price index (CPI) factors for fiscal years 1984 through 1992. Includes a glossary and an appended section detailing survey methodology. (JB)

Descriptors—*College Students, Economic Factors, Employment Level, *Employment Patterns, Employment Statistics, *Enrollment, Higher Education, Minority Groups, Part Time Employment, Private Colleges, Sex Differences, State Colleges, Student Characteristics, Student Costs, *Student Employment, Student Financial Aid, *Undergraduate Students, Working Hours

Identifiers—National Postsecondary Student Aid Study

This report examines how much undergraduates work while enrolled in postsecondary education for the academic year 1989-90. It specifically addresses types of institutions they attended, educational experiences, and the relationship of their education cost and financial aid to the amount of time they worked while enrolled. The report presents data from the 1989-90 National Postsecondary Student Aid Study in narrative and tabular forms. Results suggest that not only are most undergraduates working while they are enrolled, a substantial number are working full time. Other highlights include: (1) about 75 percent of all (full and part time) undergraduates worked at some time during 1989-90 of which 40 percent reported working full time at some time while enrolled; (2) among undergraduates enrolled full time for a full academic year, about 22 percent worked full time at some time during their enrollment; (3) undergraduates who attended private, for-profit institutions were much less likely to work while enrolled (61 percent); (4) undergraduates who worked while enrolled were employed for most of their enrollment; (5) most undergraduates held jobs in the areas of administrative support, service occupations, blue collar occupations, marketing, and as sales clerks; and (6) women were less likely to work full time while enrolled than men. Includes a glossary and technical notes. (Contains 12 references.) (JB)

Identifiers—*Academic Community, Diversity (Student), Focus Groups, Involvement in Learning

A study of nearly 100 freshman community col-

lege students' perceptions of their educational experiences and motivations through focus group interviews found that, despite high dropout rates, community college students can become successful students. The study concluded that students will be more likely to persist if institutions help them to be successful at negotiating the transition to college, becoming involved in campus academic and social life, and developing positive attitudes about their learning ability. In efforts to involve students in campus life the campus community must know that nontraditional students will not become involved on their own, that simply offering opportunities for involvement is not enough, and that the key to involving students is to create validating academic and social communities in and out of class. What successful students remember are incidents when they experience validation and when faculty, staff, friends or family members actively reached out to them and affirmed them as capable. Colleges can create in-class validating communities by personalizing the atmosphere, by offering one-on-one feedback, and fostering diverse curricula and positive classroom environments. Out-of-class validating environments require a hospitable campus climate, and an institutional climate that connects the cognitive and social dimensions of the college. (Contains 10 references.) Is Differential Exposure to College Linked to the Development of Critical Thinking?

Illinois Univ., Chicago. Coll. of Education; National Center on Postsecondary Teaching, Learning, and Assessment, University Park, PA.

Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC.

Pub Date—[94]

Contract—R117G10037

Note—33p.

Pub Type—Reports—Research (143)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—College Credits, College Freshmen, College Outcomes Assessment, Colleges, College Students, *Critical Thinking, Higher Education, Intellectual Development, Outcomes of Education, *Student Development, *Thinking Skills, Two Year Colleges, *Two Year College Students, *Undergraduate Study

Identifiers—*National Study of Student Learning

This study, part of the National Study of Student Learning, investigated the influence of differential exposure to postsecondary education, particularly the impact of type of institution, number of credit hours, and other factors on gains in critical thinking skills. The sample was 2,092 first-year students attending 13 four-year and 4 two-year institutions from around the nation. The findings from the four-year college sample suggest that amount of exposure to postsecondary education, operationalized as number of semester hours taken, had a modest, positive effect on end-of-first-year critical thinking. Moreover, this effect persisted even in the presence of controls for precollege critical thinking skill and academic motivation, the average critical thinking of the first-year class at the institution attended, gender, race, age, work responsibilities, and types of courses taken during the first year of college. The findings for the two-year sample were also that level of exposure to postsecondary education had a significant, positive, linear effect on critical thinking at the end of the first year that persisted even in the presence of the same statistical controls. The two-year full-time college students derived the largest critical thinking benefits from their college exposure. (Contains 38 references.) (JB)

Effects of Teacher Organization/Preparation and Teacher Skill/Clarity on General Cognitive Skills in College.

Illinois Univ., Chicago. Coll. of Education; National Center on Postsecondary Teaching, Learning, and Assessment, University Park, PA.

Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC.

Pub Date—[94]

Contract—R117G10037

Note—36p.

Pub Type—Reports—Research (143)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—Academic Achievement, *College Faculty, *College Freshmen, *Course Organization, Higher Education, Intellectual Develop-

ment, Mathematics Achievement, Reading Comprehension, Student Characteristics, Student Development, Student Motivation, Teacher Behavior, *Teacher Effectiveness, *Teaching Skills, Teaching Styles, *Thinking Skills, Undergraduate Study

Identifiers—Collegiate Assessment of Academic Proficiency, National Study of Student Learning, *Teacher Clarity

In further exploring the relationship between teacher behaviors and student learning, this study, part of the National Study of Student Learning, examined how teacher organization and preparation and teacher skill and clarity influenced the development of general cognitive skills in the first year of college. A sample of 2,302 students attending 18 diverse four-year institutions from 15 states throughout the country participated. Data collected in Fall 1992 included a precollege survey that gathered information on student demographic characteristics and background, as well as aspirations, expectations of college, and items assessing orientation to learning. Students also completed the Collegiate Assessment of Academic Proficiency (CAAP) measure. A follow-up testing took place in Spring 1993. Results showed that, when controlling for precollege cognitive level and academic motivation, the average cognitive level of the incoming class at each institution, ethnicity, gender, age, level of enrollment, work responsibilities, and course-taking patterns, the extent to which students judged the overall instruction as high in teacher organization and preparation was significantly and positively associated with end-of-first year reading comprehension, mathematics, critical thinking, and composite cognitive development. Additional analysis suggested that the net cognitive impacts of teacher organization and clarity were general rather than conditional. (Contains 47 references.) (JB)

Racism in Higher Education: Its Presence in the Classroom and Lives of Psychology Students.

Pub Date—23 Aug 93

Note—26p; Paper presented at the Annual Meeting of the American Psychological Association (101st, Toronto, Ontario, Canada, August 23, 1993).

Pub Type—Opinion Papers (120)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—Blacks, College Students, Diversity (Institutional), Graduate School Faculty, *Graduate Study, *Higher Education, *Psychology, Racial Attitudes, *Racial Bias, Racial Discrimination, *Racial Relations, Sociocultural Patterns, Student Attitudes

This paper explores the overt and covert forms of racism in American institutions of higher education and focuses on racism at one graduate school in psychology. Though the nation as a whole decries racism, overt racial acts are on the upswing at institutions of higher education and covert racism exists across the nation. The paper argues that, in the educational community, the most significant racism is covert and involves hostile and insensitive acts, bias in the application of harsh sanctions, bias in attention to students, bias in selection of curriculum materials, unequal amounts of instruction, biased attitudes toward students, lack of diversity in faculty and administration, and denial of racist actions. The central portion of the paper examines a particular graduate school of psychology publicly known for its openness and diversity. This portion cites examples of overt racism. Confronting these incidents brought to the surface existing covert racism in student treatment, hiring patterns, and community denial of racism. A final section explores and suggests solutions to address feelings, biases, and prejudices in the areas of school policies, faculty recruitment and awareness, student sensitivity, and curriculum opportunities. Meaning Making, Discriminatory Harassment, and Institutional Policy.

Pub Date—5 Apr 94

Note—21p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 5, 1994).

Pub Type—Reports—Research (143)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Administrators, College Faculty, *College Students, *Hermeneutics, Higher Education, Policy Formation, Qualitative Research, *Racial Bias, *Racial Relations, *School Policy, Social Bias, *Social Discrimination, State Colleges

Identifiers—Gadamer (Hans Georg)

In seeking ways to address racial problems on college campuses this study applied a hermeneutical approach to social relations which acknowledges the centrality of actors' perspectives in the creation of social reality. In this model, based on the hermeneutical theory of Hans-Georg Gadamer, conflict has neither a negative or positive influence on social relations; instead conflict is something naturally presented in society. The study used Gadamer's theory to examine two incidents occurring on the campus of a mid-sized state-supported college which first developed an institutional discriminatory harassment policy in 1986. Data included ethnographic interviews with 24 student and administrator informants and transcripts of two focus group discussions. Analysis illustrates how members of the campus community framed notions of race relations and how they perceived and interpreted events. Analysis found that participants' perceptions of the need for, and expected outcomes of the discriminatory harassment policy were shaped by the extent to which individuals and groups shared experiences within the social context. These experiences helped to shape distinct, yet inter-related constituencies within the college based on participants' social position and race. (Contains 9 references.) (JB)

Descriptors—*Academic Advising, *Church Related Colleges, College Faculty, Educational Counseling, *Faculty Advisers, Foreign Student Advisers, Guidelines, Higher Education, *School Policy, Student College Relationship

Identifiers—*Advisor Role, *Houston Baptist University TX

This handbook is a revised guide for faculty academic advisors at Houston Baptist University (HBU), a liberal arts university in Houston, Texas. The handbook is divided into three sections. The first section, "Academic Advising Research Data," discusses assumptions about the practice of advising and its role in higher education, various definitions of advising, and discussion and review of research on the advisor's role, function, and limitations. The second section is a selection of various lists, resource materials and articles that may be helpful in advising students. The list of resource materials is subdivided into four categories: (1) "The Advising Process," (2) "Responsibilities of the Advisors," (3) "Responsibilities of Advisees," and (4) "Advisee Problems." The third section contains information pertaining to specific departments and to specific HBU regulations. This section lists regulations and responsibilities for academic advisors. Appendixes contain tables detailing test/course requirements for English and Foreign Languages, Business, Christianity and History, Mathematics and Science, and Advanced Standing; as well as common registration questions, grading questions, and a list of referrals and responsible offices at HBU. Contains 62 references. (JB)

Identifiers—*Earlham College IN

Responding to an accrediting agency mandate for assessment of student outcomes, Earlham College (Richmond, Indiana), a liberal arts college, developed and implemented an assessment plan. The process began with review of the institutional identity and early identification of the philosophy and principles to guide the process. A timetable was developed beginning 20 months before a scheduled site visit from the accrediting agency. Other early steps included reviewing assessment practices already taking place, and development of the assessment plan by the curricular policy committee. Each academic unit submitted a self-study report. The assessment plan included a timetable for gathering and disseminating assessment data on the general education of Earlham students. The plan also required individual departments to indicate current and proposed forms of student academic assessment for their student majors. Lessons emerging from the experience suggested the importance of keeping the process at a grass roots level, evolving the assessment approach gradually, and integrating the assessment with other data collection efforts on campus. Appended material includes the revised self-study general plan, background information on the North Central Accreditation process, review of existing assessment data, a 5-year assessment plan, a summary of general education goals, and plans for student outcome assessment by department. Descriptors—*Academic Achievement, Academic Aspiration, *College Students, Demand Occupations, *Educational Demand, Foreign Countries, Grade Point Average, Higher Education, Prediction, *Predictive Measurement, Predictor Variables, Research Methodology, Secondary Education, Statistical Analysis, Undergraduate Study

Identifiers—Spain, *University of the Basque Country (Spain)

This study examined the predictive factors of demand for degrees and academic performance at the University of the Basque Country (Spain). The study followed two cohorts of university students from secondary education to the completion of the third year of higher education. The data analyzed included secondary school qualifications, selectivity and registration, and completion of the third year. At the first stage bivariate descriptive analysis was carried out. Once the variables with greater predictive strength had been selected, the relationships among variables were analyzed through multivariate procedures. Data were displayed using a graphic representation in factorial planes of the different kinds of variables to facilitate comprehension and direct and global insight on the main aspects. With regard to the demand for various types of degrees the study found that employment status of the student's father and the student's previous academic performance were the strongest predictive factors. For predicting academic performance in higher education, previous performance in secondary school was the strongest predictor variable. Six figures show data and findings distributions. Contains 20 references. (JB)

Identifiers—*State University of New York

This study examined trends in attrition and retention of State University of New York students enrolled in both baccalaureate and associate degree programs. A cohort survival analysis was used to evaluate the relative success of the students. Data are based on full-time, first-time and transfer Fall enrollees from 1987 through 1992 and were collected in Fall, 1993. Highlights of the findings include: (1) most full-time, first-time students are taking 5 to 6 years to earn a degree; (2) White and Asian/Pacific Islander students have higher than average graduation rates; (3) more than 18 percent of full-time, first-time students complete an associate degree during the third and fourth years after enrolling; (4) the number of baccalaureate students who earn a degree within 4 years declined through the 1980s and has steadily increased in the 1990s; (5) the percent of associate degree-seeking students who earned degrees in 2 years declined in the 1980s and continues to decline. The vast bulk of the document presents study data in tables organized in four parts. Part 1 covers attrition, retention and graduation information for students in Baccalaureate degree program; Part 2 covers students in associate degree programs; Part 3 includes trend information on baccalaureate students from 1977 through 1993; and Part 4 provides similar trend information for associate degree students from 1977 through 1993. Identifiers—*State University of New York

This 24th annual study of application and enrollment patterns of transfer students within the State University of New York (SUNY) during Fall 1993, was conducted in response to the demand for information on the inter-campus mobility of students attending SUNY institutions. The study used an analysis of the higher education backgrounds of transfer students enrolled at SUNY with system-wide data for all undergraduate institutions in SUNY. The report includes an index of SUNY institutions by coordinating areas. Overall 31,603 transfer students enrolled at SUNY in Fall 1993, a 1.8 percent decrease from the previous year with all of the decrease occurring at two-year institutions. The document is almost entirely composed of tables of data in 10 parts as follows: (1) institutional summary tables showing headcounts and percent distribution; (2) coordinating area summary tables showing head count and percent distribution area; (3) location and type of prior institution; (4) transfer students from other SUNY institutions; (5) transfer students from other New York institutions; (6) transfer students from outside the state; (7) trend reports; (8) undergraduate admissions tables; (9) associate degrees granted by SUNY two-year colleges; and (10) appendices containing a map of SUNY institutions, a chronology of data of establishment of SUNY institutions, and a publications list. Pub Date—94

Note—173p.

Available from—Charles C. Thomas, Publisher, 2600 South First Street, Springfield, IL 62794-9265 (\$41.95 hardcover, ISBN-0-398-05915-2; \$26.95 paperback).

Pub Type—Guides - Non-Classroom (055) — Books (010)

Document Not Available from EDRS.

Descriptors—*Bibliographies, Computer Software, Data Analysis, Data Collection, Data Processing, Higher Education, Literature Reviews, *Research Design, Research Methodology, Research Problems, *Research Projects, Research Proposals, Research Reports, Research Skills, Research Tools, Statistical Analysis

This guide to planning and conducting research projects covers how to decide on a research problem, state a hypothesis, plan for the collection of data, write a proposal, analyze and interpret data, and write the research report. Overall, the book takes a practical, hands-on approach and offers checklists, suggestions, and guidelines for all the basic elements of the research process. Chapter 1 is titled "The Literature Search." Chapter 2, "Planning Your Research," addresses stating the problem, identifying variables, evaluating relationships between variables, research planning, stating hypotheses, selecting sampling procedures, and setting significance levels. Chapter 3, "Writing a Research Proposal," covers stating the problem, writing the literature search report, describing the design, writing the elements of the research design, automatic and semiautomatic collection procedures, and data collection by subjective procedures. Chapter 4 is titled "Summary of Requirements in Planning Your Research and Writing a Research Proposal." Chapter 5, "Conducting the Research Project," offers suggestions for getting organized, collecting data, developing questionnaires and interview guides, recording observational data, obtaining test data, and using unobtrusive measures. Chapter 6 discusses "Analyzing and Interpreting Data." Chapter 7, "Computer Programs for Data Analysis," offers programming commands for International Business Machine compatible personal computers for determining descriptive statistics and others such as t-values, correlation coefficients, Chi-square values, and test reliability estimates. Chapter 8 is entitled "Writing the Research Report." A subject index is included. (JB)

Descriptors—Administrators, Agency Cooperation, College Students, Diversity (Institutional), Educational Finance, Graduate Students, Higher Education, Hispanic Americans, Minority Groups, *Program Effectiveness, Role Models, *School Holding Power, Student Financial Aid, *Student Recruitment

Identifiers—Diversity (Student), *Hispanic American Students, Recruit Attrition, Recruiter Role, *University of Colorado Boulder

In order to propose solutions to expressed Hispanic minority student recruitment problems, this study assessed the strengths and weaknesses of several University of Colorado at Boulder Hispanic student recruitment agencies. Data collection involved interviews with nine minority recruiting agency representatives, two retention agency representatives, and a sample of the Hispanic student population. The students included 45 undergraduates and 12 graduate students. The study also sought the recruitment and retention rates for each agency. Among the study findings were that many recruiting agencies do not keep recruitment and retention statistics from year to year, that several recruiting agencies face budget deficiencies and insufficient intra-agency communication, and that a labor short-

age affects the Admissions Office's ability to recruit minority students with minority recruiters. Retention agencies also reported shortages in funding, labor, and student financial aid. Other cofactors of Hispanic student attrition included lack of minority faculty and staff as role models, low Hispanic student presence, insufficient student financial aid, student personnel problems, and systemic racism. Extensive appendixes contain study data, questionnaires, data on the institution, organizational charts, and a map of the university. (Contains 25 references.) (JB)

Identifiers—*Europe, France, Germany, Ireland, Netherlands, United Kingdom

The Program on Institutional Management in Higher Education of the Organisation for Economic Cooperation and Development studied information technology (IT) in higher education. Specifically, the study aimed to investigate the state of the art of IT in European higher education, examine the potential of IT and the impact of IT developments on higher education, and identify management issues of IT. Six topics were identified as a way of classifying the use of IT across the higher education spectrum, and are represented in the following six papers: (1) "Teaching and Learning" (Gordon Bull); (2) "Research and National Networking" (Yves Epelboin); (3) "Administration" (Edgar Frackmann); (4) "Management Information" (Carry Dallinga-Hunter); (5) "Libraries and Information Services" (Edgar Frackmann); and (6) "General Management Issues" (Edgar Frackmann). In addition, analyses of the range of national initiatives in support of IT and their impact in five countries are presented, in the following papers: "France" (Yves Epelboin); "Germany" (Edgar Frackmann); "Ireland" (Dennis Jennings); "Netherlands" (Carry Dallinga-Hunter); and "United Kingdom" (Gordon Bull). Most papers contain references. (JDD)

Descriptors—*Academic Achievement, *Academic Persistence, *College Freshmen, College Outcomes Assessment, Grade Point Average, Higher Education, Instructional Effectiveness, Introductory Courses, Liberal Arts, *Predictor Variables, School Holding Power, *School Orientation, Seminars, Student Adjustment, Student Participation, Student School Relationship, Success

Identifiers—*Ramapo College NJ

This paper compares freshmen who enrolled in the College Seminar at Ramapo College (a 4-year liberal arts college in New Jersey) with freshmen who have not taken the seminar. The seminar course includes units on higher education in America; study skills (e.g., writing papers, research skills, taking notes, time management, computer skills); communication and interpersonal skills (e.g., avoiding date rape, solving disputes); substance abuse; stress management; values clarification; volunteer-

ism; discrimination and other minority issues; and career planning. The study's data include responses from 68 percent, 80 percent, and 80 percent of the 1986, 1987, and 1988 freshmen cohorts (ranging from 400 to 500 students) respectively. Retention rates into the subsequent years of college favored those students who enrolled in the seminar. Of eight variables analyzed to predict cumulative grade point average after four semesters in college, the best predictor was "grade and enrollment in College Seminar." Students who took the course attended more events on campus, belonged to more extracurricular organizations, felt more comfortable approaching faculty, spoke with faculty more frequently outside of class, and were more familiar with college support services. The paper concludes that students who have taken the seminar bonded more to the institution and experienced more benefits in both the academic and personal spheres. (JDD)

Identifiers—*Institute of International Education NY

Since its founding in 1919, the Institute of International Education (IIE) has been committed to strengthening mutual understanding and to encouraging the free flow of knowledge and ideas across national boundaries. Through the international programs IIE develops and administers, it has pioneered in the education of men and women of outstanding leadership potential in the conviction that such investment will help secure a more peaceful, enlightened future. Educational services have informed both the public and the academic community about opportunities and policy issues in international education. Partnerships that IIE has built with corporations, foundations, colleges and universities, government agencies, and international organizations have worked to mobilize resources and ensure their wise and efficient application to education. To begin the next 75 years, IIE believes that new levels of international cooperation are imperative and that its work must include not only fostering mutual understanding but encouraging mutual action as well. Looking toward the future, four key areas of focus for IIE are: strengthening human resources to build democratic, pluralistic societies, and market economies; strengthening international competence of U.S. citizens; fostering mutual understanding; and building global problem-solving capabilities. Faculty/Staff Nonrenewal and Dismissal for Cause in Institutions of Higher Education. Higher Education Administration Series.

Report No.—ISBN-0-912557-06-0

Pub Date—86

Note—61p.

Available from—College Administration Publications, P.O. Box 15898, Asheville, NC 28813 (\$16.95).

Pub Type—Guides - Non-Classroom (055) — Books (010)

Document Not Available from EDRS.

Descriptors—Compliance (Legal), *Court Litigation, *Dismissal (Personnel), Due Process, *Higher Education, Legal Problems, *Legal Responsibility, *Teacher Dismissal, Tenure

This monograph presents a succinct overview of the legal parameters regarding nonrenewal and dismissal for cause of employees of higher education institutions. The monograph is written in everyday language for the lay reader and presents a concise review of case law on the subject. An introductory chapter discusses judicial review, the employment

relationship, tenure status, term contracts, at-will status, academic freedom, public/private distinctions, and overbreadth or vagueness in adequate cause standards. A chapter on adequate cause for dismissal addresses incompetency, neglect of duty, insubordination, and immoral or unethical conduct. Legal challenges to adequate cause are also discussed, covering basic admissions; denial of due process; denial of free speech, association, or academic freedom; discrimination; and breach of contract. An appendix lists monographs and periodicals providing legal information in secondary and higher education. (Individual chapters contain references.) (JDD)

Descriptors—Access to Education, *Educational Policy, Family Income, Higher Education, Money Management, Need Analysis (Student Financial Aid), *Parent Financial Contribution, *Paying for College, State Programs, *Student Costs, *Student Financial Aid, Undergraduate Study

Identifiers—*Florida

This study examines the financial characteristics of students attending Florida's colleges and universities and how they pay for their education, based on a survey of more than 8,500 resident families with students enrolled in Florida colleges or universities during 1992-93. The study addresses the cost of Florida higher education, family income and financial aid status, savings behavior, family contributions, gift aid, and planned future support. The report identifies conclusions, policy questions, and recommendations for consideration by state policy makers. The study found that: in 1993-94, Florida ranks 44th nationally in tuition and fees charged to undergraduate residents at public institutions; that access to postsecondary learning is at jeopardy for low income Floridians; and the State's commitment to need-based aid has not kept pace with increases in eligible applicants; and that almost 70 percent of Florida families are not saving for college. Recommendations focus on increasing need-based aid, increasing tuition charges at public colleges to at least the national average, expanding Florida Resident Access Grants and academic program contracting, attending to income and ethnic characteristics of recipients of merit-based aid, making the financial aid process more user friendly, encouraging increased commitment to family savings, and holding debt burdens to acceptable and financially viable levels. Appendixes provide a statistical summary of findings and a description of the research methodology. (JDD)

Tenure and Teaching in the University of North Carolina.

North Carolina Univ., Chapel Hill. Board of Governors.

Pub Date—10 Sep 93

Note—39p.; Tables contain small print.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*College Instruction, *Employer Employee Relationship, Employment Practices, Excellence in Education, Higher Education, *Instructional Improvement, *Personnel Policy, Promotion (Occupational), *Tenure

Identifiers—*University of North Carolina

This report presents findings from an investigation into procedures and criteria for the awarding of tenure to faculty members, conducted by two University of North Carolina (UNC) committees. The investigation found that, generally, tenure policies and procedures within the UNC are sound. Much time is devoted to evaluation of faculty members holding probationary term contracts. In the case of negative decisions, processes are in place for subsequent appeal at several levels. Quality of teaching is a matter of genuine commitment and concern on all UNC campuses and is the most important single factor in reappointment, tenure, and promotion decisions.

Overall, Institutions are taking aggressive and impressive steps to foster excellence in teaching, including awards to recognize teaching excellence and special activities to support and strengthen instruction. Greater efforts need to be made in this regard at a number of UNC campuses, especially those with limited resources. Institutions should provide tangible incentives and encouragement for tenured and nontenured faculty and graduate teaching assistants to take advantage of professional development opportunities. Six recommendations are offered. An appendix contains five tables on methods for informing faculty of teaching evaluation criteria, evaluation methods, awards for outstanding teaching, special centers for excellence in teaching, and support and activities for teaching improvement. Descriptors—*Clinical Experience, Clinical Teaching (Health Professions), *Experiential Learning, Higher Education, *Medical Education, Medical School Faculty, *Medical Students, Osteopathy, Primary Health Care, Program Effectiveness, *Student Attitudes, Student Experience, Teacher Attitudes

Identifiers—*Ohio University

This paper describes the impact of early clinical contact (ECC) on medical students. The concepts emerged from a grounded theory analysis of interviews with students and faculty in the ECC program at Ohio University College of Osteopathic Medicine, which places first-year and second-year students in a variety of clinical settings in ambulatory clinics, private offices, and community settings. Program goals are broadly stated: neither explicit objectives nor formal feedback to students is provided. To assess the program, interviews were conducted with 8 faculty and 19 students, covering the length, timing, and structure of the experiences provided; impact of the program; and relationship to the didactic curriculum. Results indicated that students value opportunities to become acclimated to clinical settings before they are thrust into clerkships. Students were especially interested in: observing how physicians interacted with patients and managed their time, understanding how physicians approach clinical problems and make decisions; and recognizing that there is more to medicine than just the textbook. Though ECC programs are often developed to encourage students to enter primary care, students do not report much relationship between ECCs and their career choices. The study concludes that ECC can begin to train students to think like doctors while it initiates them into a community of practice. (Contains 14 references.) (JDD)

Descriptors—*Finance Reform, Financial Exigency, Foreign Countries, Higher Education, *Income Contingent Loans, Loan Default, *Loan Repayment, Student Costs, Student Financial Aid, *Student Loan Programs, *Taxes

Identifiers—Australia, *Income Taxes, New Zealand, *Ontario

The Ontario Student Loan Program has experienced problems with default on student loans, as have loan systems in other countries where governments rely mainly on banks and special departments of quasi-public institutions to monitor or police the borrowers. This report discusses the need for radical modifications of the student loan program to enable

students and universities to tap more private funding and abolish the present means testing of student loans, and investigates trends in the level and structure of university fees. It offers a summary of changes in student assistance schemes in New Zealand and Australia, which incorporate use of the income tax machinery in the collection of loan repayments and the implementation of an income contingent loan system. The report presents simulations of outcomes of introducing an income contingent loan system, using different assumptions concerning rates of interest chargeable to students, the length of the repayment period, and the minimum income repayment threshold. The report concludes that full incorporation of the tax machinery into the loan collection process would substantially improve the operation of the loan program as it would allow borrowers to spread repayments over a longer period to accommodate fluctuations in their incomes. (Contains 32 reference notes.) (JDD)

Identifiers—*Ontario

This study gauges the secondary impacts of Ontario, Canada's higher education system, in an attempt to define the boundary of production that encloses the economic activities involved in sustaining the demands put on the system by normal university activities. The accounting framework, upon which the impact model is based, is Statistics Canada Interprovincial Input Output Tables for 1984, which was refined to deal with price changes, wage rate increases, and productivity increases between 1984 and 1992. The study found that, while it may be difficult to ascertain precisely the economic value of educating engineers, scientists, professionals, and researchers, there is no doubt about the importance and significance of this contribution. Also, universities are major employers of people and significant contributors to the economic stability and vigor of the provincial economy, as well as of regional economies. Universities sustained over 182 thousand person years of employment and added \$9 billion to the Gross Provincial Product of Ontario in 1992. A one percent drop in Ontario funding of universities carries with it serious declines in income and employment for the province, the regions, and the Canadian economy at large, and these declines are multiples of the original decrease. Four tables and four figures illustrate the study's findings. (JDD)

Identifiers—*Canada

In each Canadian province, governments appear to be more and more intrusive into the day-to-day operations of their universities. Governments in such provinces as Manitoba, Saskatchewan, New Brunswick, and Alberta are concerned with making the universities more cost-effective and more "accountable" to the government and to the public at large. Interventions by government into Ontario's provincial system of higher education escalated when the provincial legislature authorized the Provincial Auditor's Office to examine the financial records of three Ontario universities. The audits resulted in establishment of a Task Force on University Accountability, which issued 47 recommendations intended to make universities more accountable. The provincial government also became involved in negotiating reductions in salaries, wages, and benefits for university and college employees and has implemented several initiatives which have swept up universities along with other institutions. Governments' attempts to make universities more accountable can be viewed as a form of conflict among various elite groups within those institutions and within society as a whole. A self-regulatory framework is proposed that would include graduate program quality appraisals and undergraduate program reviews, annual institutional accountability reports, and a system-wide performance indicators and outcomes report. (Contains 15 footnotes.) (JDD)

Descriptors—*Administrators, *College Faculty, Comparative Analysis, Educational Finance, Financial Audits, Higher Education, Peer Institutions, *Personnel Policy, Promotion (Occupational), *Salaries, *State Legislation, *Teacher Salaries

Identifiers—*State University of New York

This audit evaluated State University of New York (SUNY) personnel practices under 1985 and 1987 state legislation which granted SUNY greater flexibility to set salaries in order to recruit and retain top faculty and administrative talent. The study concluded that SUNY has used flexibility prudently and that flexibility has not had a significant impact on overall salaries. In addition, comparisons with peer university systems nationwide found that SUNY's faculty and administrator salaries are in line with other states. However, the audit found that SUNY has not developed any formal criteria or gathered evidence to assess the impact of flexibility on personnel practices. A review of a sample of SUNY staff paid more than institutional maximums found these were adequately documented and properly authorized and were generally used to attract or retain top faculty or administrators. Salary ranges for employees were established based on existing SUNY salary structure at the time flexibility legislation was enacted and on the salaries paid by SUNY's peer institutions. Findings indicated that SUNY officials should establish specific criteria and obtain data to measure the benefits and costs of flexibility. Appendixes contain faculty and administrator salary comparison charts and comments of SUNY officials. (JB)

Learning Style Differences between Developmental Studies and Academic Core College Students: Implications for Teaching.

Pub Date—94
Note—23p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Academic Achievement, *Active Learning, *Cognitive Style, *College Freshmen, Comparative Analysis, *Developmental Studies

Programs, Higher Education, *High Risk Students, Learning Strategies, Remedial Instruction, Sex Differences, *Student Characteristics, Teaching Methods

Identifiers—*Passive Learning

This study examined characteristics of passive and active learners among college students enrolled in remedial classes and students enrolled in regular academic classes. Active learners are typically analytical, focused on task, tolerant of new ideas, curious, adept at processing information, able to develop other ways to solve a problem, self-motivated, responsible for their own successes and failures, less affected by others' values, and have broad interests. The 193 students in the two groups attended a regional southern university. Students with low entrance examination scores had been placed in remedial developmental studies programs. Students in regular academic programs were education majors taking introductory classes. All students responded to the 32-item Passive Active Learning Scale (PALS) developed to measure learning characteristics of students. Results indicated that the developmental studies students had a more passive learning style than their peers in the regular academic program. In addition, females had more passive learning characteristics than males. The findings have significant implications for teaching across many levels. (Contains 16 references.) (JB)

Document Not Available from EDRS.

Descriptors—Check Lists, *Classroom Techniques, College Faculty, *College Instruction, *College Outcomes Assessment, *Educational Principles, Higher Education, Quality Control, Student Development, Student Participation, Teacher Effectiveness, *Teacher Student Relationship, Teaching Methods, Teamwork, *Total Quality Management

The mission of this book is to facilitate effective instructor-student partnerships through the study of total quality management (TQM) principles and to demonstrate to instructors how they can make a difference in their classrooms, institutions, and communities. It uses an educational approach that actively involves students in the learning system as they meet expectations of customers (parents, employers, and instructors down the line). The book is developed for professors who are partially trained and knowledgeable about TQM and who want to apply the theory of TQM to their classrooms. The core of the training program involves 11 steps, with a chapter devoted to each: (1) the mission, goals, and academic integrity of the class must be absolutely clear; (2) the professor must demonstrate leadership; (3) most work must be pertinent and flow from the students; (4) course content is connected to the campus community and the real world; (5) the student is treated as a "worker" and a member of the "research and development" team; (6) peer teaching, small group work, and teamwork are emphasized; (7) students should have aesthetic experiences; (8) classroom processes should include reflection; (9) the teaching/learning system should undergo constant evaluation; (10) new activities should constantly evolve from the old; and (11) there must be an audience beyond the professor. Each chapter contains exercises or checklists to use in applying the steps. (Contains 13 references.) (JDD)

Document Not Available from EDRS.

Descriptors—*Doctoral Dissertations, *Expository Writing, Higher Education, *Qualitative Research, *Research Methodology, Technical Writing, Writing (Composition)

This book for doctoral students is designed to provide direct, in-depth support for learning about qualitative research. The data sources for the book are reflections of research correspondents who describe their experiences with choosing qualitative research methodologies for their thesis research. The book begins with a chapter about "the end," where an amount of certainty and confidence finally emerges for novice qualitative researchers. Subsequent chapters address selecting and working with a committee; preparing and defending the proposal/prospectus; maximizing resources; connecting focus, literature, and ownership; keeping a journal; methodology and analysis; and defining "the end." Each chapter poses a set of questions to prod researchers to consider the totality of the research endeavor as they encounter seemingly discrete concerns. Appendixes provide a copy of the letter to potential research correspondents, biographical notes about the research correspondents, and tables of contents from their dissertations. (Contains 41 references.) (JDD)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—*Classification, *Colleges, Enrollment, Higher Education, *Institutional Mission, *Universities

Identifiers—*Carnegie Classification of Higher Education

This new edition of the Carnegie Classification of Higher Education groups American colleges and universities according to their missions and similarity of their programs and purposes. In this 1994 edition, for the first time, institutions are classified according to the highest level of degree conferred, and a new category is introduced—tribal colleges and universities. A foreword by Ernest L. Boyer reveals trends in higher education as indicated by changes in the classification. Preliminary figures and tables offer data on percentage of institutions within each classification area, enrollment by type of institution, and changes in enrollment over time. Part I then lists public and private institutions by state within the following classification areas: research universities (levels I and II); doctoral universities (levels I and II); master's (comprehensive) colleges and universities (levels I and II); baccalaureate (liberal arts) colleges I; baccalaureate colleges II; associate of arts colleges; and specialized institutions (religion and theology, medical, other health professions, engineering and technology, business and management, art, music, design, law, teachers colleges, and tribal colleges and universities). An index lists institutions alphabetically, along with their respective classifications. (JDD)

The Compact for Faculty Diversity.

New England Board of Higher Education, Boston, MA; Southern Regional Education Board, Atlanta, Ga.; Western Interstate Commission for Higher Education, Boulder, Colo.

Pub Date—94
Note—39p.; Photographs may not copy adequately.

Pub Type—Reports - Descriptive (141) — Opinion Papers (120)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Change Strategies, *College Faculty, Cultural Pluralism, *Doctoral Degrees, Educational Opportunities, Educational Policy, Financial Support, Graduate Study, Higher Education, *Incidence, Minority Groups, *Minority Group Teachers, Student Financial Aid

Identifiers—Compact for Faculty Diversity, *Diversity (Faculty)

Minorities constitute 26 percent of the U.S. population, but only 12 percent of higher education's

full-time instructional faculty. Adequate representation of minority faculty in higher education is crucial, as they serve as mentors, communicate the possibility of success for minority students, and help develop a knowledge base on minority issues. From 1982 to 1992, the percentage of doctoral degrees awarded to minority individuals increased less than one percent. A large number of current faculty are predicted to retire in the years following 1995, providing an opportunity to achieve better minority representation in faculty ranks, but a pool of qualified minority candidates must be prepared. Toward this end, the New England Board of Higher Education, the Southern Regional Education Board, and the Western Interstate Commission for Higher Education formed the Compact for Faculty Diversity, which aims to support at least 200 minority doctoral students per year through financial and academic support programs. The Compact's strategies include: (1) motivate states and universities to address the problem by increasing the base of financial support for minority doctoral study, (2) offer promising minority graduate students a support package of fellowships and research and teaching assistantships, (3) introduce incentives for academic departments to create supportive environments, (4) sponsor an annual institute, and (5) develop a collaborative approach to student recruitment. Identifiers—Crime Awareness and Campus Security Act 1990

This booklet is designed to assist colleges and universities as they develop policies, procedures, and programs to increase safety, respond appropriately to victims of crime, and fully comply with federal requirements established by the Crime Awareness and Campus Security Act of 1990. Part 1 presents 11 topics for helping define comprehensive, exemplary campus security programs. Topics include: statement of behavioral expectations by chief officers of the institution; a plan for timely dissemination of information; effective campus security organization and personnel; services designed to foster safety through prevention; security-sensitive physical plant design and maintenance; a fair, just, clearly articulated judicial system; victims' assistance programs; special considerations for residence halls; special attention to more volatile areas; good campus-community relations; and campus crises prevention and response plan. Part 2 presents some examples of practices, shared by campus officials across the country, that may be helpful to other colleges and universities, categorized according to Part 1's topic areas. Appendix A lists the schools cited in the report. Appendix B lists resources in the field of campus security. (JDD)

The Power of Structural and Symbolic Redesign:
Creating a Collaborative Learning Community in
Higher Education.

Pub Date—[94]
Note—19p.

Pub Type—Reports - Descriptive (141)
EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Action Research, Community, Curriculum Development, *Educational Administration, Educational Change, *Educational Cooperation, *Educational Environment, Feminism, *Graduate Study, Higher Education, Leadership Training, *Program Development, Women Administrators

Identifiers—*Collaborative Learning, Diversity (Student), *Oakland University MI

This paper describes efforts to redesign a graduate program of educational administration and leadership at Oakland University in Rochester, Michigan, shaped by contributions of researchers in contemporary management and leadership theory, feminist pedagogy, action research, and educational reform. A culture of collaboration, inclusion, and success for all was created through faculty information-sharing and relationship-building meetings. The program operated on a cohort model, by which approximately 15 students would be admitted once a year, to remain as a working team over the entire 2 years of the program. Admissions criteria were modified to deliberately recruit students with diverse backgrounds, qualities, and experiences. Rites and rituals were created, teams began to create their own meaning and identity by naming themselves, models of collaborative teaching and learning were established, collaborative action research projects were conducted, mentors were identified for all students, and portfolio assessment was integrated with reflective practice and cognitive coaching. The program has demonstrated that the conscious redesign of structure and symbolism can create a different learning environment, one which helps capable women attain the levels of achievement and responsibility of which they are capable. Archer, Austin C.
The Measurement of Charismatic Teaching in the College Classroom.

Pub Date—4 Apr 94

Note—49p.; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4, 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—College Faculty, *College Instruction, Factor Analysis, Higher Education, Interviews, *Measurement Techniques, *Merit Rating, Professional Recognition, Questionnaires, *Student Attitudes, *Student Evaluation of Teacher Performance, Teacher Attitudes, Teacher Behavior, *Teacher Characteristics

Identifiers—*Charisma

This study identified the characteristics of charismatic teaching behavior by interviewing deans, department chairs, teachers, and students at a midwestern state university. Based on interview data, a questionnaire was developed and administered to 19 classes, 10 taught by teachers recognized by the university for teaching merit and 9 teachers not so recognized. Results indicated that charismatic teachers were perceived as exhibiting caring and concern for students and were seen as energetic and enthusiastic in the classroom. There may be two opposing kinds of charismatic teaching, one focused on intellectual aspects, the other on personal or relational attributes. There was a positive relationship between teachers recognized for merit and teachers viewed as being charismatic. The relationship among: (1) personal empathy, personal intensity, and intellectual challenge as factors of charismatic leadership, (2) trust, and (3) commitment were also analyzed by ethnicity of student, sex of student, age of student, sex of teacher, and subject being taught. (Contains 22 references.) (JDD)

Strengthening Departmental Leadership: A Team-Building Guide for Chairs in Colleges and Universities. The Jossey-Bass Higher and Adult Education Series.

Pub Date—94

Note—295p.
Available from—Jossey-Bass Inc., 350 Sansome St., San Francisco, CA 94104 (\$30.95; quantity discount available).

Pub Type—Books (010) — Guides - Non-Classroom (055)

Document Not Available from EDRS.

Descriptors—*Administrator Responsibility, *Administrator Role, *College Administration, Conflict Resolution, *Department Heads, Departments, Faculty Development, Faculty Evaluation, Higher Education, Instructional Leadership, Leadership, *Leadership Responsibility, *Personnel Management, Stress Management, Teamwork

This book demonstrates how academic chairs at

institutions of higher education can learn the skills that are essential to their becoming leaders and faculty developers and having a significant impact on their departments. The book assists chairs in building cohesive teams in their departments and facilitates learning and using survival skills. It is designed to be highly practical, presenting sensible advice on handling problems that occur frequently in college and university departments. The book provides a goal-setting framework and action steps that result in leadership knowledge and skills. Specific chapters address: (1) opportunities departmental chairs have to handle specific challenges confronting higher education, and barriers that prevent chairs from becoming leaders and team builders; (2) a leadership matrix which measures nine major leadership and faculty development responsibilities and assesses strengths and target areas for development; (3) step-by-step method for developing a vision that will elicit the commitment of the department; (4) motivating, evaluating, and rewarding faculty members; (5) supporting effective teaching; (6) providing feedback on classroom teaching; (7) enhancing commitments to scholarship and service; (8) team building through supportive communication; (9) managing conflict and playing the role of third-party facilitator; (10) using feedback from the department; (11) the dean's role in developing departmental leadership; (12) stress reduction interventions; and (13) personal strategies for strengthening leadership effectiveness. Contains approximately 260 references. (JDD)

Identifiers—New York, *State University of New York

This three-volume report presents the results of the annual survey of the geographic origins, or permanent residence, of students attending institutions of the State University of New York (SUNY) during the fall 1992 term. The first volume summarizes: (1) the distribution of all credit course students by load (full-time/part-time), level (undergraduate/graduate), residency, and various relative distance measures for New York State residents; (2) the origins of new (first-time and transfer) undergraduate students; (3) each institution's enrollment by level, load, history (first time/transfer), and permanent residence; and (4) data on the total State University system as well as the institutions by type. Volume II provides enrollment data for each New York State county; permanent residence of students from outside of New York State broken out by standard geographic regions; percent distribution of all undergraduate and graduate credit course students in terms of institutional totals distributed across the four New York State Planning Regions and region totals distributed across institutions; and percent distribution of all first-time full-time and transfer undergraduate students in terms of institutional totals. Volume III displays data on trends in geographic origins from 1959 through 1992, by individual institution and institutional type; a 7-year trend in the New York origins of full-time first-time students for each SUNY institution or institution type; and a 7-year trend for full-time students from each New York county. able from EDRS.

Descriptors—*Administrative Policy, Court Litiga-
tion, *Financial Exigency, Higher Education,
*Legal Responsibility, *Program Termination,
*Reduction in Force, *Retrenchment, School
Closing, School Responsibility, Student Rights,
Trustees

The materials in this compendium are intended to
assist counsel and administrators at institutions of
higher education faced with the need to consider
and plan for program closures. Some materials also
deal with the closely related issues of financial ex-
igency, faculty reductions, and reductions in force.
Section I offers the following papers: "The Age of
Austerity: Downsizing for the 90's" (Corinne A.
Haupt); "Problems of Contraction: Legal Consider-
ations in University Retrenchment" (Annette B.
Johnson); "Evaluating and Discontinuing Pro-
grams" (Edward A. Dougherty); "Planning the Un-
thinkable: Issues in Institutional Reorganization
and Faculty Reductions" (Steven Glenn Olwang);
"Procedures and Criteria for Faculty Retrench-
ment" (Kenneth P. Mortimer); "What If the Faculty
Member To Be Laid Off Is the Governor's
Brother?" (Colleen Dolan-Greene); "Terminations
without Tears: Avoiding Litigation Risks in Reduc-
tions in Force" (Peter M. Panken and Michael
Starr); "Planning for Workforce Reductions: Chart-
ing a Course around the Legal Icebergs" (Fred W.
Alvarez and Elena E. Matsis); "Program Elimina-
tion, Financial Emergency, and Student Rights"
(Steven Glenn Olwang and others); "To Save a
College: Independent College Trustees and Deci-
sions on Financial Exigency, Endowment Use and
Closure" (Edward A. Johnson and Kent M. Weeks);
and "Closing a College: Trustee Decisions and Ad-
ministrative Policies" (Joseph P. O'Neill and Sam-
uel Barnett). Section II consists of various
guidelines and institutional policies and procedures
on terminations or reductions of programs, termina-
tions of faculty and staff, and treatment of students
affected by program closures. Section III includes
internal documents and agreements from specific
program closure situations. A resource list of 19
monographs and journal articles concludes the com-
pendium. (JDD)

able from EDRS.

Descriptors—Books, *Copyrights, Court Litigation,
*Fair Use (Copyrights), Federal Legislation, Fed-
eral Regulation, *Guidelines, Higher Education,
*Legal Responsibility, Music, Periodicals, Pro-
gramming (Broadcast)

This pamphlet discusses how colleges and univer-
sities can protect themselves and their employees
from liability for copyright infringement. The pam-
phlet outlines types of works that are copyrightable
and notes that certain infringements of copyrights
are excused under the doctrine of "fair use." The
four factors in determining fair use are discussed,
including purpose and character of the use, nature
of the copyrighted work, amount and substantiality
of the portion used, and effect of use upon the po-
tential market for or value of the copyrighted work.
The pamphlet examines the role of the "Agreement
on Guidelines for Classroom Copying in Not-
for-Profit Educational Institutions with Respect to
Books and Periodicals," which was developed by
educational institutions, authors, and publishers.
The application of copyright law to particular ac-
ademic circumstances is then explored, including li-
braries, online databases and optical videodisks,
performances, music, audiovisual works, commer-

cial software, ad hoc anthology, and use of factual
information. The pamphlet notes how to obtain
copyright permission for published works and pen-
alties for copyright infringement. Appendixes pro-
vide texts of the "Agreement on Guidelines" noted
above, "Guidelines for Educational Uses of Music,"
and "Guidelines for Off-Air Recording of Broadcast
Programming for Educational Purposes." The pam-
phlet concludes with 47 references to court cases,
Congressional reports, books, and articles. (JDD)

able from EDRS.

Descriptors—*Administrative Policy, Civil Rights
Legislation, *Compliance (Legal), Eligibility,
*Employee Absenteeism, Employment Practices,
Federal Legislation, Federal Regulation, Higher
Education, *Labor Legislation, *Leaves of Ab-
sence, Personnel Management, *Personnel Policy
Identifiers—Americans with Disabilities Act 1990,
*Family and Medical Leave Act 1993

This pamphlet explores how universities must in-
tegrate the Family and Medical Leave Act of 1993
(FMLA) with existing institutional leave policies
and how universities can harmonize the require-
ments of the FMLA with other federal mandates,
particularly the Americans with Disabilities Act
(ADA). First, basic FMLA concepts are discussed,
including eligibility for FMLA leave, notice require-
ments, medical justification, intermittent leave,
relationship of paid to unpaid leave, benefits before
and after leave, reinstatement to employment, and
enforcement procedures. Next, a series of hypothet-
ical situations is analyzed to highlight practical
problems in applying the FMLA to higher educa-
tion. Finally, several special issues relating to im-
plementation of the FMLA in higher education are
raised, including unionized employees, academic
year work schedules, "key employee" exceptions,
substitutions of paid leave for unpaid FMLA leave,
deductions from compensation of salaried employ-
ees for intermittent FMLA leave, and relationship
of the FMLA and the ADA. (JDD)

Descriptors—Campuses, *Compliance (Legal),
Contracts, *Court Litigation, *Crime, Employer
Employee Relationship, *Higher Education, *Legal
Responsibility, Legislation, Prevention, Risk,
*School Responsibility, Student Rights, Torts,
Victims of Crime

This monograph reviews a college or university's
responsibility for incidents of crime occurring on its
campus or in the course of its programs. Part 1
reviews the legal analyses which courts undertake in
responding to claims that, under common tort law
or contract theories, liability for the injuries suffered
by a person ought to be shifted from the victim to
the university. It examines theories and cases on
duty of care in three models (college-student "spe-
cial relationship," landowner-business invitee, and
landlord-tenant); negligence based on foreseeability
of injury risk; and breach of express or implied con-
tract. Part 2 examines a kind of statute that makes
the institution a criminal for "permitting" crime on
its campus and/or creates a new per se liability pro-
tecting students and employees. Four distinct ways
in which these statutes may impose liability on ac-
ademic institutions are discussed: direct criminaliza-
tion of university conduct, compliance as a

condition of federal funding, statutorily created
duty of care, and breach of contract. Part 3 catalogs
ways in which institutions can reduce the incidence
of crime on campus and manage the risk of liability,
through education, compliance, prevention, peri-
odic review and modification, and crisis manage-
ment. (JDD)

Descriptors—*College Freshmen, Higher Educa-
tion, Program Development, *School Orienta-
tion, Seminars, *Small Colleges, *Student
Adjustment, Student Experience

This conference was designed to assist educators
and administrators at small colleges in the planning,
implementing, and refining of programs designed to
enhance students' first-year experience. The conference
addressed the special environments, challenges,
and opportunities for success in the first-year
experience. Conference presentations were categor-
ized into five theme tracks: (1) enhancing institu-
tional environments; (2) special populations of
first-year students; (3) assessment and accountabil-
ity; (4) curricular and cocurricular strategies; and
(5) other issues. Paragraph-length descriptions of
conference presentations are provided, followed by
one-to-two-page outlines of 23 of the presentations.
Presentations examine such topics as academic ad-
vising, electronic journaling, portfolio assessment,
community service, developmental curricula, fresh-
men seminars, mentors, life skills development,
early warning of risk of failure, commuter students,
and supplemental instruction. (JDD)

tional Attainment, Enrollment, Enrollment Influ-
ences, Family Characteristics, Higher Education,
National Surveys, *Racial Differences, Salary
Wage Differentials, Statistical Analysis, *Student
Attrition, Student Financial Aid, *White Students
Identifiers—*High School and Beyond (NCES)

This study examined the college attendance and
degree completion rates of black and white students
using census data and data from the class of 1980 of
the High School and Beyond Study. Introductory
information examines the racial gap in earnings. The
following sections consider: differences in educa-
tional attainment in relation to wage differences; the
effects of standardized test scores, high school char-
acteristics and family background on racial differ-
ences in college entry; differences in college
retention and the racial gap in educational attain-
ment; differences in colleges attended by blacks and
whites students; differences in retention among
blacks and whites attending predominantly white
institutions; effects of attending historically black
institutions. Overall findings include the following:
(1) college entry rates of blacks were higher at every
SAT (Scholastic Aptitude Test) quartile; (2) the
mean enrollment rate of Blacks was lower than for
whites; (3) black college completion rates (by SAT
quartiles) were generally slightly higher for blacks
than for whites; (4) increased access and financial
aid had but marginal impact on degree completion
rates for blacks; (5) enrolling in a historically black
college or university increased retention rates for
blacks; and (6) the disproportionate numbers of
black youth receiving low test scores appeared to be

the primary obstacle to black student retention. (DB)

First Steps: The Early Stage of Distance Education in Institutional Comparisons.

Pub Date—[94]

Note—21p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Access to Education, Community Colleges, Comparative Analysis, *Distance Education, Educational Facilities, Educational Technology, *Educational Television, Higher Education, Library Materials, Nontraditional Education, Nursing Education, Program Descriptions, Program Development, Program Evaluation, Rural Areas, *State Programs, Student Attitudes, *Technological Advancement

Identifiers—*Compressed Video, *Nevada, Video Technology

A descriptive evaluation is presented that considers several distance-education courses in Nevada, all of which use compressed video. The performances and attitudes of distance-education students are compared in general terms with those of students in regular classes. Programs evaluated in this preliminary investigation include nursing courses from the University of Nevada, Las Vegas, which is linked to Northern Nevada Community College and three distance-education courses. Access to library reference materials is a problem recognized at these sites and at the University of Kentucky, where evaluations of distance education have been more extensive. Other issues explored include classroom interaction with and access to the instructor and the physical arrangements of classrooms and technology. Distance education in Nevada is in its infancy in terms of the developing technologies, effective teaching techniques, and fulfilling student needs, but it offers great promise for reaching rural areas and educating those who cannot leave their home communities. Identifiers—Compressed Video, Louisiana, North Slope Borough School District AK, *Star Schools, Video Technology

Distance education has become a major teaching and learning tool. Distance education typically uses technology to reach learners in the following ways: (1) audio communication through one- or two-way radio or telephone; (2) audiographic links such as computer-to-telephone setups; (3) freeze-frame transmission of visual images; (4) one-way audio-video such as educational television; and (5) interactive, two-way full-motion compressed video. A popular satellite-delivered program called Star Schools is a good example of effective distance education. Many factors influence the acceptance of distance education, but it appears to be more readily accepted when it is the only alternative to a regular

classroom. The Telelearning Project Outreach at the Louisiana School for Math, Science, and the Arts and the distance-learning programs of the North Slope Borough School District (Alaska) illustrate the advantages and drawbacks of distance education. The America Tomorrow Leadership Information Service (ATLIS) is being implemented to help educators learn about distance education and educational technology. (Contains 11 references.) (SLD)

Identifiers—Virtual Reality

Education has entered an era that will challenge our ability to adapt and to interact with new technological and interactive media. Elementary, secondary, and postsecondary education will all benefit from new technologies if educators respond to the profound possibilities of such technologies. Television is one media source that can be used effectively if its limitations are recognized and if it is used in conjunction with other media. Traditional teaching by television (i.e., the face-to-face lecture) must be supplemented by effective two-way television interaction. Supporting materials must complement the programs effectively, and the faculty's importance cannot be dismissed. Instructors must learn to serve as the managers of instruction. Colleges of education must adapt so that they can prepare educators for their new roles. It must also be recognized that if educators do not adapt, business and industry will take the lead in technological innovation, because the power of television has already been acknowledged. From Information Searching to Learning: A Comparison of Contrasting Hypertextual Menu Designs for Computer-Based Instructional Documents.

Pub Date—Apr 94

Note—25p.; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150) — Tests/Questionnaires (160)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Computer Assisted Instruction, Higher Education, *Hypermedia, *Information Seeking, *Instructional Design, *Menu Driven Software, Problem Solving, Questionnaires, *Search Strategies

Identifiers—*Document Structure

This study examined the influence of three different combinations of document structures and menu designs on users' attitude, performance, and learning in five different search tasks. The three types of combinations studied were: (1) an explicit menu signaling hierarchical structure where cross-referencing was not supported (EXH-explicit and hierarchical); (2) an explicit menu signaling hierarchical structure in which cross-referencing capability was embedded (EXN-explicit and network); and (3) an embedded menu signaling both hierarchical structure and cross-referencing capability (EMN-embedded and network). Based upon the specificity, complexity, and boundary of the search targets, five types of searches were studied—when the target was: simple and fully known; simple but not partially known; complex and fully known; complex but only partially known; and complex and the condition for terminating the search was unclear. Results showed that providing cross-reference links in small- or medium-sized online documents can im-

prove search accuracy but not efficiency. EXN produces the best search accuracy, and EMN encourages in-depth search for tasks that are complex and not fully known. Although EXN was best received by the subjects, it resulted in a greater sense of getting lost for those who used the referential links and backtracking links more often. Causes of this disorientation, reasons why EXN and EMN produced better performance were discussed and search strategies employed by the subjects were investigated. The questionnaire used in the study is appended. (Contains 54 references.) (JLB)

Descriptors—Change, Conservatism, Democracy, *Educational Philosophy, Educational Principles, Educational Theories, Ethics, Liberalism, Modernism, *Politics, Science and Society, Technology

Identifiers—1960s, Historical Background, Postmodernism

It is the thesis of this work that the intellectual and social movements of the sixties beyond conservatism, classical liberalism, new liberalism, and various versions of Left philosophy have generated a space for the construction of a neoteric philosophy. The neoteric influence of today's reality points out that philosophy must move beyond postmodernism and conservatism. This essay argues for a neoteric philosophy of education. Neoterism asserts that politics is not reducible to epistemology, economics, class, modes of production, or life-worlds. It is the rate change-a dynamic, not a structure—that is the central factor of modernity. It reasserts that the new liberal claim that community is the core topic of all politics is correct. A neoteric philosophy of education revolves around the reestablishment of democracy, community, civic humanism, and freedom in discussions of political philosophy in particular in a tone that is against fragmentation. Identifiers—Alberta

An important goal of the Educational Information Exchange (EIE) of Alberta Education is to provide leadership in promoting school student record automation. This document presents a mechanism for the review, evaluation, and recommendation of school-based student records software for the EIE. The report provides an overview of the initiative to automate and begins with a description of the preparations taken prior to the beginning of the review process. The main topics covered in this section are the request for information from software vendors; formation of the working committee for the review process; and an outline of the evaluation strategy. The next section examines the software evaluation process. It consists of the following stages: short software demonstrations; half-day software demonstrations; visits to school sites; invitation to offer; and negotiations and recommendations. The fourth section provides general overviews of the top eight software packages evaluated by the working committee. The final section provides a summary of the report and concluding remarks. Nine appendices

include sample letters, a description of functional criteria for evaluating software, and a list of vendors. (JLB)

Students' Perception of Computer Art Graphics Integration of Art and Science.

Pub Date—Apr 94

Note—17p.; Poster presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150) — Tests/Questionnaires (160)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—*Art Activities, *Computer Assisted Instruction, *Computer Graphics, *Geology, Higher Education, *Instructional Innovation, Integrated Activities, *Interdisciplinary Approach, Questionnaires, Science Instruction, Student Attitudes

Identifiers—*Computer Art

In this study, integration of art and science instruction was applied in an experimental computer art graphics class, as undergraduates learned geological concepts and processes through creating computer art graphics. The qualitative study concerning students' perception of integrative instruction was made from the students' point of view. Questionnaire answers revealed that creation of geology-related art production on the computer provided the students with confidence about their artistic abilities and helped them understand geological drawings, graphs, and geology lectures. Most of the students found beneficial and stimulating that they were not evaluated and could use and manipulate their knowledge of geology in an atmosphere of freedom and flexibility. In the quantitative study made from the teacher's point of view, dependent variables included mean score on the geology content achievement and art jurors' evaluations of the student artwork. Results showed a significant difference between mean scores on the laboratory grade and the course grade for the experimental and control groups. Jurors' evaluations correlated with the order of creating the subsequent science-related computer art graphics. Results suggest that the adoption of computer art graphics integration with science instruction provides opportunities for increasing students' understanding of scientific concepts, improves their performances in science, and enhances their artistic production. Identifiers—International Surveys, Netherlands (Enschede)

The purpose of this study was to determine if there are cross-national factors that account for students' computer know-how. The data used in the study were collected in the International Association for the Evaluation of Educational Achievement study on computers in education. In 1992, data were collected in seven different countries about the use of computers in elementary and secondary schools. A questionnaire was used to determine attitude scales, computer use at home, and scores on the Functional Information Technology Test (FITT) by students. Teachers were asked to indicate whether the subject matter covered in each item of the FITT was taught before the testing. The FITT consisted of 30 multiple choice items designed to measure the general practical knowledge and skills students will need to use information technology. Results showed that, in all countries, the average level of achievement differs across schools. Conclusions drawn from the analyses are that schools, student attitudes

towards information technology, gender, and home background are meaningful factors in understanding differences in student achievement on functional information technology. (JLB)

Identifiers—Performance Support Systems, University of Twente (Netherlands)

This paper contains a report about a collaborative project of the University of Twente (Netherlands) Faculty of Educational Science and Technology, Department of Curriculum and the Dutch National Institute for Curriculum Development (SLO). The project explores the potentially supportive role of the computer in improving the quality and efficiency of curriculum development activities. This report describes the early steps and findings of this long term project. A brief introduction on the context of curriculum development by the SLO is presented. The functions and characteristics of the system are then outlined, based on an analysis of available systems and on recent trends in electronic performance support systems. The project's development and evaluation approach is described, and the current version of the prototype is examined. Finally, recommendations are presented for further research. The Effects of Collaborative Interaction and Computer Tool Use on the Problem-Solving Processes of Lower-Ability Students.

Pub Date—Jul 93

Note—24p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Academic Ability, Cognitive Processes, Comparative Analysis, *Computer Assisted Instruction, *Cooperative Learning, *Courseware, Higher Education, Intermode Differences, Man Machine Systems, *Metacognition, *Problem Solving, Protocol Analysis, Word Problems (Mathematics)

This study examined ways in which two independent variables, peer collaboration and the use of a specific tool (the TAPS interface), work together and individually to shape students' problem-solving processes. More specifically, the researchers were interested in determining how collaboration and TAPS use cause metacognitive processes to differ from those that occur when students engage in individual problem solving using standard tools. The TAPS systems help students develop metacognitive skills and awareness. Forty-eight undergraduate students were selected and randomly assigned to one of four research groups: pairs and TAPS; individuals and TAPS; pairs and standard tools; and individuals while thinking aloud. Protocols of these problem-solving sessions were videotaped for analysis. For coding and analysis, each protocol was broken down into 15-second segments. Results showed that TAPS users differed from users of conventional tools in both time taken in problem solving and reading time; TAPS use appeared to serve as a catalyst for more strategic planning behavior; collaboration also produced more planning behavior; and more behavior associated with metacognitive monitoring occurred in the pair groups. Groupwork with Computers in British Primary Schools.

Pub Date—Apr 94

Note—23p.; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Case Studies, Children, Classes (Groups of Students), *Computer Assisted Instruction, *Cooperative Learning, Decision Making, Elementary Education, Foreign Countries, Group Dynamics, Microcomputers, *Small Group Instruction

Identifiers—England, LOGO Programming Language

In British primary schools, it is unusual to find more than one computer in a classroom. As a result, children are assigned to small groups to use the computer. This research reported here sought to explore the characteristics of groupwork with computers and to provide guidance to teachers on computer use issues. This paper summarizes work from the Sussex component of a three-year project involving London and Sussex Universities and 12 schools in six districts. The children observed in the study were between 8 and 12 years of age. The software used in the classrooms included LOGO (Mathematics), Lego LOGO (Control Technology), databases (for Social Studies Topics), and DEVELOPING TRAY (a language program using a cloze procedure format). Data for the case studies were gathered by observation, interviews, questionnaires, school records, and, in some cases, tests of pupil performance. This paper reports on the following selected topics from the research: group processes, including pupil roles, decision making, turn-taking, participation, fairness, conflict, and collaboration; ability factors; optimum size of group; personality factors; teacher approaches to group composition; and emerging policy issues. (Contains 23 references.) (JLB)

Descriptors—*Computer Assisted Instruction, *Computer Software Development, Educational Media, Educational Technology, Evaluation Methods, Foreign Countries, Higher Education, Hypermedia, *Multimedia Instruction, Research and Development

Identifiers—Australia, Interactive Systems, Multimedia Materials, *Performance Support Systems

This paper describes research and development concerning the use of electronic performance support systems (EPSS) in interactive multimedia (IMM) classes at Edith Cowan University (ECU), Australia. EPSS are a special type of computerized support systems that integrate a knowledge base with practical tools required for a specific type of job. The use of an EPSS in the context of an IMM course is seen as appropriate given the heavy emphasis that is placed on the practical application of theory to large scale project work. The current IMM Project EPSS prototype consists of an information base and software tools with links between them. The first two research and development phases are characterized by qualitative research accompanied by concurrent development and evaluation. Phase 1 (Initial Assessment) consists of product design, development, and evaluative research. Phase 2 (Assessment of Initial Implementation) will determine the effects of implementing learning strategies based on the IMM EPSS on 30 graduate students. This assessment may result in new or modified research questions and software modifications for the EPSS. (JLB)

Is There Too Much Hype about Hypercard?

Pub Date—May 94

Note—51p.; Master's Thesis, University of Virginia.

Pub Type—Dissertations/Theses - Masters Theses (042)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Computer Assisted Instruction, Educational Technology, Grade 2, *Hypermedia, Instructional Innovation, Intermode Differences, Pretests Posttests, Primary Education, Spelling,

***Spelling Instruction, Word Lists
Identifiers—HyperCard**

The central focus of this research was to test the effectiveness of HyperCard in spelling achievement and to determine if HyperCard has any significant impact on student learning. Four boys and four girls were randomly selected from a second grade classroom at Clark Elementary School in Charlottesville (Virginia) to be part of the experimental group. The research design followed four steps: (1) the control and experimental groups were given a pretest on short and long "e" words, since the HyperCard program worked specifically within these words; (2) both groups were given an introductory tutorial lesson on HyperCard; (3) the experimental group worked with a program designed for the project, while the control group did word study; and (4) both groups were given a posttest at the end of the session. Conclusions drawn from the study include the following: HyperCard does not appear to be detrimental to spelling achievement; the use of HyperCard as a spelling tool may be beneficial as students learn spelling and the use of computers; HyperCard seems to promote higher levels of movement in the word study sequence; and HyperCard seems to promote beneficial student practices, such as curiosity, attention, and collaboration. The appendices include word lists, sample computer screen displays, the word study sequence, and within word study observations. (Contains 11 references.) (JLB)

Developing a Campus-Wide Computer Ethics Policy.

Pub Date—[Jun 94]

Note—12p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Computer Networks, *Computer Uses in Education, *Ethics, Futures (of Society), Higher Education, *Policy Formation, *School Policy, Technological Advancement
Identifiers—*Academic Computing, *Computer Ethics, Illinois Wesleyan University

This paper discusses the process for developing a campus-wide computer ethics policy at Illinois Wesleyan University. As a part of a campus-wide computerization planning effort, the university realized it would be necessary to set in place rules of conduct, methods of monitoring conduct, and penalties for transgressions of these policies. The need for a policy arose from the realization of problems relating to network integrity, liability, and software copyrights. A task force consisting of faculty and administration created a smaller group charged with developing the policy. The policy created focuses on legal and ethical issues of campus computing. Issues encountered while developing the policy include: whether or not to allow the use of games; the use of computer equipment for monetary gain; and academic dishonesty. An implementation plan was developed along with the policy: (1) obtain approval from the trustees; (2) include the policy in the faculty and student handbooks; and (3) make students aware of the policy. The policy was adopted in April 1993 by the Board of Trustees of the university. Sections of the campus-wide ethics policy are interspersed with narrative in the paper describing the policy's development. (JLB)

Advisor Systems: The Development Life Cycle

Illustrated by Two Case Studies.

Report No.—ISBN-2-9802934-1-5

Pub Date—92

Note—190p; French edition available as ISBN-2-9802934-0-7.

Pub Type—Books (010) — Reports - Descriptive (141)

EDRS Price - MF01/PC08 Plus Postage.

Descriptors—Case Studies, *Computer Software Development, Databases, *Expert Systems, Information Systems, *Intelligent Tutoring Systems, Musical Composition, Problem Solving
Identifiers—*Advisory Systems

An intelligent advisor system is an adaptive system aimed at intervening when the user of any application software performs complex transfer tasks. An important aspect that needs to be taken into account when designing and developing an advisor system is the strategies and tactics used by the advisor to provide the user with an environment tailored to his or her needs and goals. This book presents the development life cycle of advisor systems as illustrated

by two case studies: CODMA, an intelligent advisor in conceptual database modelling, and MUSIC, an intelligent advisor in musical composition. The introduction gives an overview of advisor systems, life cycles, and the book. For each step of the life cycle examined, the next two chapters illustrate the results obtained in the case studies. The first step, "Describing the strategy of intervention," defines the nature of knowledge to be recorded. The second step describes the strategy and means proposed for the knowledge acquisition. Step three describes the content, the architecture, and the implementation in the environment strategy. Finally, the fourth step describes the physical implementation of the system. (Contains 105 references.) (JLB)

Planning/Evaluation Report 94-256.

Des Moines Public Schools, IA. Dept. of Information Management.

Pub Date—2 Aug 94

Note—54p.

Pub Type—Reports - Descriptive (141)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Educational Assessment, Educational Needs, Educational Objectives, *Educational Planning, Educational Policy, Elementary Secondary Education, Futures (of Society), *Information Management, Information Technology, Program Evaluation, *School Districts, School Effectiveness, Staff Development, Strategic Planning
Identifiers—Des Moines Public Schools IA, *Technology Plans

The Des Moines (Iowa) Independent Community School District Department of Information Management provides leadership and management services for the district in the areas of strategic planning for district improvement, technology, telecommunications, accountability, program evaluation, research, testing/assessment, and student information. This is a report of the department evaluation. The context evaluation contains an overview of departmental functions; recent developments including implementation of a transformation plan, changes to the district's assessment program, technology improvements, and a new student records database; and policies, standards, and regulations that govern departmental operations. The input evaluation component contains information on budget and expenditures; human resources; technology cost summary; costs of inservice/staff development; materials and equipment by the department; community resources; and space allocations. The process evaluation section is comprised of information about work flow; district goals and objectives for 1993-94 and 1994-95; inservice and staff development activities; and the influence of technology. The product evaluation component describes specific outcomes of department objectives; program evaluation; assessment; student information; and technology. Finally, the department identifies plans for the future. (JLB)

Identifiers—*Multimedia Materials, Teacher Surveys, Utah State University

"Konichi-Wa" is designed to teach Japanese language and culture via a multimedia videodisc, a teacher's guide, and supplemental cultural materials. Its objectives are to provide a learning experience for children in grades K-6 with instruction from a regular classroom teacher who has little or no formal language instruction training in foreign languages. During the winter quarter of the 1993-94 school year, the Instructional Product Evaluation

class from Utah State University was asked to participate in the evaluation of "Konichi Wa." The purpose of this study was to provide formative evaluation findings to be incorporated into producing the next language videodisc package, the Chinese-Korean videodisc. The evaluation procedure was divided into two approaches: to determine if the materials functioned as intended and to determine how effective the materials are when used in a classroom. The results of the evaluation are presented in the following categories: teaching materials; videodisc; cultural materials; and on-site visit. Findings showed that this approach to teaching foreign languages has received enthusiastic implementation and the videodisc works as intended. Included in the appendices are the full evaluation reports from each component and the evaluation instruments. (JLB)

Identifiers—*Grenada

In 1986, an American computer company invited the government of Grenada to install and assess the viability of using computer assisted instruction (CAI) to improve school achievement. This case study reports on the results of this experiment. The Crochu Roman Catholic Primary School was chosen to receive the integrated learning system (ILS) that consisted of a file server, 32 student terminals, teacher guides, student workbooks, and the WICAT K-8 curriculum. This document begins with an overview of the project including information on the school, the ILS, cost and design considerations, and the people involved in the project. Next, early decisions which were vital to the success of the project are discussed. A description of the actual implementation of the ILS follows. Then, the evaluation design and results are examined. The overall impact of CAI on the learning of Crochu students was positive. Other benefits of the system reported were in the form of individual improvement; success in passing the Common Entrance Exam; and the impact of CAI on the community. Finally, the conclusions and implications of the study are presented. (Contains 16 references.) (JLB)

Identifiers—*United States (Mid Atlantic States)

This directory presents information on the 1994 census of educational research and development and service improvement organizations in the Mid-Atlantic region (Delaware, the District of Columbia, Maryland, New Jersey, and Pennsylvania). The introduction describes the survey methodology and provides an overview of the research and devel-

opment organizations in the region in terms of the type of organization, services, expertise, clients, size, and costs. An explanation of how to use the directory and sections presenting descriptions and directory information on state departments of education, intermediate service agencies, and ERIC Clearinghouses serving the area follow. Listings of the 97 regional educational resource organizations in alphabetical order comprise the main section of the directory. For each organization, the following information is provided: name, address, telephone number, and contact person; type of agency; staff size; services offered; areas of expertise; costs for services; client groups; and a brief description of the agency. The agencies are indexed by primary services offered and primary areas of expertise. The survey instrument and a list of resource directories consulted are appended. (JLB)

Policy briefs are reports on the status of current issues in education from a national perspective; descriptions of actions and agendas in the North Central Regional Educational Laboratory (NCREL) region; and commentaries by experts from their particular point of view; and resources for further information. The focus of this report is technology and education. The brief begins with a report entitled "Education as a Component of the National Infrastructure" (Dennis Gooler) that examines the role of schools in the national information infrastructure (NII). Next, regional actions and agendas are presented for the states in the region, i.e., Illinois, Indiana, Iowa, Michigan, Minnesota, Ohio, and Wisconsin. The following information is given for each: local efforts; state efforts; financial aspects; key groups in education technology; educational equity; and education technology needs. Recent legislative developments are presented in the report "Recent Legislative Initiatives Expected to Affect Educational Technology," (Rafael Ramirez and Rosemary Bell). Finally, state contacts are listed. (JLB)

The Educational Media and Technology Yearbook (EMTY) is designed to provide media and

instructional technology professionals with an up-to-date, single-source overview and assessment of the field of educational technology. Each volume offers organized access to the hot topics, trends, issues, and advancements in the field, with comprehensive coverage of developments in theory, hardware, software, dissemination, applications, organizations, and delivery systems. EMTY 1994 is divided into eight parts. Part 1 focuses on trends and issues and includes articles that address the definition of instructional technology and current literature. Part 2 covers the profession as a whole, including seven articles that discuss new curriculum developments, research and development, and criticism. Current developments in the field, such as networking, alternative assessment, school-university partnerships, and telecommunications are discussed in part 3. Part 4 presents leadership profiles of Carolyn Guss and Mendel Sherman. Part 5 provides reports from seven professional organizations. Several hundred pertinent organizations are listed in the annotated entries of Part 6. Part 7 covers graduate programs, scholarships, fellowships, and awards currently available in the field. Finally, Part 8 contains a resource list of media-related books, journals, articles, and ERIC documents. An index is provided. (MES)

Surry, Daniel W. Gustafson, Kent L.

The Role of Perceptions in the Adoption of Computer-Based Learning.

Pub Date—[94]

Note—28p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Adoption (Ideas), *Attitudes, *Computer Assisted Instruction, Diffusion (Communication), Educational Change, Educational Technology, *Instructional Innovation, *Meteorology, Multimedia Instruction, Training Methods

Identifiers—*Weather Forecasting

This study sought to determine the role that perceptions played in the adoption of an instructional innovation. According to current diffusion theories, an innovation is more likely to be adopted if potential adopters have favorable perceptions in regard to its complexity, compatibility, relative advantage, observability, and trialability. Three computer-based learning (CBL) modules represented the innovation in this study. These modules were developed for use in three weather forecasting agencies and were to be used as on-site training for forecasters. The research design involved the use of questionnaires and interviews to determine the perceptions of the potential adopters in regard to the CBL modules. A total of 29 potential adopters were interviewed for this study. Results showed that potential adopters consistently used three of the attributes listed above to discuss their perception of the innovation. The researchers concluded that compatibility, complexity, and relative advantage can be important considerations when introducing an innovation into instructional settings. The researchers also concluded that Rogers (1983) theory of perceived attributes can be a valuable tool for instructional developers working to increase the utilization of their products. Identifiers—Pennsylvania, Research for Better Schools Incorporated

This document presents the second year evaluation of the CAI/Cooperative Learning Project. The purpose of this project is to develop a national model for integrating computer-assisted instruction (CAI) through an integrated learning system. The project is a collaborative effort by two Pennsylvania school districts, Hatboro-Horsham and Pittston Area, and Research for Better Schools (RBS). This report begins with an introduction that provides background information on the project and the evaluation questions addressed by the study. Next, the evaluation design and procedures are described including design, student sample, instrumentation, and data collection and analysis. The findings of the evaluation questions for year two are presented in two sub-sections: program implementation and program outcomes. The program implementation sub-section presents data from both the Hatboro-Horsham and Pittston Area School Districts while the program outcome section includes data only from the Pittston Area. Finally, conclusions drawn from this evaluation and implications for year three are presented and examined. Included in the appendix are the surveys used in the evaluation as well as the mean survey responses for rated items. (JLB)

An Investigation into the Feasibility of Using Computer Technology in Achievement Directed Leadership.

Research for Better Schools, Inc., Philadelphia, Pa. Spons Agency—Department of Education, Washington, DC.

Pub Date—Aug 85

Note—53p.

Pub Type—Reports - Research (143) - Computer Programs (101) - Tests/Questionnaires (160)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Academic Achievement, *Basic Skills, Computer Software Development, *Computer Uses in Education, *Decision Making, Elementary Secondary Education, Field Tests, *Instructional Improvement, Microcomputers, Questionnaires, *Research Utilization

Identifiers—*Achievement Directed Leadership Program, Research for Better Schools Incorporated

Between 1977 and 1981, the Basic Skills Component of Research for Better Schools worked with education agencies to develop a research-based approach to improving basic skills instruction and student achievement. Called Achievement Directed Leadership (ADL), the approach was field tested extensively in three school districts during the 1981-82 school year. It is noted that these tests provided persuasive evidence that educators could be trained to use research findings to monitor and manage critical classroom processes, and further evidence strongly suggested that student achievement improved according to the degree of ADL implementation. A key element in the project was the development of a microcomputer program to facilitate the collection and management of quantitative data by educators for their instructional decision making. The introduction to this report provides an overview of the investigation, a description of ADL, and a discussion of the use of microcomputers in schools. The methodology of the project is then presented, including the plan of investigation and the procedure. The section on the conduct of the investigation and findings of the project describes the design of the microcomputer-based support system for the ADL; the component's efforts to modify commercially available software to assist educators with the management of ADL; and the development and evaluation of an in-house software program, CONFERENCE. Finally, the conclusion addresses the technical feasibility and advantages for users in using the microcomputer for ADL data-based decision making. Included in the appendices are data collection forms, the principal/teacher conference form, and the CONFERENCE program code. (JLB)

ment, Individual Instruction, *Instructional Improvement, *Mathematics Instruction, Microcomputers, Young Adults
 Identifiers—Research for Better Schools Incorporated

This paper presents the final report of a project designed to produce an effective individualized adult learning program in mathematics. The need for such a project has been reflected in the reports of national commissions and studies which provided documentation and statistics on the lack of proficiency of adults and young adults in the basic skills of mathematics. The purpose of this project was to convert to a computer-assisted format an existing program, "Individualized Learning for Adults (ILA)-Mathematics." Five objectives were involved in the effort: (1) to revise the ILA Mathematics curriculum content; (2) to revise the ILA testing and diagnostic measures; (3) to computerize the revised ILA curriculum content; (4) to computerize the revised testing and diagnostic measures; and (5) to disseminate/evaluate the new ILA/CAI math curriculum. The introduction to the report presents the problem and need which led to the project as well as the procedures and strategies used in carrying it out. A section on accomplishments then reviews each of the project objectives together with the procedures used to achieve the individual objectives and the accomplishments realized for each objective. The final section presents conclusions and recommendations. Findings indicated that four of the objectives of the original plan were achieved, while objective five was only partially met. (JLB)

Beaudoin, Michele. And Others. Position Paper on Learning Resource Centres and their Future in the Ontario Community College System: A Technology Perspective.

Georgian Coll. of Applied Arts and Tech., Barrie (Ontario).

Pub Date—Oct 93

Note—21p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Access to Information, Classroom Design, *Community Colleges, *Computer Assisted Instruction, Curriculum Development, Distance Education, Educational Change, *Educational Technology, Educational Trends, Foreign Countries, Futures (of Society), *Information Literacy, *Learning Resources Centers, *Technological Advancement, Telecommunications, Trend Analysis, Two Year Colleges

Identifiers—Ontario

The Learning Resource Centres (LRCs) of Ontario (Canada) are in the midst of a technological metamorphosis unprecedented in their 25-year history. The LRCs are becoming centers for independent, self-paced, experiential learning, places in which students actively create, evaluate, experience, and interpret a world of information through technology. LRCs in Ontario are being influenced by national, provincial, and local trends. As they adopt a broader vision of the future, they plan for important roles in: (1) information literacy; (2) alternative learning; (3) software; (4) production; (5) instructional telecommunications; (6) distance education; (7) curriculum design and delivery; and (8) classroom design. Few of the Ontario LRCs are structurally, financially, or technologically prepared for their new and expanded roles. A transformed role for the LRCs implies significant change in alternative learning, information literacy, leadership, access, standards, staff training, and funding. (Contains 44 references.) (SLD)

Identifiers—*Digital Imagery, *Library Materials Conservation, Yale University CT

Digital image quality, indexing structures, and production workflow were the three central issues examined during the second phase of the set-up phase of Project Open Book, a major effort by Yale University Library to explore the usefulness of digital technologies for preserving and improving access to deteriorating documents. This report outlines the incremental progress made during the set-up phase and describes the results of Yale's investigation into the administrative requirements for high-volume production conversion. In 1993, Yale set up and evaluated components of an in-house production-conversion facility, converted and indexed 100 volumes in a test run, and prepared for the conversion from preservation microfilm of the next 3,000 volumes of a projected 10,000-volume digital library. A production workflow plan was developed that stressed the importance of working with vendors, training staff, and broad administrative sup-

port. The set-up phase focused intensely on process quality, efficient ways to use existing database technology, and specific steps in the conversion process. The production-conversion phase will define requirements for conversion and validate the conversion model. (Contains 11 references.) (SLD)

Resource Strategies in the 90s: Trends in ARL University Libraries. Occasional Paper 16.

Association of Research Libraries, Washington, D.C. Office of Management Services.

Report No.—ISBN-0-918006-72-4

Pub Date—Mar 94

Note—47p.

Pub Type—Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Academic Libraries, Administrators, Budgeting, Educational Finance, Foreign Countries, Higher Education, Income, *Library Administration, Library Development, *Library Funding, Library Services, Library Surveys, Questionnaires, *Research Libraries, *Resource Allocation, Retrenchment, *Shared Library Resources, Surveys, Tables (Data), Trend Analysis

Identifiers—Association of Research Libraries, Canada, United States

In 1992 the Association of Research Libraries (ARL) surveyed administrators in member libraries regarding resource strategies of the previous three years. This paper summarizes revenue activities, adaptive tactics, and budgetary practices reported by 87 Canadian, U.S. private, and U.S. public university libraries and establishes a baseline for comparing these factors. The period from 1990 to 1992 has been a difficult one for ARL members, with the largest reductions in public support experienced by public university libraries. All respondents sought outside revenues to supplement their campus allocations. Virtually every responding library had experienced some form of internal restructuring, and three of every five had eliminated positions over the three-year survey period. Administrators valued flexibility in fund reallocation very highly, but few had much control over carrying unspent funds to the next year. While 88% of respondents expected the demand for services to grow, only 32% anticipated budget increases. Greater selectivity in activities and greater library sharing are likely to result from the economic realities. Three appendices contain the survey summary results, the cover letter, and the questionnaire. (Contains 33 references.)

Pub Type—Guides - Classroom - Teacher (052) — Tests/Questionnaires (160)

EDRS Price - MF01/PC09 Plus Postage.

Descriptors—Computer Software, *Databases, Foreign Countries, Higher Education, Indexing, *Information Literacy, Instructional Materials, Library Education, *Online Searching, Online Systems, *Online Vendors, Reference Services, Relevance (Information Retrieval), *Search Strategies, Spanish, *User Needs (Information)

Identifiers—*DIALOG

As an introduction to the use of the DIALOG online retrieval service, this guide presents material that was developed during a fellowship at Carlos III University, School of Library Science and Documentation, Madrid (Spain) and that is based on a course on the same subject taught in English at Texas Women's University. Although the use of DIALOG presupposes a knowledge of English, this guide is presented in Spanish for the convenience of its intended audience. In addition, DIALOG is constantly improving its software and the details and recommendations here are based on the software available in April 1994. The lessons cover (1) online information retrieval; (2) databases; (3) production, structure, and organization of databases; (4) determination of the user's objectives through interviewing and beginning the online search; (5) the search process; (6) DIALOG rules; (7) rules and techniques for DIALOG searches; (8) online searching as a communication process; (9) characteristics of languages and their effectiveness in retrieval; (10) retrieval and indexing; (11) evaluation of search effectiveness; (12) types of search strategies; and (13) DIALINDEX and OneSearch. Appendixes contain possible final examinations, transparencies, practice exercises, and instructions for connecting to DIALOG. (SLD)

Descriptors—Annotated Bibliographies, Civil Liberties, *Cultural Differences, Elementary Secondary Education, Ethnic Bias, *Ethnic Groups, Foreign Countries, Minority Groups, *Multicultural Education, Organizations (Groups), Racial Bias, Resource Materials

Identifiers—Alberta, *Multicultural Materials

This annotated bibliography was created as a result of ongoing collaboration between Alberta (Canada) Education and Alberta Community Development on the topic of multiculturalism. It identifies some of the best resources which are available to schools in order to make these resources known to teachers and principals. The entries have been selected and evaluated to ensure a good curriculum fit, practicality, availability, and balance across grades. The approximately 500 print and audio-visual resources form a base on which to build programs and library collections. Each entry contains the following information (if available): grade level; author; title; publication information; ISBN; and annotation. The material has been organized into the following sections: Teacher References; Bibliographies and Catalogues; Africans; Afro-Americans (includes Canada); West Indians; Chinese; Japanese; South East Asians; South Asians; People of the Near and Middle East; Central and South Americans; Europeans; North American natives (except the Inuit); The Inuit; Series; Human Rights; Racism; and Additional Materials. A list of relevant Canadian agencies, an author index, and a title index are also included. (JLB)

Identifiers—Australia

This paper focuses on a program at Marist Sisters' College, Woolwich (MSCW), an Australian secondary school, that integrates information skills into subject curriculums. A description of the school which includes its philosophy and ethnic makeup is presented to give a context for the program. The research project investigated the impact of information skills on learning and teaching. An interdisciplinary planning team was established to help teachers develop information skills in the classroom. The team found that there were four levels of commitment in regard to the program: resistance, curiosity, acceptance, and commitment. The team implemented two strategies to help teachers progress through the stages: a demonstration program was set up so that teachers could observe the process; and teachers were involved in negotiating lesson planning. Both qualitative and quantitative data were gathered to evaluate the program. Both teachers and students found the addition of information skills to the curriculum to be beneficial. These skills had an impact on students' self perception, learning processes, learning outcomes, and on the learning environments. The paper concludes by discussing the role of school administrators in integrating information skills into the curriculum. (Contains 10 references.) (JLB)

Starting Point: Guidelines, Standards and a Framework for Establishing a National Literacy Information and Communication Network.

National Inst. for Literacy, Washington, DC.

Pub Date—[Jul 94]

Note—114p.

Available from—National Institute for Literacy, 800 Connecticut Avenue, N.W., Suite 200, Washington, DC 20006.

Pub Type—Guides - Non-Classroom (055) — Reports - Descriptive (141)

EDRS Price - MF01/PC05 Plus Postage.

Descriptors—*Access to Information, Cataloging, Computer Software, *Databases, Federal Legislation, Guidelines, *Information Dissemination, *Information Networks, *Literacy, Literacy Education, National Programs, Organizational Objectives, Resource Materials, Standards

Identifiers—*Database Development, National Literacy Act 1991

The National Institute for Literacy (NIFL) was charged with developing a National Literacy Database. This manual contains standards, guidelines, and a framework to be used when adding literacy resources to the National Literacy Information and Communication Network. As more state literacy resource centers (SLRCs) and literacy organizations implement these standards, the NIFL can make available all literacy-related information and material through a single point of contact. This Network will provide a consistent, reliable, and central source of literacy information. The manual opens with the vision statement of the NIFL Information and Communication System. The next two sections deal with cataloging literacy material and provide the MARC format, guidelines, and samples to be used when adding unpublished materials and organization information. The literacy thesaurus to be used for subject headings will eventually be added to the manual. Issues relating to the purchase of automation software for SLRCs are covered in the software section. A listing of software packages available in the marketplace is also included. The final section introduces guidelines for the dissemination of literacy materials. Included in the appendices are the text of "The National Literacy Act of 1991" and lists of work groups and their members. (JLB)

Identifiers—*Louisiana

This document presents the five year library plan for public libraries in Louisiana. It identifies the specific inadequacies in public library services, resources, facilities, and personnel; identifies the people who are to be served; reveals the geographical, sociological, economic, and educational barriers to the expanded use of libraries; and presents specific goals and objectives as part of an overall plan to overcome both inadequacies and barriers. The document begins with a statement of purpose followed by a description of the public libraries served. Also included is an overview of the services the state library provides. The identification of needs and plans of action are presented in the form of 21 goals which make up the major part of the report. For each goal, the following information is given: the standard it is built from (if available); status/needs; objectives; activities; and evaluation procedures. The goals cover such topics as administration; areas without services; areas with inadequate services; community information and referral centers; drug abuse information and prevention; child care centers and providers; literacy programs; handicapped access; multicultural issues; services to special populations; and library networks. Four appendices contain: the Louisiana State Library organization chart; 10 maps providing information on minority populations, correctional institutions, long-term care facilities and other pertinent areas of need; and sections of the Library Services and Construction Act. Identifiers—National Center for Education Statistics

The tables in this report summarize information about public libraries in fiscal year 1992. These data were collected through the fifth Public Libraries Survey. Respondents for this census were the 8,946 public libraries identified in the 50 states and the District of Columbia by state library agencies. Nearly 71 percent of the population of legally served areas in the United States was served by 957 (nearly 11 percent) public libraries; over 81 percent of public libraries had only 1 service outlet; total operating expenditures for public libraries were over \$4.5 billion in 1992; and public libraries reported a total of 109,933 paid full-time equivalent staff. This report begins by presenting highlights of the findings. The introduction then describes the terminology used in the document; the universe represented by the data; data collection and use of the technology; and quality review of the data. Also included are caveats for using the data; information on ordering machine readable data and publications; and a source for further information on public library sta-

tistics. The data are presented in 17 pairs of tables, which make up the major part of the report. The information includes data on staffing; operating income and expenditures; type of governance; type of administrative structure; size of collection; and service measures such as reference transactions, public service hours, interlibrary loans, circulation, and library visits. The appendices include background on the Federal State Cooperative System (FSCS), a glossary, and a list of states with overlapping population of legal service areas. (JLB)

Slavit, David

The Effect of Graphing Calculators on Students' Conceptions of Function.

Pub Date—Apr 94

Note—48p.; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Reports - Research (143)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Algebra, *Calculators, Computation, Educational Technology, *Functions (Mathematics), *Graphs, High Schools, Learning Processes, *Mathematics Instruction, Models, Problem Solving, *Secondary School Mathematics

Identifiers—*Graphing (Mathematics)

This paper has two goals. The first is to present a model of the acquisition of a concept image of function. Theories describing the objectification of function are outlined through two different but related paths, and both stem from the conception of function as a process. The first path to objectification involves the generalization of the process view into one based on relationships between sets. The second path deals with function as an object possessing various properties, such as extrema and continuity. The second goal is to present the results of a year-long investigation on the acquisition of a function concept image in a high school Algebra II course which made significant use of the graphing calculator (GC). It was found that the students were able to define function objectively, but discussions and problem solving behaviors suggesting objectification occurred to a lesser degree. The graphic representation allowed objectification to occur more readily, and the use of the GC appeared to facilitate students' translation ability between functional representations. Students increased their use of the GC throughout the year, particularly on tasks which required graphical thinking. Misconceptions directly resulting from the use of the GC were also identified. Circumstances and Experiences That Lead to Incorporating Telecommunications into Teaching Practices.

Pub Date—Apr 94

Note—27p.; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Reports - Research (143)—Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Computer Assisted Instruction, *Computer Attitudes, *Computer Networks, Educational Innovation, Educational Technology, Elementary Secondary Education, *Information Networks, Instructional Improvement, State Programs, Teacher Attitudes, *Teacher Participation, Teaching Methods, *Telecommunications, Use Studies

Identifiers—Access to Computers, Interactive Systems, University of Virginia, *Virginia Public Education Network

In 1991, educators at the Curry School of Education at the University of Virginia began developing ideas for integrating telecommunications into the instructional practices of public school teachers using Virginia's Public Education Network. Teachers from across the state were invited to participate in a telecommunications project called the Electronic Academic Village, consisting of a variety of electronic resources developed for elementary, middle, and high school teachers. Teachers had the option of utilizing existing resources or initiating projects which corresponded to their curricular needs. During the first two years of the project, patterns of use emerged. Although the teachers had training, support, and access to equipment in their classrooms, some were not participating. Six individual case

studies were developed based on teachers' levels of participation in telecommunications projects. Three had relatively high levels of participation, and three had low levels. Data from the individual cases of high and low users were compared using cross-case analysis. Findings indicated that teachers who were integrating telecommunications into their teaching practices valued the use of an interactive learning network; figured out how to use it instructionally; received support from other users; and had access to computer equipment at home. Circumstances and experiences that did not appear to impact on use were the number of computers in a school and the principal's level of knowledge and interest in telecommunications. Public Libraries Survey, FY 1992. Data Base Documentation.

National Center for Education Statistics (ED), Washington, DC.

Pub Date—92

Note—55p.; For the report based on this survey, see IR 055 206. The machine-readable data file documented here is available from NCES and requires a DOS-based system with a minimum of 9 MB of available hard drive space (see Announcement NCES-94-030a appended).

Pub Type—Machine-Readable Data Files (102)—Numerical/Quantitative Data (110)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Branch Libraries, *Databases, Financial Support, Interlibrary Loans, Library Circulation, Library Collections, *Library Statistics, Library Surveys, National Surveys, Nonprint Media, *Public Libraries, Reference Services, State Libraries

Identifiers—National Center for Education Statistics

The Public Libraries Survey has been conducted annually since 1988 by the National Center for Education Statistics (NCES) through the Federal-State Cooperative System for Public Library Data (FSCS). The survey collects identifying information and basic data on public libraries (8946 in 1992) and their outlets in the United States; identifying information on library entities that provide public library services but do not meet the definition of a public library, (i.e., state library agencies, and systems, federations, and cooperative services); selected data on state library outlets; and a few data items on characteristics of the state data submission. The survey collects 33 basic data items and 11 identifying items on public libraries. Five files were generated from the survey: (1) the Public Library Data file; (2) the Public Library Outlet file; (3) the Public Library State Summary/State Characteristics File; (4) the Administrative Entities Only/State Libraries File; and (5) the State Library Outlet file. Included in the database documentation are a survey summary; file description; and record layouts. The appendices include: the survey methodology; guidelines for processing the files; data entry screens; and data element definitions and instructions. (Author/JLB)

Descriptors—Adult Basic Education, Adult Education, *Adult Literacy, *Adult Reading Programs, Basic Skills, Federal Aid, Federal Legislation, *Federal Programs, *Library Services, *Literacy Education, Public Libraries, State Libraries

Identifiers—Library Legislation, *Library Services and Construction Act

This document examines the types of projects funded by the Library Literacy Program in fiscal year 1993. The variety of literacy activities supported under the Library Services and Construction Act (LSCA) Title VI reflects the diversity of literacy

needs in states and communities across the United States. Many factors influence a library's choice of activities for a literacy project: demographics of the target population; economic base of the community; availability of literacy services; nature of existing literacy or adult education services; and availability of human and material literacy resources. Section I discusses major developments taking place among the LSCA Title VI projects and includes selected examples; Section II is a summary of the characteristics common to most of the LSCA Title VI projects; Section III presents several projects that are using unique approaches to provide literacy services; Section IV provides an exhaustive list of literacy activities culled from all the projects; Section V lists project activities, alphabetically by state and library; and Section VI is a statistical analysis of fiscal year 1993 applications and grantees. Regulatory Enhancement and Connecticut's Cautious First Step in Establishing a Statewide, Interactive, Distance Learning Interconnection.

Pub Date—Sep 94

Note—27p.; Paper presented at the NARUC Biennial Regulatory Information Conference (9th, Columbus, OH, September 6-9, 1994).

Pub Type—Reports - Evaluative (142) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Cable Television, *Distance Education, *Educational Television, Elementary Secondary Education, Federal Legislation, Interactive Television, Programming (Broadcast), State Legislation, *State Programs, Technological Advancement

Identifiers—Connecticut, Telecommunications Policy

This paper is concerned with the recent developments in federal and state legislation regarding cable franchises and their effect on the establishment of a statewide distance learning network. It begins with an overview of recent legislation regarding cable regulations and presents issues regarding distance education. These include linking cable franchises with new trunking cable, allowing single signals to be received by single towns; remote educational protocols; and developing educational programming agreements. Regulatory enhancements and their effects on educational programming are examined. Video dial tone trials which allow video programming over traditional copper lines are introduced. Remote educational protocols for distance networks are discussed. Federal initiatives have given money and legislation to be used in developing regional educational networks. The changes that advances in technology have made in distance education are examined. Finally, the implications of these new developments for Connecticut are identified. (JLB)

Descriptors—Access to Information, Authority Control (Information), Book Reviews, *Cataloging, Childrens Libraries, *Childrens Literature, Classification, *Cultural Differences, Elementary Secondary Education, Ethnic Groups, Foreign Language Books, Library Collection Development, *Library Material Selection, *Multicultural Education, Reading Materials, School Libraries, Spanish, Subject Index Terms

Identifiers—*Multicultural Materials

This paper examines the process of selecting, evaluating, integrating, and cataloging multicultural texts for school libraries. The first part examines the selection and evaluation of culturally authentic texts. Seven sources for locating multicultural literature and several reviewing sources are listed. The following criteria for evaluating multicultural are identified: accuracy and authenticity; avoidance of stereotypes; and use of language and dialect. Suggestions for integrating culturally diverse literature throughout the curriculum are given: sharing the

contributions of other cultures; adding stories from other cultures; and choosing books which transform and mobilize readers. The second part of the paper examines the challenges of cataloging culturally diverse material, especially Spanish language materials. Two areas of cataloging are identified that present problems: (1) routine cataloging and authority control issues; and (2) problems unique to specific physical formats. Specific problems related to subject access are addressed, and a strategy is presented to create a new method for subject assignment to Spanish language materials to ensure access for all patrons. Analyses of New Jersey Public Library Statistics for 1992.

New Jersey State Library, Trenton.

Pub Date—Oct 93

Note—165p.; For New Jersey Public Library Statistics 1992, see ED 373 805. Cover title varies slightly.

Pub Type—Numerical/Quantitative Data (110) - Reports - Research (143)

EDRS Price - MF01/PC07 Plus Postage.

Descriptors—Data Analysis, Library Circulation, Library Collections, Library Expenditures, Library Personnel, *Library Statistics, Library Surveys, *Public Libraries, State Libraries, State Surveys, Tables (Data)

Identifiers—*New Jersey

The purpose of this volume is to add meaning to the statistics of New Jersey's diverse public libraries. This report interprets data obtained from the annual reports of 295 public libraries in the state. The report begins with an introduction describing how the data were analyzed. The introduction then displays the following tables graphically to illustrate some of the trends that occur as population or total expenditure increase: local tax support per capita; percentage of staff with professional certification; equalized valuation per capita; and materials expenditures as a percentage of total expenses. Also included are suggested uses for the tables. The analyses of the data are presented in four categories: all public libraries in New Jersey; public libraries by region; public libraries by population served; and public libraries by total expenditures. Information provided includes the following: equalized valuation per capita; local tax support per capita; state library aid as a percentage of total income; salaries, wages, and benefits as a percentage of total expenditures; library materials as a percentage of total expenditures; circulation per capita; and total expenditures. Public School Library Media Centers in 12 States: Report of the NCLIS/ALA Survey.

National Commission on Libraries and Information Science, Washington, D. C.

Pub Date—Apr 94

Note—259p.

Pub Type—Reports - Research (143) - Tests/Questionnaires (160) - Numerical/Quantitative Data (110)

EDRS Price - MF01/PC11 Plus Postage.

Descriptors—Elementary Secondary Education, *Learning Resources Centers, Library Associations, Library Collections, *Library Expenditures, *Library Services, *Library Statistics, Library Surveys, Media Specialists, National Surveys, *Public Schools, *School Libraries

Identifiers—American Library Association, National Commission Libraries Information Science In 1993, both the American Library Association (ALA) and the National Commission on Libraries and Information Science (NCLIS) concluded that up-to-date statistics about school library media centers (LMCs) were needed in light of current state and local reform efforts and pending federal legislation related to the National Education Goals. A questionnaire was sent to school libraries in 12 states to obtain information for a "snapshot" of the current status of LMCs. This report begins with a letter to the President of the United States presenting the highlights of the findings, including the following: many LMCs are poorly equipped to support instruction; half of elementary school libraries buy less than one book per student per year; and almost no LMCs have access to the Internet. The introduction then describes the rationale for the study and the survey methodology. Also included are comments on the data, including observations on four

topics: material resources, working with teachers, technology, and expenditures. The data are presented in the 26 tables that make up the major part of this report; they are arranged alphabetically by state. The information presented includes data on expenditures, items acquired, staff, currentness and quantity of resources to support the instructional program, rating of entire collection to support multicultural education, number of computers, and use of the LMC during the school week. The survey instrument is appended. (JLB)

ED 374 819 IR 055 222

Holt, Wanda Clements Holt, Cynthia

Adult Library Patrons with Disabilities: An Assessment of Information Access Needs.

Phoenix Public Library, AZ.

Pub Date—May 94

Note—165p.; Prepared by the Special Needs Center.

Pub Type—Reports - Evaluative (142) - Tests/Questionnaires (160)

EDRS Price - MF01/PC07 Plus Postage.

Descriptors—*Accessibility (for Disabled), *Access to Information, *Adults, Assistive Devices (for Disabled), *Disabilities, Individual Needs, Library Personnel, Library Services, Long Range Planning, *Needs Assessment, User Needs (Information), User Satisfaction (Information), Use Studies

Identifiers—Arizona, *Special Needs Individuals

The Phoenix Public Library's Special Needs Center (SNC) has provided service to disabled patrons and professionals who serve the disabled community for over 10 years. Determined to stay abreast of changing needs, the SNC initiated a needs assessment project which included staff, professionals, and patrons. The purposes of the needs assessment were to: (1) assist with long range planning; (2) identify patron and professional needs; (3) document needs that can be used in preparing grant proposals; and (4) identify additional areas in which the SNC may be of service. The data were gathered through the use of staff, patron, and professional surveys. Data indicated patrons most often used special needs services/resources for personal enjoyment while professionals used services for their jobs, to assist clients, and for professional development. Among patrons, highest use of services occurred in the Large Print Books by Mail Program, using staff to help locate references, and use of assistive technology to read materials. Highest areas of use among professionals were related to braille production, checking out regular print books in the Center, word processing in the computer workplace, and using Center reference materials. Based on a review of the literature and analysis of the needs assessment data, an "Information Access Planning Guide" was developed to assist in planning. The survey instruments used in the study are appended. (Contains 25 references.) (JLB)

Evaluation of a Current Awareness Service in an Academic Library.

Pub Date—Aug 94

Note—14p.

Pub Type—Reports - Research (143) - Tests/Questionnaires (160)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Academic Libraries, Access to Information, Communication (Thought Transfer), Delivery Systems, *Faculty, Higher Education, *Library Services, *Reference Services, *Selective Dissemination of Information

Identifiers—New Mexico State University

This paper describes the evaluation of a current awareness or selective dissemination of information (SDI) service at New Mexico State University. To provide expanded library services to faculty, a current awareness service was offered to 18 science departments in 1991. A profile for each researcher enrolled was entered into a program and was run against "Current Contents" diskettes weekly. Each week relevant citations were delivered to the faculty member who could then request the articles to be delivered. After 18 months of the service, a questionnaire was mailed to the faculty using the service. The purpose of this evaluation was to determine the level of satisfaction and to develop a method for deciding which profiles needed updating. There were 71 responses out of 98 profiles, for a response rate of 72%. It was concluded from the findings that the users were satisfied with the service; the majority of citations received were considered relevant;

35% of the users needed revision of their profiles; and few faculty members took advantage of the document delivery service. The survey instrument is included. (JLB)

Setting Up a Library: How To Begin or Being Again. CSLA Guide No. 1. Second Revised Edition.

Church and Synagogue Library Association, Portland, OR.

Report No.—ISBN-0-915324-37-7

Pub Date—94

Note—24p.; For the first edition, see ED 316 251.

This edition is expanded and enlarged to incorporate material from "Running a Library: Managing the Congregation's Library with Care, Confidence, and Common Sense," (Seabury, 1982) now out of print.

Available from—Church and Synagogue Library Association, P.O. Box 19337, Portland, OR 97280-0337 (\$7; members \$5.50).

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Guidelines, Library Administration, Library Associations, Library Collection Development, *Library Development, *Library Planning, Library Services, Mission Statements, Outreach Programs, *Special Libraries
Identifiers—Church and Synagogue Library Association PA, *Church Libraries, *Synagogue Libraries

Designed as a simple how-to guide, this revised handbook presents guidelines for setting up a church or synagogue library or revitalizing an existing one. The first section, "Begin with a Purpose," advocates preparing a statement of purpose. The second step, "Be Prepared," discusses the importance of the planning process. Section 3, "Obtain Approval," suggests ways to make sure the congregation approves of the library and supports it. The fourth, "Organize a Library Committee," provides the procedures to establish a library committee. "Staff the Library" examines how to find people to manage the library, acquire and maintain its collection, and to operate its services. Step 6, "Survey Your Assets," suggests how to gather existing materials, sort and store them, and how to review the collection and user requirements. The seventh, "Establish Basic Policies," gives examples of library policies. Step 8, "Develop Action Plans," provides the steps of the planning process. The ninth section, "Carry Out the Plan," provides suggestions for implementing the plan. Step 10, "Provide for Continuity," recommends preparing annual reports and plans. The final section, "Stretch Your Horizons," examines outreach possibilities with the community, congregational libraries, and professional librarians. A planning worksheet is appended. (JLB)

Kusack, James M.

Evaluating Library Buildings: Principles and Procedures for Post-Occupancy Evaluation.

Connecticut State Library, Hartford.

Spons Agency—Department of Education, Washington, DC.

Pub Date—Mar 91

Note—28p.; This study was funded through the Library Services and Construction Act (LSCA).

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Evaluation, *Evaluation Methods, Facility Guidelines, Facility Improvement, Facility Planning, Library Development, *Library Facilities, *Library Planning

This manual provides the steps in planning a post-occupancy evaluation of library facilities to determine how effective the designed environment is for users. Evaluating a building provides a feedback loop to the planning process and can help fine tune the building or help others. The first actions of the planners are to clarify the purpose; gain support and endorsement; determine limitations or constraints; and determine level of efforts. They should also learn where to look and to identify objectives of the evaluation. When designing the evaluation, planners will have to decide where the information will come from and who should be involved in the process. The methodology of the evaluation needs to be chosen and the following methods are described: sampling and statistics; performance measures; questionnaires; interviews; focus groups; diaries; and unobtrusive measures. The manual addresses

expert evaluations; sequence of access; staff productivity; hierarchy of use; machine requirements; and physical design considerations. Finally, the processes of conducting the study and reporting of the findings are examined. A planning outline is appended. (Contains 11 references.) (JLB)

Identifiers—Indiana, *Outcome Based Education

This report was produced by the 18 participants enrolled in a week-long summer institute conducted at the Center for Excellence in Education at Indiana University and sponsored by the Indiana Department of Education. The purpose of this institute was to give school people the time and resources to identify and apply technological solutions to restructuring issues. Working in small groups, the participants investigated how technology might support the following areas of restructuring: authentic assessment; learning styles and multiple intelligences; life-long learning; outcome-based education; student-as-worker; and thematic instruction. Participants formulated inquiry questions; reviewed professional journal articles; read books; conducted ERIC searches; interviewed local, state, and national experts; and explored software and hardware. Each group submitted a finished report. This document is a compilation of those six reports. Each group report contains the following components: a brief description of the group members; a definition and description of the inquiry topic; issues, concerns, and problems in implementing the topic; inquiry questions; resources and references; reviews of articles and software; scenarios or outlines of implementation strategies; and final comments. The AIME Statewide Survey of School Library Media Centers: Expenditures & Collections.

Association for Indiana Media Educators, Bloomington.

Pub Date—94

Note—61p.

Journal Cit—Indiana Media Journal; v16 n3 p103-162 Spr 1994

Pub Type—Journal Articles (080)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Audiovisual Aids, Books, Electronic Equipment, Elementary Secondary Education, *Learning Resources Centers, *Library Collections, *Library Expenditures, *Library Statistics, *Library Surveys, Media Specialists, *School Libraries, State Surveys
Identifiers—Indiana

This report is based on an Indiana statewide survey of school library media center collections, budgets, and services which was sponsored by the Association for Indiana Media Educators (AIME). Completed and usable surveys were received from 823 public and private school library media programs representing 44% of the total possible school library programs in the state. Of these surveyed programs, 42% are elementary, 32% are junior high or middle school, and 26% are senior high school. Information on three levels—baseline, comparative, and relationships—is presented through a series of questions so that practicing school library media specialists and school administrators can clearly identify data that can be applied to their local program. Part A contains the following data on budget and expenditures: average amount invested, per pupil, for the purchase of books, periodicals, and equipment; the average amount, per pupil, obtained for school library media center programs from federal funding. Indiana Capital Projects, and gift

sources; and the average dollar amount, per pupil, for total program expenditures. Part B contains information on school library media program collections, including average number, per pupil, of titles and volumes of books, audiovisual titles, computer and video programs housed in the library; average number of items—materials or equipment—per pupil, added to and deleted from the library; the ages of the book and audiovisual collections; and the distribution of the book collection among divisions of fiction, non-fiction, reference, and biographies. (Contains 20 references.) (JLB)

Descriptors—Access to Information, Computer Networks, *Government Role, *Information Networks, *Information Policy, *Planning
Identifiers—*Information Infrastructure

In order to ensure that the United States maintains an advanced information infrastructure, the Council on Competitiveness has started a project on the 21st century infrastructure. Participating in this project are the many different parties who are providing and using the infrastructure, including cable companies, regional Bell companies, long distance carriers, cellular firms, computer hardware and software companies, banks, publishers, and universities. Although these groups do not agree on all issues, the Council hopes to develop a consensus to accelerate the deployment of an advanced information infrastructure. This vision statement represents such a consensus. The document begins with an executive summary. The vision statement is then presented. It addresses the need for an advanced information infrastructure and covers the following issues: (1) why the information infrastructure is important; (2) where the United States stands; (3) what the vision is; (4) the roles of the government and the private sector; (5) where to go from here; and (6) what the next steps are in obtaining this goal. Innovation for the Common Man: Avoiding the Pitfalls of Implementing New Technologies.

Pub Date—May 94

Note—19p.; Paper presented at the Annual Conference on Rural Datafication (2nd, Minneapolis, MN, May 24, 1994).

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Adoption (Ideas), *Computer Uses in Education, Diffusion (Communication), *Educational Change, Elementary Secondary Education, Instructional Improvement, *Instructional Innovation, *Rural Schools

Citing the failure of film, radio, and television to revolutionize the American education system, this paper identifies reasons for those failures and suggests ways to avoid similar failure in the diffusion of computer use in education and the diffusion of "datafication" into the homes of rural America. Four steps are identified to facilitate the introduction of technological change and to increase its acceptance by those who will use it: (1) find solutions for discovered needs rather than finding needs for discovered solutions; (2) build support from the grassroots up rather than from the bureaucracy down; (3) make technology work for the users rather than making users work for the technology; and (4) give customers what they want, not just what they need. Additional steps are identified for the diffusion of datafication of rural schools: pay attention to needs of users rather than the discoveries of researchers; let the users express how technology can benefit them; keep the innovation simple; and sell the benefits of change. Descriptors—Academic Libraries, Access to Information, *Bibliographic Records, Bibliographic Utilities, *Cataloging, Financial Support, Graphs, Higher Education, Latin American Culture, Latin American History, Latin American Literature, Library Automation, *Library Collections, *Online Catalogs, *Preservation, Records Management, Research Libraries, Retrospective Conversion (Library Catalogs), Surveys

Identifiers—*Latin American Studies

This report offers a baseline survey of the retrospective strength of, access to, and preservation of Latin Americanist resources in North American libraries. Information about collections, online bibliographic control, and the need for preservation is derived from analyses of a 550-item sample of Latin Americanist materials published between 1935 and 1965. Results of the analyses suggest that North American libraries have done a fairly good job of acquiring mainstream research materials from and about Latin America. Only 20 items from the 550-item sample are not held in the United States. Most are represented in the major online bibliographic utilities, OCLC and RLIN. Results suggest that continued funding for retrospective conversion and delayed original cataloging is a crucial component for increasing access to Latin Americanist publications. While findings highlight significant progress in providing machine-readable access to bibliographic records in Latin Americanist studies, they underscore the fact that preservation reformatting has so far saved only a small portion of the Latin American imprints. Four appendixes list projects for conversion and cataloging and details of study methodology. Fifty-two figures (graphs) illustrate relative holdings. (SLD)

Community College Internal Auditors: Internal Audit Guidebook.

Community Coll. Internal Auditors, Inc.

Pub Date—Sep 91

Note—72p.

Pub Type—Guides - Non-Classroom (055) — Tests/Questionnaires (160)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Accountability, Administrator Responsibility, Administrator Role, *Audits (Verification), Community Colleges, Evaluation Methods, Organizational Effectiveness, *Policy Formation, Program Evaluation, Quality Control, *School Effectiveness, *Self Evaluation (Groups), Two Year Colleges

Identifiers—*California, *Internal Auditors

This guidebook includes information compiled by the "Audit Manual" committee of Community College Internal Auditors (CCIA) from several California community college districts regarding their internal auditing practices. The first section of the guidebook discusses the purpose of internal audits, indicating that audits assist members of the organization in the effective discharge of their responsibilities by furnishing analyses, appraisals, and recommendations concerning institutional activities. The second section discusses reporting relationships, including the relationship which auditors must maintain with the organization being investigated, suggesting that auditors should be independent of the activities they audit. The next section describes the obligations of internal auditors, including responsibilities for tasks other than internal audits, fraud detection, peer review, and audit scheduling and budgeting. Internal audit charters are discussed in the next section, which contains sample charters from several districts, designed to clearly define audit objectives, authorities, and responsibilities. The fifth section provides standards for the professional practice of internal auditing and audit manuals for two college districts. After a section presenting sample job descriptions for community college internal auditors in California, the

seventh section provides a list of professional organizations and a bibliography of reference books. The final section presents the results of the CCIA's April 1991 survey of California community colleges, which gathered information on organizational structure, charter, operational responsibilities, compensation, staffing, and professional resources of internal audit functions. New Models for American Higher Education.

Pub Date—Apr 91

Note—15p.

Pub Type—Opinion Papers (120) — Historical Materials (060)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Community Colleges, *Educational Change, *Educational History, Educational Practices, Educational Trends, *Higher Education, *Organizational Change, Organizational Development, Two Year Colleges, Two Year College Students

The establishment, design, and location of American higher education institutions correlate directly with the evolution of American thinking regarding the nature of democracy, the knowledge required by the citizenry for full participation in democracy and the "American Dream," and the progression of the American economy from an agrarian to an industrial, and later to a technological base. Early American colleges were based upon the model of European colleges, which provided liberal arts curricula to ruling and upper class youth. In the increasingly industrialized society of the late 1700's, an influx of technological ideas created a need for a better educated population, and the demand for public support and control of higher education increased. Two articles of legislation provided major public support of higher education: the Morrill Act of 1862 provided 30,000 acres of public land to each congressman for the establishment of colleges of agriculture and mechanic arts, while the Servicemen's Readjustment Act of 1944, commonly known as the "G.I. Bill of Rights," provided tuition, subsistence, books, supplies, and counseling services for World War II veterans. Another major impetus on higher education has been the Basic Grant Program first passed by Congress in 1972. These monies have allowed millions of previously disenfranchised students access to higher education. Community colleges, which had their greatest growth during the 1960's and 1970's, began in the early 1900's as junior colleges designed to provide free or inexpensive education beyond high school to the area's citizens. Because the American economy is becoming more knowledge based, community colleges should provide educational facilities and support services, allowing other institutions to provide upper division and graduate instructional programs. Figures showing fastest growing occupations by general training requirements are included. Five footnotes contain reference information. (MAB)

Scanning the Front Range Environment: A Statistical Snapshot of the Front Range Community College Service Area.

Front Range Community Coll., Westminster, CO.

Pub Date—Aug 93

Note—70p.

Pub Type—Collected Works - General (020)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*College Planning, Community Colleges, *Economic Factors, Educational Environment, *Environmental Scanning, Futures (of Society), Long Range Planning, *Organizational Change, *Social Change, *Trend Analysis, Two Year Colleges

Identifiers—Front Range Community College CO

This environmental scanning report from Front Range Community College (FRCC) in Colorado examines trends in population, demographics, income, and education in the college's service area. The report begins with Kathleen Cain's essay, "Environmental Scanning," indicating that the four major objectives of environmental scanning are to detect scientific, technical, social, and political interactions and other elements important to the organization; to define potential threats, opportunities, or changes for the organization by those events; to promote an orientation toward the future in management and staff; and to alert management and staff to trends which are converging, diverging, speeding up, slowing down, or interacting. Next, the report presents several essays and interviews offer-

ing the perspectives of staff and members of the community, including: (1) "The Community College in the Community," by Eric Reno; (2) "FRCC's Economic Development Role," an interview with Jack Keever; (3) "Scanning and Change: A Concrete Example," by Leo Giles; (4) "The Changing Role of Women in Higher Education," by Susan Hartman; (5) "Distance Learning and the Future of Education," by Steve Tilson; (6) "Fostering Diversity: A President's View," by Tom Gonzales; (7) "Networking: Mutual Benefit is the Key," an interview with Jill Marce; (8) "Collaboration: A Deliberate Process," by Mary F. Johnston; and (9) "A Systematic Approach: The Times Demand It," by Dave Braman. The remainder of the report provides statistical profiles of 15 primary communities and four counties that make up the FRCC service area, including income, employment, and demographic data. (KP)

This report provides 31 charts showing trends in enrollment; transfer students; and ethnic and gender characteristics of students, faculty, and staff at Diablo Valley College (DVC), in California, up to fall 1992. Following a brief introduction highlighting statewide trends, charts are provided for the following areas: (1) DVC fall enrollments from 1984 to 1992; (2) student type (e.g., continuing, first-time, etc.), level of educational attainment, gender, part- and full-time status, ethnicity, and age for 1987-1992; (3) spring high school graduates, 1990 to 1992, highlighting graduates from the Acalanes, Mt. Diablo, and San Ramon school districts and percentages enrolled at DVC; (4) number of high school students tested and percent enrolled at DVC by district for 1991 and 1992; (5) DVC fall grade distributions, 1986 through 1991; (6) number of transfer students and destinations, 1986-87 through 1990-91; (7) the top ten community colleges with respect to numbers of students transferred, 1986-87 through 1990-91; (8) ethnic distribution of new faculty hires and all faculty, 1984-85 through 1992-93; (9) ethnic distribution of full-time and all employees, fall 1992; (10) gender distribution of new faculty hires, 1984-85 through 1992-93; (11) gender distribution of full-time employees, fall 1992; (12) average daily attendance (ADA) at DVC's main, Pleasant Hills, and San Ramon campuses, 1990-91; and (13) full year ADA/full time equivalency comparisons for the three sites, 1987-88 through 1991-92. Identifiers—Diablo Valley College CA, *Transfer Rates (College)

Focusing on the transfer function at Diablo Valley College (DVC), in California, this report offers 1991 and 1992 transfer data drawn from reports issued by the University of California (UC), the California State University (CSU), and the Los Angeles-based Center for the Study of Community Colleges (CSCC). Following introductory materials, the UC report on fall 1991 and 1992 transfers is reviewed, indicating that 70% of the DVC students who applied to UC in fall 1992 were admitted, compared to 72% for all California community colleges; most of

DVC's transfers were to UC Davis and Berkeley; of the DVC students who were admitted to a UC school, 231 were female, 245 were male, 8 were African-American, 88 were Asian, 37 were Hispanic, and 18 were Filipino; and compared to proportions in enrollments and DVC's service region in 1989, a smaller number of African-Americans transferred to UC in 1992 than might be expected, while larger than expected numbers of Asians, Hispanics, and Filipinos did so. Data generated by the CSU for 1992-93 are then reviewed, indicating that DVC transferred 37 African-American, 58 Hispanic, and 90 Asian students to CSU in 1992, and that based on 1989 enrollments a larger number of African-Americans transferred to CSU than expected, while smaller than expected numbers of Hispanic and White students did so. Finally, data from the CASC are outlined, showing that DVC had a transfer rate of 42% for fall 1992, compared to 22% for all the 61 colleges participating in the CASC study. (KP)

Factors Affecting Retention of New Students in Their First Semester: Fall 1992 Cohort.

Diablo Valley Coll. Pleasant Hill, Calif.

Pub Date—Jan 94

Note—25p.

Pub Type—Numerical/Quantitative Data (110) — Reports — Research (143)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Age Differences, Community Colleges, *Dropout Characteristics, Dropout Rate, Dropout Research, *Dropouts, *Enrollment Influences, Ethnic Groups, *School Holding Power, *Student Attrition, Student Behavior, *Student Educational Objectives, Student Motivation, Two Year Colleges, *Two Year College Students, Withdrawal (Education), Working Hours

Identifiers—Diablo Valley College CA

To determine factors affecting new students in their first semester, a study was conducted at Diablo Valley College, in California, to draw a profile and track 4,251 students who applied or were identified as new in fall 1992. Percentage distributions were calculated for the sample and for the sub-groups who applied only, completed testing only, completed orientation courses only, and dropped all courses. Study findings included the following: (1) 69.2% (n=2,944) of the sample completed the semester, while 403 applied but did not attend, 221 completed testing and failed to return, 304 completed up to Counseling 105, 20 completed up to Counseling 105A, and 359 dropped all their courses; (2) those who applied but did not attend were more likely to have indicated a goal of other than transfer or vocational degree and were planning to work 31 or more hours per week; (3) students stopping after testing were more likely to be over 30 and planning to transfer without an associate degree; (4) students who stopped after completing the first counseling course were more likely to be between 25 and 29, and have an objective of a vocational degree, general education diploma, certificate, or to maintain a license; (5) those who dropped all their classes were more likely to have an educational objective other than transfer, have graduated prior to spring 1992, and be planning to work more than 30 hours a week; and (6) finally, students who completed the semester were more likely to be under 20 or over 30 and have chosen transfer as their objective. Providing data on institutional trends up to fall 1993 at Diablo Valley College, in California, this report consists of 14 charts on enrollment and student characteristics. Following an introduction describing a general decline in enrollments due to a statewide increase in fees, the following tables are

provided: (1) fall enrollment from 1984 to 1993, showing an enrollment of 20,709 for 1993; (2) first-time, continuing, and transfer status of students, 1987-93, indicating that first-time students decreased by 26.6%, first-time transfer students decreased by 23.6%, returning students decreased by 10.8%, and returning transfer students decreased by 21.2% from 1992 to 1993; (3) student level of educational attainment, 1987-93, showing a 7.7% decrease in freshman students from fall 1992; (4) student gender, 1987-93, indicating that 54.5% of students were female in 1993; (5) part-/full-time status of students and part-/full-time status by gender, 1987-93, revealing a 12.5% decrease in part-time students from 1992 to 1993; (6) student enrollment by time of day (day/evening) and by time of day by gender, 1989-93, indicating that the number of evening-only students decreased by 10.4% in 1993, and that men registered as day-only increased by 3.2% in 1993, compared to a 3% decrease for day-only women; (7) student ethnicity, 1987-93, showing a 14.7% decrease in White students from 1992 to 1993; (8) student age, 1987-93, indicating that the largest group of students (n=6,340) were between 20 and 24 years of age; and (9) credit student age by gender, indicating that the largest age group for women was 30-49, while the largest group for men was 20-24. Declining Feeder High School Enrollments at Diablo Valley College, Fall 1993.

Diablo Valley Coll. Pleasant Hill, Calif.

Pub Date—Jan 94

Note—8p.

Pub Type—Numerical/Quantitative Data (110) — Reports — Research (143)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—Community Colleges, *Declining Enrollment, Enrollment, *Enrollment Influences, *Enrollment Trends, *Feeder Patterns, High School Graduates, Two Year Colleges

Identifiers—Diablo Valley College CA

Analyses of enrollment figures at Diablo Valley College (DVC), in California, indicate that the number of students under 20 years of age attending has been declining. DVC's enrollments are dependent on what happens in the college's feeder areas, since the number of recent high school graduates directly affects enrollment at the college. While the State Department of Finance predicts that the number of high school graduates in DVC's county has reached bottom and begun to increase, the number of graduates from DVC's feeder schools does not show that trend. The data indicate that in fall 1993 a smaller number of most graduating classes enrolled in courses at DVC than had been the case in the last three years. Enrollment statistics indicate that 23% of the fall 1993 graduates from the Alacranes multiple high school district enrolled, compared to 30% in 1992; 38% of the Mt. Diablo district graduates enrolled, compared to 30% in 1992; and 28% of the San Ramon district graduates enrolled, compared to 32% in 1992. Percentages were also down from the single high school districts of Alhambra (36% versus 60% in 1992), Carondelet (17% versus 31% in 1992), and De LaSalle (30% versus 37% in 1992). The college must determine if the decline is the result of recent state-mandated fee increases, and determine appropriate responses. Charts and tables are included. (KP)

Matriculation Evaluation Using the New Student Cohort, Fall 1992.

Diablo Valley Coll. Pleasant Hill, Calif.

Pub Date—Aug 94

Note—20p.

Pub Type—Numerical/Quantitative Data (110) — Reports — Research (143)

EDRS Price — MF01/PC01 Plus Postage.

Descriptors—*Academic Persistence, *Admission (School), Community Colleges, Comparative Analysis, Grade Point Average, *School Holding Power, Student Behavior, *Student Characteristics, *Student Educational Objectives, Two Year Colleges, Two Year College Students

Identifiers—Diablo Valley College CA

An analysis of student matriculation was conducted at Diablo Valley College, in California, using the cohort of 4,251 students identified as new in fall 1992. Data indicate that 22.3% of this cohort did not enroll in any courses after applying, being tested, and completing orientation and advising;

8.4% continued on in the semester, but dropped all their courses; and 69.3% completed the semester. To determine characteristics of students by academic outcome, students were further identified as fully matriculated (FM) (e.g., having completed all assessment, orientation, and advisement components), partially matriculated (PM) (e.g., having components left to complete), exempt from the components, and not matriculated (NM). Results of the analysis included the following: (1) 80% of the FM students chose transfer as an educational goal, compared to 69% of the PM, 13% of the exempt, and 42% of the NM students; (2) 82% of the NM students completed fall 1992, while 79% of the exempt, 44% of the NM, and 38% of the PM students did so; (3) 100% of the FM students enrolled in at least one subsequent semester by fall 1993; (4) FM students enrolled in and completed more units than students in other groups; and (5) while only 39% of the NM students had a grade point average of 2.0 or higher, 64% of the FM and 50% of the PM students did. Recommendations for intervention strategies and data tables are included. (KP)

Identifiers—*Customer Services

To develop a college-wide resolution process for dealing with student concerns, Burlington County College, in New Jersey, undertook a planning effort involving the faculty, student, staff, and administrator senates in the college's governance system. Rather than appoint an administrator to lead the project, a member of the staff senate was selected to lead a 15-member team composed of members of all the governance senates and charged with the development of a customer service philosophy and resolution process. The team began by looking at 165 past examples of student requests for intervention as a springboard to developing a system-wide method of collecting reliable customer service data, or a Customer Service System (CSS). The next step was to provide employees with training related to the customer service process itself, as well as hands-on experience with the CSS. A course, "A Quality Improvement Customer Service Process," was presented in one-day workshops to all employees and an in-house customer service videotape was developed. All new employees receive a customer service manual and are shown a copy of the video. Lessons learned by the planning team in this improvement effort included the following: (1) employee involvement is essential; (2) every employee must be encouraged to improve quality service; (3) cross-functional teams produce better outcomes; (4) continuous improvement must be structured and ongoing; and (5) achieving quality improvement takes hard work but the benefits to customers and employees are enormous. ity Management, Two Year Colleges

A formal governance system was adopted by the Board of Trustees in April 1991 at Burlington County College in New Jersey after the Middle States Association of Colleges and Schools observed that it was lacking. The policy defines the path for maintaining a governance structure which fosters clear and timely communication within and among the college community. Senates of administrators, college staff, faculty, and students were formed to provide representation for all college constituencies. Governance Forums and regular President's breakfasts with leadership from each of the senates were implemented to improve campus communications. Officers from each senate work with elected representatives from their constituencies to study specific issues, while recommendations are presented for discussion and subsequently voted on by the membership before being formally presented to the President. Many recommendations generated by the staff senate have been approved, including the following: (1) the addition of a benefits specialist position; (2) a secretarial pool feasibility study; (3) a process for dealing with on-the-job injuries; and (4) an employee award to recognize special efforts. In addition, an Academic Secretaries Roundtable was created to improve commonly shared work processes, which led to the formation of a Quality Council of secretaries and administrators charged with meeting the needs of constituents; improving work processes; fostering communication and understanding; and supporting other quality service initiatives. (The Board of Trustees policy on governance is appended.) (KP)

Identifiers—Customer Relations, *Customer Services

Prepared for use by staff in development workshops at Burlington County College (BCC), in New Jersey, this handbook offers college-wide guidelines for improving the quality of service provided to internal and external customers, and reviews key elements of BCC's Customer Service System (CSS), a computerized method of recording and following-up on complaints. Following introductory materials, the purpose of the workshop theme, "Managing Customer Concerns," is described as supporting a professional service environment by increasing knowledge about college-wide procedures and examining a dynamic customer service process. Next, key terms in the process are defined, including "receiver," or the individual receiving a customer's inquiry; "owner area," or the place where individuals charged with providing information and assistance are located; and "owner," or the first administrator in line in the owner area. Receiver and owner tasks in a customer inquiry are then delineated and a process model is presented for dealing with customer inquiries or complaints. Next, a review is provided of guidelines and procedures related to in-person and telephone customer relations skills; issues related to student confidentiality; and such special cases as complaints related to racial and sexual harassment and assisting disabled students. Finally, issues concerning the use of the CSS are reviewed, including definitions of terms, the need for sensitivity in creating CSS records, access to the system, and system commands. A CSS records format is appended. (KP)

Focusing on data for 1992-93, this institutional profile provides information on students, faculty, staff, finance, facilities, and services at Wallace Community College Selma (WCCS), in Alabama. Following an introductory section providing a history of WCCS and reviewing the college's mission and goals, the report provides detailed student data and includes information on: credit hour production from 1987 to 1993; credit enrollment for 1988 to 1992; credit enrollment by race, sex, and county; credit enrollment characteristics; feeder high school enrollment; enrollment by program, 1989-93; awards conferred; student financial aid profiles; non-credit enrollment; companies served through business and industry instruction; and job placement statistics, 1988-93. The next section provides data on WCCS' Educational Talent Search Program, an effort involving nine target high schools to promote college attendance through student services. Next, a brief report on WCCS's experiences with Tech Prep is presented. The following section provides data on school personnel, including salaries, race, gender, employment status, and full- and part-time faculty characteristics. Following data on fall 1992 library resources, financial data are provided for 1988-1993, including expenditures by function and object, revenues by source, and foundation revenues. Next, data on physical plant assets and a results of a building inventory are presented. The report then provides information on the Alabama Community College system, including data on credit hour production, student headcount by race and sex, and personnel classified by salary schedule. Data tables; campus, service area, and system maps; and a report evaluation form are included. (KP)

Identifiers—San Joaquin Delta College CA

As part of an effort to stem an unexpected decline in full-time equivalent students (FTES), San Joaquin Delta College, in California, surveyed students to determine their reasons for taking fewer courses and assess their likely reaction to fee increases scheduled for spring 1993. In fall 1993, 2,329 surveys were distributed to students in morning and evening classes, resulting in 1,676 usable surveys. Survey findings included the following: (1) approximately 40% of the students reported that they were unable to enroll in all the classes they wanted in the current semester, while 68% of these students reported full classes as the main barrier; (2) one-third said they would have to cut back on the number of classes, and 12% said they might have to drop out of school, as the result of planned fee increases; (3) for the 4% of the students who already had a bachelor's degree, and thus were subject to higher fee increases, 38% indicated that they would be forced to leave the college; (4) the total FTE loss was estimated at 1,583 FTES; and (5) students receiving financial aid were less likely to be impacted than the general population. An analysis conducted subsequent to the spring 1993 fee increases indicated that students did not drop out at the rates suggested by their survey responses and that drop-outs were com-

pensated by new student entries which actually increased FTE rates over the previous spring. The survey instrument is included. (KP)

Identifiers—*San Joaquin Delta College CA

In response to an accreditation team's concern over the status of affirmative action, the campus atmosphere toward women and ethnic minorities, and involvement of staff in decision-making at San Joaquin Delta College (SJDC), in California, the college conducted a survey of staff attitudes. A questionnaire was distributed to all 942 full- and part-time faculty, administrators, and classified staff in December 1992, resulting in 359 usable responses for a sample that closely matched college demographics. Survey findings included the following: (1) 45% of the respondents agreed and 9% disagreed that SJDC was making a strong effort to recruit women into management, while for women only 30% agreed compared to 60% of men; (2) 67% of the male respondents disagreed that sexism was a major problem at the college, compared to 40% for females; (3) staff as a whole indicated that SJDC was making a strong effort to recruit minorities and that they were well represented in management positions, while both Hispanic and Black employees indicated disagreement; (4) only 26% of the staff believed that committees created to expand shared governance had much influence on major decisions, compared to 34% who did not believe so and 40% who were neutral or had no opinion; and (5) analysis of the findings offered insight into unity and dissension of staff attitudes, with Black, Hispanic, and classified staff members workers more likely to give negative responses and managers, men, and full-time faculty less likely. The survey instrument is appended. (KP)

Descriptors—Administrators, Affirmative Action, Community Colleges, *Diversity (Institutional), *Enrollment Trends, *Faculty Integration, Graduation, *Minority Groups, *Racial Composition, Student Characteristics, Two Year Colleges, Two Year College Students

Identifiers—*Graduation Rate, San Joaquin Delta College CA

To provide a progress report on efforts to increase access to minority students and diversify the teaching and administrative ranks, a study was conducted at San Joaquin Delta College (SJDC), in California, of recent trends in minority student attendance and graduation rates and the ethnic composition of faculty and administrative staff. Results of the analysis included the following: (1) as of July 1993, students attending SJDC generally reflected the ethnic composition of the district population, although whites and Hispanics were underrepresented relative to their district proportions and Asians were overrepresented; (2) for the 1986-87 and 1992-93 academic years, the ethnic composition of students receiving degrees and certificates was remarkably similar to the ethnic make-up of the student population 3

years previously; (3) since 1986-87, the percent of white administrators has declined from 81% to 71%, with a corresponding increase in minority administrators from 19% to 29%; (4) Hispanic administrators have increased from 8% to 13% in this period, compared to an increase from 4% to 11% for Blacks and a decrease from 6% to 5% for Asians; and (5) the percent of white full-time faculty has declined from 82% to 74% in this period, with Hispanics increasing from 7% to 10%, Blacks from 5% to 7%, and Asians from 6% to 9%. Identifiers—*San Joaquin Delta College CA

This planning document provides data on current operations as of January 1994 and goals for the future at San Joaquin Delta College, in California. Section I, presents the context for planning at the college, describing the following major factors shaping the college's future: (1) the population is rapidly expanding; (2) fee increases and reductions in base support will impact enrollment projections; (3) the college's student body will be ethnically transformed; (4) a larger number of economically and educationally disadvantaged students will attend; and (5) declining agricultural and manufacturing sectors will create a need for more occupational training programs. Section II presents the college mission statement, and section III offers institutional goals for the near term future regarding instructional quality; student access and success; community relations; governance issues; quality of facilities and equipment. Section IV then provides specific operational plans related to facilities, computer services, matriculation, instruction plan, student services, affirmative action, and faculty and staff diversity. Section V provides statistics on indicators of progress, including student access, student success, student satisfaction, equity and affirmative action, and the college's fiscal condition. The final section, reviews three major enhancements to the college's planning system that should be accomplished to ensure a successful future: establish a rigorous program review system, expand current plans into a system of management by objectives, and integrate planning and budgeting. Descriptors—*Accreditation (Institutions), Accrediting Agencies, Community Colleges, *Evaluation Methods, Evaluation Research, *Evaluators, Mail Surveys, *Participant Satisfaction, Two Year Colleges

In 1993, the Accrediting Commission for Community and Junior Colleges initiated a comprehensive evaluation of the standards and procedures it uses to accredit colleges. The Commission asked the Research and Planning Group for California Community Colleges to carry out the survey. A total of 1,361 questionnaires were mailed to representative members of visiting teams and staff members from colleges which had been accredited using the 1990 standards. Study findings, based on a 70% response rate, included the following: (1) both team members and staff members who prepared self-studies were supportive of the overall accreditation process, including the Commission handbooks, orientation, team composition, and clarity of communications; (2) evaluation standards were judged to be appropriate; (3) the process was perceived to be useful in promoting self-evaluation, planning, and program review; clarifying college mission and goals; and

monitoring college processes; (4) a majority of the respondents felt that accreditation stimulates institutional improvement, certifies that colleges are meeting their goals, provides broad assurance of quality to the public, and helps develop consensus on standards of good practice; and (5) respondents were critical of the accreditation process with respect to its helpfulness in complex budgetary, staffing, and leadership areas; clarity of standards; the Commission's willingness to take negative actions when warranted; and colleges' lack of speed in taking action on accreditation recommendations. The survey report includes data on procedures and outcomes; a comparison of findings with a 1987 survey; and policy questions raised by survey findings. (KP)

Identifiers—*Southwestern College CA

A longitudinal study was conducted at Southwestern College (SWC) in Chula Vista, California, to assess the impact of the matriculation process on SWC students. Three groups of students were compared: students who started "Pre-Matriculation" (in 1985); students who started during the "Phase-In" (in 1987); and students who started "Post-Matriculation" (in 1989). The study compared the enrollment patterns, academic performance, and academic experiences of these three groups during the first five semesters of their possible enrollment at SWC. Study findings, based on an examination of the transcripts of 6,381 first-time students entering during 1 of the 3 study years, included the following: (1) the gender and age make up of the three groups remained essential the same, though during the period there was a shift in ethnicity from Anglo to Hispanic and a shift toward a higher percentage of students seeking to transfer; (2) about 60% of the students enrolled for two consecutive semesters; (3) by the third semester, 46% of all entering students from each cohort were enrolled in at least one course; (4) differences in retention, and units attempted and completed were much more pronounced across age groups over the five semesters than after the first semester; and (5) there was little relationship between matriculation and first semester retention rate, number of units completed, or successful pass rates. Identifiers—Tallahassee Community College FL

Drawing from data provided by the Florida Education and Training Placement Information Program (FETPIP), this series of reports provides follow-up information on FTIC students entering Tallahassee Community College (TCC) in fall 1990. The four reports compare students based on race, entry level test pass rates, full-/part-time status, and grade point average (GPA). Highlighted findings include the following: (1) the fall 1990 FTIC cohort contained 1,428 students; (2) by fall 1991, only 57% of the original cohort were still enrolled at TCC, and another 10% were enrolled in another college or

university; (3) compared to white students (who comprised 75% of the cohort), black students were less likely to be enrolled in college, were attending a smaller number of transfer institutions, and were less likely to remain in college until fall 1992; (4) of the original cohort, 73.5% passed the reading placement test, 64.1% passed the writing placement test, and 46.7% passed all three placement tests; (5) fall 1992 retention rates for those passing the placement tests were between 48% and 49%, while retention rates for those failing one of the tests were between 33% and 39%; (6) 66% of the original fall 1990 cohort were enrolled part-time, and 34% were enrolled full-time; (7) students who began at TCC as part-timers were less likely to remain enrolled, less likely to transfer, and less likely to earn degrees, but more likely to be employed full-time; and (8) students who were successful academically at TCC during their first semester were more likely to remain in college than those who were not. Descriptors—*College Planning, Community Colleges, Program Descriptions, *School Schedules, *Total Quality Management, Two Year Colleges

Identifiers—Continuous Quality Improvement, Hazard Community College KY

The Academic Council at Hazard Community College in Kentucky applied the Continuous Quality Improvement (CQI) process to improve the college's method for class scheduling. Four specific CQI steps were applied: Focus, Analyze, Develop, and Execute. The first step was for the Quality Action Team (QAT) to focus on making a clear written statement of scheduling problems. The analysis step found ineffective coordination among division chairs; little or no proofing for errors or conflicts; and lack of adherence to deadlines. Developing a

plan for solving these problems was the next step. The team agreed that the plan would: (1) use a master matrix to show utilization of all classes, rooms, and times; (2) involve faculty, staff, and students to gain their commitment to forward planning and minimize changes; (3) build a student-focused schedule; (4) prepare a timeline that would allow for necessary changes, editing, and printing; and (5) increase coordination with other college units. The execution of the plan is scheduled for Fall 1994. The QAT is confident about the schedule and agreed to allow only changes which came about as a result of new hires, or class cancellations. (KP)

Descriptors—*Accountability, *College Outcomes Assessment, Community Colleges, Educational Assessment, *Educational Change, Evaluation Criteria, *Policy Analysis, Public Policy, Two Year Colleges

Identifiers—*California

Community college reform legislation in California mandates the development and implementation of a comprehensive accountability model. The reform model implemented during the 1991-92 academic year will provide the legislature and state officials with outcomes and process data in five areas of community college services: student access, student success, student satisfaction, staff composition, and fiscal condition. The overall intent of this reform is to improve teaching and learning at community colleges. Uses for accountability reform include public relations; inter-college and district comparisons; program review and evaluation; campus budgets; and monitoring local indicators. The literature suggests that currently designed reform measures may not reach these intended goals. To increase the likelihood of successful implementation, institutional assessment should be driven by teaching and learning goals, and indicators should include more than outcomes-only data. Outcomes indicators might best be composite indicators comprised of collegiate context, student characteristics, process, and environmental variables measured longitudinally. The proposed model for accountability uses indicators not as barometers of effectiveness, but indicative of the conditions that facilitate positive change. Contains 15 references. (KP)

A study was conducted in October 1987 to evaluate student indebtedness at four matched pairs of community and senior colleges in Florida, California, Nebraska, and New York. Questionnaires and return envelopes were sent to 5,149 students registered in credit-course at the eight institutions, resulting in 616 usable responses, including 297 from the community and 319 from the senior colleges. Results of the study included the following: (1) respondents were essentially from the lower-middle and middle-middle socio-economic levels; (2) over 23% of the community college respondents (CCR's) and 32.6% of senior college respondents (SCR's) reported borrowing money to attend college; (3) 53.6% of CCR's and 61.5% of SCR's who borrowed money used loan money to meet tuition expenses; (4) in most instances, borrowing took place in the \$1,000-\$6,000 range; (5) for the entire sample of CCR's, only 17.8% reported owing from less than

\$1,000 to \$4,999, while only 0.6% reported owing over \$5,000; (6) of the entire sample of SCR's, 22.6% of students owed less than \$5,000, 6% owed between \$5,000 and \$9,999, and 2.2% owed over \$10,000; (7) the most apparent differences in expected future indebtedness between CCR's and SCR's was in the \$27,000-\$80,999 range, where there were four SCR's and one CCR; (8) only 9.4% of CCR's and 8.2% of SCR's reported that they were not responsible for any of their college costs, while 48.1% of CCR's and 44.8% of SCR's reported that they were responsible for all of their college costs; and (9) 73.7% of CCR's and 72.1% of SCR's reported that their total college expenses were under \$5,000 per year. Contains extensive data tables. (MAB)

The survey instrument contained five separate questionnaires, directed to the college officers responsible for research and planning, academic affairs, financial aid, business affairs, and the office of the president. The questionnaire was mailed to 235 college presidents in October 1987, resulting in a final sample of 129 surveys from technical junior and community colleges in 38 states. Study findings included the following: (1) 36% of the sample institutions enrolled fewer than 1,000 students, while 38.8% enrolled between 1,000 and 4,999; (2) for the research and planning sub-questionnaire, 63% of respondents typified the economic climate to be poor, while over 75% of the sample forecast positive changes in their economic climates due to increasing tax bases and diversified economic bases; (3) other shifts identified by planners included increases in older students, minority students, female students, and part-time students; (4) 28.5% of responding business officers believed that the relative contributions or mix of funding sources would change; and (5) responding college presidents echoed the shifts identified by planners, while 69% gave their institution a rating of 8, 9, or 10 out of 10 in terms of adaptability. Contains data tables and responses to open-ended questions. (KP)

Descriptors—Community Colleges, *Predictive Validity, *Reading Tests, *Standardized Tests, *Student Placement, *Test Reliability, Two Year Colleges, *Two Year College Students

Identifiers—*Assessment and Placement Services, College of the Canyons CA

In July 1994, College of the Canyons (COC) in California conducted several predictive validity studies of the College Board Assessment and Placement Services (APS) Reading Test. COC began using the 35-question objective format test in spring 1993. Fall 1993 test scores were used in determining the ability of the APS Reading Test to predict student success in both basic skills and college-level English courses offered at COC. Correlation coefficients were computed for each English course between the test scores and course grades with withdrawals converted to fails; and between test scores and course grades with withdrawals deleted. The median predictive validity value across all levels was .27, indicating a moderate linear relationship between test scores and course grades. This predictive validity coefficient value is below the .35 level recommended by the Chancellor's Office. In light of

the myriad factors that influence grades other than placement tests, however, the obtained value of the predictive validity of the APS reading test was considered adequate to justify use of the test for placing students into reading courses at COC. Contains two references. (KP)

Identifiers—College of the Canyons CA

A survey was conducted at College of the Canyons (COC) to assess the current status of the campus climate. The survey instrument focused on students' experiences, attitudes about diversity issues, and suggestions for improving the climate for diversity. The survey was mailed to all disabled and under-represented racial/ethnic group students plus a sample of white and Asian populations (N=1,770). Since minorities were oversampled, results were differentially weighted to compensate for bias. Selected survey findings, based on a 30% response rate, included the following: (1) 5% of the respondents felt they had been discriminated against at least occasionally because of their race/ethnicity or age, with Asian/Pacific Islanders most likely to report such experiences; (2) 5% indicated that they had been discriminated against by students; (3) 19% reported having heard "insensitive or disparaging comments" about racial/ethnic minorities by students, 27% had heard students making such comments about gays and lesbians, and 16% had heard negative comments about women; (4) 25% had had at least occasional discussions about sexism with members of the opposite gender which affected them in a positive manner, while 18% had such discussions which affected them negatively; (5) 80% thought that diversity was a good thing for COC and that it should be actively promoted; (6) students felt that it was desirable to create ways for different racial/ethnic groups to interact, and most were opposed to separation and segregation. The survey instrument is attached. (KP)

Identifiers—College of the Canyons CA

This fact book from College of the Canyons (COC) in Santa Clarita, California, details enrollment trends and student characteristics for full-term enrollment from fall 1990 to fall 1993. Tables and brief narratives provide information on the following: COC's enrollment history; part-/full-time headcount; enrollment status; gender of enrolled students; entering academic status; resident/non-resident headcount; student race/ethnicity; educational status; educational goal; age; headcount by major area of study by division; time of class enrollment; citizenship; and primary language. The following trends, identified between 1990 and 1993 include: (1) full-term enrollment increased by 10%; (2) first-time college students decreased from 25% to 18%; (3) the proportion of females students increased by 1.6%; (4) students with sophomore or higher status increased by 35%; (5) white students enrollment decreased from 79% in fall 1990 to 72% in fall 1993; (6) with the advent of higher fees for students who already hold bachelor's degrees in spring 1993, enrollment from this cohort dropped from 8.7% to 3.4%; (7) the number of students who indicated that their goal was to transfer increased from 21.1% in fall 1990 to 49.4% in fall 1993; (8) the

median age of the student body dropped from 23 to 21; (9) enrollment in social and behavioral sciences, mathematics and sciences, and fine arts and humanities increased while enrollment in applied arts and technologies remained static; (10) in the fall of 1993 undeclared majors made up 45% of the student body; and (11) English as the primary language dropped from 98% in 1990 to 91.9% in 1993. Identifiers—College of the Canyons CA

After the conclusion of each academic year, the Computer Center at the College of the Canyons in Santa Clarita, California, compiles a data file of degrees and certificates awarded by the college from July 1 through June 30. This information is transmitted to the Chancellor's Office and becomes part of the statewide Management Information System. The following data were compiled from the Computer Center's files for 1990-94: associate degrees awarded; associate degrees awarded by gender, race/ethnicity, disability, discipline, discipline and gender, discipline and ethnicity, and discipline and disability. Calculations were also made of certificates awarded by time/units required; certificates awarded by gender, race/ethnicity, disability, and discipline. Significant changes during the period were as follows: (1) associate of science (AS) degrees increased by 41.5%; (2) females earning AS degrees increased by 33.3%; and males earning AS degrees increased by 52.9%; (3) Associate of Arts (AA) degrees earned by Latino students increased by 62.5%; (4) AS degrees awarded to females in the biological sciences increased by 366.7%; (5) AA degrees awarded to non-white students in business and management increased by 53.3%, in public affairs and services by 75%, and in interdisciplinary studies by 88%; and (6) AA degrees earned by non-white students increased by 27.3% and by disabled students by 22.2%. Identifiers—Assessment and Placement Services, College of the Canyons CA

A study was conducted to determine how best to use APS Reading Test scores for making English placement recommendations for students at College of the Canyons (COC) in Santa Clarita, California. The primary method used to establish cut scores involves comparing success rates for contrasting groups over a range of scores. The contrasting groups are defined as successful students who earned grades of A, B, C and CR, and unsuccessful students earning grades of D, F, NC or withdrawal. The study population included 213 students from spring 1993, fall 1993 or spring 1994 enrolled in English 010 (N=15), English 034 (N=88), English 080 (N=70), or English 101 (N=40). The students were first-time college students that had taken the APS Reading Test just prior to enrolling in English. Scatter diagrams were prepared to illustrate the relationship between test scores and success in each target class. The scattergrams provide an initial basis for establishing trial cut scores to minimize placement errors. The findings of the study validated the use of the APS Reading Test to support placement decisions for students entering English 034, 080 and 101. Use of the test together with proposed placement rules could increase the rate of

correct placement over the base rate by 9.1% for English 034, and 2.6% for English 101. (KP)

A study was conducted at College of the Canyons (COC) in Santa Clarita, California, to provide preliminary data in monitoring for disproportional impact of placement into basic skills courses for various demographic groups. The study was designed to ascertain whether different levels of basic skills courses differ significantly for students in particular age, gender, ethnic or disability groups based on an assessment instrument, method, or procedure. The tested population was composed of 4,760 first-time students taking one of the four Mathematics Diagnostic Testing Project (MDTP) tests in each of the six semesters (fall 1991, spring 1992, fall 1992, spring 1993, fall 1993, and spring 1994). To compare recommended placements by race/ethnicity, the majority group of white students was compared to a minority group. The 80% rule was used to form a ratio between the percentage of students in each group who would be placed according to the cut score. A figure of fewer than 80% of minority students placed indicates that the placement scheme should be reviewed for discriminatory practices or that a biased test is being employed. The study revealed that: (1) MDTP Algebra Readiness Test scores resulted in disproportionate placements of Latino, African American, Native American, and female students; (2) MDTP Elementary Algebra Test scores resulted in disproportionate placements of Latino, African American, and students age 30 to 49; (3) MDTP Intermediate Algebra Test scores resulted in disproportionate placements of Latino, African American, and Filipino students; (4) MDTP Precalculus Test scores resulted in disproportionate placements of Latino students; and (5) increases in cut scores being considered by the COC mathematics faculty would change but not eliminate the disproportionate placements. Identifiers—*Okaloosa Walton Community College FL

Pursuant to Florida educational legislation, this report presents findings of an educational plant survey conducted in April 1994 at Okaloosa-Walton Community College (OWCC). The report is designed to aid the formulation of plans for housing the educational program, student population, faculty, administrators, staff, and auxiliary and ancillary services of the college for the ensuing 5-year period. Sections 1, 2, and 3 provide background information on the plant survey team, procedural policies, and the cooperative process used in conducting plant surveys in the Florida community college system. Section 4 presents a historical overview of OWCC, including its major purposes, goals, and policies as they relate to the capital improvements program. Section 5 analyzes the student population

and projected enrollment for the 5-year period, while section 6 highlights the program, service, and facility needs of OWCC. Section 7 provides an inventory of existing sites and facilities, including a table of existing satisfactory student stations and space used by faculty, and a discussion of instructional and auxiliary facilities. Section 8 provides a plan for housing programs, students, and services, while section 9 features an analysis of capital outlay finances, including revenue sources for capital outlay. The final section offers recommendations for specific construction, remodeling, and renovation plans, as well as data on site acquisition, development, and improvement needs and costs, totaling \$14,668,904. Descriptors—Administrator Guides, *Administrator Role, College Governing Councils, Community Colleges, Foreign Countries, *Governing Boards, *Policy Analysis, *Policy Formation, *Trustees, Two Year Colleges

Identifiers—College Cambrian College ON

This guide to the policy-making functions of community colleges' boards of trustees is based on a 3-year operational review conducted by Cambrian College in Sudbury, Ontario (Canada). The guide begins by outlining the purposes and processes of Cambrian's governance self-study. Next, differences among Canadian colleges that affect the role of their boards in policy making are noted, including age, size, and governance structure. The characteristics of five types of boards (i.e., working, administrative, administrative/management, management/policy, and policy boards) are outlined next. A list of the characteristics of effective policy boards is followed by lists of the responsibilities of a policy board for a medium- to large-sized college, and of the processes required for board effectiveness. Quotes that illustrate how academics view policy are followed by statements defining and establishing the purpose of governing policies; e.g., governing policies must be future-oriented and above day-to-day operations and the pressures and crises of the moment. Comments on levels of policy (i.e., mission and values; and governing, executive, and operating policy) are followed by charts illustrating areas of policy making and approaches to policy making on the issues of staff development, expense reimbursement, copyright, and graduation requirements by policy level. Guidelines for the governance of policy development cover the steps of identification of need, formulation, adoption, implementation, and review and evaluation of the policy. Next, a checklist provides a framework for individual trustees to use in analyzing the development, establishment, and review of their Board's governing policies and for staff to use in carrying out their related functions. Concluding comments discuss the related issues of policy making and leadership. Contains 10 references. (KP)

Descriptors—Community Colleges, *Counselor Training, *Faculty Development, *Faculty Evaluation, Feedback, *Inservice Teacher Education, Learning Activities, Learning Processes, School Counselors, Teacher Evaluation, Teacher Improvement, Teaching Methods, *Teaching Models, Two Year Colleges

Designed for use as a development activity for

counselors at Bronx Community College in New York, this program provides discussion materials, questionnaires, and worksheets from the college's Counseling Faculty Development Program. A brief introduction indicates that the program encompasses three components, empowering counselors in the teaching role, formative evaluation and supervision, and inservice training. The remainder of the document consists of three sections corresponding to the three program components. Part I focuses on empowering counselors and describes four stages of a self-directed learning model, providing a framework that facilitates a gradual shift in beginning teaching counselors (BTCs) from learners dependent upon an authority to self-directed and independent learners. This section includes questionnaires for evaluating the learning model and the effect of development on counselors and contains nine references. Part II describes formative evaluation through supervision, indicating that BTCs participate in a pre-observation conference with supervisors, are observed, and then participate in a post-observation conference. This section includes questionnaires for evaluating pre- and post-observation conferences and teacher supervisors, and a rating guide for evaluating counselor performance. Contains 18 references. Finally, part III describes the components of inservice training, including presentation of theory, modeling techniques, practice under simulated and classroom conditions, providing feedback, and coaching for application. This section includes a syllabus for inservice training; evaluation forms for the teaching learning module, courses, and the inservice workshops; and a class teaching method questionnaire. Contains 12 references. (KP)

Identifiers—*Assessment of Student Skills for Entry Transfer, Terra Community College OH

In an effort to determine the correlation between assessment placement test scores and grade point average (GPA), a study was conducted at Terra State Community College (TSCC), in Ohio. A sample population was constructed of 93 potential students who took the American College Testing Service Assessment of Student Skills for Entry Transfer (ASSET) placement test Form B and began attending TSCC full-time in fall 1992. The sample consisted of 47 males and 46 females ranging in age from 17 to 47, with a mean age of 21.7. Test scores and course grades were obtained through the TSCC records office. A statistically significant correlation was found between cumulative GPA and all three ASSET scores: written skills, reading skills, and numerical skills. The amount of common variance between the scores and GPA was small, however, registering 16% for written skills, 17% for reading skills, and 8% for numerical skills. The study findings, therefore, could not be considered conclusive. To get a better picture of correlation between these variables, a study should be done on a larger scale, using samples from different ASSET testing years and examining student retention in addition to GPA. Required Courses, Two Year Colleges

Identifiers—*Norwalk Community College CT

In an attempt to revitalize and reform its curriculum, the Associate of Arts-Associate of Science (AA-AS) Degree Review Committee (DRC) of Connecticut's Norwalk Community College issued a curriculum report proposing a 21 credit, limited distributive core for the AS degree (which accounts for 80% of the college's degree recipients). This proposal should not be put into effect, however, since the DRC's recommendations provide a misleading and narrow definition of general education as liberal arts or non-vocational classes. Moreover, the proposal places an emphasis on minimum requirements, doesn't provide students with an opportunity to see the connectedness of knowledge, doesn't provide a balanced distribution of topics in the core, and may limit the adaptability of the curriculum to meet changing educational needs. A better alternative would be a common core of five courses, including interdisciplinary and departmental offerings, for all associate degree students which would provide flexibility for cultural literacy and multicultural education, raise academic standards by maintaining a minimum competency level requirement for entry to core classes, and provide more focused developmental and English as a Second Language programs. In addition, it would hold all faculty responsible for student skill development, eliminate an "educational underclass," rejuvenate faculty by giving them responsibility for curriculum development, and provide a connected view of learning. Despite concerns related to the implementation and transferability of interdisciplinary courses, the college would improve through the process and be on the forefront of curriculum reform. Identifiers—*Barton County Community College KS

This handbook provides information on procedures related to advising and general administrative functions at Barton County Community College (BCCC) in Kansas, in seven parts. Part I describes the philosophy, goals, and objectives guiding academic advising at BCCC and outlines student responsibilities and confidentiality concerns. Part II details campus policies and procedures related to enrollment and admissions, financial aid, business office functions, and assessment, while part III presents guidelines and strategies for performing such advising functions as advisement interviews, determining interview questions, handling upset students, interacting with physically-impaired students, and advising international students and non-native speakers of English. Part IV focuses on the advisement of coursework, highlighting the role and selection of advisors, advisor loads, interpretation of test scores, athletic advising, course waivers, degree and graduation requirements, using video-courses, a state-wide audio network, and academic suspension and probation. Part V provides a manual for using the advising computer program for enrollment, schedules, degree audit, course transfer, transfer equivalency, student ID, low grade reporting, satisfactory progress reports, financial aid, final grade reporting and confidentiality. The final section reviews such common advising processes as change of advisor and major, over-riding enrollments, adds and drops, tutor referral guidelines, final exams, and intent to graduate. Lists of programs and advisors, a glossary of terms, sample forms, and a directory of campus resources are appended. (KP)

Descriptors—*College Faculty, Community Colleges, *Critical Thinking, *General Education, *Interdisciplinary Approach, *Outcomes of Education, Teacher Effectiveness, Two Year Colleges

In the traditional educational model, the accumulation of information is more important than the understanding of conceptual relationships between disciplines. The process of traditional education is to assure that students know the rudiments of conventional wisdom. Interdisciplinary education, on the other hand, is relational. Ideas, their validity, and their relationship to the arts, society, and the human condition are the central issues of the interdisciplinary model. The goal and process of the interdisciplinary method is to interpret primary sources with regard to their expressive intent and contextual meaning. Essential elements of the interdisciplinary method include: (1) a chronological approach; (2) the use of primary sources; and (3) an instructor committed to exploring other disciplines with the aim of integrating and presenting substantiated interpretations. Student outcomes, particularly in the area of critical thinking, are in many ways parallel to the methodology of interdisciplinary education. Unfortunately, even at community colleges that are committed to the concept of interdisciplinary outcomes-based education, success in reaching general education problems are hindered by such problems as the academic mentality of exclusiveness and territoriality and faculty members' inability to think critically and globally about their own fields. Proper implementation of outcomes-based, interdisciplinary education could improve, and perhaps radically change the attitudes and skills of students. The continuous questioning and reevaluation of traditional information is precisely analogous to a thoughtful and engaged lifestyle, the essence of lifelong learning. Its aim is directed toward a per-

sonal understanding of the world that brings about greater individual autonomy, fulfillment, and effectiveness. (KP)

Identifiers—John Tyler Community College VA

In summer 1994, an employer follow-up study was conducted at John Tyler Community College (JTCC), in Chester, Virginia, to gather data on JTCC graduates' preparation for their jobs, attitudes toward work, and adequacy of specific skills. Based on permission granted by graduates, surveys were sent to 127 employers of JTCC graduates, with usable responses being received from 59% (n=75) of the employers. Thirty-two percent of respondents evaluated nursing graduates, about eleven percent evaluated business graduates, while for more than half of the programs only one or two employers responded. Study findings included the following: (1) nearly 70% of the graduates evaluated were female and almost 65% were white; (2) approximately 67.6% of respondents felt that the training received at JTCC adequately prepared graduates for their current position, while 5.45% indicated the training was inadequate; (3) graduates were rated average or above average regarding their general attitude toward work, ability to operate job-related tools, willingness to learn, and analytical/problem-solving skills; (4) about three-fourths of the employees said that they would hire another JTCC graduate; and (5) although few negative ratings were given, graduates' writing and computer skills were evaluated as below average most frequently. Contains a discussion of results by program, responses to open-ended questions, a list of responding employers, and the survey instrument. (KP)

Freshman Orientation: A Comparison of

Five-Week Versus Ten-Week Sessions.

Pub Date—94

Note—18p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Career Planning, *College Freshmen, Community Colleges, Comparative Analysis, *Participant Satisfaction, *Program Effectiveness, Program Evaluation, *School Orientation, *Student Personnel Services, Study Skills, Two Year Colleges

Identifiers—*Class Length

At DeKalb College in Clarkston, Georgia, freshman orientation classes are conducted by the counseling and student personnel staff who present information about career planning, study skills, student activities, college regulation, student seminars, drugs, program planning, and library seminars. Classes meet for 10 hours per quarter. During summer quarter, beginning freshmen were given the option of attending 5 hours of summer orientation sessions with the fall quarter orientation last 5, rather than the traditional 10 weeks. A study was conducted to determine whether the needs of students were satisfied by the orientation classes, and if there were differences between the evaluations of freshmen in the 5-week classes as compared to those in the 10-week classes. Approximately 1,300 freshmen evaluated the classes at the final class session. In general, student evaluations of the 5-week sessions were more positive than evaluations of the 10-week sessions. For example, 91.5% of the freshmen in the 5-week course felt that the program planning session was essential or very important for the beginning freshmen, while 71.5% of the freshmen in the 10-week classes felt the same. The career planning sessions were considered essential or very important by 70.8% of the 5-week sample and 56.4% of the 10-week sample. Drug information and study skills sessions appeared to be the least effective. (KP)

Identifiers—Hudson County Community College NJ

In 1993, two surveys were conducted to determine community perceptions of Hudson County Community College (HCCC) in New Jersey. During January and February 1993, 591 questionnaires regarding HCCC's mission were sent to representatives of business and industry, education, government, community groups and agencies, health and human service organizations, law, insurance, and real estate. In summer 1993, a survey was conducted of the employers of 43 HCCC graduates who had previously given permission for their employers to be contacted. Employers were asked about their satisfaction with the graduates' preparation and their suggestions for strengthening HCCC's programs. Study findings, based on a 25% response rate from the community survey and a 79% response rate to the employer survey, included the following: (1) community respondents felt that the most important HCCC missions were to provide programs preparing students for employment; access through low tuition; programs for transfer into academic and occupation programs; access through financial aid; career planning and placement services; access through support for special needs students; general education in a comprehensive curriculum; career retraining for the unemployed or underemployed; and for the development of a centralized campus; (2) asked to comment about HCCC, community respondents mentioned the need for curricular expansion; English as a Second Language, transfer, and basic skills education; the need for public relations; recent positive leadership; general praise for services; and the importance of having a centralized campus and providing for parking, security, and transportation; and (3) 100% of the employer respondents were satisfied or very satisfied with the preparation of their HCCC-educated employees. Descriptors—*College Role, Community Colleges, *Developmental Studies Programs, *Institutional Mission, Mission Statements, Organizational Objectives, *Outcomes of Education, *Remedial Instruction, *Remedial Programs, Two Year Colleges

Identifiers—Hudson County Community College NJ

Historically, Hudson County Community College (HCCC) in New Jersey has included developmental education within its mission. As a result of a major re-evaluation of the College's offerings and operations during 1992, it was recommended that: (1) the college formulate curricula that would serve students who do not progress to college-level study so that they will obtain skills to enable them to enter the working world; (2) maintain assessment and developmental services for academically underprepared students; and (3) obtain alternative funding programs for students in pre-college remedial programs. The mission statement approved in April 1993 included the importance of access regardless of educational preparation and basic skills instruction.

JC 940 565

tion. In a comprehensive review of academic progress of students who began as freshmen in 1989, 20% began in degree programs; 30% began in developmental education; and 50% began in English-as-a-Second-Language course. The evidence overwhelmingly justifies the inclusion of a developmental education goal in HCCC's mission. The challenge for the college is to carry out this function at such a high level of excellence that developmental education students will be able to hold gainful employment; take part in community life; and continue their education in degree programs. HCCC must help the community understand the necessity of developmental education and support that domain of the mission. (KP)

Identifiers—Hudson County Community College NJ

In November 1993, Hudson County Community College (HCCC) surveyed a sample of enrolled credit students to understand retention and attrition at the college. The survey asked students to list briefly things HCCC could change or improve to improve retention and to indicate why students they knew had left HCCC before finishing their program. In order to reach students with as wide experiences as possible, the survey was administered in 24 courses sections selected on the basis of academic and language preparation, location, and instructor characteristics. Survey findings, based on responses from 10% of the 3,445 credit students enrolled that term) included the following: (1) suggestions for change or improvement fell into the following categories: 33% - facilities, parking, and classroom equipment; 17% - curriculum and courses; 16% - college services; 14% - instruction; 13% - academic support; 7% - finances; (2) day students offered suggestions for improvement at a higher rate than evening students (96% versus 77%); and (3) of the 250 students who knew someone who left HCCC, 23% indicated that the reason for dropping out was related to curriculum and courses; 22% indicated that the reason related to finance and time; 16% reported an instruction-related reason; 12% reported a personal reason; and 9% each reported reasons related to academic placement/grades and college services. The study report includes sample questionnaires in three languages. (KP)

Over the past 2 decades, personal appeals, annual campaigns, internal-giving programs, phone drives, mailings, and planned giving have been successfully employed by a number of community colleges. Voluntary support has made a significant difference in the funding of programs, buildings, equipment, and scholarships that would not otherwise be sustained. Though some community colleges have done well with fundraising from private sources, as a whole, however, community colleges report less than 2% of

their annual revenue from philanthropic sources. Shifting the focus of energies and resources from fundraising to tax levies or partnerships can often produce significantly greater results than those attainable through traditional approaches. The partnerships of Chattanooga State Technical Community College (CSTCC) with city and county governments and with the local area Private Industry Council, for example, led to the renovation of two 15,000 square-foot facilities now dedicated to college use at virtually no cost to CSTCC. CSTCC's partnership with Hunter Art Museum and a widely acclaimed Chattanooga community theater increased the college's prestige and widened the scope of its art and theater programs. Strategic alliances with local business and industry can result in a level of community involvement neither sector could provide on their own. This is not to argue that community colleges should not continue to solicit private support, but that partnerships can provide the same or even more significant ends. (KP)

Descriptors—*Change Strategies, Community Colleges, Computer Uses in Education, *Educational Technology, *Educational Trends, Higher Education, *Information Technology, Nonschool Educational Programs, Public Opinion, *Teacher Student Relationship, Teaching Methods, Two Year Colleges, Two Year College Students

Higher education is trapped in a time warp - a pre-Gutenberg era where instructional information is mostly transmitted by word of mouth. New information technologies present a critical challenge which cannot be ignored if higher education is to succeed or even survive. Increasingly diverse college students are beginning to think and act like consumers interested in job skills that have relevance beyond the classroom. At the same time, confidence in higher education has turned to cynicism as the public decries soaring costs and declining quality. New competition will be created by communication companies with extensive electronic networks and the funds for the best educators, equipment, and data bases. The convergence of the problems of new students, public distrust, and new competitors poses a challenge to higher education which can only be met if colleges use the new information technologies to transform classrooms and teaching technologies. To succeed, faculty overcome their own fears and resistance to technology and alter the way they teach and the way students learn. Technology can help higher education link access and excellence by tailoring learning to the diverse student needs and styles, while also allowing colleges to respond to critics by containing costs and improving quality. Most of all, it can confound potential competitors by freeing up faculty to spend more time on activities most valued by students - advising, counseling, mentoring, and collaborating. (KP)

Data on student enrollments in 12 regional community and state technical colleges in Connecticut are provided for fall 1993-94. Introductory material

highlights the following information about the state's community-technical colleges (CTC), which serve 51.4% of the undergraduates in Connecticut public institutions: (1) the fall 1993 CTC enrollment was 45,542 students, while full-time equivalent (FTE) enrollment was 22,178; (2) this represents a 0.2% decline in headcount and a 1% decrease in FTE over fall 1992; (3) in spring 1994, enrollment was 43,037 with an FTE enrollment of 20,681; (4) in fall 1993, 75.2% of all CTC students attended part time; (5) the average age of the student population was 29, with full-time students averaging 23 years of age and part-timers averaging 31; (6) 25% of students fell into the 20-24 age bracket, while 40% were age 30 or above; (7) gender composition was 61.3% women and 38.7% men; (8) minority student enrollment increased from 19% in 1992 to 20% in 1993, with Blacks and Hispanics representing nearly 18% of the student enrollment; (9) of all Black and Hispanic undergraduates enrolled in Connecticut public higher education, 67.5% attend the CTC's; (10) in fall 1993, 43.3% of all students were enrolled in occupational programs; (11) liberal arts and sciences and general studies programs accounted for an additional 31% of all students. The bulk of the report consists of data broken down by full-/part-time status, general fund or extension, status, gender, ethnic group, age distribution, and program enrollments. Additional information on geographic distribution of funding, and associated degrees and certificates awarded is included. (KP)

Take Charge of Your Enrollment: Improving Enrollment Management through Policy Analysis.

Pub Date—25 Jul 94

Note—18p; Paper presented at the Annual Conference of the Society for College and University Planning (29th, San Francisco, CA, July 24-27, 1994).

Pub Type—Opinion Papers (120) - Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Community Colleges, Continuing Education, *Enrollment Management, Minority Groups, *Policy Analysis, *School Holding Power, Student Financial Aid, *Student Recruitment, Two Year Colleges

As student bodies become more diverse and student needs multiply, institutions may find recruitment and retention increasingly challenging tasks. Effective enrollment management can introduce some stability and predictability into the planning context, with the promise of increased efficiency and effectiveness in meeting both student and institutional goals. Successful enrollment management depends on an information base that is comprehensive, targeted, and continuously updated, to inform enrollment management policies, and to monitor their effectiveness. Adopted in its entirety, this approach: (1) establishes a framework for studying student college interaction; (2) encourages development of enrollment targets, performance monitoring systems, and longitudinal tracking; (3) identifies areas of student behavior where institutional understanding is weak; (4) integrates research into enrollment management policy; and (5) promotes continuous improvement using the data, analysis, and policy (DAP) cycle. To illustrate the application of the DAP cycle, this paper describes three examples of enrollment management policy analysis and revisions. The first example, involving the use of institutional financial aid in a selective admissions environment, is a classic enrollment management problem at liberal arts colleges. The other examples illustrate the wide applicability of the framework focusing on minority student retention and continuing education recruitment at a large, open-admission community college. (KP)

Community College of Denver 1993-94 Accountability Report.

Denver Community Coll., Colo.

Pub Date—Oct 94

Note—55p; Submitted to the Colorado State Board for Community Colleges and Occupational Education and the Colorado Commission for Higher Education.

Pub Type—Reports - Descriptive (141) - Numerical/Quantitative Data (110)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Academic Standards, *Accountability, *College Outcomes Assessment, Community Colleges, Competency Based Education, Educa-

tional Objectives, Educational Testing, Evaluation Criteria, General Education, Minority Groups, *Organizational Change, Organizational Objectives, Outcomes of Education, *Program Effectiveness, Scores, Two Year Colleges

This report provides data on 1993-94 student outcomes, public relations, and changes in teaching, curricula, and learning at the Community College of Denver (CCD). Following a summary of CCD's success in meeting its accountability goals, section I reviews 1993-94 changes in teaching, curricula, and learning and section II notes plans to incorporate information on assessment expectations in the college catalog. Section III presents charts comparing minority and non-minority student retention and completion rates, and Educational Testing Service Academic Profile scores by race/ethnicity. Section IV provides data on CCD's goals and students' scores and success rates in general education skills and knowledge, discipline-specific skills and knowledge, and basic skills. In addition, information is provided on student retention and completion; student, graduate, alumni, and employer satisfaction with CCD; and after graduation performance. Section V reports the accreditation team's positive assessment of CCD faculty's involvement in the assessment process. Appendixes include the 1994 CCD President's Annual Report; a brief history of accountability at CCD; a list of significant changes at CCD as a result of accountability efforts; and further data on skills and knowledge; retention, completion, and persistence; and student and alumni satisfaction. Report of the Certification Study Committee.

Arizona State Board of Directors for Community Colleges, Phoenix.

Pub Date—Oct 94

Note—99p.

Pub Type—Reports - Research (143) - Tests/Questionnaires (160)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Administrator Attitudes, *Board of Education Policy, *College Faculty, Community Colleges, *Economic Impact, Educational Practices, National Norms, National Surveys, *Program Termination, State Programs, State Surveys, Statewide Planning, Teacher Attitudes, *Teacher Certification, Two Year Colleges

Identifiers—*Arizona

Prepared in response to a legislative recommendation that the certification of community college faculty by the State Board of Community Colleges be discontinued, this report provides results from constituent surveys, recommendations, and background materials. First, background information is provided on the review, indicating that there are presently six types of teacher certificates authorized by the Board and that the study team determined that there were three alternatives for assuring teaching faculty qualifications: retain teacher certification with or without legislative modifications, replace certification with statewide minimum standards administered by the districts, or replace the certification process with local standards developed and administered at the district level. Reports are then provided on surveys of 38 state community college directors, administrators and faculty at all Arizona community colleges, and 110 recently certified teachers, indicating that state-level certification of community college teachers is not common nationwide, responses from Arizona practitioners were mixed regarding program continuation or discontinuation, and that recently certified teachers generally favored the continuance of statewide certification of faculty. Finally, fiscal effects are listed for the three scenarios considered by the study team. Appendixes provide survey instruments and detailed responses from the surveys of nationwide certification practices, Arizona community college personnel, and certified individuals and state rules for community college certification. Registration Priorities: A Report.

California Community Colleges, Sacramento. Office of the Chancellor.

Pub Date—8 Sep 94

Note—52p; Prepared as Agenda Item Number 16 for a Meeting of the Board of Governors of the California Community Colleges (Sacramento, CA, September 8, 1994).

Pub Type—Reports - Evaluative (142) - Tests/Questionnaires (160)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Admission Criteria, College Admission, *Community Colleges, *Educational Practices, *Enrollment Management, *Retrenchment, School Holding Power, *School Registration, State Surveys, Two Year Colleges, Use Studies Identifiers—*California Community Colleges

In May 1993, the California Community Colleges' Board of Governors adopted systemwide guidelines recommending student registration priorities to help address current discrepancies between available resources and courses and the colleges' open-door mission. This report describes the guidelines and results of a study conducted to determine their implementation at the colleges, as well as other enrollment management (EM) initiatives in use. First, background on the guidelines indicates that due to funding reductions, the colleges have cut course sections by 10% since 1990 and have experienced a 9% decrease in headcount enrollment since 1990. Next, findings from the study of college practices are presented, including the following: (1) only 4 of the 107 community colleges in the state did not have formal registration priorities, while for the 103 with priorities, the most common criteria were continuing students, disabled/equal opportunity students, units completed, and matriculated students; (2) 28 of the colleges with priorities follow the Board's guidelines by designated students with baccalaureate degrees as the lowest priority, and (3) with respect to changes from 1992-93, matriculated and returning students, units completed, and grade point average increased most in use. Finally, information is provided on other EM practices in use, including adjustments to curricula, marketing, admissions/registration processes, retention strategies, pricing, and delivery methods. Appendixes provide the Board guidelines, the survey instrument, detailed survey results from 1992-93 and 1993-94 studies, and data on EM activities at the colleges. (KP)

Identifiers—*California Community Colleges

Thirteenth in a series of annual reports, this document presents fall 1993 demographic, staffing, salary, and workload information on California community college employees, based on data collected from all 71 California community college districts. Section I presents data on primary occupational activity, full-time equivalency, and type of assignment for each district's total number of employees, along with summary information on regular and overload weekly faculty contact hours for certificated staff. This section concludes with a 5-year profile of the number of full-time faculty and the average annual salary paid by district from 1989-90 to 1993-94. Sections II through VII summarize data for each of the six major categories of employees: contract and regular (full-time) faculty; temporary (part-time) faculty; full-time professionals, including faculty who spend more than 15 hours per week as counselors, librarians, or nurses; full-time certificated administrators; full-time classified administrators; and all other full-time classified employees. For each group, tables provide data on percentage distributions by age, gender, ethnicity, employment classification, employment status, duration of employment contract/agreement, and annual salary per schedule plus stipends, while faculty tables provide data on weekly faculty contact hours, weekly faculty contact hours of overload instruction, and hourly compensation rate for overload instruction. Appendixes provide staff data elements and definitions and district contact persons. (KP)

Descriptors—Academic Achievement, *College Outcomes Assessment, Community Colleges, *Developmental Programs, Grade Point Average, *High Risk Students, *Program Effectiveness, *Remedial Programs, School Holding Power, Two Year Colleges

Identifiers—Gainesville College GA

The Fresh Start (FS) program was initiated at Gainesville College (GC), in Georgia, to target at-risk students and improve their overall academic performance and retention. The program provides immediate placement of students into remedial classes, academic support services, intrusive counseling, and long-term computerized tracking to assess student outcomes. A study was conducted to track academic outcomes for one academic year and determine any differences for the 68 FS students who entered in summer 1993 and 233 similarly at-risk students who started in fall 1990. Results of the analysis included the following: (1) while the two sample groups were similar for most characteristics, 50% of the 1990 sample were female, compared to 59% of the FS sample; (2) the FS group had more remedial education needs upon entering than the 1990 sample; (3) after one year, the FS students had an average grade point average of 2.22, compared to 1.70 for the 1990 students, while 19% (n=13) of the FS and 21% (n=49) of the 1990 group were candidates for academic probation; (4) 79% of the 1990 group returned for the subsequent quarter, while 69% of the FS students did; and (5) for both groups, less than 7% of the students who attempted academic credit courses received "A's," overall pass rates in the humanities were 11% better for FS students than the 1990 group. The results suggested that the FS program, as implemented, resulted in overall better academic outcomes for at-risk students. (KP)

Identifiers—Arapahoe Community College CO

This annual report provides an overview of Arapahoe Community College's (Colorado) efforts to improve undergraduate education and the success of those efforts as of 1993-94. After outlining changes made in the transfer, vocational education, and developmental studies programs, the report provides information on specific recommendations implemented since 1992-93 related to vocational education; retention and completion; alumni satisfaction; after graduation performance; graduating students satisfaction; community education; and business and industry services. Appendixes comprise the bulk of the report, providing data and survey results related to the following: (1) a 1993-94 calculus readiness test; (2) college algebra instructional strategies; (3) a student self-evaluation communication survey and instructor ratings of student improvement in speech; (4) guidelines for English instructors and results from surveys of students confidence in their writing ability; (5) transfer accountability projects; (6) two pilot studies in developmental English; (7) a developmental reading survey; (8) a developmental mathematics tracking analysis; (9) minority student enrollment comparisons, 1992-94; (10) results of licensure exams, 1993-94; (11) a vocational education student satisfaction survey; (12) a graduate employer survey; (13) term-to-term retention/persistence rates for full-time, part-time, and all students; (14) transfer acceptance, grade point averages, and completion/persistence rates for selected years from 1988-89 to 1993-94; (15) graduating student satisfaction levels; (16) commu-

nity education satisfaction levels; and (17) business and industry student satisfaction reports. (KP)

The four issues of "Trustee Quarterly" combined here focus on topics of current concern to community college trustees. The winter 1994 issues offers these feature articles: "Honoring Retiring Presidents," by Terry O'Banion; "Trustees as Reluctant Leaders: The Board/CEO Relationship," by Norma Jean Germond, John Keyser, and Vaughn A. Sherman; and "Trustee Heroines and Heroes," by Edward M. Sweitzer. The spring 1994 issue presents "Accreditation Agencies and the Federal Government: Can they Work Together?" by Sally Hutchins; "British Educational Reforms: Quality, Accountability, Expansion, and Efficiency," by John Graystone; and "Community Colleges: Critical Partners in National and Community Service," by Goodwin Liu. The summer 1994 issue includes "Achieving Faculty and Staff Diversity: Dallas Finds Multilevel Approach Key to Success," by Norma Kent; "Minority Affairs Committee Sets Goal of Better Communications," by the Association of Community College Trustees; and "A Local Community Emphasis for Study Abroad Programs," by Richard Fonte. Finally, the fall 1994 issues provides the following features: "Survival Skills and the Trustee Orientation," by Richard Anderson and Daniel J. LaVista; "Fundraising from the Private Sector: Trustee Perceptions," by Arthur R. Southland and Mary Spring Graham; and "The Community College Board and the Foundation Board: The Role Relationship in the Context of 'Policy Governance'," by Ray Taylor. (KP)

This volume provides the latest research and theory in the area of children's play with their parents. It includes discussions of the basic processes involved in parent-child play, parent-child play in atypical populations of children, and parent-child play from a cross-cultural perspective. Fifteen chapters follow the introduction, "Parents and Children Playing" (Kevin MacDonald). The chapters are: (1) "Dilemmas in Adult Play with Children" (Brian Sutton-Smith); (2) "Parent-Infant Games as Dynamic Social Systems" (Alan Fogel and others); (3) "Parent-Infant Play as a Window on Infant Competence: An Organizational Approach to Assessment" (Marjorie Beeghly); (4) "Parent-Child Play: An Evolutionary Perspective" (Kevin MacDonald); (5) "Rough and Tumble Play: A Fundamental Brain Process" (Jaak Panksepp); (6) "Lessons from Pri-

mate Play" (Maxine Biben and Steven Suomi); (7) "Parent-Child Physical Play: Determinants and Consequences" (James Carson and others); (8) "The Necessary Lightness of Mother-Child Play" (Phyllis Levenstein and John O'Hara); (9) "Mother-Infant Play and Maternal Depression" (Jeffrey Cohn); (10) "Peekaboo across Cultures: How Mothers and Infants Play with Voices, Faces, and Expectations" (Anne Fernald and Daniela O'Neill); (11) "Gentle Play Partners: Mother-Child and Father-Child Play in New Delhi, India" (Jaipaul Roopnarine and others); (12) "Mother, Older Sibling and Me: The Overlapping Roles of Caregivers and Companions in the Social World of Two- to Three-Year-Olds in Ngeca, Kenya" (Carolyn Edwards and Beatrice Whiting); (13) "Persistence of Play and Feeding Interaction Differences in Three Miami Cultures" (Tiffany Field); (14) "Cultural Differences in Scaffolding Pretend Play: A Comparison of American and Mexican Mother-Child and Sibling-Child Pairs" (Jo Ann Farver); and (15) "The Cultural Context of Mother-Infant Play in the Newborn Period" (Kevin Nugent and others). Each chapter includes references. (TJQ)

Increasing Parental Involvement in the Preschool Program by Offering Alternative Communication Strategies between Parents and School Staff.

Pub Date—94

Note—89p.; Ed.D. Practicum Report, Nova South-eastern University.

Pub Type—Dissertations/Theses - Practicum Papers (043)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Hispanic Americans, Low Income Groups, Parent Attitudes, Parent Education, *Parent Participation, *Parent School Relationship, Parent Student Relationship, Parent Teacher Cooperation, *Parent Workshops, *Preschool Education, Program Design, Program Implementation

This practicum was designed to improve communication between the mostly low-income, Hispanic parents and the non-Hispanic staff of a school-based preschool program. Parents of the program's 20 children were surveyed to determine what factors might encourage their participation in school functions. Parents were also interviewed by telephone and in person at an "open house" meeting at the school. The needs assessment found that many parents would require transportation, child care, evening meetings, or a Spanish-speaking interpreter to participate. Three parent workshops were conducted, covering such topics as child development, community resources for parents, and the selection of toys for preschoolers. The practicum led to a significant increase in parent participation at the school, with a majority of the parents participating in at least two of the three workshops. (Eleven appendices contain a contact log, parent survey, English- and Spanish-language fliers advertising school events and the workshops, and workshop handouts. Contains 27 references.) (MDM)

Identifiers—*Curriculum Implementation, *Scotland, United Nations Convention on Rights of the Child

This guide was designed for use as a reference when planning and reviewing the curriculum of Strathclyde, Scotland preschool centers, as well as a resource tool for parents and others wishing to learn about the curriculum. The guide is divided into 9 main sections that address: (1) the definition, design, and implementation of curriculum; (2) the values and intentions of the curriculum; (3) the child development, learning, and play; (4) the components of the curriculum; (5) how the curriculum is put into practice and made accessible and relevant to every child; (6) observations and assessment of

children; (7) internal and external evaluations of the curriculum; (8) the management of home-to-school and preschool-to-primary school transitions; and (9) things adults can do to help children learn. A 51-item annotated bibliography and a glossary of terms are included. Three appendices contain excerpts from the United Nations Convention on the Rights of the Child, and from other preschool policy statements. (MDM)

This theme issue of "Transition" features a series of articles on fatherhood and the changing role of fathers in parenting. The articles include: (1) "From Cloth to Paper Diapers and Back: Reflections on Fatherhood during Two Generations" (Robert Couchman), which relates experiences of a new father 20 years ago and today; (2) "Does Society Support Involved Fathering?" (Robert Glossop and Ish Theilheimer), which examines whether society truly supports the idea of active fathering that receives so much attention in the media; (3) "The Changing Faces of Fatherhood" (Germain Dulac), which discusses the stages of fatherhood and how fathers' roles have changed over time; (4) "Talking about Fatherhood" (Ginette Decoste), which summarizes the findings of a study on the attitudes of fathers toward parenting; and (5) "Dad Is the Trailer" which reports on a survey of attitudes toward fatherhood in Canada. The last article, "Time To Thank Families—Not Blame Them" (Alan Mirabelli) describes families as being mostly hardworking and flexible, and encourages society to support them since families build our society and drive our economy. Other sections of the issue list conferences and seminars on the family and profile four publications on Canada's families by the Vanier Institute of the Family. (MDM)

The Role of Kinesthetics in Learning: The Importance of Active Engagement and the Connected Process of Reflection.

Pub Date—May 94

Note—41p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Cognitive Development, Cognitive Processes, *Cognitive Style, *Elementary School Students, *Kinesthetic Methods, Language Arts, Learning Activities, Primary Education, Teaching Methods, *Thinking Skills

Identifiers—Active Learning

A study examined the effect of a kinesthetic component in instruction on the performances of 16 5- and 6-year-old public school students on a cognitive development test. Eight boys and eight girls were randomly selected and assigned in equal numbers to a treatment group and a control group. The kinesthetic elements consisted of drawing, coloring, making a collage, using pantomime, dramatization, acting out action words, rhythm clapping, and sculpting with clay. It was hypothesized that a kinesthetic form of active engagement would lead to stronger cognitive development. A series of five language arts lessons were taught. The treatment group's lessons included a kinesthetic element. The goals for the five lessons were to help both groups to learn (1) story structure, (2) new concepts through building vocabulary, and (3) the concepts of synonyms and antonyms. Both groups used the

same format. The TONI-2 Test of Nonverbal Intelligence: A Language-Free Measure of Cognitive Ability was administered individually to all subjects before and after the series of lessons. The results indicated no statistically significant difference between the two groups. However, there was a slight improvement of cognitive skills when the kinesthetic element was present. Contains 28 references. (WP)

Even Start Family Literacy Program Evaluation, Oklahoma City Public Schools: A National Diffusion Network Approved Program, Family Intergenerational-Interaction Literacy Model 1993-94.

Oklahoma City Univ., Okla.

Pub Date—30 Jun 94

Note—61p.; For the 1992-93 report, see ED 369 512.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Disadvantaged Youth, Limited English Speaking, *Literacy Education, Parent Child Relationship, Parent Education, *Preschool Children, Preschool Education, *Program Effectiveness, Program Evaluation, School Readiness

Identifiers—*Even Start, *Family Literacy, Literacy as a Social Process

The Even Start Family Literacy Program, in its fourth year of operation, provides a literacy environment based on the Family Intergenerational-Interaction Literacy Model (FILM) in the southwest area of Oklahoma City. The FILM model is designed to provide a family literacy education program for parents, extended family, and their preschool children from culturally diverse environments who need education in both basic skills and parenting strategies. High school drop-outs and first-generation non-English-speaking immigrants are the target audience. Objectives of the program are to: (1) provide a safe environment where families can develop the education, economic, and social skills they need to plan and achieve long-range goals; and (2) empower families with the strategies needed to break out of the intergenerational cycle of under-education and poverty. An evaluation of the program was conducted, using a series of aptitude tests and interviews of the graduates of and participants in the project. The evaluation included—in addition to assessment of compliance with the basic national program requirements—activities aimed at determining the program's impact on the parent's literacy, home environment, parenting skills, and attitudes. An additional component was identifying the longitudinal progress of the preschool graduates as they entered educational settings. The evaluation found that: (1) parents' attitudes toward learning changed positively as a result of being involved for a consistent amount of time in Even Start; (2) parents made behavior changes and became more confident of their parenting knowledge base; (3) children's readiness for school and their social interaction and language improved; and (4) involvement in Even Start prepared preschool children for future success in school. Descriptors—*Adoption, *Adoptive Parents, *Biological Parents, Foreign Countries, State Legislation, Transracial Adoption

Identifiers—Canada

This theme issue deals with adoption. "Adoption in Canada: A Profile," provides statistics on public and private adoption, as well as demographic characteristics on adoption applicants and children placed for adoption. It also discusses current adoption legislation. "Abandoning Ownership: A Philosophical Approach to Adoption" (Terri Spronk) explores the changing attitudes about the place of adopted children in their adoptive families. "Open Adoption in Canada" (Marilyn E. Shinyei and Linda Edney) focuses on the practice of allowing the birth parent to choose the adoptive family for their baby. This article clarifies the distinction between open and closed adoptions, noting that in spite of its positive aspects, open adoption may not be suitable for everyone. "Adoption: So Many Issues, So Little Understanding" summarizes some of the most important issues relating to adoption, including transracial and special needs adoptions. Also included in this issue are short articles about funding for family support programs and the evolving definition of family. The issue concludes with an annual review (1991-92) of the Vanier Institute of the Family. (BAC)

Identifiers—*Adult Child Relationship, Canada

This theme issue explores the behavior of teenagers. "Are the Kids Alright?" (Ish Theilheimer) develops a perspective on the subject of teen behavior, noting that a growing number of young people demonstrate discontent, alienation, aggression, violence, and antisocial behavior, and that a growing underclass of children is likely to fail. The article also notes that these concerns require broad response, community action, and an understanding that youth attitudes reflect those of adults. The article, "Listen to What the Children Are Telling Us," which is an interview with Andree Ruffo, offers observations based on the work of a judge and attorney. It suggests that children must be listened to and helped to find solutions and establish ideals. The article also notes that social change will be effected by individuals, that teens must become important to someone, and that institutional change will be slow and require political will. "Children, Culture and the Curriculum of Television" (Michael Manley-Casimir) examines the impact of television on a generation of teenagers, focusing on the obvious features of violence, loss of a real sense of childhood, sex role stereotyping, the dominance of white, middle-class values, and commercial advertising. The article also suggests ways for parents and society to respond, including developing media literacy and critical viewing skills, reconsidering society's valuation of children, and exerting political power. "Are the Adults Alright?" offers brief excerpts about teen-adult relationships from the book "Teen Trends" by Reginald Bibby and Donald Posterski. (TM)

Descriptors—Childhood Attitudes, Divorce, *Fathers, *Interpersonal Communication, Letters (Correspondence), One Parent Family, *Parent Child Relationship, *Parenting Skills, Parent Materials, Parents, *Questioning Techniques, *Questionnaires

Identifiers—*Long Distance Parenting

This book offers help and guidance to fathers who have been physically separated from their children by divorce, work, or other factors. It gives methods and ideas to help long-distance fathers better communicate with and stay connected to their children. The methods offered in this book include devising test-like questionnaires for children; these tests are designed to help parents get to know their children better, to encourage discussion between parents and children, and to develop and maintain a close relationship between children and their parents. Part 1 discusses the father's separation from his child, and how he came to use tests in order to bridge the communication gap. It also explores the reasoning behind the tests, and guides readers through the construction of their first "Dad's Test." A checklist and troubleshooting guide are included to assist in test construction. Part 2 consists of actual tests used by a father, and offers commentary and suggestions on what type of questions to use and avoid when designing tests. Included at the end of the book is a list of organizations dealing with children's rights and welfare, parenting, and parent rights. (AS)

Descriptors—*Child Health, *Disease Control, *Diseases, Epidemiology, Family Health, Foreign Countries, Health Conditions, *Health Education, Hygiene, Public Health, Sanitary Facilities, Viruses

Identifiers—*Parasitic Infections, *Tropics

Intestinal parasites have become a serious public health problem in tropical countries because of the climate and the difficulty of achieving efficient hygiene. The objectives of this journal issue are to increase awareness of the individual and collective repercussions of intestinal parasites, describe the current conditions of contamination and clinical actions for parasites, and foster health education as a means of preventing infestation. The journal issue explains various types of parasites, including their epidemiology, symptoms, and different means of diagnosis. These explanations are organized according to different means of transmission: fecal/oral transmission, food transmission, and transcutaneous transmission. The issue also notes that controlling intestinal parasites can be achieved by the use of active drugs, the main features and indications of which are determined by the different types of worms. The spread and transmission of the disease can be stopped by interrupting completely the epidemiological chain at any one point. The journal issue concludes with the statement that the most important factor in prevention is public health awareness among community leaders and the improvement of health status by means of health education. Descriptors—*Classroom Techniques, Cognitive Style, *Curriculum Development, Curriculum Guides, Educational Change, Educational Strategies, Elementary Education, *Integrated Curriculum, Models, *Teaching Methods, *Thematic Approach

Identifiers—*Integrated Thematic Instruction

This book presents Integrated Thematic Instruction (ITI), a model for implementing a "brain-compatible" learning environment for students and teachers using a year-long theme to organize curriculum content and skills. The book's introduction identifies six "mismemes" (or mistaken ideas) that have hindered educational reform, and proposes seven "new memes" (or foundational premises) for education reform that are consistent with brain research and children's developmental characteristics. Also identified are eight brain-compatible implementation elements to create an environment that will enhance children's performance and provide the basis for successful learning experience. Chapter 1 then describes the three principles of the ITI model: that brain research must become the basis for decisions to improve education, that teaching is an art and science that must implement brain research in the classroom, and that curriculum development must occur at the classroom level based on the classroom teacher's understanding of the learners and community. Chapters 2 through 9 explain the eight brain-compatible implementation elements and how they can be applied to learning. The eight elements are: (1) absence of threat; (2) meaningful content; (3) choices; (4) adequate time; (5) enriched environment; (6) collaboration; (7) immediate feedback; and (8) mastery (application). Chapter 10 describes a brain-compatible curriculum, one that emphasizes pattern-seeking and program-building. Chapters 11 through 13 describe three steps in curriculum making: creating a year-long theme, determining the key concepts and skills to be mastered within year-long themes, and creating and using inquiries. Chapter 14 shows how the ITI model is not incompatible with teaching reading, writing, and mathematics skills. Finally, chapter 15 argues the need for personal transition if change is to be made. Five appendices present sample materials for building an ITI program. A glossary is included. Contains 35 references. (TM)

Identifiers—*Florida First Start Program

This guide is designed to facilitate the implementation of the Florida First Start (FFS) program, created to help at-risk children from birth to 3 years of age have the best possible start in life and to support parents in their roles as their children's first teachers. Emphasis is on providing early, high-quality education and support services. Sections of the guide address: (1) the purpose of the FFS program; (2) personnel, staff development, and technical assistance requirements; (3) measures to increase public awareness of the program; (4) the equipping of parent resource centers; (5) program eligibility guidelines; (6) home visits; (7) child screening and testing; (8) family group meetings; (9) interagency cooperation; (10) program exiting and transitioning procedures; and (11) program evaluation. A bibliography of resources on behavior management, child abuse and neglect, health and safety, nutrition, stereotyping, and child development is included. Seven appendices provide a statewide directory of FFS officials, state-recommended forms, sample newsletters and pamphlets, program logos, Florida statutes and regulations relevant to the FFS program, a list of responsibilities and duties of parent education, and a list of infant resource books. Identifiers—*Health Care Reform, *Health Policy

This brochure describes the meeting of 63 representatives from the American Academy of Pediatrics, Washington Business Group on Health, Maternal and Child Health Bureau, and the education community convened to develop an action plan for American health care that would be responsive to children's needs. Highlighted problems included the lack of health coverage for 15% of those under 21, the high rate of child poverty, and the misplaced incentives and lack of accountability in the health industry. The group reached widespread agreement on several issues: (1) universal child health benefits should cover prevention and early intervention, as well as acute, chronic, and mental health care; (2) prenatal care for mothers is essential; (3) services for children and pregnant women should have first priority in the health care reform process; (4) entry into the new system should be through the primary care practitioner, and all care should be delivered under medical supervision by the most appropriate provider in the most appropriate setting; (5) the health care system should be employer-based for the private sector and funded out of general revenues for the poor; (6) health services should be coordinated with other essential community services; and (7) health education should help Americans become informed consumers. The brochure includes information about the needs of pregnant women, newborns, infants, young children, adolescents, and workers, along with a participant list, glossary of terms, and mission statements for participating organizations. Getting Professional: Preparing To Work with Young Children.

Pub Date—18 Jun 94

Note—6p.

Pub Type—Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—College Credits, College Students, College Transfer Students, *Educational Attitudes, Elementary Education, Higher Education, *Student Attitudes, Teacher Education, Teacher Effectiveness, *Teacher Employment, *Teacher Role, *Teaching (Occupation)

This essay discusses the concerns of college students and graduates regarding the teaching profession, and reviews the experiences of a former teacher who is now a university professor of education. The problem of credit transfer between community college and university programs is examined, along with the job market for new teachers. Prospective teachers need to maintain good grades, engage in leadership and volunteer activities, take part in professional organizations, and develop a marketable specialty. Prospective teachers should not avoid big-city schools when seeking employment, despite the standard conditions and poor schools in some areas. Many effective, though largely unpublicized, schools and programs exist in the inner cities. The contributions that a dedicated teacher can make in a school with students from low socioeconomic backgrounds, even with limited resources, are significant and highly rewarding. (MDM)

Infant Mortality: District Profiles for the Congressional Black Caucus, 102nd Congress. Report for the Congressional Black Caucus.

National Commission To Prevent Infant Mortality, Washington, DC.

Pub Date—17 Jul 92

Note—20p.

Pub Type—Numerical/Quantitative Data (110)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Birth Weight, *Blacks, Child Health, Demography, *Infant Mortality, *Mortality Rate, Prenatal Care, *Profiles, Racial Differences, *Whites

Identifiers—Congressional Black Caucus, United States

This report provides an overview of infant mortality rates in congressional districts represented by members of the Congressional Black Caucus (CBC). The 1989 or 1990 mortality rates for Blacks and Whites for the 25 districts represented by CBC members are presented, as well as rates for the overall population. An appendix provides data on Black, White, and overall mortality rates in the United States from 1970 through 1989, and infant mortality, low birth weight, and prenatal care by race and state for 1989. The report notes that in 1989, the infant mortality rate among Blacks was 17.7 per 1,000 live births, while the rate for Whites was 8.2. Whereas infant mortality rates for both Blacks and Whites have dropped by 50 percent since 1970, the ratio between the 2 rates has remained unchanged. (MDM)

Identifiers—*Healthy Start Program, United States

About 36,500 infants die each year in the United

States, due largely to low birth weight and inadequate prenatal care. The United States ranks twenty-second among the world's nations in infant mortality. This brochure addresses the high infant mortality rate in the United States compared to other developed nations, and notes actions that prospective parents and others can take to reduce infant mortality. It also explains the Healthy Start Program, designed to lower the infant mortality rate through the provision of health and social services, local outreach programs, and parent education. The first goal is to reduce infant deaths in 15 selected communities that have alarmingly high rates of infant mortality. The brochure recommends that concerned individuals encourage pregnant women to seek adequate prenatal care, and that women who are planning a pregnancy or who are already pregnant should visit their doctor or clinic regularly. A list of eight national organizations that provide information about prenatal and newborn care is included. (MDM)

Identifiers—CDA, *Child Development Associate, *Project Head Start

The Head Start Male Role Model Child Development Associate (CDA) Credential Program is based on the assumptions that men are valued as nurturers of small children; that low-income Black and Hispanic males can be successful as educators and role models to young children and other men; and that early childhood education can be a remunerative and satisfying career choice for men. The 1-year

program consists of 9 quarter hours of study in child development coordinated through National-Louis University and work as a paid teacher aide for 20 hours per week in a Head Start Program. Of the first group of 10 participants, only two completed the program as structured. Problems included the students' failure to keep many agreements (being late or absent from class and work at Head Start sites, and not doing homework and necessary paper-work); students' below-average written language and math skills; and students' sense of being relegated to low-skill tasks. In addition, the community did not support the idea of men working with small children. To improve the program, which also had administrative problems, it was recommended that the coordinator-student relationship be strengthened, and the curriculum be revised to include orientation; outreach; activities focusing on the self-esteem, self-awareness, and commitment of the participants; and success-building in the classroom. The papers in these proceedings focus primarily on features of the Head Start Program, contributions made to its research and its future direction. The first part of the proceedings contains presentations from the nine symposia, dealing with the following topics: (1) Head Start demonstration projects; (2) issues relating to education and the schools, such as learning and literacy; (3) child development and assessment; (4) child and family health; (5) integrated approaches to early intervention; (6) conceptual models for the study of multi-ethnic and minority families; (7) researcher and practitioner partnerships; (8) directions the Head Start program can take in terms of research, practice, and policy; and (9) miscellaneous issues such as involving fathers in the Head Start program, research issues in racial identity, and research methodologies. The remainder of the proceedings contains papers presented at the conference as follows: (1) "Adolescent Parents"; (2) "Children with Special Needs"; (3) "Collaborations and Partnerships"; (4) "Comprehensive Approaches to Early Intervention"; (5) "Developmentally Appropriate Curriculum"; (6) "Family Ecology-Systems Approach to Family Research"; (7) "Family Strengths and Adaptive Strategies"; (8) "Family Support Services"; (9) "Health and Nutrition"; (10) "Health Issues"; (11) "Home-Based Intervention"; (12) "Language and Literacy"; (13) "Normative Child Development"; (14) "Out-of-Home Child Care"; (15) "Parent Involvement"; (16) "Research, Service Delivery and Policy"; (17) "Screening and Assessment"; (18) "Social and Academic Competence"; (19) "Training and Development"; and (20) "Transition." Four appendices provide a list of cooperating organizations, the program committee and peer reviewers, as well as a subject index and directory of conference participants. (BAC)

New findings about child nutrition and cognitive development indicate that undernourished children are typically fatigued and uninterested in their social environments. Such children are less likely to establish relationships or to explore and learn from their surroundings. Undernourished children are also more susceptible to illness and, thus, more likely to be absent from school. These factors result in a loss of opportunities for undernourished children and in a loss of contributions to society. An overview of research reveals that children in the United States suffer a mild to moderate degree of malnourishment associated with poverty. A combination of environmental insults and undernutrition has been shown to result in growth retardation and developmental delays. Unless irreparable physiological damage has occurred, improvements in environment and nutrition can rectify the developmental effects to which a young child is exposed. Nutrition programs such as the Special Supplemental Food Program for Women, Infants, and Children (WIC), the School Breakfast Program, the School Lunch Program, the Summer Food Service Program and the Food Stamp Program play key roles in safeguarding the health and cognitive development of children who are at risk for undernutrition. Addition benefits provided by these programs include savings in medical costs and savings in special education programs. (VL)

Identifiers—*Australia, Before School Programs

Noting an increase in demand for school-age child care offerings, with no corresponding establishment of guidelines for program development, this booklet addresses design and evaluation issues in school age child care (SACC) in Australia. The booklet is largely based on two surveys of SACC programs conducted in 1986. The issues discussed in the booklet include: (1) the high level of staff turnover in most SACC programs, which is often caused by low wages, odd hours, and poor working conditions; (2) the need for adequate resources for staff to carry out the program mission; (3) the lack of before-school care in most programs; (4) the lack of dedicated space, with most SACC programs using public areas, such as cafeterias or assembly room, or sharing space with other programs; and (5) the criteria for program assessment and evaluation. A 25-item annotated bibliography is included. (MDM)

Identifiers—Australia, Gender Balancing (Curriculum)

Research on academic subject selection and socialization for girls and boys suggests that a gender imbalance exists in the education of children. This imbalance often results in problems of low self-esteem and a limited sense of career options as children age. Adults in early childhood classrooms need to implement a program in which the teacher is a positive role model and children are encouraged to participate in all activities. Teachers also need to build self-esteem among children through praise that does not perpetuate traditional male and female stereotypes. To be successful, this process must include parents. Suggestions for early childhood teachers on how to integrate an inclusive curriculum involve activities in the following areas: classroom observation, personal philosophy, expectations, children's self-esteem, classroom organization, inclusion of parents in school and at home, and acquisition of professional support. EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Child Caregivers, *Child Health, Childhood Attitudes, *Drug Abuse, *Drug Education, *Drug Use, Early Childhood Education, Family Influence, Foreign Countries, Parent Influence, Parent Responsibility, *Prevention, Role Models, Self Esteem

Identifiers—Australia

This booklet provides a guide for adults, parents, older siblings, and caregivers to help children develop constructive attitudes about present and future drug use. The first part of the guide focuses on role models in early childhood and implications of their behavior for children's future drug use, noting that parents, family, and the community need to recognize that children will copy their behavior. The second part focuses on competence and confidence, and how self-esteem, as a defense against habitual drug use, has a high influence on young children's attitude and skill development. The third part focuses on medicines as a child's first drug, offering suggestions to parents on using and storing medicines and on when to consult a doctor. (AP)

Benton-Murray, Janet M.

Increasing the Growth in Prosocial, Nonviolent, Problem-Solving Skills of Kindergarten Students through Conflict Resolution Skills.

Pub Date—94

Note—64p.; Ed.D. Practicum Report, Nova Southeastern University.

Pub Type—Dissertations/Theses - Practicum Papers (043)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Aggression, *Behavior Problems, *Conflict Resolution, *Interpersonal Competence, Kindergarten, *Kindergarten Children, Primary Education, Problem Solving, Program Effectiveness, Prosocial Behavior, *Social Cognition, Social Influences, Student Behavior, Teaching Methods

A practicum was conducted at a small, private

elementary school to introduce strategies that would reduce kindergarten classroom disruptions and playground disturbances due to fighting, verbal confrontations, and disregard for authority and rules. A survey conducted at the school revealed that kindergarten teachers handled a daily average of 10 disruptions in their classroom without making referrals to the administration. Causes of the problem were identified by observations, interviews with staff, daily checklists, and the teacher survey, indicating that the lack of nonviolent problem-solving skills was a major contributor to the frequency of classroom disruptions. A four-step method of conflict resolution was used, along with open-ended stories, art, music, and role play, to teach children to identify their emotions and settle conflict situations nonviolently. Choices of appropriate methods of problem evaluation, recognition of emotions, and acceptance of responsibility for actions were sequentially presented using small- and large-group interaction and role playing. The study population consisted of 25 kindergarten students. Results of a post-intervention teacher survey revealed a positive trend toward the reduction in the number of disruptive incidents requiring teacher intervention, as well as an increase in the number of incidents children were able to resolve successfully on their own. Identifiers—Africa, Asia, *Bernard Van Leer Foundation (Netherlands), Europe, South America, United States

This report, in both English and Spanish versions, aims to highlight the Bernard van Leer Foundation's identity, objectives, and major activities, as well as the work undertaken by the projects the foundation supports. The review features articles on the Foundation's work on advocacy, supporting families living in disadvantaged circumstances, teaching children by using dramatic art, and approaching teenagers' specific needs. The Foundation's 1993 worldwide approaches to improving opportunities for young children living in disadvantaged circumstances, as well as ways of organizing and disseminating experiences and knowledge among people with similar goals are also discussed. The major part of this report consists of descriptions of approximately 120 projects from 42 different countries that were being supported by the Foundation as of the end of 1993. These are presented by country and include brief details of target groups, location and activities, major objectives and main strategies. Finally, the Foundation's financial report, a list of publications and videos produced by the Foundation, and the names of members of the Board of Trustees and Foundation staff are presented. (AA)

Identifiers—Case Management, *Project Head Start, Puerto Rico

This document provides guidelines and procedures, in Spanish and English, for Head Start teachers in taking care of children with AIDS, or children who are HIV positive, and their families. The goal of the guide is to maximize participation of infected children in the Head Start program. The guide presents activities in three main stages: pre-enrollment, direct services, and health education. In the pre-enrollment stage, an interdisciplinary team presents orientation to the children's parents, requests parents' written authorization to share the information and interviews with parents about their children's health. In the direct services stage, a nurse examines children's state of health, including physical, medical, and dental treatment. A nutritionist, food service personnel, and health services coordinator give instructions on food handling, sanitation, hand washing, and health guidelines. In the health education stage, the interdisciplinary team provides training for personnel, parents, and the community for the purpose of disseminating information about AIDS, diseases of children with AIDS, health, nutrition, and hygiene problems. Other program components, such as psychological and special services, are also discussed, along with the staff position responsible for implementation. Two appendices contain the parent authorization form and a description of the role of the case management system, which offers or coordinates needed assistance services of children with HIV/AIDS. The Spanish version also contains a list of agencies providing HIV/AIDS services for children and their families and a brief outline of the Federal Privacy Act of 1974. (AP)

Descriptors—Child Development, Childhood Needs, *Day Care, Developmental Stages, Disabilities, *Early Childhood Education, Employed Parents, Evaluation Criteria, Individual Needs, Infants, Kindergarten, Kindergarten Children, Parent Attitudes, Preschool Children, *Preschool Education, *School Choice, Special Needs Students, Toddlers

Identifiers—Special Needs Children

Designed to help parents make informed decisions about child care, preschool, and kindergarten placements, this book answers typical questions other parents ask about schooling decisions. Chapter 1 is a resource section based on current research and educational theory, and provides a brief summary of the best and most recent thought on early childhood issues. It gives information on how and why schools and child day care centers differ. Chapters 2 through 6 focus on specific age groups. Chapter 2 deals with children from birth to 18 months, and chapter 3, with children from 18 months to 3 years. Chapters 4 through 6 cover 3-, 4-, and 5-year-olds, respectively. Each age-group chapter discusses characteristics typical of children in that age group and answers questions their parents ask. Chapter 7 deals with various problems families may encounter when seeking child care. It examines child care choices for special needs or handicapped children, and gives information for parents who work unusual hours. This final chapter also discusses legal issues that concern parents, such as how to report child care wages to social security, and includes other information about the Internal Revenue Service's regulations dealing with child care. The appendices contain information that is generic to all age groups, including state listings of licensing and resource and referral services, tax form examples, and check sheets to use when visiting prospective child care providers. The Distance between Feminism and Early Childhood Education: An Historical Perspective.

Pub Date—Oct 93

Note—30p; Paper presented at the Reconceptualizing Early Childhood Education: Theory Research and Practice Conference (Ann Arbor, MI, October 1993).

Pub Type—Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Attitude Change, Child Development, Child Rearing, Developmental Psychology, *Early Childhood Education, *Educational History, Females, *Feminism, Social Change, Social History

Identifiers—Developmentally Appropriate Programs, *Feminist Pedagogy

Despite the strong association between women educators and young children, a chasm exists between "education feminism" and early childhood education. This paper explores why this chasm exists, and offers ways in which the two fields can be brought together. The relationship of feminism and early childhood education is explored, using history as a frame of reference. The evolution of feminist thinking about young children and their education is examined, as is the development of the field of early childhood education. The paper concludes by calling into question the hegemonic domination of developmental psychology, the theoretical foundation upon which early childhood education is built, and suggests that feminist theory and epistemology could provide a viable foundation for a new vision of early childhood education. The paper argues that the unification of feminism and early childhood education would benefit both fields. Contains 50 references. (AS)

Descriptors—Classroom Techniques, Day Care Centers, Discipline, Employer Supported Day Care, *Inservice Teacher Education, Preschool Children, Preschool Education, *Preschool Teachers, *Teacher Guidance, Teacher Role, *Teacher Student Relationship

Identifiers—Developmentally Appropriate Programs

A practicum was conducted at a rural hospital-subsidized child development center to reduce the inappropriate responses of teachers in meeting the needs of children from 6 weeks to 6 years of age. Informal observations indicated that staff members of the center were not using child development knowledge in guiding and responding to children. The physical environment was not arranged to support active learning, open-ended experiences, or language development; daily experiences at the center were not structured to give children and adults the greatest potential for interaction. A series of inservice training sessions, addressing the areas of early childhood development, learning environment, learning experiences, and supportive staff responses, were conducted on-site for all 20 staff members. Staff members were divided into teams and assigned to one of two supervisors who served as consultants and facilitators. After each training session, the supervisor and staff member agreed on goals to achieve in relation to inservice knowledge and skills. Implementation was monitored, and data were collected in a portfolio. Progress was reviewed and evaluated by the staff member and supervisor. Subsequent to the training sessions, inappropriate responses declined, and appropriate techniques of supporting child development increased. (AC)

Identifiers—Australia (Sydney), *Lady Gowrie Child Centres (Australia).

This booklet reflects the past 10 year's thoughts and experiences and presents the current debate concerning multicultural early childhood education, as experienced by the Lady Gowrie Child Centre, in Sydney, New South Wales, Australia. The booklet describes how the center experienced the satisfying process of change and growth with such a program and realized that broader perspectives were needed to encompass the full range of diversity manifested by a truly multicultural classroom. Staff at the center found that the difficulty with the current thrust of multicultural education is that it does not sufficiently address the need for critical thinking nor develop skills for challenging bias within Australia. An early childhood program should be provided that incorporates the positive intent of multicultural education while avoiding the dangers of a tourist approach and to offer a more inclusive education that embraces gender, disability, and class issues by directly addressing the impact of stereotype, bias, and discriminatory behavior on young children. The booklet concludes with a multicultural resource center list. (AP)

Identifiers—Adult Child Relationship, Australia, *Jigsaw Puzzles, Special Needs Children

This booklet examines the educational value of jigsaw puzzles and gives practical suggestions on how to select and make them for use by children ages 1 through 8. It asserts that jigsaw puzzles provide children with the opportunity to develop problem-solving strategies, and discusses a theory of adult-child interaction that encourages the development of such strategies. In addition to problem solving, the booklet discusses how jigsaw puzzles help children to learn about various mathematical concepts and to develop eye-hand coordination, visual discrimination, and social skills. Practical suggestions are given on how to purchase jigsaw puzzles and how to organize the jigsaw puzzle area. A number of techniques for making puzzles are offered. Jigsaw puzzles for special needs children are also discussed briefly. (AS)

Descriptors—Access to Education, *Acculturation, *Cultural Pluralism, Federal Legislation, Foreign Countries, *Immigrants, Language Maintenance, Migration, *Multicultural Education, *Public Education, Refugees, Student School Relationship, Undocumented Immigrants

Identifiers—Language Minorities, Language Policy, *Switzerland

This booklet examines issues of multilingualism and cultural pluralism in French-speaking Switzerland, particularly as they relate to children of refugees and undocumented aliens. Chapter 1 focuses on past and current migratory waves, examining causes of Swiss emigration during the 19th century and more recent waves of immigration into Switzerland. Chapter 2 offers immigration figures, indicating that around 10,000 immigrant children arrive each year in Switzerland, representing approximately one-sixth of the country's school children. Chapter 3 provides an analysis for each French-speaking canton and for the structures used to integrate immigrant children into the classroom. The cantons either place the children immediately into age-appropriate classrooms of public schools or into separate reception classes. Chapter 4 examines the statutory obligations of the cantons to provide education for children of both undocumented immigrants and refugees. In chapter 5, intercultural training for teaching professionals is discussed. Chapter 6 describes the courses in students' native languages and cultures organized by the several countries of origin, tracing changes in objectives and pedagogies of these programs since the 1970s. Chapter 7 focuses on the role played by language instruction in the creation of a tolerant, nonracist pluralistic society. Contains 35 references. (AC)

This double issue of the journal "Report" focuses on the collaboration among seven social service systems that support and serve children and families. Each of the sections discusses one of the seven systems, presents an overview essay, and profiles programs that execute the service. The first section, on education, emphasizes linkages between schools, communities, and families to ensure educational success. Section 2 is concerned with the child welfare system and its support for foster families providing physical and emotional safety for children. The focus of Section 3 is the health care system and its scope beyond traditional clinical care. Youth development is discussed in Section 4, as a parallel movement to family support. The program profiles deal specifically with low-income and minority families in African-American neighborhoods. Section 5 focuses on supporting people with disabilities through centers and home visiting programs. Section 6 is concerned with the welfare system and using a new approach of combining employment services with family services. The last section focuses on the child mental health system, which is concerned with services for children and adolescents with emotional and mental disturbances. (BAC)

Identifiers—*Sotho People, South Africa, *Zulu People

This study sought to understand how South African Sotho and Zulu children learn and communicate at home. Data were collected from 80 homes of 5-year-olds through observation and supplemented by audiotaped sessions. The analysis sought to identify the social rules and constraints governing the amount, style, and content of the information transmitted to the child. Qualitative and quantitative analysis revealed that communication was influenced by the variables of age and sex of the communicator, and that these differences were related to seniority and the female gender. In the spontaneous interactions that were observed, children received a greater proportion of information from their peers than from adults. In the audiotaped sessions, which sought to record standardized school-based tasks, older children (especially girls) and adults took on a more active role in interacting with the children. The results suggest that to improve the children's academic achievement, intervention should focus on stimulating the interest and participation of the family members who influence the child. (BAC)

tion, *Health Promotion, Policy Formation, Pregnancy, *Prevention, Preventive Medicine, *Social Problems, *Well Being

Identifiers—Affective Disorders, *Primary Prevention, Sexually Transmitted Diseases

This book argues that a paradigmatic change of emphasis is needed from treatment to prevention in order to promote the well being of children and to reverse many of the social problems children face today. Written for an interdisciplinary audience, the book is divided into three sections. The first section provides a framework and overview of prevention issues. In the second section, representative problems of children's health, education, and behavior are defined and approaches to primary prevention and promotion are described. The last section provides a synthesis of themes and issues and identifies implications for practice, policy, training, and research. The 16 chapters are: (1) "Promoting Children's Health, Education, and Well-Being" (Rune J. Simeonsson); (2) "Toward an Epidemiology of Developmental, Educational, and Social Problems of Childhood" (Rune J. Simeonsson); (3) "Primary Prevention: The Missing Piece in Child Development Legislation" (Robert W. Chamberlin); (4) "Maternal and Child Health: A Collaborative Agenda for Prevention" (Bonnie Strickland and Merle McPherson); (5) "Healthy Children: Primary Prevention of Disease" (Nancy W. Simeonsson and Judith N. Gray); (6) "Preventing School Failure and Dropout" (Sharon Carnahan); (7) "Adolescent Pregnancy" (Tina M. Smith); (8) "Drug Use and Pregnancy" (Rebecca Edmondson); (9) "Child Abuse: A Prevention Agenda" (Gail S. Huntington and others); (10) "Preventing Injury in Children and Adolescents" (Joseph E. Zins and others); (11) "Externalizing Behavior Disorders" (Rick Jay Short and Richard Brokaw); (12) "Internalizing Affective Disorders" (Jayne E. Bucy); (13) "Sexually Transmitted Diseases: A Paradigm for Risk Taking among Teens" (Susan L. Rosenthal and others); (14) "Promoting Literacy Development" (Dixie Lee Spiegel); (15) "Policy and Practice: Implications of a Primary Prevention Agenda" (Rune J. Adduci, Lynne L.
Mobility and Student Achievement in Orange High School.

Research for Better Schools, Inc., Philadelphia, Pa. Spons. Agency—Office of Educational Research and Improvement (ED), Washington, DC.

Pub Date—Jan 90

Contract—400-86-0003

Note—20p. This report was prepared at the request of the Director of Research and Evaluation in the Orange School District.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, *English (Second Language), Family Characteristics, *High Schools, *High School Students, Limited English Speaking, Predictor Variables, Socioeconomic Status, Student Evaluation, *Student Mobility

Identifiers—*Orange City School District NJ

An evaluation was conducted of the numbers of student who move both within and into the Orange Township School District, New Jersey, and the impact of this student mobility on academic achievement. The district is in a small urban city located within the metropolitan New York area. The study was conducted at the Orange High School, using a sample of 198 tenth-grade students for whom the most recent scores on the state mandated High School Proficiency Test (HSPT) were available. Data on students' family structure, primary language, and socioeconomic status were also collected for use as control variables in the analysis. Student mobility was measured by the number of consecutive uninterrupted years in the district, the number of moves, and the distance of the move. The results indicated a high degree of mobility, and that mobility did not affect student achievement. The mobility factors explained only 1.8% more of student achievement than did the non-mobility factors. Student language was the only variable consistently related to HSPT performance for students who transferred into the district from both outside the United States and within the United States. Even with the mobility factors taken into consideration, students who spoke only English scored almost six points higher on the HSPT than students who did

not speak only English. The results suggests that whether or not a student speaks only English at home is an area that the Orange School District can focus on as it strives to improve student achievement. (HTH)

Promoting Successful Transition into School: A Review of Current Intervention Practices.

Kansas Univ., Lawrence. Kansas Early Childhood Research Inst.

Spons. Agency—Department of Education, Washington, DC.

Pub Date—Jun 91

Contract—H024U80001

Note—15p. Portions of this paper were presented at the conference, "New Directions in Child and Family Research: Shaping Head Start in the 90s" (Arlington, VA, June 1991).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—At Risk Persons, Early Childhood Education, *Early Intervention, Educational Strategies, Grade 1, Grade Repetition, Kindergarten, *Program Effectiveness, School Entrance Age, *School Readiness

Identifiers—Delayed School Entry, Project Head Start

Three types of intervention strategies are helping children make a successful transition into kindergarten: early intervention programs, school survival skill training, and delayed school entry. Early intervention programs are early childhood and preschool programs such as Head Start. The overall long-term effectiveness of such programs has generally been impressive; however, increased kindergarten readiness scores for participating children do not always transfer to the public schools, suggesting a discrepancy in classroom organization and teacher style between preschool and primary school. School survival-skill training involves direct instruction in specific skills immediately prior to the child's transition into school. Controversy over this approach has focused on whether preparation for kindergarten is an appropriate and necessary function of preschool programs. This controversy might be eased if some of the broader developmental tasks faced by children during early school transitions could be addressed, such as learning to view themselves as successful students, and formulating strategies for learning. Delay of school entry for children who appear at-risk for early difficulties often involves placing such children in "developmental" kindergarten or first-grade programs. The thrust of this movement is maturational rather than educational. Despite the increasing use of this strategy, a review of research into delayed school entry, placement in developmental programs, or retention following kindergarten or first grade indicates overwhelmingly that these practices are rarely helpful and sometimes harmful. Factors contributing to successful school transition include personal characteristics of the child, children's school performance, family and parent characteristics, and teacher characteristics. Identifiers—Federal Communications Commission This newsletter issue focuses on the role of parents in monitoring their children's television viewing habits. The newsletter first discusses the current state of parental concerns about the content of television programming, noting the industry's increased willingness to provide more information, and the advent of a rating system and "v-chip" that would enable parents to block out objectionable television programs. It then discusses what research says

about the effects of television viewing on children in the areas of amount of viewing, learning, violence, and use of time. This section notes that although children can learn a great deal from television, they learn less than they would from a comparable amount of time reading, and that excessive amounts of viewing inappropriate programs can desensitize children to violence. The newsletter then lists various organizations and their activities in the area of television and its effect on children, including the Federal Communications Commission, Children's Television Workshop, Center for Media Literacy, and various educational organizations such as the National PTA. Addresses of these organizations are then listed as sources for further information. The newsletter concludes with 10 suggestions for parents to curb the effects of television violence on their children. (HTH)

Parent Involvement in Education. Indicator of the Month.

National Center for Education Statistics (ED), Washington, DC.

Report No.—NCES-94-693

Pub Date—Oct 94

Note—3p.

Pub Type—Numerical/Quantitative Data (110)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, Asian Americans, Behavior Problems, Black Students, Grade 8, Junior High Schools, *Junior High School Students, *Parent Participation, *Parent Student Relationship, Racial Differences, Rural Schools, Sex Differences, Suburban Schools, Urban Schools

Noting that parent involvement in their children's schooling can improve academic performance, this report presents statistics on eighth-grade students' perceptions of parent involvement and its effect on their achievement for the school year ending in 1988. The report first highlights the findings as follows: (1) More than 80 percent of eighth-graders reported that they had talked with their parents about school life and selecting courses—six of ten reported that their parents had spoken to a teacher, but few reported that their parents visited their classes; (2) females were more likely than males to report talking with their parents about school, while males were more likely to report that their parents had spoken with a teacher; (3) Asian eighth-graders were less likely than others to report that their parents had talked with a teacher, while Black students were more likely than others to report that their parents had visited their classroom; (4) urban students were more likely than suburban or rural students to report that their parents had spoken with their teachers and had visited classes; and (5) students with three or more misbehavior incidents were less likely to report that their parents limited their television viewing or going out with friends than students with fewer incidents. The report then presents in table form the percentage of students who reported various types of parent involvement, by sex, race or ethnicity, and type of school (urban or rural). These data are then presented in bar graph form. (HTH)

Descriptors—*American Indian Education, *American Indian Reservations, American Indians, Elementary Secondary Education, Higher Education, Information Networks, *Policy Formation, Rural Areas, Technological Literacy, *Telecommunications, *Tribal Sovereignty

Identifiers—INDIANet, *Information Superhighway, *Telecommunications Policy This newsletter article addresses the increasing role of telecommunications and its effect on American Indian institutions. Advocates believe that telecommunications could make rural Indian reservations more viable places to live, work, edu-

cate children, and treat illnesses. Additionally, new technology could revolutionize reservation economies. However, before Indian communities leap onto the "information superhighway," they must be willing to take action to determine how the information system is designed and regulated. American Indian Telecommunications and Americans for Indian Opportunity (AIO) have attempted to educate Indian communities concerning the urgency and necessity of becoming a part of the telecommunications movement. American Indian Telecommunications was created to promote Indian use of computers and telecommunications in a culturally appropriate manner. AIO raised money and started INDIANet, which provides subscribers with free job announcements, information from the Federal Register and several federal agencies, research services, and free access to Internet. Despite such growing involvement, Indian people must do much more at the national and local level with regard to the national telecommunications agenda. To protect their sovereign rights, tribal institutions must ensure the nation's telecommunications policies reflect various Indian concerns including privacy of data, cost sharing, safeguarding traditional tribal beliefs and values, and encouraging Indian people to become producers of media as well as consumers. Identifiers—*Empowerment, *Nepal

This monograph describes Save the Children's Non-Formal Education (NFE) Program implemented in rural Nepal. Since the formal education of females is not a cultural priority, NFE targets women and girls. Currently, 90-95 percent of participants are female, including adult women and out-of-school girls. Enhancing and increasing literacy is the primary goal of NFE, a community-based program that couples literacy with community development. Program features include materials that are relevant to women's daily lives, and the organization of women's groups for collective action. Such groups have undertaken economic development activities; devised a system of home-based rotating child care; empowered local women economically, socially, and politically; and begun activities focused on the needs of children. Program implementation has demonstrated several principles of nonformal education intervention: (1) literacy curriculum relevant to learners' lives energizes the process of learning to read; (2) program sustainability is directly connected to community initiative and program ownership; (3) effectively reaching isolated rural areas depends on local program management, training, and monitoring; (4) an integrated approach addresses community needs more effectively and holistically; (5) raising awareness and meeting raised demands should be organizational responsibilities; and (6) child care issues must be addressed. Descriptors—*American Indian Culture, Camping, Childrens Literature, *Chippewa (Tribe), *Cultural Activities, Cultural Education, Elementary Education, Field Trips, Instructional Materials, *Outdoor Education, Trees

Identifiers—*Maple Sugar, Minnesota

This book describes the traditional method of making maple syrup and maple sugar as practiced by the Anishinabe people in Minnesota. It begins with the Ojibway story of Ininatig "the man tree" and how Native Americans have relied on the sugar maple tree for food. It then tells how an Anishinabe man named Porky White continues his people's traditions by teaching students to tap trees and make maple sugar. Each spring, hundreds of children from schools in the Minneapolis area come to his sugar bush camp to learn about sugar making. Friends and family live at the camp during the 2-3 weeks of sugar making. Porky tells traditional stories and remembers his boyhood when birch bark, rather than plastic, containers were used. Respect and thankfulness for the trees is a theme that is present throughout the book. Includes many color photographs, a word list, and recommended further reading list. (TD)

Identifiers—*Internet, Kansas, National Information Infrastructure

American rural communities are decaying, the underlying causes being chronic unemployment and inadequate infrastructure. The information age can cause the ultimate demise of rural America by further eroding local institutions or it can be its savior by revitalizing the sense of community. The link between community development and the information age is discussed. Electronic access to government services and online learning, tele-entrepreneurship, and using one's computer to get a better job are part of the solution to rebuilding rural community. The Internet, the National Resource Education Network (NREN), and the National Information Infrastructure (NII), which directs and makes policy for NREN and the Internet, are briefly described. Policy goals of the NII are discussed, particularly that it provide universal service to avoid information haves and have-nots. A proposed project that will deliver economic development services to all of Kansas is described, as are two successful rural information networks. In K-12 education, the two main issues are training teachers to use the Internet and the incorporation of Internet information into the curriculum so that it is relevant and useful. (TD)

Elementary Education, Foreign Countries, *Itinerant Teachers, Life Style, Migrant Children, *Migrant Education, Migrants, *Program Effectiveness, *Teacher Attitudes, *Teacher Role Identifiers—*Showmens Guild (Australasia)

This paper examines the perceptions of teachers associated with the Brisbane School of Distance Education (Queensland, Australia), concerning their role in the establishment and implementation of a primary education program for children of the Showmen's Guild of Australasia. Interviews with five itinerant teachers revealed that their responsibilities include assessing correspondence papers from students and maintaining telephone contact with students, home tutors, and parents, as well as working in selected towns on a short-term basis to teach "face-to-face" lessons to itinerant students. Each teacher worked with between 15 and 20 children, usually in family groups across grade levels. Teachers expressed concerns about the show children's lifestyle and how this has affected their educational and social development. However, all teachers felt that the distance education program had improved the children's educational opportunities and adequately addressed their educational needs. Disadvantages of the children's itinerant lifestyle that the program was unable to address were lack of routine, lack of continuity, dependence on the support of the home tutor, role conflicts of local teachers, and insufficient program funding. Implications for other itinerant education programs include recognizing the importance of teacher attitudes when implementing an educational program for a marginalized group. Contains 20 references. Descriptors—*Disadvantaged, Distance Education, *Educational Opportunities, Elementary Education, Foreign Countries, *Group Unity, *Lobbying, Migrant Education, *Migrants, *Political Power, Social Bias, Subcultures

Identifiers—*Marginality, *Showmens Guild (Australasia)

This paper examines the tactics used by the Showmen's Guild of Australasia in successfully lobbying for the development of a distance education program for their children. The Guild is considered to be a "marginalized" group, meaning members have less access to wealth, power, and status. Since 1930, members of the Showmen's Guild and their families have traveled from town to town providing agricultural and equestrian shows. Despite the diversity of backgrounds and experiences among people connected with the show circuit, the Guild is highly organized and has been politically active. Informal sanctions have been effective in enforcing group discipline and in presenting the image of a single body of opinion. In addition, investment in sophisticated machinery and technology has resulted in show people having the financial resources to buy homes and have a political voice via more "normalized channels." Although members learn early that they are a marginalized group and are perceived as different from the mainstream, the group maintains close ties and often celebrates its difference. Implications for educational program development center on the goals of educational programs designed for disadvantaged groups, and the status of other marginalized groups and their efforts to contest their marginalized status. Identifiers—*Showmens Guild (Australasia)

This study examines the elements of "work and play" as they are conceptualized by the children of the Showmen's Guild of Australasia. Recreation and work are semantically distinct, but this distinction can be blurred in particular contexts and according to differing individual perceptions. As part of a study evaluating a distance education program, interviews conducted with parents, children, home tutors, and itinerant teachers included a series of questions about work and play. It was found that many of the families participated in outdoor recreation such as boating and camping. However, the mobile lifestyle of the children prevented them from belonging to a team, attending training sessions, playing regular sports, and developing skills in a controlled form. Instead their participation was limited to sport and play in an informal and semistructured manner at school (for example, lunch breaks and physical education classes) and on the show grounds. The children's lifestyle also contributed to their view of work. For most children, show day represents a day of fun, but for show children it is a day of work. They attend school and after school they return to the show ground to work alongside their parents until late evening. Almost all show children had work aspirations beyond the Guild, but knew that a working life in the show was available to them. (LP)

Identifiers—Marginality, *Researcher Subject Relationship, *Showmens Guild (Australasia)

This paper examines the link between language and power as it relates to program evaluation of the Brisbane School of Distance Education. This program was developed in 1989 to meet the educational needs of children who are part of the Showmen's Guild of Australasia. Guild members and their families travel from town to town putting on agricultural and equestrian shows. As part of program evaluation, interviews were conducted with parents, children, home tutors, and itinerant teachers. Interpretation of interview data was affected by relationships between the Showmen's Guild and the School of Distance Education, between the Guild and the researchers, and between the School and the researchers. It was found that in each relationship, language was used in an attempt to exercise power, by way of controlling the constructed identities that represent each group to "the public." Other noteworthy factors in these relationships include difficulties establishing communication among the three groups due to the mobility of Guild members, the ambiguous status of individuals within each group, and the coinciding and competing aspirations of researchers. Based on communication theories, this paper suggests that language reinforces the power to control responses of readers or listeners, that power is differentiated and mediated through language, and that all three groups involved in the study attempted to enhance their cultural capital and

thereby become less marginalized in the wider community. (LP)

Identifiers—*Sense of Place, *Showmens Guild (Australasia)

This paper examines itinerancy, particularly educational itinerancy, and the appropriateness of various labels applied to the life style of members of the Showmen's Guild of Australasia. Guild members and their families travel from town to town providing agricultural and equestrian shows. An ongoing study is examining the effectiveness of a distance education program established in 1989 for show children. Researchers interviewed children, parents, and home tutors about curriculum, participant roles, social networks, and work and play. It was found that most respondents referred to Guild members' caravans (i.e. house trailers) as their "homes," and children talked about coming "home" from school to their caravans. On the other hand, most responses to the question, "Where is home for you?", referred to a particular town, rather than to "my caravan." Some blurring of the home/school distinction was also revealed, in that school work (rather than homework) was described as being completed both at the local schools and in the caravans. These varying responses indicate the wide range of experience and understandings that make up the particular form of itinerancy in which show people engage. Additionally, the lifestyle of show members cannot be stereotyped as nomadic, as their lives have definite frontiers and boundaries and some show people are very successful in material terms. This paper concludes that an attempt to characterize educational itinerancy as conforming rigidly to a single and simplistic conceptualization fails to gain credence. Instead, itinerancy emerges as a multilayered, contextualized, and negotiated phenomenon. (LP)

Identifiers—*Showmens Guild (Australasia)

This paper examines implications for teacher education derived from the evaluation of a distance education program for the Showmen's Guild of Australasia. The program was established in 1989 to meet the educational needs of Guild members who travel from town to town providing agricultural and equestrian shows. A review of the literature reveals that there are numerous difficulties faced by highly mobile students and by rural students and teachers. Interviews conducted with children, parents, home tutors, and itinerant teachers focused on their perceptions of their lives and their general views on education. Data from the interviews revealed the

existence of extended and intensive social networks that sustain the itinerant lifestyle. Respondents evaluated the distance education program positively as meeting the educational needs of show children. Work and the work ethic played an important role in the development of children's distinctive identity, while sport and play were associated with local schools and socializing with local children. This study points out the importance of teacher graduates being acquainted with the increasing variety of educational experiences, implications of distance education for children, and benefits and limitations of distance education programs. Identifiers—*Showmens Guild (Australasia)

This paper presents initial results of research on a distance education program developed in 1989 for the children of the Showmen's Guild of Australasia. The program accommodates the mobility of children and their parents who are rarely in any town for more than a week during the show circuit. The children complete correspondence lessons in various subjects and are assisted by their parents or home tutors. Several times a year, distance education teachers join the children during the show circuit and work intensively with them for several weeks. Unlike many other groups involved in the distance education program, the Showmen's Guild is well organized. It has a very supportive parent base and has campaigned over the years to establish favorable political support for a program to meet the special needs of its children. A literature review reveals that high mobility can place students at an educational disadvantage while placing an enormous burden on those providing the education for the mobile group. Interviews conducted with parents, children, home tutors, and teachers revealed close and trusting relationships between parents and distance education teachers and between students and distance education teachers. In addition, there is typically an intimate relationship between the mother and her children as it is the mother who takes on the responsibility for organizing and managing her children's education during a hectic working day. This paper concludes that the uniqueness of each mobile group must be taken into account when implementing an educational program, and delivery must respond to the socioeconomic and cultural attributes of each group. A Primary Change from Within a Rural Kentucky School District.

Pub Date—[90]

Note—15p.

Pub Type—Opinion Papers (120) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Assistant Principals, *Change Strategies, *Curriculum Development, *Educational Change, Educational Practices, Elementary Schools, Inservice Teacher Education, *Primary Education, Reading Instruction, Rural Education, *Rural Schools, Teacher Attitudes

Identifiers—*Developmentally Appropriate Programs, High Scope Model, Kentucky Education Reform Act 1990, *Nicholas County School District KY

This paper describes how a vice principal at a rural Kentucky elementary school successfully implemented curriculum changes to meet the learning needs of young children. The change process also addressed the concerns of kindergarten teachers frustrated with the demands of teaching basal reader activities that eliminated explorative play and other developmentally important activities. Initially, two kindergarten teachers and two administrators attended training sponsored by the Parent and Child Education Program (PACE). PACE advocates the use of the High Scope curriculum, which is based on a child-centered, active-learning approach. By the next school year, classrooms were redesigned and an individualized curriculum was in place. Meetings were held with kindergarten parents to prepare them for program changes. Parents had positive reactions and, after witnessing the benefits of the curriculum, wanted this same approach to carry over to the first grade. Although first-grade teachers were critical of the approach, they agreed to attend training and try some of the advocated practices. The following summer, primary teachers, special education teachers, the school librarian, the curriculum supervisor, and the principal attended training conducted by a certified High Scope certified trainer. Although attitudes of the first-grade teachers presented the biggest impediment to change, faculty from grades K-3 decided to move toward literature-based reading. In 1990, the Kentucky Legislature mandated that all students in grades K-4 not be given standardized tests and that every school move to an ungraded primary model by fall 1992. This move has supported educational change in other Kentucky schools and in addressing the learning needs of young children. (LP)

Language Instruction, Nonformal Education, *Ojibwa, Preschool Education, Tribally Controlled Education

Identifiers—Canada, *Mohawk

This paper examines current usage, educational initiatives, and future prospects for survival of three Canadian Aboriginal languages—Ojibwa (frequently called Ojibwe), Mohawk, and Inuktitut. The presentation centers around the direct insider stories of Mohawk and Ojibwa coauthors, with comparative commentary by an outsider with long-term experience in Inuit communities. Among all Canadian indigenous peoples, 36 percent of persons over 15 and 13 percent of school-age children speak their indigenous language, a dramatic shift from 15 years ago when over half of indigenous children entered school with native language fluency. Ojibwa and Mohawk communities demonstrate a pattern of increasing language loss with each generation. Among Inuit, however, 72 percent of adults and 39 percent of schoolchildren (much higher proportions in the eastern Arctic) speak Inuktitut, and 88 percent of speakers also read the language. An overview and informant comments cover the following topics: (1) school issues and effects (language of instruction controversies, innovations that adapt school culture to community needs, evolving roles of indigenous teachers, and dissatisfaction with indigenous teacher preparation); (2) community-based efforts to teach and maintain indigenous languages; (3) the relationship of language to culture and of language structure to thought patterns and worldview; and (4) language change and hope (language attitudes across Canada, emerging bilingual and multiple-literacy practices, and increasing contacts among Inuit-speaking peoples around the Arctic). Appendices contain language demography data and the texts of interviews with key informants. (SV)

This activity packet was designed to introduce students in grades 5-7 to the geology of the Blue Ridge Mountains through hands-on activities for the classroom and the outdoor setting of Mount Jefferson State Park (Jefferson, North Carolina). Previsit activities introduce students to the different rock types: sedimentary, igneous, and metamorphic. Students learn how rocks are formed, how to recognize them, and how they erode. On-site activities familiarize students with the actual rock types of Mount Jefferson State Park, their characteristics, and where they are found in the park. Postvisit activities broaden student understanding of geology by clarifying how rocks and minerals are used in our daily lives. Each activity includes curriculum objectives, location, group size, estimated time, materials, special considerations, major concepts and objectives, teacher instructions, information for students, and student worksheets. The guide also includes an overview of the North Carolina State Parks System and Mount Jefferson State Park, information on the geology of Mount Jefferson State Park, vocabulary words, references, and forms to schedule park visits. Identifiers—Congress 103rd, *Project Head Start

A joint Senate committee hearing received testimony on the unique circumstances and needs of American Indian Head Start programs. There are currently about 120 Indian Head Start programs providing services to 181 American Indian and Alaska Native tribes. The Associate Commissioner of the Head Start Bureau described the ongoing federal initiative aimed at improving and expanding Head Start by making additional financial and technical assistance available to Head Start grantees. U.S. Senators, tribal leaders, Indian parents, and representatives of the National Indian Head Start Directors Association, the National Head Start Association, the National Indian Education Association, and individual Indian Head Start programs discussed the following issues: (1) potential weakening of the federal-tribal nation-to-nation relationship by proposed decentralization of federal administrative functions for serving Indian children; (2) eligibility requirements that exclude educationally disadvantaged children whose family income is marginally above the maximum; (3) restrictions that prevent a tribal program from serving Indians of other tribes or its own members living off-reservation; (4) need for pre-natal services and services for infants and toddlers; (5) obstacles to construction and renovation of Head Start facilities by Indian grantees; (6) funding difficulties and additional program costs related to the remoteness of many Indian communities; (7) insufficient funds to address the training needs of staff, parents, and volunteers; and (8) need for Head Start services in unserved Indian communities. Appended materials include legislative recommendations, numerical data on Head Start programs, and descriptions of individual tribal programs. (SV)

Identifiers—Congress 103rd, *Native Hawaiian Education Act 1994

A Senate committee received testimony supporting reauthorization of the Native Hawaiian Education Act as part of reauthorization of the Elementary and Secondary Education Act (ESEA). In the previous week, the House of Representatives

had narrowly defeated an effort to delete the Native Hawaiian Education Act from ESEA reauthorization. The Native Hawaiian Education Act recounts the history of the U.S. invasion and illegal annexation of Hawaii, describes the basis of the federal government's trust responsibility toward Native Hawaiians, the educational needs of Native Hawaiian children, and authorizes supplemental educational programs to assist Native Hawaiians to reach the National Education Goals. These supplemental programs are Native Hawaiian Language Immersion Project; Native Hawaiian Family-Based Education Centers serving infants, preschoolers, and their families; Native Hawaiian Higher Education Demonstration Program; Native Hawaiian Gifted and Talented Demonstration Program; and Native Hawaiian Special Education Program. Testimony by U.S. Senators and Representatives, school and college administrators, program directors, teachers, and parents describes the programs and provides evidence about the need for these programs and about program successes and accomplishments. Appended materials include the text of the Act and data on program enrollments and Native Hawaiian college enrollment. (SV)

Identifiers—*California, Chicanas, Chicanos, *Ford Foundation

This report addresses the underrepresentation of Mexican-Americans in the faculties of U.S. universities. During the 11-year period from 1980 to 1990, a total of 91,837 women received doctorates from U.S. universities, and of these, 751 (0.7 percent) were Mexican-Americans. Of the 148,352 men who received doctorates during this period, 1,189 (also 0.7 percent) were Mexican-Americans. Other trends include critical underrepresentation of Mexican-Americans, especially females, in the fields of physical science, engineering, life science, humanities, education, and other professional fields. California undergraduate institutions produced the largest share of Mexican-American students who went on to receive doctorates; within the state, the California State University system produced the largest number of these future doctorates. Sixty-six scholars who were awarded the Ford Foundation Minority Fellowship were interviewed concerning family background and educational experiences. Respondents indicated that educational barriers included lack of preparation and skills, lack of financial support, lack of information on graduate school, lack of role models, family responsibilities, being stigmatized as an affirmative action student, and experiences with racial and gender discrimination. On the other hand, scholars spoke of positive mentoring relationships; research experiences; and encouragement from certain faculty, peers, and family. They noted that the single most important factor in obtaining a doctoral degree was a positive mentoring experience. Policy implications for public schools and universities are discussed. Contains 20 references, numerous tables, the survey questionnaire, and a summary that was published separately. (LP)

Identifiers—*California, *Chicanos

This report examines factors that influenced low-income Mexican-Americans from homes with little formal education to achieve high academic status. Although over one third of students in California's public schools are Hispanic, only a small fraction of these students complete a university education. Fifty Mexican-Americans (30 men and 20 women) who had completed graduate degrees were interviewed about family background and educational experiences. Most of the subjects' parents supported their children's educational goals, set high performance standards, and helped in any way that they could. In contrast to middle-class parents, subjects' parents frequently modeled a hard-work, education-as-mobility ethic. In addition, parents told stories of wealth, prestige, and position to their children to keep their hopes alive for a better future. Subjects expressed intense motivation for achievement and a personal vow that they would not continue to live in poverty. More than two thirds of subjects thought that persistence was more important to their success than innate ability. In all cases, subjects were exposed to a high-achieving peer group against whom they could realistically test their own skills and validate their performance. In fact, almost all had extensive exposure to middle-class white students, a circumstance that helped them to move easily between cultures and to adapt to widely differing situations. Minority recruitment programs and financial aid were critical to the continued education of most subjects. Implications for educational policy in California are discussed. Includes 70 references and a summary that was published separately. (LP)

Migrant Day Care Needs and Services in Pennsylvania.

Research for Better Schools, Inc., Philadelphia, Pa. Spons Agency—Central Susquehanna Intermediate Unit 16, Lewisburg, Pa.; Department of Education, Washington, DC; Pennsylvania State Dept. of Education, Harrisburg.

Pub Date—Feb 91

Note—88p.

Pub Type—Reports - Evaluative (142) — Tests/Questionnaires (160)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Day Care, *Delivery Systems, Early Childhood Education, *Migrant Children, Migrant Education, *Migrant Programs, *Needs Assessment, Program Evaluation, State Programs

Identifiers—*Pennsylvania

This report evaluates the day care needs of Pennsylvania migrant families and the adequacy of current state and local resources and delivery system for meeting those needs. Data collection included a meeting with state program administrators; mail surveys of state, regional, and local agency administrators and staff, and of employers of migrant workers; on-site visits to migrant day care centers; and review of state financial records. The poverty of migrant families, the nature of their work, and the fact that many young children are non-English-speaking creates specialized day care needs. Due to inadequate data sources and agency differences in definitions, counts of migrant workers and their families in Pennsylvania were inconsistent and unreliable. However, estimates based on census figures and program counts suggest that there may be over 11,000 migrant children under age 13 in the state. In 1990-91, the Statewide Migrant Day Care Program provided services to 1,110 migrant children, of whom less than 300 received direct day care and the rest received health and referral services. In addition, the limited resources available for day care were unevenly distributed across the state. The delivery system for these limited resources, however, was more than adequate in terms of program and fiscal efficiency. This report includes data tables and recommendations to legislators and agency personnel. Appendix contains survey questionnaires, interview guide, organizational charts, and policy documents. (SV)

Descriptors—*Educational Improvement, Elementary Secondary Education, *Improvement Programs, *Planning Commissions, *Rural Education, *Statewide Planning

Identifiers—Delaware, Maryland, New Jersey, Pennsylvania, *Rural Assistance Councils

In 1988, Research for Better Schools (RBS) proposed the development of state-specific rural assistance councils (RAC) in Delaware, Maryland, New

Jersey, and Pennsylvania to assist in strengthening rural school-community partnerships and in planning rural school improvement. This report summarizes the activities of each of the four RACs during 1988-92 in the following areas: (1) formation and organization; (2) developing a state-specific working definition of "rural"; (3) developing a statewide improvement plan for rural education; and (4) disseminating information related to the statewide improvement plan. In addition, some RACs sought additional resources to implement rural and small school improvement plans, and supported local school improvement activities. Despite differences among the four councils in membership and activities, several commonalities were observed: (1) the support of state education agencies (SEA) was important in establishing a firm foundation for the RACs; (2) SEAs were critical in identifying and recommending RAC members who were committed individuals representing important rural constituencies; (3) the development of a rural education assistance plan was a slow process that appeared to move in cycles; (4) the involvement of the RBS staff member participating on each RAC and providing technical and some financial assistance, was a key element in RAC organization and development; and (5) all RACs achieved an initial objective of identifying and disseminating successful practices and programs for rural schools. Descriptors—*Academic Achievement, *Computer Assisted Instruction, *Computer Managed Instruction, Elementary Education, Elementary Schools, Elementary School Students, *High Risk Students, Program Evaluation, *Rural Schools, Small Schools, *Student Attitudes, Teacher Attitudes

A 3-year project examined the potential of a computer-managed instruction (CMI) system to improve the academic performance of students in small rural elementary schools. A CMI system consisting of 32 student work stations, 6 courseware packages, 2 testware packages, and a management package was installed at 3 sites in Maryland, Pennsylvania, and New Jersey. The New Jersey school at the time the project began enrolled 180 students in grades two, three, and four; the Maryland school began with 216 students in grades K-6; and the Pennsylvania school with 275 students, grades K-5. Each had significant numbers of at-risk students. Each school year, students completed the Waterford Test of Basic Skills (WTBS) for placement, then received CMI approximately 30 minutes daily throughout the year, alternating among subjects (reading, language arts, writing, mathematics, and typing). A posttest on the WTBS and an attitude survey were administered to students at the end of the school year. Regular observations and interviews assessed teacher attitudes and practices relative to CMI. Following modest gains in the first year, achievement results in the second and third years showed significant gains for all grades and sites. Student attitudes toward their experience with computers were extremely positive and consistent. Many teachers initially viewed the program as an add-on and resented the loss of instructional time. However, in the second and third years, teachers began to incorporate CMI into their instructional activities. Contains tables detailing achievement results. (SV)

Identifiers—*Ethnohistory, Torono Oodham (Tribe)

This paper examines the remembrances or life stories of four young adult American Indians and their efforts to evolve an understanding of themselves as individuals and as culture bearers interacting in two different societies. The project objective was to investigate the correlation between American Indian people's ability to use their heritage languages and how they felt about their identities as culture bearers and as members of a cultural group. The relevant literature is reviewed concerning life stories, the development of social and cultural identity, and the centrality of language to self. The paper consists principally of selected transcripts of conversations with four consultants (Oodham, Hopi, and two Navajo) in which their descriptions of childhood, family, community, and culture are left intact. Discussion of the life stories focuses on the integral importance of the heritage language to the conveyance of culture, the close relationship between language and traditions, the necessity of the heritage language for both daily social interaction and for gaining an understanding of ceremonies and rituals, and its use as an indication of respect in communication with elders. Over the year-long course of interviews, the Indian consultants evolved the perception that to have a great sense of identity with their traditional cultures and to maintain and carry those cultures forward, they had to speak their heritage language. Contains over 70 references. (RAH)

Descriptors—*American Indian Education, American Indians, *Doctoral Programs, Ethnic Discrimination, *Faculty Advisers, Financial Problems, Graduate Students, Higher Education, Institutional Environment, *Mentors, *Mexican American Education, Mexican Americans, Qualitative Research, Self Concept, Student Alienation, *Student Attitudes, Teacher Student Relationship
Identifiers—United States (Southwest)

This paper addresses the continuing failure of racial and ethnic minorities, specifically Mexican Americans and American Indians, to gain full representation in doctoral graduating classes and college faculties. The demographics of minorities in doctoral programs is reviewed with particular emphasis on the Southwestern United States and the two minority groups under consideration. The qualitative data for the study consist of 139 responses to a free-response question presented at the end of a lengthy questionnaire completed by 176 Mexican American and 38 American Indian doctoral students. The broad themes for discussion are financial obstacles and institutional barriers; the departmental environment, including academic and social integration and alienation and discrimination; and faculty and student interaction, which includes ethnic role models, relationships with mentors and advisors, and academic self-concept. Representative verbatim statements are given in each category. Mentor relationships were highly significant in the satisfaction of doctoral students, and same-gender and same-ethnicity pairing of doctoral mentors and students significantly affected the academic satisfaction of these minority doctoral students. Contains 52 references. (RAH)

Identifiers—*Ambivalence (Psychology), Middle School Students

This paper examines the influence of community context on the attitudes of rural and nonrural adolescents toward their own future geographic and social mobility. Part of a national sample in a longitudinal study of career development, the 1,060 subjects were public school students in grades 6, 8, 10, and 12 from 3 contrasting Illinois communities. Subjects completed questionnaires based on those used in the National Educational Longitudinal Study (NELS), and some also participated in the experience sampling method for obtaining self-reports on activities and moods. Some analyses were replicated using NELS data. Hypotheses were that rural adolescents would be more likely than their nonrural counterparts to have future residential preferences that would be incompatible with their career aspirations, and that the resulting conflict would lead to uncertainty and negative affect regarding the future. Questionnaire data revealed a greater prevalence among rural than among nonrural adolescents of a potential conflict between the perceived importance of staying close to parents and relatives and moving away from their area. Those adolescents expressing this potential conflict were more likely to indicate feeling empty, angry, and pessimistic about their futures. Compared to urban and suburban students, rural adolescents (particularly rural males) expressed more hesitancy about pursuing further education, more anger about their futures, and more worry and lower motivation when doing activities related to their future goals. Contains data tables, figures, and 16 references. (Author/SV)

Descriptors—Economic Development, Federal Aid, *Federal Programs, Government Role, Human Resources, Public Policy, Rural Areas, *Rural Development, *Rural Economics

This report identifies factors that influence a rural area's economic success or failure, and evaluates whether federal programs efficiently address rural economic problems. Data collection included a review of federal programs that provide funding to rural areas, and interviews with federal and state agency officials involved with rural development and with local officials in 31 rural counties in 13 states. The counties selected were samples of counties that performed better than, worse than, or consistent with the predictions of an economic model. Three factors that frequently inhibit economic growth are inherent rural characteristics—distance from metropolitan areas, reliance on a single industry, and sparse population. Other obstacles to rural development are inadequate infrastructure, poor business climate (lack of credit or tax incentives, and workers lacking in technical or basic

(skills), lack of local business expertise, financial drain of unfunded state and federal mandates, and lack of effective local leadership and planning. Between 1983 and 1992, approximately 689 federal programs related to economic development, human resources, agricultural/natural resources, and infrastructure channeled about \$667 billion to rural areas. Of the 689 programs, 461 were human resource programs sponsored by such entities as the National Science Foundation, the U.S. Department of Education, and the National Endowment for the Humanities. The many complex and narrowly focused programs are generally difficult and costly to use because officials must grapple with a variety of rules and regulations. These numerous programs are an inefficient surrogate for a single federal policy for rural economic development. Moreover, the federal interagency group established to address these problems lacks the authority to make program changes. Appendices contain a list of counties visited, comments from federal departments, and legislative recommendations. (SV)

Identifiers—Canada, Community Viability, Europe, *Multicommunity Collaboration, Rural Restructuring, United States

This book reports on a study of rural community development policies and practices in the United States, Europe, and Canada in relation to multicommunity collaboration as a rural restructuring strategy. The study focused on multicommunity collaboration involving two or more small rural communities working together to attain social or economic development objectives that communities would not be able to attain individually. Data were derived through a combination of personal interviews and a follow-up mail survey. Data led to the development of a definition and classification of multicommunity collaboration; identification of the structure and process of creating, promoting, and sustaining multicommunity collaborations; determination of guiding principles for success at the local level; determination of the degree to which prolonged collaboration has led to larger municipal or tertiary levels of government; and identification of educational needs of leaders and systems that support multicommunity collaboration. The book also includes the following appendices: (1) a list of rural area visits, consultations, and conferences in Canada, the United States, and Europe; (2) definitions of terms; (3) descriptions of two leadership training programs that have contributed to successful implementation of multicommunity collaboration; (4) eight case studies of multicommunity collaboration; (5) an overview of community development efforts in rural France; (6) thought pieces on selected collaborative processes; (7) a 106-item bibliography; and (8) the Community Leader and Agency Specialist Survey. Identifiers—Canada, Europe, *Rural Restructuring, United States

This book examines cases of rural community development initiatives in the United States, Canada, and Europe, identified during a study of multicommunity collaboration projects. Section 1 includes 36 community development ideas operating at provincial, regional, and local levels. Included are ideas such as bank community development corporations, educational shadowing programs, community equity funds, community development resource centers, community or regional festivals, and a community business directory. The second section includes community development guidelines related to rural community survival, coping with change in small towns, recruiting new leaders, community self-renewal, linkage strategies in community economic development efforts, characteristics of an effective team, stages in local economic development, and measuring prosperity according to inflow and outflow of monies. The third and fourth sections describe 41 programs and 26 development institutes and centers that focus on information, formal education, and leadership development; networking and coordination; community development contests; community economic development; community and rural development; policy development; cooperative development; and community development funding schemes. The last section of the book profiles newsletters devoted to information on rural economic development. Appendices include definitions of terms and a bibliography of over 70 selected readings on developmental and related concepts. (LP)

Descriptors—American Indians, Drinking, Drug Use, Eating Habits, Health Education, High Schools, *High School Students, Physical Activity Level, *Risk, *Self Injurious Behavior, Sexuality, Smoking, Statistical Surveys, *Student Behavior

Identifiers—Health Behavior, *Native Americans, New Mexico, *Youth Risk Behavior Survey

This report summarizes the major results of a youth risk behavior survey administered to 1,549 students (grades 9-12) in 14 New Mexico schools identified as predominantly "Native American." The purpose of this report is to stimulate useful discussions into ways to increase informed support for effective, school-based comprehensive health education programs. A similar report presents results from schools not identified as "Native American." Of responding students, 77.5 percent described themselves as Native American or Alaska Native. After a brief description of the survey methodology, statistics and graphs are presented in the following areas: (1) unintentional and intentional injuries relating to motor vehicles, violence, and suicide; (2) tobacco, alcohol, and other drug use; (3) sexual behaviors relating to HIV/AIDS education, other sexually transmitted diseases, commencement and frequency of intercourse, pregnancy, and condom use; (4) dietary behaviors relating to obesity and fat consumption; and (5) physical inactivity and exercise. Most statistics are disaggregated by gender and grade, with males showing higher levels of risk behavior on most parameters. National statistics and relevant "year 2000 objectives" provide a broader context for understanding. A final section lists the elements of a successful comprehensive school health program. Contains 41 references. (RH)

Document Not Available from EDRS.

Descriptors—*American Indian Education, Canada Natives, *Change Strategies, Cultural Influences, Distance Education, Educational Administration, *Educational Change, *Educational Improvement, Elementary Secondary Education, Foreign Countries, Parent Participation, Politics of Education, Professional Development, *Rural Education, Rural Schools, Rural Urban Differences, School Community Relationship, *Small Schools

Identifiers—*Canada

This book consists of 13 essays focusing on successful developments in education in rural and remote regions across Canada. Essays examine the integration of local or Aboriginal culture into education, need for educational partnerships between parents and schools, importance of distance education in meeting the educational needs of rural students, issues concerning teacher supply and administration, professional development needs, and school improvement efforts. The final chapter summarizes factors facilitating educational change. Individual essays are as follows: (1) "Omachewa-Isipimewin: Education and Community in a Northern Saskatchewan Cree Village" (C. King); (2) "Educational Development in the N.W.T.: Creating Divisional Boards of Education" (G. B. Isherwood and K. B. Sorensen); (3) "Shared Services in Isolated School Districts: A Case Study" (D. Marshall); (4) "Cycles and Crisis Politics in an Educational Organization: P.E.I." (P. Garland); (5) "Parent Participation in Rural Schooling" (P. B. Wiebe and P. J. Murphy); (6) "Implementing Parental Involvement in Northern Manitoba Schools" (W. A. Gulka and B. Knudson); (7) "Program Equity in Small Rural Schools in Alberta" (L. Bosetti and T. Gee); (8) "Distance Education Technology: Equalizing Educational Opportunity for Students in Small Schools" (D. Downer and W. Downer); (9) "Engaging Students through Experiential Programs" (B. Sharp); (10) "Our Students, Our Future: A Study on the Implementation of Whole Language in the Dehcho, Northwest Territories" (B. Knudson); (11) "The Effect of Teacher Supply and Demand on Rural Education" (K. C. Sullivan and M. Sandell); (12) "The New Brunswick Centre for Educational Administration" (K. Cameron and R. Campbell); and (13) "Summary: Understanding Change in Education in Rural and Remote Regions of Canada" (D. Knight). Each chapter contains references. (LP)

Danin, Susan T.
Evaluation of the Dissemination of "Family Connections" for the Laboratory Network Program.

Research for Better Schools, Inc., Philadelphia, Pa. Spons Agency—Office of Educational Research and Improvement (ED), Washington, DC.

Pub Date—Sep 93

Note—12p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Child Development, Educational Cooperation, *Information Dissemination, *Institutional Cooperation, Organizational Objectives, Parent Education, *Parent Materials, *Preschool Education, Program Evaluation, Rural Areas, *Rural Education, Shared Resources and Services

Identifiers—New Jersey, *Regional Educational Laboratories, Rural Assistance Councils

This report evaluates the dissemination to rural communities in New Jersey of a program previously found to be successful in rural Appalachian communities. The report evaluates the collaboration process between Research for Better Schools (RBS), the New Jersey Rural Assistance Council (RAC), and Appalachia Educational Laboratory (AEL), who developed the program. Family Connections consists of 30 weekly guides designed for use by families in helping their preschool children develop identified skills. Key individuals involved in program dissemination were asked questions about the

roles different people played, resources required, decision-making processes, success stories, and problems and resolutions. The collaboration was considered successful due to the following factors: (1) both RBS and AEL benefitted from the collaboration (e.g., the program helped RBS meet its goals for working with the New Jersey RAC, and AEL gained assessment information about the program); (2) key people from both laboratories were compatible and flexible; and (3) RBS and AEL shared costs and responsibilities for promoting the program. Successful program dissemination in New Jersey was the result of support from key leaders in the RAC and in the counties with established relationships with RBS; the "user-friendly" nature of Family Connections in that it is easily understood, adaptable, and relatively inexpensive to implement; an internal support structure consisting of implementation teams, a local coordinator, and follow-up meetings; direct dissemination of the program to people who would implement it; and enthusiasm resulting in schools' willingness to assume the cost for continuing the program. Descriptors—Administrator Attitudes, Case Studies, Change Strategies, Educational Assessment, *Educational Change, Elementary Secondary Education, Foreign Countries, Higher Education, *Leadership, Parent Attitudes, Rural Education, *Rural Schools, Rural Urban Differences, *School Community Relationship, *Small Schools, *Strategic Planning, Student Attitudes, Teacher Attitudes

Identifiers—*Canada (West), Saskatchewan, Stakeholders

Developed as a text for studying rural education in Canada, this book focuses on the importance of listening to the voices of all stakeholders in education, formulating a shared vision for schooling, and providing leadership that will revitalize schools in sparsely populated areas. Section 1 presents strategic planning as the most promising approach to educational change in small school-community contexts. One chapter identifies the components of strategic planning, including clarification of organizational mandates, external analysis, internal analysis, integration of analyses, implementing change, and ways to monitor and evaluate change. Another chapter describes the features of small school-community contexts that are most relevant to strategic planning. Section 2 includes chapters reporting on a survey of attitudes toward education among students, parents, community members, and teachers from a small, rural school system in Saskatchewan. Each chapter is organized under the headings of thinking, relating, and planning in an effort to promote connections among thoughts, ideas, and local contexts. Section 3 focuses on vision building and leadership, and examines personal priorities, dialogue, and identification of strategic issues. Three case studies of successful change processes provide insight into the many interacting factors affecting educational change. A chapter on monitoring and evaluation also looks at political pressures on schools. The last section integrates ideas addressed in the book with the strategic planning model. Contains tables and figures. (LP)

Descriptors—Building Obsolescence, *Educational Environment, *Educational Equity (Finance), *Educationally Disadvantaged, *Educational Re-

sources, Elementary Secondary Education, Financial Problems, Financial Support, *Rural Urban Differences, *School Buildings, School Districts, School District Wealth

Identifiers—*Alabama, Educational Adequacy

As part of litigation challenging the equity and adequacy of school funding in Alabama, educational resources and school conditions were examined in the highest and lowest funded school districts in the state. Identification of these districts revealed that all eight of the highest funded districts were urban systems, while all eight of the lowest funded districts were rural or county systems. Site visits to 45 schools in 15 of the above districts, interviews with principals, and a teacher survey produced completely consistent findings of clear disparities between rural and urban schools. Compared to urban schools, rural schools had less attractive physical plants and grounds, fewer educational resources in virtually all areas, fewer instructional offerings, and staffs that were more dispirited about their abilities to provide effective education under existing conditions. Particular educational and environmental disadvantages of rural schools included restricted opportunities for participating in outdoor athletics; discomforts caused by inefficient heating and cooling systems, old and dark school interiors, and dirty rest rooms lacking in basic supplies; cramped classrooms lacking sufficient textbooks and maps; and old and inadequate libraries and gymnasiums. In addition, teachers and principals reported staff and student involvement in fund raising, and the lack of funds for enrichment programs, subjects such as drama and foreign languages, professional development, and teacher compensation for extra work. Includes tables of statistical data. (SV)

Howley, Aimee A. Howley, Craig B.

Receptivity to Telecommunications among K-12 Teachers in a Rural State: Results of a West Virginia Survey.

Spons Agency—National Science Foundation, Washington, D.C.

Pub Date—16 Oct 94

Note—31p.; Paper presented at the Annual Meeting of the National Rural Education Association (Tuscaloosa, AL, October 1994).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Access to Information, Computer Literacy, Distance Education, Elementary School Teachers, Elementary Secondary Education, Information Technology, *Rural Education, Secondary School Teachers, *Teacher Attitudes, *Technological Literacy, *Telecommunications

Identifiers—Internet, *West Virginia

Distance education is a way to provide needed instructional resources to rural schools, and the Internet and other telecommunications networks are the newest addition to the distance education toolkit. However, little is known about rural teachers' technological skills and attitudes in this area. A mail survey of 262 K-12 teachers in West Virginia—a predominantly rural state—examined their computer and telecommunications skills, resources available to support telecommunications networking, teacher attitudes about the utility of classroom and professional development applications of telecommunications, and background variables contributing to teacher attitudes. Teachers were familiar with various computer applications, particularly instructional applications and word processing. Although much less familiar with possible applications of telecommunications, teachers were generally receptive. Few had the hardware and software necessary to use telecommunications, however. While few teachers had actually used telecommunications services, nearly 70 percent wanted access so that students could get information for class projects, and 65 percent wanted access to full-text materials for themselves. Teacher attitudes were influenced by instructional level and teaching experience, while level of technological skills was related to gender and access to technology. Despite high teacher interest, future usage patterns of rural teachers are more likely to be influenced by state concerns for control, uniformity, and "efficiency," and by the extent to which private enterprise takes over the information superhighway for profit and limits access for rural areas. The need to provide an improved science and mathematics curriculum is imperative. Over recent years cognitive psychologists and educators have responded to this need by designing instructional programs that are more compatible with our knowledge of how people acquire, use, and retain knowledge. This book contains many of the guiding principles that underlie these programs. The following chapters and authors are presented: (1) "A Cognitive Approach to Improving Thinking Skills in the Sciences and Mathematics" (Diane Halpern); (2) "The Jasper Series: An Experiment with New Ways to Enhance Mathematical Thinking" (James Van Haneghan, Linda Barron, Michael Young, Susan Williams, Nancy Vye, and John Bransford); (3) "Mathematical and Scientific Thinking in Classrooms and Other Situations" (James Greeno); (4) "Expert Knowledge and Processes of Thinking" (Robert Glaser); (5) "Enhancing Higher-Order Thinking Skills in Physics" (Jose P. Mestre, Robert J. Dufresne, William J. Gerace, Pamela T. Hardman, and Jerold S. Touger); (6) "Teaching of Thinking Skills in the Sciences and Mathematics" (Richard Mayer); and (7) "Cognitive Research on Thinking in Academic Science and Mathematics: Implications for Practice and Policy." (Audrey B. Champagne). (ZWH)

Identifiers—*LabNet

Many educators advocate the use of projects in the science classroom. This document describes an effort (LabNet) that has successfully implemented a program that allows students to learn science using projects. Chapter 1, "An Introduction to LabNet" (Richard Rupp, Meghan Pfister), provides an initial framework for understanding the LabNet project. Chapter 2, "From Current Practice to Projects" (Richard Rupp, Sarah Haavind), examines the background of the project by providing a glimpse into today's physics classroom and reviewing a brief history of project science as an idea and in practice. Chapter 3, "Shifting the Approach to Science and Teaching" (Shahaf Gal, Greg Lockett, Mary Ethel Parrott), presents evaluation results from LabNet. Chapter 4, "Support and Leadership in a Community of Practice" (Shahaf Gal), portrays LabNet teachers' involvement in their community. Chapter 5, "Design for a Science Network" (Brian Drayton), asks the question: Given what we now know from the LabNet experience, how should a telecommunication network be designed to serve science teachers? Chapter 6, "Reflections on Project-Enhanced Science Learning-Teachers," is a collection of seven essays by teachers. Chapter 7, "Reflections on Project-Enhanced Science Learning-TERC Staff," presents seven essays that con-

trust science which students see with the science of the scientist. Chapter 8, "Agenda for an Uncertain Future (Richard Ruopp), ties together threads that weave throughout this book. Appendixes include a collaborative evaluation conducted on a network, a teacher questionnaire and summaries of big idea grants. (ZWH)

Identifiers—*Environmental Attitudes, *Environmental Concepts

Environmental attitudes and behaviors established during the preschool years provide the basis for a lifetime of responsible actions. Each activity in this guide is designed to stand alone and have been arranged by key experiences (classification, number concepts, representation, spatial relations, and time) and by environmental topics (basic survival needs, change, conservation, evidence of wildlife, habitat, and recycling/litter prevention). Each activity includes a statement of the instructional objective; a brief description of the method used; background information for the teacher; a list of materials needed; procedures for each section; ways to evaluate student learning; indication of recommended age level, key experiences, setting (outdoors or indoors) and key vocabulary; extensions to reinforce the major activity; and teaching aids. Appendices include a list of agencies and organizations which may be helpful to teachers who use the activities and a glossary of terms for use by the teacher. (MKR)

Guides - Classroom - Learner (051)
EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Computers, Databases, *Data Processing, High Schools, *Instructional Materials, Mathematics Education, Science Education
Identifiers—Atlantic Ocean, *Hurricanes, *HyperCard

This document describes the procedures used by one group of Wisconsin high school students to compile data researched on all hurricanes in the Atlantic from 1886 through 1993. The students used data received on Internet to create a hypercard stack that would plot hurricanes. Students from Minnehaha Academy in Minnesota used the net to download images of famous (and not so famous) hurricanes. The Wisconsin students used linear equations to solve mathematical problems encountered while plotting hypercard data. Computer students at the high school were responsible for making the equations into functions (as in computer language functions). Students ignored the importance of developing computer code that is clearly documented. Fifth graders tested the computer programs. (AA)

California Freshwater Shrimp Project: An Eco-Action Project with Real Life Learning.

Pub Date—Apr 94
Note—43p.
Pub Type—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Constructivism (Learning), Endangered Species, *Environmental Education, *Experiential Learning, Grade 4, Integrated Activities, Intermediate Grades, Learning Activities, *Student Participation, *Student Projects
Identifiers—*Environmental Action, Freshwater Systems, Shrimp

The California Freshwater Shrimp Project is an example of a student-initiated, eco-action project. Students, from a fourth grade class in the Ross Valley School District in San Rafael, California, were linked to their community and environment through their work in rehabilitating habitat and educating the public. The paper gives an overview of a project to rehabilitate a creek inhabited by the endangered California Freshwater Shrimp and details Real Life Learning, which involves students taking responsibility for their own education by directing it. Eight key outcomes of the experience, including students acquiring academic skills through integrated learning and obtaining skills needed in real life that are not usually taught in school are reviewed. The paper describes the work of student committees that were able to alert government officials about the shrimp's dilemma; institute a Shrimp Network of biologists, ranchers, and business people; begin rehabilitation of the creek; and win local and national recognition. Identifiers—Asia Pacific Region

The Asia and the Pacific Programme of Educational Innovation for Development (APEID) has a primary goal of contributing to the building of national capacities for undertaking educational innovations linked to the problems of national development, thereby improving the quality of life of the people in the member states. One of the major interests of this group is science and technology education. A workshop was held to discuss the following topics: (1) reviewing problems and issues in the development of scientific and technological talent; (2) developing exemplar instruments for identifying scientific and technological talent; (3) developing nurturing programs for the scientifically and technologically talented; (4) promoting interest among science educators in the development of scientific and technological talent; and (5) exchanging ideas on how to improve the development of the scientifically and technologically talented. Also included in the document are the agenda, list of participants, the development of learning/teaching materials for real-life problem-solving situations, and examples of problem-solving situations. Perceptions of Mathematics Classroom Climate: A Multilevel Study.

Spans Agency—National Inst. of Child Health and Human Development (NIH), Bethesda, MD.
Pub Date—Aug 93

Contract—HD1H553
Note—17p.; Paper presented at the Annual Meeting of the American Psychological Association (Toronto, Ontario, Canada, August 1993).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Classroom Environment, *Educational Quality, *Elementary School Students, Grade 5, Intermediate Grades, *Mathematics Instruction, Motivation, Multiple Regression Analysis, *Student Attitudes, Teaching Methods

One framework for conceptualizing the study of classroom effects on student motivation asserts that students' perceptions of the classroom environment mediate the relationship between teacher practices and student performance outcomes. This study examined within- and between-classroom effects on 356 fifth-grade students' perceptions of the quality of instruction in their mathematics classes. Results suggest that a positive classroom instructional climate is related to several individual difference variables, including low perceptions of differential treatment by gender and ability. Several classroom

level variables were related to positive class instructional climate, including the use of extrinsic motivational incentives, and the infrequent use of individualized forms of instruction. Teachers who used "mastery" oriented instructional strategies tend to have students in their classes who perceive a diminished relationship between teacher expectations and classroom instructional climate. Contains 10 references. (MKR)

Identifiers—*Conceptual Frameworks, Environmental Issues, Indiana, Renewable Resources, Resource Management

The purpose of this curriculum is to provide high school teachers and students with a conceptual framework for analyzing energy and environmental issues, especially in regards to economics. A second purpose of the curriculum is to provide teachers with a set of four motivating, interdisciplinary teaching units. The issues covered in the four teaching units are water pollution, forest resources, non-renewable energy resources, and global warming. Part 1 of the introduction to the booklet explains the basic economic concepts that provide the conceptual framework. Part 2 of the Introduction explains how to use a five-step, decision-making model used to analyze energy and environmental issues. Each of four teaching units focuses on a particular energy and/or environmental theme and has three basic elements: (1) basic information; (2) a set of classroom teaching activities; and (3) a case study. In each case study, students use a five-step, decision-making model to investigate and solve an energy environmental issue. Each unit includes basic facts and vocabulary about the issue being studied. Classroom teaching activities require students to apply skills across several areas of the curriculum, and some activities require students to make extensive use of resources in their communities. The Enduring Effects of Productivity Factors on

Eighth Grade Students' Mathematics Outcome.

Pub Date—Apr 94

Note—36p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Reports - Research (143)—Speeches/-Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Classroom Environment, Educational Quality, *Family Environment, Grade 8, Junior High Schools, *Junior High School Students, Longitudinal Studies, *Mathematics Achievement, Mathematics Instruction, Models, *Motivation, *Student Attitudes

Using Walberg's educational productivity model, this study estimated the influences of home environment, motivation, ability, classroom environment, quality of instruction, and instructional time on mathematics outcomes using longitudinal data from the Second International Mathematics Study (SIMS). SIMS was a comprehensive survey of the teaching and learning of mathematics in 20 countries conducted by the International Association for the Evaluation of Educational Achievement. The data incorporated measures collected at the beginning and the end of the academic school year. The U.S. sample comprised 7,935 eighth-grade 13-year-old mathematics students in 299 classrooms. Results indicate that attitude toward mathematics can be reliably assessed as mathematics outcome and that instructional time is a significant direct influence upon both mathematics achievement and attitude. Adolescent Mathematical Problem Solving: The Role of Metacognition, Strategies and Beliefs.

Pub Date—Apr 94

Note—40p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Reports - Research (143)—Speeches/-Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Beliefs, *Cognitive Style, High Schools, *High School Students, *Mathematics Achievement, Mathematics Education, *Metacognition, Models, *Problem Solving, *Sex Differences

Mathematical problem solving has been the focus of much concern. This study investigated the relationship of various cognitive factors, attributions, and gender to the solution of mathematics problems by 100 high school seniors. The independent variables examined in this study included: (1) mathematics knowledge as measured by a score on the mathematics section of the Preliminary Scholastic Aptitude Test (PSAT); (2) metacognitive regulation as measured by a score on the Assessment of Individual Mathematical Metacognition (AIMM); (3) beliefs, including attributions and generalized beliefs, as measured by scores on selected questions from the Inventory of Students' Mathematical Beliefs and Behavior (ISMBB); (4) metacognitive awareness as measured by a score on the Metacognitive Awareness Assessment (MAA); and (5) gender. No gender differences were found in any of the variables except in the high knowledge group: (1) high knowledge boys outperformed high knowledge girls on one problem, and (2) high knowledge girls were less likely to attribute their success in mathematics to effort than were high knowledge boys. Contains 53 references. (MKR)

Identifiers—*Science Achievement

This study focused on teachers' academic preparation for teaching science and mathematics, as measured by the National Education Longitudinal Study of 1988 (NELS:88) which collected data for a nationally representative sample of 26,435 8th-grade students clustered within 1,052 schools. The relationship between teachers' academic preparation, their subsequent teaching methods, and student outcomes as measured by student scores on proficiency exams was examined. On average, student proficiency scores were best if their teachers had grade point averages above 3.0 in science or mathematics. Further, students in mathematics performed best if their teachers had taken advanced mathematics courses, while scores in mathematics pedagogy only provided an extra benefit if teachers had also taken advanced mathematics courses. Students in science showed small differences based on the number of science courses their teachers had taken, but no difference based on courses in science education. (MKR)

This paper presents a description of a northern Florida middle school and of the students enrolled in the school, 92% of whom are African-American. Three quarters of the entire student population is eligible for free or reduced price government assisted lunches. This figure is double the state average. During academic year 1991-92, expenditure per student enrolled within regular academic programs was 12% below the state average or \$2,920 per student. Observations of an eighth-grade physical science class, a sixth-grade mathematics class, and an eighth-grade science assembly are related. Interviews with the science teacher and mathematics teacher from these classes are given along with a list of needs generated from mathematics and science teachers. Traditional methods of teaching prevailed in these classrooms. (MKR)

Making Mathematics Learning In and Out of School Complementary.

Pub Date—6 Apr 94

Note—15p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Reports - Research (143)—Speeches/-Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Experiential Learning, High Schools, *High School Students, *Mathematical Applications, *Mathematics Instruction, Models, *Problem Solving

Students need in-school mathematical experiences to build on and formalize the mathematical knowledge they gain in out-of-school situations. This paper presents illustrations from research that was conducted to better understand how mathematics practice and problem solving in everyday work situations compared to secondary students' solutions of the same problems. A research framework for studying the interplay between sociocultural and cognitive developmental processes is described. The framework consists of three analytic components: (1) goals that emerge during activities, (2) cognitive forms and functions constructed to accomplish those goals, and (3) interplay among the various cognitive forms. The paper concludes by linking the framework to classroom practice. Contains 23 references. (MKR)

Since there are many criticisms of self-reported assessments of technology use, it is important to observe the actual extent to which technology is used in classrooms and to look specifically at the technology use of individual students, because it may differentiate the academic success or failure of these students. The present study conducted systematic observations in multi-ethnic middle school mathematics classrooms to examine whether or not there were gender, ethnic, or grade-level differences in 1,315 students' use of technology. The school district selected for the study is located in the vicinity of a major metropolitan city in the south central United States. The multivariate analysis of results revealed that there were only grade-level differences among students in their use of technology. Contains 27 references. (MKR)

Conceptual and Developmental Analysis of Mental Models: An Example with Complex Change Problems.

Pub Date—Apr 94

Note—21p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Reports - Research (143)—Speeches/-Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Arithmetic, *Constructivism (Learning), *Elementary School Students, Foreign Countries, Intermediate Grades, Mathematics Instruction, Models, *Number Concepts, *Schemata (Cognition)

Defining better implicit models of children's actions in a series of situations is of paramount importance to understanding how knowledge is constructed. The objective of this study was to analyze the implicit mental models used by children in complex change problems to understand the stability of the models and their evolution with the child's development. The study was structured in two phases. First, a written test was given to 198 fourth-, fifth-, and sixth-graders in order to identify different stable resolution patterns used by children in a set

of problems involving the reconstruction of a change. The second phase consisted of individual interviews with 15 children of each level representing all procedures. Three models were identified from the study: sequential model, state comparison model, and change comparison model. Two conceptual leaps in the transition from the different models were identified: the first related to the representation of the problem structure and the other deals with the concept of number. Contains 14 references. (MKR)

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—*Cooperative Learning, Grade 11, High Schools, *High School Students, *Mathematics Achievement, Mathematics Instruction, Models, Observation, *Peer Relationship, Tutoring

In the last few years educational researchers have become increasingly aware of the need to examine interaction among students to understand the impact of cooperative small groups on learning. For this study 26 students in an 11th-grade Algebra II/Trigonometry class were trained to use a didactic cooperative learning technique called scripted cooperation. The study was designed to explore the nature of students' verbal interaction within this cooperative structure, how that interaction changed over time, and its relationship to achievement. Findings from analysis of transcripts of students working in groups, chapter tests, and student characteristics instruments indicated the fact that none of the 24 categorized interaction sequences or behaviors was significantly related to ability as measured by prior mathematics achievement. Identifiers—*Computer Integrated Instruction, *Function Probe

Function Probe is a multi-representational software for Apple Macintosh computers. It was designed to allow students to approach problems in different ways and/or use different representations. This case study describes a 16-year-old student as he creates a path among a variety of representations of transformations of functions while using the Function Probe computer software. The model used in this study inverts the order of the traditional model of teaching about transformation of functions, by starting with visualization of graphs, then focusing on relationships between graphs and tabular values, and finally, focusing on relationships between graphs and algebraic representation. Contains 14 references. (MKR)

Descriptors—*Discussion (Teaching Technique), Intermediate Grades, Junior High Schools, *Ju-

nior High School Students, *Knowledge Level, Mathematics Instruction, Mathematics Tests, Middle Schools, *Probability, Sampling, *Statistics, Teaching Methods

Identifiers—Alternative Assessment, *NCTM Curriculum and Evaluation Standards, Wisconsin

Ten high-ability middle school students participated in a 13 week enrichment program on inferential statistics. Consistent with the NCTM Standards, classes emphasized problem solving in real world contexts and the communication of mathematical ideas. Students struggled with written assignments, yet worked effectively in pairs, small groups, and whole class discussions. Students also proved capable of teaching the class and developing their own tests. Significant improvement in student performance from pretest to posttest showed that instruction improved students' statistical understanding. Analysis of students' written work and protocols of classroom dialogues indicated that students had considerable experience with both chance and inferences in decision-making. Students were familiar with the language of probability although they struggled with the concept of equally likely outcomes. Students were comfortable with the use of sampling in their everyday lives but their understanding was limited to particular problem contexts and constrained by their inability to make spontaneous connections between statistical results and how those results might be used. Contains 25 references. (Author/MKR)

Identifiers—*Florida

In 1989 Florida responded to the continuing crisis in mathematics and science education by developing a Comprehensive Plan: Improving Mathematics, Science, and Computer Education that identifies specific strategic goals and recommendations. Florida State University has been the sole evaluator of the Comprehensive Plan. Visits have been made at elementary, middle, and secondary schools ensuring representation from a variety of ethnic and socio-economic levels. This paper reports a study of two diverse middle school science classes. The demographics of the schools, science teachers, and learning environments are compared and contrasted. In addition, information from the mathematics and science teachers from each school is given about their own practices and beliefs about what their practices should be. The ethnic distributions at both schools were similar, but the socioeconomic distribution was different. Clarke Middle School has approximately 175 students, 75% Caucasian, 23% African American, 1% Hispanic, and 1% Asian. Fifty-five percent of the students are on free and reduced price lunches. Ocean Grove Middle School (a pseudonym), a magnet school has approximately 415 students, 65% Caucasian, 29% African American, and 6% Asian. Twenty-nine percent of its students are on free or reduced price lunches. Other differences included: resources; curricula; students' teachers' and researchers' perceptions of the learning environment; control; and teacher professionalism. (MKR)

Descriptors—Case Studies, *Cooperative Learning, *Feedback, Grade 7, *Helping Relationship, Junior High Schools, *Junior High School Students, *Mathematics Instruction, Student Attitudes, *Student Behavior

Grade 7 mathematics students (n=18) were audiotaped while working in cooperative learning groups on 4 occasions over a 16 week period. After the second and third recordings, students were given edited transcripts of their discussions and were trained in how to interpret them. They used an instrument to appraise their group processes 1-2 times per week thereafter. The self-assessment had a beneficial impact on the frequency and quality of help seeking and help giving, and on student attitudes toward asking for help. The effect of the assessment procedures was attributed to three factors: (1) the feedback strengthened helpfulness norms built up in the classroom over the previous 4 months of cooperative learning implementation; (2) the feedback increased students' skill in asking for and giving help; and (3) the assessment enhanced students' self-efficacy. The paper includes the group appraisal instrument, coding scheme, and questions for comparing transcripts. Contains 65 references. (Author/MKR)

Using a Computer Simulation to Determine Linguistic Demands in Arithmetic Word Problem Solving or Is the Time Right for a Database of Word Problems?

Pub Date—Apr 94

Note—29p.; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Speeches/Meeting Papers (150)—Reports—Descriptive (141)

EDRS Price—MF01/PC02 Plus Postage.

Descriptors—Addition, Arithmetic, *Computer Simulation, *Databases, Elementary Education, *Mathematics Instruction, Subtraction, *Symbolic Language, *Word Problems (Mathematics)

Relating natural language to mathematical language is an important component of elementary mathematics education. This paper describes new steps toward a computerized database of addition and subtraction word problems that could provide teachers and students with access to critical natural language terms and expressions for mathematical relationships. On the basis of new results from a computer simulation that is sensitive to slight changes in problem wording, the suggestion is that a database of word problems that reflects a relative order of difficulty is not only feasible but essential if researchers in this area are to increase the practical dissemination of research results. A collection of math stories sensitive to children's text comprehension skills and mathematical development is the foundation of an ongoing effort to implement a knowledge-building environment that can facilitate children's discussions of why one math story is more difficult than another, as well as encourage communities of students to build their own database of stories. An appendix contains an example simulation of EDUCE and SELAH solving a station-non-relational (combine 5) problem. Contains 64 references. (Author/MKR)

Descriptors—*College Mathematics, *Educational Change, Higher Education, *Mathematics Education, Two Year Colleges, Undergraduate Study

Identifiers—*Reform Efforts

Anyone who believes that educational reform is something needed only at the school level will be disabused of that notion by reading this document. This report, prepared by a committee of distinguished citizens from academia, industry, and public policy, calls for sweeping change in mathematics education at the College - University level to parallel change underway in the nation's schools. Both levels play key roles in advancing science and technology and in preparing the broader work force and quantitatively literate citizenry the country needs. Previous publications prepared by the committee are "A Challenge of Numbers," which might be reviewed as an appendix to this document, just as "Everybody Counts - A Report to the Nation on the Future of Mathematics Education" might be considered its introduction. Chapters include: The Challenge, The Myths, Behind the Myths, Facing the Myths, Moving Beyond Myths, Mathematics Beyond Myths, and Evidence and Documentation. An appendix contains Challenges for College Mathematics: An Agenda for the Next Decade, a summary of a joint report from the Association of American Colleges and the Mathematical Association of America, and lists members of the Committee on the Mathematical Sciences in the Year 2000; the Board on Mathematical Sciences; and the Mathematical Sciences Education Board. Contains 17 references. (MKR)

Descriptors—*College Students, Diagrams, Environmental Education, Grade 9, Higher Education, High Schools, *High School Students, Interest Research, *Mathematics Instruction, Models, *Student Interests, Student Motivation
 Interest may be conceptualized as a variable which affects both motivational and cognitive activity. The purpose of this study was to systematically apply a theoretical model of interest to a classroom setting and explore whether students' interest in mathematics could be increased. The theoretical model of interest is presented and followed by the rationale used for developing the interest treatment. A study of (n=15) college students (Study 1) and (n=68) high school freshmen (Study 2) was conducted using a curriculum developed for the study called Mathematics of the Environment (MOE). In the MOE experience, students work in groups to assess the environmental health of selected world countries. The final student outcome is to find and propose a solution for resolving environmental problems in their chosen nation. An interest survey was given at the beginning and end of Study 1 and at the end of Study 2. The results of the studies were mixed. Study 1 indicated great success of the curriculum in enhancing students' motivation towards the subject, but Study 2 indicated no difference between students' attitudes in the MOE classroom relative to student attitudes in other mathematics classrooms taught by other master teachers. Two differences in the two studies were the teachers and the age of the students. Contains 30 references. (MKR)

um in enhancing students' motivation towards the subject, but Study 2 indicated no difference between students' attitudes in the MOE classroom relative to student attitudes in other mathematics classrooms taught by other master teachers. Descriptors—Classroom Design, *Cooperative Learning, Grade 7, *Interpersonal Relationship, Junior High Schools, *Junior High School Students, *Mathematics Achievement, *Mathematics Instruction, Middle Schools, Teaching Methods, Teaching Styles

This study analyzed relationships between students' regard for one another and their mathematics achievement in cooperative learning groups in six grade 7 middle school classes. The sample consisted of 184 students (55% Hispanic, 14% Black, 27% White, 3% Asian American) in a city of Los Angeles County. Two teachers each taught three classes, two experimental, one comparison. Teacher difference emerged as the central finding of the study. Overall, students increased their regard for teammates but there was no significant increase in mathematics achievement and no correlation between regard and mathematical achievement. Observation of the classes revealed that despite the fact that the two teachers participated in the same training sessions in preparation for small group work and used identical curriculum, three factors emerged that may have contributed to the different findings for the two teachers: seating arrangements, teacher style, and instruction. This study shows that there can be a positive relationship between regard and mathematics achievement but that the teacher plays a very important role in the process. Second, there are important implications for the education of teachers. Contains 30 references. (MKR)

Identifiers—Ithaca City Schools NY, *Problem Posing

This study investigated how 8 secondary school students coped with the task of choosing their own problems for a 9-week course in an alternative school in Ithaca, New York. The students chose a theme to be investigated before the class started, collected real data on the theme, and if they felt the need for it, analyzed it using Function Probe, a software package. Observation, interview, and journal data from the students and teacher and written work of the students were compiled. Preliminary analysis of the results showed that working with real data made a difference in the level of excitement about data collection, helped the students deal with new issues in mathematics, and helped students feel more control over what they were learning. Contains 22 references. (MKR)

Numeracy as Cultural Practice: An Examination of Numbers in Magazines for Children, Teenagers, and Adults.

Pub Date—Apr 94
 Note—36p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Adolescents, Adults, Children, Content Analysis, *Decimal Fractions, Elementary Secondary Education, *Fractions, Mathematics Education, Number Concepts, *Numeracy, *Percentage, *Periodicals, *Rational Numbers

Many have argued for the importance of numeracy, yet little is known about the opportunities for numeracy available to people in their daily lives. In this study, characteristics of rational numbers in magazines written for children, teenagers, and adults were analyzed and compared. Analysis indicated that difficult mathematical concepts that appear in the media such as fractions, percents, and averages are much more prevalent in adults' magazines than in those written for children and teenagers. Adults are often presented with rational numbers that are related to each other. Numbers in teenagers' texts do not appear to provide a transition to those found in adults' texts, despite the fact that through formal schooling teenagers have encountered all the mathematical concepts that are frequently found in adults' texts. Implications for preparing students for the numeracy demands of everyday life are discussed. An appendix contains the coding scheme used in the study. Contains 27 references. (Author/MKR)

Descriptors—Diagrams, Grade 7, *Graduate Students, Integers, Interviews, Junior High Schools, *Junior High School Students, Mathematics Education, *Metaphors, Middle Schools, *Problem Solving, *Thinking Skills

Identifiers—*Metaphorical Thought, *Negative Numbers

Metaphorical reasoning explains how people can interpret abstract representations through a complex activity and then apply them to new problems. In particular, metaphors can facilitate both conceptual understanding and problem solving by: (1) intuitively justifying mathematical operations, (2) integrating mathematical knowledge, (3) enhancing the computational environment, and (4) improving recall. In this study audiotaped interviews of (n=12) novice middle school students and (n=5) expert master's graduates solving three tasks involving negative numbers were analyzed. Through a variety of spatial and quantitative metaphors, these students reasoned metaphorically, not only to understand and solve these problems, but also to evaluate and justify their solutions. Experts articulated more metaphors and reasoned with them selectively. In contrast, novices employed metaphorical reasoning less skillfully, but they used it more frequently. Appendices include: Arithmetic is Motion Along a Linear Path metaphor, Stock Market problem, Ordering problem, and Images of Arithmetic Expressions. Contains 85 references and 12 figures. (MKR)

This National Council of Teachers of Mathematics yearbook, organized into three parts, provides a collection of articles on the professional development of teachers of mathematics. Based on known research, part 1 examines the issues associated with professional development and addresses the stages of the continuum of professional development from general to mathematics-specific perspectives. The articles in part 2 address the initial preparation of teachers of mathematics in grades K-12. A call for changing preservice programs is followed by descriptions of exemplary mathematics teacher education programs at all levels, K-12, including a model for a preservice program to prepare elementary mathematics specialists. Part 3 focuses on professional development for practitioners. These articles describe very creative projects and programs from the educational and business communities. High levels of cooperation and collaboration among those constituencies committed to reforming mathematics education are showcased throughout. (MKR)

Identifiers—Costa Rica, Guided Discovery Approach, *LOGO Programming Language

This paper reports on a pilot study of 34 sixth-grade students engaged in mathematical explorations that was carried out in the context of a national Logo project in Costa Rica. Students worked in pairs investigating a mathematical microworld written in Logo. The investigation had three phases: (1) open exploration of the microworld, during which the students recorded their observations and formulated hypotheses about how the program worked; (2) group discussion and sharing of hypotheses; and (3) additional guided discovery and problem solving. Through observations and collection of written worksheets, it was found that the students were successful in discovering certain functions of the microworld during the first phase, and their hypotheses were improved after discussion with their peers, guided by the instructor. The students were successful in applying their knowledge of the computer microworld in the problem-solving tasks during the third phase. Contains 12 references. (MKR)

First Grade Teacher Expectations in Mathematics.

Pub Date—Sep 94

Note—31p.

Pub Type—Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Elementary School Teachers, *Grade 1, Mathematics Instruction, *Mathematics Skills, Primary Education, School Readiness, Surveys, *Teacher Expectations of Students

The focus of this study was on the expectations that first-grade teachers have of the mathematics skills of their incoming first-grade students. At the end of one school year and at the beginning of the next school year, first-grade teachers ($n=64$) in rural and urban settings completed the Mathematics Skills Expectations Survey (MSES). The MSES considers 11 basic areas of mathematical skills appropriate for the primary grade level and allows respondents to indicate agreement or disagreement with statements about abilities incoming first-grade students should have with respect to these skills. Data were analyzed with respect to skills clusters (numeration, arithmetic computation, measurement, symbols, and geometry) and performance vectors (written, oral, calculation, psychomotor, and visual expectations). In regard to skills clusters,

teachers had highest expectations for numeration and geometry skills and lowest expectations for arithmetic computation and symbol skills. In regard to performance vectors, teachers had highest expectations for psychomotor skills and lowest expectations for calculation skills. An appendix contains the MSES questions and results of the survey. Contains 17 references. (MKR)

Identifiers—*Nature Study

This book contains a guided exploration of a special place in nature. Although geared towards young adults (ages 12-17), the book may also be appropriate for older children (ages 9-11), and adults. During a series of five visits, short multi-ethnic stories with matching activities help the reader to discover the area's uniqueness and beauty by using their senses and careful observation. Five chapters have the following themes: (1) beginning to explore a special place in nature; (2) ways to become familiar with animals and plants that live in the area; (3) receptivity to nature; (4) ways to preserve and care for the site and to share its special features with a friend; and (5) personal reflection during an evening/morning or overnight visit to the site. The book is written as if a young person is doing the activities alone, however the activities and stories can be used with groups. The final section of the book contains a leader's guide with a group activity for special situations, a group song, and 13 resources. (LZ)

Identifiers—*Nature Study

This book of nature activities for all ages is a sequel to "Sharing Nature with Children," and provides a fuller development of the Flow Learning system of nature awareness. Flow Learning is intended to help teachers, parents, or nature guides tune into a group's level of enthusiasm and lead them into energized, enjoyable appreciation of the natural world. Chapter I contains a short story that illustrates what can be accomplished with Flow Learning and nature activities. Chapter II outlines the four stages of Flow Learning and describes which kinds of activities work best at each stage. Chapter III contains 19 games and activities. Activity information includes: (1) concepts, attitudes, and qualities taught by the game; (2) when and where to play; (3) number of players needed; (4) best age range; (5) special materials, if any; and (6) activity instructions accompanied by photographs and illustrations. Chapter IV outlines a sample Flow Learning session designed to encourage both scientific

and intuitive appreciation of trees. Chapter V contains a short essay on suggested attitudes with which to lead nature activities. Four appendices contain a short story, a Flow Learning activity chart, 38 references, and an index to quotations. (LZ)

Identifiers—*Nature Study

This book is a guide to 42 nature awareness activities and games aimed at helping children of all ages experience nature. Small-group, large-group, and individual activities involve children in role-playing, observing, hiking, imaging, identifying, exploring, and other experiences that demonstrate science concepts. An introduction contains suggestions for teaching, and choosing the right game for the right time and place. Activity information includes: (1) concepts, attitudes, and qualities taught by the game; (2) when and where to play; (3) number of players needed; (4) best age range; (5) special materials, if any; and (6) activity instructions accompanied by photographs and illustrations. The activities are divided into groups with the following goals: (1) to bring the participants into harmony with natural surroundings on the physical and emotional level (this section features several "blindfold" activities); (2) to create a quiet, contemplative mood; (3) to provide insight into the way nature works including the principles of ecological systems, habitat, zoology, food chains, food webs, predator/prey relationships, and plant succession; (4) to tune into special qualities of nature through sensory experience; and (5) to experience pure fun. Identifiers—*Hands On Science

Often elementary and junior high teachers search for effective, inexpensive, and easy-to-understand science activities. This document was designed with those teachers and their students in mind. It provides hands-on science activities that focus around three components: (1) themes—broad, unifying ideas that pervade science, math and technology; (2) processes—the techniques used to develop and test scientific concepts; and (3) concepts—including the vocabulary and the key information children need to develop and communicate scientific ideas. Over 45 activities related to matter, change and energy are presented. (ZWH)

Identifiers—*NCTM Curriculum and Evaluation Standards, NCTM Professional Teaching Standards, *Reform Efforts

The National Council of Teachers of Mathematics' (NCTM) Curriculum and Evaluation Standards and Professional Standards for Teaching Mathematics grew out of the Council's vision for developing a confident command of mathematics in all students. This booklet provides a brief overview of the NCTM Standards—the important components, the underlying beliefs, and the changes that need to be made in school mathematics. Also included are examples of successful mathematics programs that mesh with the NCTM Standards and a checklist for comparing mathematics activities in schools with the NCTM Standards. Components considered are: student learning, content and process, curriculum and instruction, assessment, and technology. Annotations including contact information are provided for: the Algebra Project, Cognitively Guided Instruction, College Preparatory Mathematics Program, Comprehensive School Mathematics Program, Core-Plus Mathematics Project, Michigan Mathematics Inservice Project, Middle Grades Mathematics Project, and The University of Chicago School Mathematics Project. Science education reform is an ongoing, forever changing process. The purpose of this booklet is to provide a brief overview of the players in science education reform, the similarities in their underlying beliefs, and the essential changes that need to be made in science education to ensure maximum use of resources that promote effective learning environments for all students. Topics that are briefly described include: emerging science education standards; student learning; content and process; curriculum/instruction; assessment; and technology. Also included is a brief list of resources, successful science programs and printed materials, and a checklist to evaluate the science activities in any school or school system. (ZWK)

Context and Ability Effects on Children's Development of Mental Addition.

Randhuwa, Bikkar S. And Others

Pub Date—Apr 94

Note—18p.; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Addition, Arithmetic, *Elementary School Students, Intermediate Grades, *Mathematics Achievement, Mathematics Education, Mathematics Tests, Multivariate Analysis, Sex Differences

Identifiers—*Mental Computation

To test the theory of mental calibration for mental addition it was hypothesized that the mean reaction time for problems in homogeneous sets will be faster than for problems in heterogeneous sets and that the reaction time was inversely related to ability and development (grade level) and independent of gender. Three sets of 40 addition problems were selected from the basic facts, and from combinations of addends in the range of 10 through 29. These combinations were presented by a computer program in a true-false format with the correct answers, and with answers differing by plus or minus one and plus or minus two. The problems were selected so that the digits 0 through 9 appear equally often as the first and last digit, and that the incorrect sum of one half of the problems was an odd number. Three groups of 40 problems (1-digit, 2-digit, and mixed) were presented in various orders. Results for grade, ability, and task were significant as predicted. One-digit problems in the heterogeneous set took significantly longer than 1-digit problems in the homogeneous set, but there was no significant difference in the context-related processing of 2-digit problems. It appears that mental calibration accounts for some of the processing resources in mental addition, but only in tasks that are in the declarative knowledge of the subject. (Author)

Descriptors—Case Studies, *Educational Change, *Elementary School Teachers, *Instructional Improvement, *Mathematics Instruction, *Mathematics Teachers

Identifiers—*Cognitively Guided Instruction, Reform Efforts, *Teacher Change

The reform movement in mathematics education calls for students to engage in problem solving, to discuss and communicate their thinking, and to develop meaningful understandings. This paper reports a case study of a fourth-grade class in line with the reform call, emphasizing the process of change the teacher experienced and the support she needed. The teacher in this study taught mathematics using the Cognitively Guided Instruction approach. Observations, interviews, and student assessments were collected. Reported are four phases of teacher change: (1) the teacher's teaching and thinking at the beginning of the study; (2) learning, thinking, and stimulating the process of change; (3) learning from and helping individuals; and (4) building on children's thinking in instruction. Contains 25 references. (MKR)

Descriptors—*Black Students, *Enrichment Activities, *Grade 7, Junior High Schools, Science Education, *Science Programs

Identifiers—*African Americans, *Hands on Science

To increase the representation of African Americans in science fields, potential candidates must

have positive personal science experiences. Even with recent reforms, most students in the United States have a limited exposure to science experiences, especially African American students. One approach to addressing this problem has been to offer science enrichment programs for African Americans, as in Atlanta's Saturday Science Academy. The science experiences gained at this program are obtained through laboratory experiments and social interaction. Laboratory experiences enable the students to encounter science in a hands-on manner, use science equipment, question the world around them, and succeed in reaching attainable goals. The social experiences include attending the program at an historically Black university where African American children can interact with other African American students with similar interests. This document is a case study that discusses the science aspect of the Saturday Science Academy and examines how the Academy establishes an environment which supports positive lab and social experiences for African American students (n=24). Descriptors—Case Studies, Educational Change, Ethnography, *Fractions, Grade 6, Intermediate Grades, *Mathematics Instruction, *Mathematics Teachers, *Middle Schools, *Teacher Attitudes, *Teaching Methods

Identifiers—*Subject Content Knowledge

Considering teachers' thinking about a specific mathematical topic allows one to better understand the broader domain of teachers' mathematical thinking and its influence on teaching and learning. This paper explores the meanings and understandings communicated by one middle school mathematics teacher about mathematics and mathematics teaching in general, and fractions in particular, in the context of his attempt to use an innovative set of curriculum materials. Data were collected using interviews, observations, and students' and teacher's written work and plans. The teacher's view of mathematics was of a correct set of rules and concepts and this contributed to his insistence on maintaining a teacher-dominated classroom environment. Also, his own flexible understanding of fractions allowed him to adjust his instruction to accommodate mathematical ideas that were not at the forefront of his own thinking and to emphasize important connections among mathematical representations when provided with curriculum materials to support such an emphasis. Contains 20 references. (MKR)

Hands-on science is not a new idea. It has been implemented successfully in many schools. But it is far from being universally used in American elementary schools. Several problems must be overcome in order to implement a successful hands-on science program. This booklet contains guidelines to eliminate some of the difficulties involved in implementing hands-on programs. The chapters are: (1) "Why Hands-On Science?"; (2) "Planning the Hands-On Science Program"; (3) "Selecting Hand-

s-On Science Units"; (4) "Creating a Refurbishment System"; (5) "Supporting the Hands-On Program"; (6) "Assessing Hands-On Programs"; (7) Hands-On Science Partnerships"; (8) "Three Sample Hands-On Units"; and (9) "Sources for Hands-On Science." (ZWH)

Identifiers—Alaska

One of the major focuses of science education reform is providing equal education to all students. One of the first steps in providing an equal education is informing teachers of classroom equity issues. This document is a training module developed to assist grades K-12 teachers in Alaskan schools in transforming their science classroom into a bias-free environment. The document contains the following: (1) a training session overview; (2) a listing of needed equipment; (3) information regarding how students perceive scientists; (4) ways of helping students obtain a positive attitude toward science; (5) a literature review of gender equity issues; (6) science activities; and (7) a listing of notable women in science. Zambo, Ron Hess, Robert
The Gender Differential Effects of a Procedural Plan for Solving Mathematical Word Problems.

Pub Date—Oct 94

Note—21p.; Paper presented at the Annual Meeting of the School Science and Mathematics Association (Fresno, CA, October 14-16, 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Analysis of Variance, *Elementary School Students, Females, Grade 6, *Heuristics, Intermediate Grades, Mathematics Instruction, *Mathematics Tests, Problem Solving, *Sex Differences, *Word Problems (Mathematics)

The majority of research investigating gender-related differences in problem-solving ability has focused on the product of word problem solving—the problem solution. This paper reports an investigation of potential gender-related effects on sixth-graders of an explicitly stated problem-solving plan. Two versions of the test were given: the formatted form, containing the seven steps of a problem-solving plan on each of the pages, with space for student work; and the unformatted form, containing only the word problems. Three classes of students ($n=73$) were administered the formatted test first, followed by the unformatted version. The remaining three classes of students ($n=82$) were administered the unformatted version first, followed by the formatted version. Females and males did equally well on both forms of a four-item problem-solving test. Students scored significantly higher on posttests that included the problem-solving plan. It was concluded that females benefited from free exploration of problem situations followed by an organized exploration. Contains 24 references. (MKR)

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Elementary Education, *Elementary School Teachers, Grade 3, Grade 8, Mathematics Education, *Mathematics Teachers, Observation, *Problem Solving, Surveys, *Teacher Attitudes, Teaching Methods, *Word Problems (Mathematics)

Identifiers—Arizona, *NCTM Curriculum and Evaluation Standards

In spite of the continued focus on problem solving, American elementary and middle grades schoolchildren are perceived to be ineffective problem solvers. This paper reports the results of a survey of ($n=744$) kindergarten through eighth grade teachers and interviews and observations of a primary and an intermediate master teacher designed to answer the following questions: (1) What is the current nature of mathematical problem-solving instruction in Arizona K-8 classrooms, and (2) To what extent do reported classroom practices in problem-solving instruction reflect the recommendations of the National Council of Teachers of Mathematics (NCTM) and others? Survey results in the areas of instructional practices, word problem sources, student and self-assessments, problem-solving strategies, and beliefs are reported. Interview results include the topics of problem-solving instruction, definition of problem solving, use of textbooks, group work, assessment, calculators, and advice to other teachers. Three responses indicated possible misalignment with the NCTM Standards: (1) Use of manipulatives dropped off dramatically as grade level increased; (2) Teachers responded positively to students' needing to know the key word approach to problem solving; and (3) There was a discrepancy between the perceived usefulness of calculators and the actual use of calculators. This issue of "Indicator of the Month" lists percentages of high school graduates taking selected mathematics and science courses in high school in 1982, 1987, 1990, and 1992. Findings include: (1) High school graduates in 1992 were more likely to take mathematics courses at the level of algebra I or higher and most science courses at the level of biology or higher than their counterparts in 1982; (2) The percentage of high school graduates who took algebra II and geometry and the percentage who took biology and chemistry increased 6 percentage points from 1990 to 1992 (to 50 and 54 percent, respectively); (3) The percentage of high school graduates who had taken remedial mathematics declined from 33 percent in 1982 to 17 percent in 1992; and (4) A larger percentage of graduates, both male and female, earned credit in biology, chemistry, and physics than their 1982 counterparts; similar percentages of males and females earned credit in biology and chemistry in 1982 and 1992; however, males were consistently more likely than females to earn credit in physics. Dockweiler, Clarence J.
Children's Attainment of Mathematical Concepts: A Model under Development.

Pub Date—Aug 94

Note—18p.

Pub Type—Reports - General (140) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Concept Formation, Elementary Secondary Education, *Mathematical Concepts, Mathematics Education, *Mathematics Instruction, Models

Identifiers—*Mathematics Activities

This paper describes a model of student attainment of mathematical concepts and its development. In this model three types of activities (developmental, connecting, and abstract) are considered as an overlay on the three ways of representing mathematical concepts (physical/visual, oral, and symbolic). Each activity type involves some means of representing mathematical concepts, and the activities are sequentially presented as the learner attempts to master a mathematical idea. Initial exposure comes from Developmental Activities, followed by Connecting Activities, and finally, Ab-

stract Activities are utilized. (Author/MKR)

Descriptors—Aesthetic Education, *Aesthetic Values, *Art Education, *Cultural Context, Elementary Secondary Education, Equal Education, Higher Education, Individualism

Practices intended to promote equity, reproduce inequity. Theories based on belief in individualism concentrate attention on individual differences, removing social differentiations. Being concerned with the formation of common culture, art educators present aesthetic objects as culturally neutral, devoid of the context from which they were produced, thus presenting the illusion that a hierarchy of aesthetic quality exists that is fixed and agreed upon. Descriptors—Citizenship Education, Criminal Law, Due Process, High Schools, *Justice, *Law Related Education, Racial Integration, Social Studies

Identifiers—Bill of Rights, United States Constitution

This document presents three articles on law-related education (LRE) written either by or for students. Brent Halling, a senior at Castle High School in Newburgh, Indiana, opens the collection with an article on how due process protects rights. Halling explains the concept of due process and illustrates its reach through the case of Kenneth Donaldson, whom the Supreme Court freed in 1975 from a coerced confinement in a Florida mental hospital. Rima Vesely, a senior at Lane Technical High School in Chicago, calls on students to debate questions raised by four school-related Bill of Rights cases. The cases include a First Amendment debate over the restrictions on gang-related clothing, a

Fourth Amendment case involving a search of students' book bags, a Fourteenth Amendment conflict over the right of an HIV sufferer to participate in sport activities, and a civil rights case over equal access for girls and boys to a school's athletic facilities. In a concluding article, Ernest Greene, one of the first students to integrate Central High School in Little Rock, Arkansas, offers a personal account of his frightening experience of breaking through the racial barriers of southern society. While applauding the Supreme Court decision in *Brown v. Board of Education* and the Fourteenth Amendment upon which it was based, Greene makes it clear that the realization of constitutional rights depends foremost on the courage of citizens. In addition to these articles, the update contains the interactive worksheets related to LRE: "Fill in the Blanks: Create Your Own Great Quotes about Justice"; "Street Scene"; and "Word Search." This article describes the law-related education (LRE) programs instituted by the United States Department of Justice Office of Juvenile Justice and Delinquency Prevention (OJJDP). By linking legal and constitutional matters to everyday life, the programs aim to bring alive for elementary through high school students legal statutes that often strike youth as arbitrary and prohibitive. Together with the American Bar Association, the Center for Civic Education, the Constitutional Rights Foundation, the National Institute for Citizen Education, and the Phi Alpha Delta Public Service Center, the OJJDP provides training, curriculum, teaching materials, and local contacts to help schools develop LRE programs. The distinguishing characteristics of LRE are creativity and adaptability. This is illustrated by describing the diversity of programs in place across the United States. The approaches to teaching LRE include mock trials, case studies, and visits by experts in the law. The curriculum of the programs cover constitutional, civil, and criminal law. For teachers and administrators interested in pursuing LRE, the article provides a guide to the organizations willing to provide them with assistance. (JD)

Sex equity issues and efforts in art and art education are examined in five major focus areas: (1) "Matters of Conscious and Consciousness" deals with problematic relationships between women, art and education. (2) "Matters of Protest and Progress" explores the sex equity progress made in art and education. (3) "Matters of Herstory and Heritage" looks at women's achievement in art and art education. (4) "Matters of Research and Vision" examines relevant research on sex differences and alternative approaches to sex equity in education. And (5) "Matters of Revision, Strategies and Resources" addresses the need for practical classroom

applications. Approaches, strategies, and resources to stimulate achievement of sex equity in art education are given. Each section is followed by extensive notes and references. Appendixes include a list of 342 women artists, 131 women's art education publications; questions for consideration and additional reference and source materials. (MM)

An Evaluation of the Instructional Effects of the "We the People... The Citizen and the Constitution Program using "With Liberty and Justice for All."

Social Studies Development Center, Bloomington, Ind.

Pub Date—Dec 93

Note—25p.

Pub Type—Reports - Evaluative (142) — Tests/Questionnaires (160)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Citizenship Education, Constitutional History, Constitutional Law, High Schools, Justice, *Law Related Education, Social Studies Identifiers—*Bill of Rights, *United States Constitution, *We the People Curriculum

Reinforcing earlier conclusions of the Educational Testing Service, this evaluation highlights the success of the "We the People" program using the "Justice for All" textbook produced by the Center for Civic Education (CCE), the program involves students in a rigorous study of the Constitution and Bill of Rights and supports their participation in congressional district, state, and national competitions. Intended to supplement government and U.S. history courses, the program strives to develop a better understanding of and a reasoned commitment to democratic principles. At the request of the CCE, the Social Studies Development Center (SSDC) of Indiana University studied whether high school students participating in the "We the People..." program demonstrated more knowledge of the history and principles of the Bill of Rights than students enrolled in high school civics and government classes using traditional textbooks. Through the use of a multiple-choice test on the subject area, the SSDC sampled 10 classes participating in the program and 14 classes not in the program, with the classes in each group distributed across 12 states. Developed by the CCE, the test content was based on recommendations from scholars in political science, U.S. history, and constitutional law. The study revealed that students who participated in the program scored significantly higher on the test than similar students enrolled in government or civics classes using traditional textbooks. Descriptors—*Citizenship Education, Constitutional Law, *Core Curriculum, Curriculum Development, Elementary Secondary Education, *Law Related Education, *Multicultural Education, Social Studies

Identifiers—*United States Constitution

From the perspective of constitutional law, this volume reconciles the conflicting claims of educational reformers who demand a curriculum for national unity and those who call for multiculturalism. The first part of the book describes the educators' opposing views about core curriculum and the century-long history of the debate. The second part of the book rephrases the debate into constitutional terms and concludes that a core social studies curriculum that stresses freedom of religion, freedom of speech, and equality would satisfy the demands for both unity and diversity. Beginning with the insight that schools should teach conflict as well as consensus, the book outlines the features of the U.S. curriculum for constitutional literacy. Social studies and law-related studies should not be taught as static and harmonious knowledge but rather as a chaotic set of conflicts that continue to shape the present world. The book concludes with extensive notes and an index of key terms. (JD)

Identifiers—Business Law, Street Law, Utah Law Related Education Project

This textbook for high school students on law in Utah supplements "Street Law: A Course in Practical Law," a program in law-related education in use across the United States. The introduction explains the meaning of law, how laws are made in Utah, and the functions of the state court system. Following chapters elucidate the branches of law, including criminal, juvenile, consumer, family, and housing law. The book also covers torts, rights, and responsibilities. Each chapter focuses on the special features of Utah law, the legal process, and the state agencies that create and enforce the law. In the section on criminal law, the descriptions of crimes provide specific definitions, aggravating circumstances, and punishments. The chapter that covers housing law presents samples of real estate contracts that illustrate the technicalities of the law. At the end of the book is a glossary of the legal terms used in the text. Identifiers—*Missouri

Fine arts, defined as visual and performing arts, are basic subjects with content that can be taught, learned, and evaluated. As part of the core curriculum, every pre-K through 12 student in Missouri should be taught a balanced, comprehensive, and sequential arts program by certified fine arts teachers. Knowledge-based programs must have outcome-based objectives. Conditions and expectations for teaching fine arts suggest the necessity for pre-service and in-service teacher education. (MM)

Identifiers—Fairfield City School District OH, Hamilton City School District OH, SpectraPlus Program

The Spectra+ program is a 4-year model arts initiative being conducted in four elementary schools in two southwestern Ohio cities. An empirical study compared students in a Spectra+ program with two groups of students in a two alternate, non-Spectra+ programs in districts A and B to measure differences in creativity, academic achievement, self esteem, locus of control, and appreciation of the arts. Results showed that on creativity tests, Spectra+ children scored highest overall on the total test, originality, and resistance to closure. Reading and mathematics achievement scores were examined prior to and following program treatments. Spectra+ students showed no differences in reading improvement from Group A, but less achievement improvement than group B. Spectra+ males showed greater mathematics improvement than Group A as a whole, while the Spectra+ girls showed the lowest mathematics improvement. There was no difference in Spectra+ and group B students in total mathematics achievement. Grade and gender were more significant to self-esteem than either Spectra+ or other treatments. There were no significant differences among the groups in locus of control measures. In total arts appreciation measures, Spectra+ students scored highest. Recommendations called for: (1) continuance of Spectra+ program in the school districts employing it; (2) longitudinal evaluation of areas showing inconclusive results; (3) expansion of the Spectra+ program to use among older students; (4) and investigation of the gender inequities shown among Spectra+ students in terms of mathematics achievement and social self-concept functioning. This anthology is a collection of 17 articles by arts supervisors and administrators. The authors discuss both specific and general aspects of art education program supervision. Topics include staff development, evaluation of art learning, integrating community cultural resources, establishing elementary art specialists, coordinating multiple arts programs, inner city programming, developing management skill, and art education from the state viewpoint. The volume includes: (1) "The Need for a Supervisor" (E. Andrew Mills); (2) "Art Beyond the School Walls" (Gene C. Wenner); (3) "Building Relationships: Quality Visual Arts Education in the 1990s" (Gretchen A. Boyer); (4) "Arts Administration in a

City System: Pittsburgh, Pennsylvania" (Laura J. Magee); (5) "Arts Education and the Effective Schools Research: Practical Strategies for Including Art in School Improvement Efforts" (Robert Eaker; Mary Ann Ranelli); (6) "Elementary Art Supervision in the Los Angeles Unified School District" (Nan Yoshida); (7) "Art Specialist Versus Arts Generalist: Timely Considerations" (Ronald J. Topping); (8) "From Art Teacher to Art Supervisor: Views of Teacher Collegiality" (Katherine O'Donnell; Gary M. Crow); (9) "Uniquely Inner City" (Billie McKindra Phillips); (10) "Art Is for Everyone: A Systematic Approach to Implementing and Evaluating Elementary Art Specialist Services" (Richard R. Doornek); (11) "Partners in Art Education: Supervising Art Education at the State Level" (Martin Rayale); (12) "Art Education Curriculum: A View from the Classroom" (Larry N. Peeno); (13) "Arts Networking as Staff Development" (Carolyn White-Travanti); (14) "The Role of the State Art Specialist: Executive Management Survival Skills" (Mac Arthur Goodwin); (15) "Coordinating the Fine Arts" (Paul M. Patterson); (16) "Evaluation of Art Learning" (Sandra Finlayson); and (17) "A Status Report of the Art Program: Anchorage School District, Alaska" (Myrna B. Clark). Short biographic data about the authors concludes the volume. (MM)

Descriptors—Aesthetic Education, *Aesthetic Values, *Art Appreciation, Art Education, *Attitude Measures, Higher Education, Undergraduate Students, Visual Arts

Identifiers—*Salkind Art Preference Test Two

A revised Salkind Art Preference Test was developed with more representational works than in the original. The revised instrument consisted of 39 slides of paintings grouped according to types such as landscape, still life, figure, and portraits. This test was administered to a 72 student sample in a beginning level design history class at a major urban university. Subjects indicated preferences as their degree of like or dislike on a five point Likert scale. Results indicated preferences for more familiar and representational works. (MM)

This publication on the constitutional principles of the U.S. Government consists of the textbook and teacher's guide. The textbook begins with a review of constitutionalism in antiquity, in early modern England, and in colonial America. Following sections outline the constitutional convention in Philadelphia, the principles of the constitution, and the debate over ratification. The final sections of the textbook elucidates the role of the constitution in U.S. history with chapters on Supreme Court interpretations and the ratification of amendments. Each

chapter opens with an synopsis of the main points presented and closes with a presentation of several primary documents related to the topic. These documents include the Magna Charta, the English Bill of Rights, the Mayflower Compact, the Virginia Bill of Rights, the Constitution and all of its amendments, several of the Federalist Papers, the Northwest Ordinance, the Supreme Court decisions in *Marbury v. Madison* and *Hunter v. Lessee*, and other materials on constitutional history. The chapters also provide questions that test students' comprehension of the content. At the end of the textbook suggestions for a classroom project in which students become state representatives and participate in a constitutional convention are included. The teacher's guide explains a new approach to the study of U.S. government. It focuses on the constitutional framework that shapes and controls the political process. The textbook is summarized as a defense of the principle that, in order to achieve liberty, order, and justice, one must first establish limited constitutional government. The teacher's guide provides lesson plans for the textbook's seven parts, which include the history of constitutional government, the colonies' original constitutions, the Philadelphia Convention, the principles of the constitution, the ratification, the interpretations of the constitution, and the amendments added since 1791. The lesson plans call for research projects, essays, and discussion questions. Each plan includes recommendations for supplemental student reading. (JD)

Intended to accompany the film "Mister Chief Justice," this study guide introduces the life of John Marshall and early U.S. history through a fictional account of a dinner party at the home of the chief justice in March, 1801. The guide presents the historical characters who attended the dinner, including John Marshall, Mary Willis Marshall, Eliza Ambler Carrington, Edward Carrington, Robin Spurlock, George Hay, Daniel Trigg, and Aaron Burr, as well as the historical events that preceded the dinner, the Whiskey Rebellion and the XYZ Affair. This guide provides primary documents and discussion questions related to the themes discussed at the dinner party, which covered the national identity, popular participation in government, and the costs of public service. The documents consist of the correspondence of John Marshall to other political leaders. A list of 18 selected works offers suggestions for other primary documents on the life of John Marshall and the politics of his day. (JD)

Evaluation of Music Educators: Toward Defining an Appropriate Instrument.

Pub Date—[93]

Note—21p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Educational Research, Elementary Secondary Education, *Evaluation Criteria, Evaluation Research, Higher Education, Measurement Techniques, Music Education, *Music Teachers, Teacher Education, *Teacher Evaluation

This paper questions whether it is appropriate to evaluate music educators exclusively on general competencies, or whether effective music teaching involves certain teaching behaviors, characteristics, and attributes that are so significantly unique that they demand their own set of evaluative criteria. The paper reviews selected relevant research from 1989 to 1993 and discusses pertinent practical issues involved in the evaluation of public school music teachers, and synthesizes eight general areas for further development as potential criteria for music teacher evaluation. Both empirical and nonempirical evidences are studied, and attempts are made to reconcile the discontinuity that exists between evaluative criteria appropriate for all teachers and that which is appropriate for teachers of music. An appropriate evaluation instrument for in-service music teachers should include the following broad areas that would serve as defining attributes: (1) personal characteristics, as evidenced through student teacher, teacher faculty, and teacher administration interactions; (2) musical competence and performance skill, as evidenced when teaching a lesson; (3) effective use of nonverbal strategies, such as modeling and demonstrating; (4) effective use of verbal strategies, such as eliciting performance from students; (5) classroom management, including discipline, group participation, and the creation of a positive learning environment; (6) effective planning for concept learning and aesthetic appreciation across a wide age span; (7) an objective assessment of teaching style based on empirically supported criteria; and (8) relevant and appropriate professional development activities. Contains 10 references. (DK)

Descriptors—Educational Objectives, Grade 6, Grade 7, Intermediate Grades, Junior High Schools, Middle Schools, *Music Education, State Standards, *Student Evaluation
Identifiers—Illinois

This document is a conference presentation on the use of portfolios as an evaluation tool for middle school music students. All of the pages are suitable for use with an overhead projector. Areas covered include reasons for teaching the arts as both an intellectual discipline and vocational education; Illinois state goals for musical learning for grades 6 and 7; and why a portfolio is a suitable evaluative tool. The portfolio is recommended for 7 reasons: (1) the portfolio is a history of the student's musical learning; (2) it is an exhibition of what the student understands and actually knows; (3) it shows a trending of the student's work and thus is both "neat" and powerful; (4) portfolios contain many products that are a cluster of ideas; (5) they hold validity because the contents consist of what the teacher has taught; (6) the portfolio is an affirmation for the student, to the larger community that what the student has practiced, the skills and habits developed, have paid off; and (7) portfolios give focus to a school's curriculum program. The portfolio contains all of the musical creations the students have generated in any notation as well as draft worksheets, a series of completed preliminary worksheets reflecting completion of each specific assigned task centered around the elements of music, domain project sheets telling about their musical activities and obtaining student response to their own music, quizzes, and anything else the student chooses to add that pertains to mu-

sic. Key portfolio projects for the 7th grade level are suggested. Instructions for assessing the portfolio are included. (DK)

Hagedorn, Victoria S.

Musical Learning for Hearing Impaired Children.

Pub Date—92

Note—7p.

Journal Cit—Research Perspectives in Music Education; n3 p13-17 Fall 1992

Pub Type—Journal Articles (080)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Elementary Education, *Hearing Impairments, Learning Problems, Learning Strategies, *Music Education, Student Characteristics. A hierarchy of auditory processing developed by Derek Sanders for use in developing sequential objectives for musical listening skills serves as the basis for this article. Because of the similarities between components of speech and music, the hierarchy is congruent with musical listening expectations. While this model was designed for the development of speech discrimination, it has important implications for music education. The hierarchy consists of a 10 level sequence for processing auditory stimuli. The steps consist of: (1) awareness of the stimuli; (2) localization; (3) attention; (4) discrimination between speech and non-speech sound; (5) auditory discrimination; (6) suprasegmental discrimination; (7) segmental discrimination; (8) auditory memory; (9) auditory sequential memory; and (10) auditory synthesis. Use of this hierarchy for advancing listening experiences for hearing impaired children could be used to maximize the residual hearing on musical listening. A brief look at each of these levels and the suggested correlation between the hierarchy and music is included. While deaf children may require more attention from the music teacher, and materials may have to be adapted in their presentation, musical perception is a possibility. With a little imagination and the adaptation of materials used in the musical education of hearing children, activities for the deaf can be designed to enhance the development of the perceptive skills in the described hierarchy. To build an effective music program for the deaf, it is necessary to create a foundation of musical perception in the early years of the child's music education. Contains 15 references and an appendix of resources for musical examples. (DK)

Effects of Required Concert Attendance on Attitudes of College Students Enrolled in Music Courses for Nonmusic Majors.

Pub Date—93

Note—6p.

Journal Cit—Research Perspectives in Music Education; n4 p28-31 Fall 1993

Pub Type—Journal Articles (080)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Concerts, Curriculum Enrichment, Educational Research, Higher Education, Learning Activities, *Music, Music Appreciation, *Music Education, *Nonmajors, Student Attitudes, *Undergraduate Students

This paper presents research surveying the responses of university students enrolled in music classes for nonmusic majors with regard to several aspects of required concert attendance. Groups of subjects ($n=258$) enrolled in courses with required concert attendance were compared to those in courses without such a requirement. Results indicated that required concert attendance was a positive or, at worst, neutral experience for the students. The students found attending concerts presented by the university music department or concert series to be an enjoyable activity, and reported a fairly high degree of awareness of campus concerts. While all expressed an inclination to attend concerts in the future, this was significantly stronger for the students with the concert attendance requirement. The structure of assignments and expectations, specific preparation for the concert experience, integration of literature studied with performance ensembles, or subsequent discussion of the experience, might be factors which could have an impact on the perceived or actual value of these requirements. The primary implication from this research for instructional practice is that including a concert attendance requirement is likely to increase interest of students and to build positive attitudes toward art music. Legette, Roy M.

Causal Attributions of Music Majors and Nonmusic Majors Regarding Success and Failure in Music: A Study of Motivation and Achievement.

Pub Date—93

Note—6p.

Journal Cit—Research Perspectives in Music Education; n4 p9-12 Fall 1993

Pub Type—Journal Articles (080)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Academic Achievement, Educational Research, Higher Education, *Majors (Students), *Music, *Music Education, *Nonmajors, *Student Motivation, Undergraduate Students. Identifiers—Asmus Music Attribution Orientation Scale

This paper reports on a study that sought to determine some of the causes to which undergraduate students attribute success or failure in music. Subjects were 43 music majors and 62 nonmusic majors enrolled in several sections of a beginning level guitar class. Subjects were administered the Asmus Music Attribution Orientation Scale (MAOS) and asked to indicate how important they thought each of the following attributions were in terms of contributing to their success or failure in music: (1) effort; (2) background; (3) classroom environment; (4) musical ability; and (5) affect for music. Results revealed that collectively the students placed more importance on the causal attributions of effort, affect for music, and musical ability. When divided by majors (music majors as opposed to nonmusic majors), the music majors placed more importance on effort, musical ability, and affect for music than did the nonmusic majors. Implications for teaching are discussed. The fact that many nonmajors performed as well or better than the music majors implies that teacher interventions aimed at modifying attributions and learning strategies may have positive effects on students. A skill mastery, rather than an ability oriented situation, might provide a context that is likely to foster long term use of learning strategies, developed around the belief that there is a contingent relationship between success and effort. Contains 25 references. (DK)

Forney, Patrick M.

The Effect of Modeling and Silent Analysis on the Performance Effectiveness of Advanced Elementary Instrumentalists.

Pub Date—92

Note—6p.

Journal Cit—Research Perspectives in Music Education; n3 p18-21 Fall 1992

Pub Type—Journal Articles (080)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Bands (Music), Educational Research, Elementary Education, Modeling (Psychology), Musical Instruments, *Music Education, *Performance, *Performance Factors, Student Attitudes, Teaching Methods. Identifiers—*Instrumental Music, Silent Analysis

By keeping abreast of the latest research in the field, music educators can better understand how practicing helps students to use practice methods that are the most effective. The purpose of this study was to determine the relative effectiveness of modeling and silent analysis on the performance ability of advanced elementary school instrumentalists. This research focused on two questions: (1) are modeling and silent analysis effective practice techniques when compared with free practice or sight reading; and (2) do modeling and silent analysis differ in their effectiveness as practice techniques? Forty sixth grade band students were assigned to one of four practice conditions and asked to perform a composition after a brief practice session. The four practice sessions were: (1) modeling; (2) silent analysis; (3) free practice; and (4) control. Statistical analyses revealed that modeling was significantly different when compared to the three other groups in improving students' performances of the composition. When looking at the gain scores, both modeling and silent analysis appeared to be more effective than free practice in helping to improve elementary students' performing level. Additionally, the gain scores revealed that practice of any kind is better than simply sight reading. The article begins by discussing the related literature. It includes four tables of scores and a graph of mean gain scores of practice groups, and concludes with an 18-item reference list. (Author/DK)

Howle, Mary Jeanette

An Examination of Selected Aspects of Pitch-Matching Problems among Children.

Pub Date—92

Note—8p.

Journal Cit—Research Perspectives in Music Education; n3 p22-27 Fall 1992

Pub Type—Journal Articles (080)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Educational Research, Elementary Education, *Music Education, Questionnaires, Sex Differences, *Singing, *Student Motivation, Teaching Methods, *Vocal Music. Identifiers—*Pitch (Music)

This article presents findings from the literature and professionals of music education concerning the characteristics of problem singers, the manifestations of the problem, suggested causes of poor singing, and possible procedures for correcting the problem. It also attempts to determine any parallels between existing research findings and informal observation. In an attempt to learn more about children who cannot match pitch, research was conducted in the related professional literature, knowledgeable teachers were asked to participate in interviews and to complete questionnaires, and work was done with children who had problems singing. All teachers contacted for this study cited problems with children who cannot sing well and had tried many different ideas to help correct the problem. Several areas have been investigated by researchers in an attempt to gain insight into the inability to sing. No one characteristic appears to be a common cause for poor singing. Factors that do seem to be prevalent in the discussion of the problem singer include: (1) gender; (2) motivation; (3) age, accuracy in singing improves with age; and (4) solo and group singing. Some children, especially prior to sixth grade, match pitch when singing alone but have difficulty when singing in a group. Manifestations of the problem are grouped into incorrect pitch, speaking singers, dependence, and coordination. Causes of poor singing include home environment, perception, melodic content, text, and range and tessitura. Social factors, experience, and education are discussed. Remedial techniques are suggested. (DK)

Descriptors—*Art Education, *Art Teachers, Discipline Based Art Education, *Educational History, Elementary Secondary Education, Multicultural Education, *Politics of Education, Teacher Education

This monograph presents the views acquired over an art educator's 40 years of teaching. Divided into four sections, the book's first section is a basic introduction to the purpose and intentions in writing the book. The second is on philosophical bases and derivative principles. This section contains four parts: (1) democratizing the range of aesthetic objects; (2) eliminating developmental purposes; (3) aesthetics as the curriculum; and (4) contextualism in aesthetic response. The third section consists of a summary of the history of art education in the United States from the late 1940s through the development of discipline based art education (DBAE) in the 1980s. The fourth section is called "Randomly Organized Opinions" and contains opinions on eight different aspects of art education: (1) the apotheosis of art education; (2) politics and art education; (3) art teacher education; (4) multicultural art education; (5) outsiders in art education; (6) newer media; (7) repeat performance; and (8) coda. Contains 20 references. (DK)

Descriptors—Access to Education, Elementary Secondary Education, *Equal Education, *Females, Foreign Countries, Single Sex Schools, *Womens Education

Identifiers—Bangladesh, Gender Gap, Kenya, Mali, Nepal, Pakistan, Senegal

This booklet focuses on educating girls and women. The main issues include gender gap and its persistence in education. The reasons for this persistence include poverty, distance of schools, non-availability of gender segregated schools, absence of female teachers, inflexible school timing, and irrelevant and gender-insensitive curriculum. It is not sufficiently recognized that educating girls is one of the wisest investments for a society as it tends to lower population growth to improve education, health and nutritional status of the entire family besides opening up opportunities for supplemental income. Many national action programs already exist which are extending education to girls and women in a cost-effective manner. Some common features among these programs include local recruitment and training, flexible timing, affordability, presence of female teachers, clear targeting of girls, multiple delivery systems, combining learning with income-earning opportunities, and mobilization of community participation. The booklet also includes successful examples of action programs such as BRAC schools in Bangladesh; Mosque schools in Bangladesh, Kenya, Mali, and Pakistan; the Tostan project in Senegal; Cheli Betti in Nepal; the mobile video literacy program in Peru, the literacy and income-earning project in Togo; and the home school project in Pakistan. Descriptors—*Censorship, Citizenship Education, Civil Rights, Females, *Feminism, Law Related Education, *Pornography, Social Science Research

In May 1993, representatives of anti-censorship feminists convened at the Graduate Center of the City University of New York to overturn the myths that censorship is good for women, that women want censorship, and that those who support censorship speak for women. Participants at the convention discussed four major themes: the current panic over sexual perversion, the anti-pornography

movement among certain feminists, the need for free speech in matters regarding sex, and the struggle for free speech. Lisa Duggan, historian, journalist, and Brown University professor, discussed the history of moral reform movements from temperance to anti-pornography and explains how they have not promoted the interests of women. Speakers denounced the legal theories developed by Catharine MacKinnon and Andrea Dworkin that excuse censorship and treat the First Amendment as irrelevant. The anti-censorship feminists argued that the banning of pornography amounts to the control of women's images and the suppression of women's search for their own sexuality. (JD)

Descriptors—Citizenship Education, *Constitutional Law, Government (Administrative Body), Instructional Materials, *Law Related Education, Secondary Education, Social Studies, *State Church Separation, *United States History

Identifiers—Supreme Court, United States Constitution

This textbook on the separation of church and state continues the "Exploring the Constitution Series," which introduces important areas of constitutional law. Intended to serve either as a reference work, a supplement to a standard textbook, or as the textbook for a course, this volume covers the constitutional issues of prayer in public schools, government support for private religious schools, the use of religious symbols by government, the right of school children to refuse to recite the Pledge of Allegiance, the rights of conscientious objectors, and the appeal to religion as an excuse for breaking the law. The introduction elucidates the historical background for the separation of church and state with a discussion of John Locke, Baron de Montesquieu, and colonial America. Each substantial chapter on a constitutional issue explains the setting of the debate, provides opinions and dissents from several Supreme Court cases, and offers discussion questions. The book closes with a glossary of legal terms, suggestions for further readings, and two appendices containing the United States Constitution and the Bill of Rights. (JD)

Descriptors—Citizenship Education, Discipline, Educational Environment, Elementary Secondary Education, Law Related Education, *School Security, Social Studies, *Staff Development, *Training, *Violence

This training manual complements the textbook "Violence in the Schools: Developing Prevention Plans." The curriculum introduces students to the democratic process by involving them in the development of a prevention plan for treating the problem of violence in their school. The manual guides trainers in designing and implementing teacher training programs to assist teachers as they initiate this interactive program in civic education. After explaining how to arrange a training session, the guide suggests two possible schedules for training

sessions, depending on whether 3 hours or only 75 minutes are available. As a means of introducing teachers to the program, the manual provides a sample lesson plan on the causes of violence in schools. The appendix includes an evaluation form for the training session, a planning checklist, a form for recording training sessions, and a participant sign-in sheet. (JD)

Identifiers—Authority

This curriculum is organized around four concepts—authority, privacy, responsibility, and justice—which form part of the common core of civic values and concepts that are fundamental to the theory and practice of democratic citizenship in the United States. Rather than focusing on facts and dates, the curriculum challenges students to think for themselves, to develop reasoned positions, and to articulate and defend their views. By raising issues over the authority of police, teachers and principals, the volume calls on students to question the benefits, costs, and limits of authority and privacy. The textbook also raises questions about how competing responsibilities should be resolved and about the various forms of justice, including distributive, corrective, and procedural justice. Each chapter provides concrete conflicts covering such areas as sporting competitions, locker rooms, computers, and drunk driving, followed by critical thinking exercises requiring students to identify and debate the competing interests. To provide students with an analytical framework for debating the issues, the textbook explains the use of intellectual tools that help students think critically, such as, for example, identifying the claims for privacy, the relevant considerations, and alternative solutions. Identifiers—Authority
This teacher's guide presents effective strategies to implement the "Foundations of Democracy" textbook, which introduces four concepts basic to the United States Constitution: authority, privacy, responsibility, and justice. The guide explains that

the success of citizenship education programs depends on extensive interaction among students, realistic content that includes balanced treatment of issues, use of community resource persons, and the support of principals and other school administrators. The guide identifies effective questioning strategies, techniques for small group learning, and interactive teaching methods. To promote student interaction, teachers are instructed to stimulate legislative hearings, moot courts, mediation sessions and town meetings. Because of the interactive and conceptual nature of the curriculum, the volume suggests performance-based assessments, in which students demonstrate their knowledge and skills by addressing complex questions within a meaningful context for which there is usually not just one correct answer. For each chapter, the guide provides suggestions for introducing the topic and for supplemental classroom activities. (JD)

Identifiers—*Nashville Metropolitan Public Schools TN, *National Training and Dissemination Program, Youth for Justice Program

This bulletin describes the success of a partnership between the National Training and Dissemination Program (NTDP) and the Metropolitan Nashville Public Schools (Tennessee). Beginning in October, 1992, the NTDP provided Nashville with technical, staff, and financial assistance as well as law-related education (LRE) resources. Nashville schools cooperated in developing a pilot program for one of the district's 11 kindergarten through grade 12 clusters. The five-step strategy that the NTDP followed in implementing the program, a strategy that begins with needs assessment, is outlined. After formulating a mission statement and goals intended to fulfill the needs of the school district, the development team designed curriculum guidelines. To promote faculty training, a key to the project's success, the district encouraged teachers to schedule LRE staff development sessions to fulfill their annual staff development requirement. The training sessions involved teachers, administrators, parents, and community leaders. In the belief that community involvement is an essential element of LRE, the development team initiated several outreach efforts. Attorneys were encouraged to visit their assigned schools and meet students informally. The article concludes with suggestions for interested readers to develop their own LRE programs. (JD)

Education, *Social Studies, Teaching Methods

This collection of four short articles presents teaching strategies to enrich the social studies curriculum and promote students' sense of citizenship. Diana Hess outlines how cooperative learning stimulates the skills necessary for effective participation in a democratic society. By taking an active role in their own education and respecting the contributions of others, students begin to learn how to work together for the common good. The second article, by Charlotte Anderson, reflects on the need to rethink the context of citizenship in the global context. Anderson shows how, through global education, students learn that institutions such as the law can be used to help people cope with the immense social and environmental problems of the current age. Ronald Banaszak explains how studying the decision-making processes in economics can help students understand the analytical thinking required of responsible citizens. In the concluding article, David Naylor discusses the importance of teaching students about the heritage of liberty, equality, and justice and how these values are protected by the rule of law. Naylor suggests ways to convince students that history and the law are not abstract concepts, but how "real people face real situations." The articles illustrate how each of these areas of the social studies curriculum—global education, economics, and history—are intertwined with legal issues. (JD)

Identifiers—*Mediation

This collection of four short articles describes initiatives of the American Bar Association that bring the skills of mediation to the classroom. Suzanne Miller discusses a program that trains students to become mediators equipped to resolve disputes in their school peacefully. The program turns problem students into positive role models, teaches problem-solving and decision-making, and promotes leadership abilities. After a discussion of the history of conflict resolution in the United States, Miller describes the factors that have contributed to the success of a training program at Gifford Elementary School in Racine, Wisconsin. Reporting on the success of pilot programs in Cleveland, Ohio, Elisabeth T. Dreyfuss explains the costs and procedures for introducing the mediation process in schools and the benefits it contributes, particularly the reduction in disruptive behavior and the improvement in the learning environment. In an article on peer mediation in Rich Township High Schools, Cook County, Illinois, Anthony Moriarty and Shirley P. McDonald argue that mediation programs provide an ideal opportunity for students to participate democratically in solving disciplinary problems. Melinda Smith assesses efforts to introduce mediation into juvenile justice settings, with special attention to the New Mexico Center for Dispute Resolution, and concludes that these initiatives hold great promise for improving juvenile justice in the United States. United States History

Identifiers—*United States Constitution

This collection of research findings by several organizations quantifies public ignorance of the U.S. Constitution and the success of the "We the People...The Citizen and the Constitution Program" in addressing the problem. Surveys by the American Bar Association, the Hearst Corporation, the National Assessment of Education Progress, the People for the American Way, the University of California at Los Angeles Higher Education Research Institute, and the United States Census Bureau indicate a poor public understanding of the principles of democracy and an apathetic attitude toward political participation. Intended to address this challenge for civic education, the "We the People...Program," designed by the Center for Civic Education, involves students in a rigorous study of the Constitution and the Bill of Rights and provides for participation in congressional district, state, and national hearings. One research study has found that students involved in the program display more political tolerance and feel more politically effective than most adults and most other students. A second study concludes that high school students who have participated in the program demonstrate more knowledge of the history and principles of the Bill of Rights than students enrolled in high school civics and government classes using traditional textbooks. Reinforcing these research findings, the Educational Testing Service has characterized the "We the People...program as a "great instructional success." (JD)

Identifiers—Supreme Court, *United States Constitution, *Westside Community Schools v Mergens

This master's thesis synthesizes literature on the teaching of the United States Constitution, analyzes the Supreme Court case of Westside Community Schools v. Mergens, 1990, and provides lesson plans for teaching the constitutional significance of this case. The thesis argues that because of the poor quality of textbooks and the inadequate training of teachers, the U.S. educational system is failing to inculcate basic constitutional principles in secondary school students. Greater use of technology, community resource persons, primary documents, case studies, cooperative learning, concept maps, and global perspectives are advocated. For a case study that will excite student interest, the Mergens case, which involves a recent piece of federal legislation, the Equal Access Act of 1984, that pertains directly to secondary school students is suggested. In the case, the Supreme Court upheld the right of students at Westside High School in Omaha, Nebraska to meet for Bible discussion during noninstructional time. It is essential for the successful introduction of case studies that teachers are provided with the historical and constitutional background of the case. (JD)

Identifiers—*Mediation

This teacher's guide provides 10 interactive lesson plans to educate youth about the consequences of violence. The lessons explore the different kinds of violence in society, conflict resolution through mediation, the behaviors that constitute sexual harassment, statistics on violence, ways to avoid domestic violence and the use of deadly force, the impact of television violence, sentencing enhancement statutes for gang activity, non-violent theories of social change, the problems facing minorities in Germany, and foreign policy alternatives to ethnic violence, civil wars, and genocide. The teaching strategies challenge students to solve problems peacefully through mediation and creative thinking. Beginning with the premises that respect is an unalienable right and that disrespect has no place in a democracy, the first priority of this curriculum is to foster respect for the inherent worth of all human beings. Once respect is established, the second step to avoiding violence is to reflect, to have the courage to think and to act clearly. Resolution, the third step, implies choosing an alternative that will allow everyone to walk away from a conflict with their worth as an individual intact. The book provides handouts to supplement mediation exercises, suggestions for resource persons, and guidelines for implementing a mediation program. (JD)

Descriptors—*Citizenship Education, Constitutional Law, Disabilities, Driving While Intoxicated, Freedom of Speech, High Schools, Homosexuality, Intermediate Grades, Junior High Schools, *Law Related Education, Middle Schools, Politics, Social Studies, Violence
Identifiers—Americans with Disabilities Act 1990, Mediation

As part of a series of lesson plans compiled by Phi Alpha Delta, this collection presents a lesson plan on current issues for each month of the school year. Intended for high school and middle school with adaptations for elementary school, the lessons cover the Americans with Disabilities Act in relation to accommodations for students with disabilities, the analysis of 30-second political advertisements, freedom of speech as it applies to rock and roll songs, hate crimes in Germany, term limitations for the United States Congress, reform of political lobbying, minority rights, non-violent dispute resolution, drunk driving, and the ban on homosexuals in the military. Each of the lesson plans provide a lesson description, objectives, key concepts and vocabulary, detailed steps for implementing the lesson, questions for class discussion, and suggestions for additional activities, such as inviting resource persons and drafting letters to legislators. The lessons also provide handouts of relevant legislation, court cases, and survey forms. The lesson on minority rights in Germany offers for comparison the United States Bill of Rights and the Basic Law for the Federal Republic of Germany. (JD)

Development, Democracy, *Educational Objectives, Elementary Secondary Education, Public Education, *Role of Education, *Social Studies

This paper discusses the nature and role of social studies in the public school curriculum. As presently used, the term "social studies" encompasses history, geography, economics, sociology, psychology, and government. In the United States, democratic citizenship is typically taught through social science subjects that are themselves a part of the social studies curriculum. The 1916 report of the National Education Association's (NEA) Committee on Social Studies of the Commission on the Reorganization of Secondary Education is discussed. Although the 1916 report gave no specific outline or curricular framework for social studies content, the purpose of social studies was established. This purpose was to provide for good citizenship. A good citizen was one who followed social customs, was loyal to national ideals, and had a sense of social responsibility. Later reports and studies also are described in this paper. This document cautions that when coverage of content becomes the primary focus of teaching and learning, then students generally do not understand what it is they have learned, and if content was learned through rote memorization, nearly all of it is forgotten within two years. Social studies advocates think that knowledge-based problem solving, decision making, and participatory activities, yield a more competent and committed democratic citizen. If the social sciences are taught as fragmented bodies of disconnected facts, then the curriculum will not achieve its goal of preparing an enlightened, active citizenry. Contains 12 references. Identifiers—*Jefferson (Thomas), *Utilitarianism

This paper discusses Thomas Jefferson's evolving concept of the form and manner of education most useful for republican citizens. Jefferson both respected and resented Europe's claims of superiority in cultural matters. But as captivated as Jefferson was by European artistic and literary attainments, he was appalled at the misery and squalor that he observed among the masses in France. In letters from Europe to those in America, Jefferson expressed his opinions of European education, and what was necessary for education in the new republic of the United States. In numerous letters and documents, Jefferson elaborated in some detail on the value of a knowledge of the classics, modern languages, mathematics, chemistry, agriculture, botany and other branches of science, as well as the study of history and ethics. Studies such as these Jefferson considered the bare essentials, the core areas of knowledge that should be in the possession of any American who sought enlightenment. His writings warned of the pitfalls of sending young men to Europe for an education. Convinced that enlightened Americans needed to attend consciously and deliberately to the serious work of educating the body politic, Jefferson sought to distance his countrymen from the social and political traditions that he believed contrasted so markedly with the conditions that should emerge and prevail in the new nation that was forming. To Jefferson liberty depended on education, an education that would ensure that the inalienable rights recently proclaimed and fought for would be realized. Theoretically Jefferson's educational scheme was both democratic and meritocratic. (DK)

This document presents the results of an exchange between the College of Education at the University of Wisconsin-La Crosse and the University College of Swansea in Wales to facilitate the development of a close departmental relationship in order to foster exchanges of information and personnel on preparing teachers by incorporating a global awareness into the teacher education curriculum. This document has three parts. The first part focuses on curriculum and contains 7 articles: (1) "Cultural Pluralism vs. Ethnic Fragmentation?" (Kent Kopelman); (2) "If Multiculturalism is the Answer, What is the Question?" (Jose Vega); (3) "Environmental Education in Wisconsin" (Lucy Slinger); (4) "Ideological Change and Curriculum Transition in Teaching about the Legacy of the Third Reich in East German Secondary Schools" (Gregory Wegner); (5) "Cross-Curricular and the Whole Curriculum" (Michael Williams); (6) "A Socio-Political Analysis of Nationalized Curriculum," Response to Michael Williams (Joyce Shanks); and (7) "Pupils' Perceptions of Science in Their Final Year in Primary School" (Catherine Woodward). The second part on instruction includes five articles: (1) "A School-University Collaboration To Implement Cooperative Learning through Integrated Language Arts" (Carol Kirk); (2) "Parallels: Supporting Students and Teachers as Learners," Response to Carol Kirk (Delores Heiden); (3) "International Connections in the Tradition of Advocacy for Teacher Professionalism" (Wade W. Nelson); (4) "Assessment of Practical Skills in Secondary School Science Courses" (John Parkinson); and (5) "A Response to Assessment of Practical Skills in Secondary School Science Courses," Response to John Parkinson (John Whitsett). The third part contains 7 articles on teacher education: (1) "The Reform of British Initial Teacher Education and the Role of the Mentor" (John Furlong); (2) "Clinical Professors and Classroom Teachers as Co-Mentors" (Robert Richardson); (3) "Standards for Quality Classroom Practice" (Lynelle L. Palmer); (4) "The New Right, Thatcherism, and the Attack Upon the Post-War Consensus" (Robert Phillips); (5) A Response to Robert Phillips, author of the preceding article (Burton E. Altman); (6) "Differences in Academic Performance: An Exploration from the Perspective of Gender and Implications for the Initial Training of Teachers of Young Children (ages 3-11) (Susan Sanders); and (7) "Parents' and Teachers' Socialization of Young Children's Gender Identity," Response to Susan Sanders (Barbara Chaney). Identifiers—Manitoba

This Manitoba, Canada curriculum guide presents an art program that effectively bridges Canadian junior and senior high school art levels. Content areas include media and techniques, history and culture, criticism and appreciation, and design. Four core units present fundamental art knowledge through themes based on self and environmental exploration. Media and techniques used include drawing, collage, sculpture and ceramics. Four secondary units are enrichment oriented. Maskmaking expands on self-exploration by examining different faces humans present to establish identity and communication. Mass media introduces students to concepts of advertisement communication. Differences between need and want are explored. Landscape is

studied as interpretations of environment as seen, remembered, or imagined. Investigation of the future allows for exploration of various scenarios with a wide variety of materials. The teaching method employed is problem solving/inquiry. Idea journals and portfolios are identified and used as evaluation tools. Appendices and bibliographies are included. (MM)

Identifiers—*Algeria

There are growing discernible differences between the status of Algerian girls and Algerian boys, as the onset of puberty approaches, in educational or literacy attainment or achievement. Around 19% of Algerian girls never attend school or drop out very early on. School is legally mandated through the age of 16, but many girls' families simply do not send them to school. As puberty approaches, more and more girls are removed from school; while dropout rates for boys of 11 years of age are 6.35%, they are 10.42% for girls. This trend is particularly powerful in the rural areas of Algeria, where attendance percentages for rural girls primary school may be as low as 35.89%. Similar disparities exist between boys and girls in terms of literacy. While 7.23% of boys aged 15-19 are illiterate, 25.30% of girls this age are. Once again, girls in rural areas are more likely to be unschooled than their urban sisters; while urban rates of illiteracy for girls are somewhere between 1.07% and 4.91%, rural girls have rates of around 48.89% and 46.33%. These figures infer that girls in Algeria are discriminated against in access to and achievement in school. Rural girls face particularly fierce discrimination. The most likely causes are: rural girls are needed for home producing more often than urban girls, schools are too far away, and social attitudes in rural areas tend to be more conservative. This study highlights the plight of the Algerian girl. Women's groups in Algeria, as well as the United Nations Children's Fund (UNICEF) and 20 NGOs (Non Government Organization), are working to lessen the disparity between the treatment of boys and girls, and are working to change the general population's views of sex discrimination. Only with a lessening of the existing disparity will Algerian women be able to be fully incorporated into "all aspects of life." (NK)

Identifiers—Africa, Basic Education, Benin, Botswana, Ghana, Guinea, Lesotho, Malawi, Mali, Namibia, South Africa, Swaziland, Uganda

Since 1989, the United States Agency for International Development (AID) Africa bureau has operated under an Agency-wide Congressional Basic Education earmark, which specifically required the creation of five new basic education programs in sub-Saharan Africa between 1989 and 1991. The Bureau exceeded that goal by initiating primary education programs in Mali in 1989, in Guinea and Ghana in 1990, in Benin, Malawi, and Namibia in 1991, and in Uganda in 1992. These programs join ongoing assistance efforts in Botswana, Lesotho, South Africa, and Swaziland. Most of these programs, especially the more recent ones, exhibit substantial policy content and careful coordination

with other donors. Each aims to help African countries increase the efficiency, equity, and quality of primary education. However, the tremendous variety that exists across the continent requires different approaches to educational reform. This report illustrates both the strategic consistency running through all of the Africa Bureau's educational programs and the variations that address country-specific problems and goals. The report has two main sections: (1) a brief general description of the problems facing African education and data illustrating these problems; (2) 11 country-specific descriptions of A.I.D.'s bilateral educational programs which either ended in or continued beyond 1992. Descriptors—Citizenship Education, *Law Related Education, *Public Relations, Secondary Education, Social Studies

In order to champion law-related education, this volume argues that administrators of law-related education (LRE) programs should make public relations an integral part of program planning. An introductory section defines public relations and offers basic advice for developing goals and strategies. The guide advises program directors to train their staffs for public relations and to involve their advisory board, affiliated organizations, and a public relations firm that does pro bono work. A section on the media explains how to develop a media contact list including contact persons, deadlines, and policies for editorial comments. It is important to establish good working relationships with reporters and not to favor one newspaper, radio station, or television station over another. The guide outlines steps that may make LRE newsworthy such as holding competitions, giving awards, and relating events to controversial issues. To foster media coverage, the document presents model news releases and explanations of why certain releases are more effective than others. The guide closes with advice for maintaining a photograph album of all LRE events that can provide materials for newspapers and in-house publications. (JD)

Compiled from teachers' responses during the 1992-93 school year, this guide presents suggestions and comments for educators involved in the Law-Related Education Program for Students with Disabilities, a program funded by the U.S. Department of Education. The teachers whose comments are featured in this guide represent high schools, middle schools, and juvenile detention centers from across the United States. They offer advice on teaching rights to students with learning, mental, emotional, behavioral, hearing, or vision disabilities. The teachers explain the training they underwent, the obstacles faced, including disciplinary problems, and the projects they pursued with students, such as field trips to courts and the creation of law-related education hypercard stacks. In one segment, Mary Jane Breen and Flemming Goddiken, teachers at Bucks County Technical School, Bucks County, Pennsylvania, illustrate how they tailored the program to their students' interests by teaching about the Americans with Disabilities Act. Identifiers—Street Law

This manual is intended to serve as a resource book for law professors and program directors who would like to conduct a program for teaching law students to instruct the public in their areas of the law. Over 30 law schools nationwide offer credit or compensation to law students to teach in the community, primarily in high schools, but also in middle schools, prisons, and community organizations. Although based predominantly on the "Street Law" textbook, the programs may differ substantially from each other. For this reason, the manual is illustrative and does not suggest a single right way to conduct a program. The seven chapters of the manual cover key issues for street law programs, their basic features, the rationale for the programs, their structures, instructions for law students, evaluations of the instructors, and the administration of the programs. In the appendices, the manual presents detailed descriptions of several law school programs, sample syllabi for a law school seminar, lesson plans for a seminar, materials for use in instructing law students to teach, lesson plans that the law students may employ, and several lists of teaching resources. Emphasizing the several strategies that have proven successful, the manual provides an overview of the different models followed by law schools at Georgetown University, Temple University, and the University of Tennessee. Identifiers—Teaching Law to the Public Program

This catalog was developed to provide useful information about the many "Teaching Law to the Public" law school-based projects operating around the country in 1993-94. Aimed at law school project staff members, it is a handy reference to other law school programs. The catalog also is intended as a guide for everybody involved in law-related education, especially those who are interested in initiating these types of projects at other law schools. The volume contains a description of each project listed in alphabetical order by law school. Each description includes the names of contact people, a description of the project's activities, materials, populations served, and funding sources. The catalog opens with a description of the National Institute for Citizen Education in the Law, which engages in course development, teacher training, and technical assistance for law schools, school systems, departments of corrections, juvenile justice agencies, bar associations, legal service organizations, community groups, and local governments. The description lists the Institute's publications, videos, and law school program materials. The catalog identifies 37 law schools that have initiated programs in law-related education. (JD)

Descriptors—Case Studies, Citizenship Education, *Controversial Issues (Course Content), Discussion, *Law Related Education, Learning Activities, Secondary Education, Social Studies, *Teaching Methods

This instruction guide conveys effective strategies for engaging students in small group exercises, brainstorming, discussions, case studies and controversial issues. After emphasizing the importance of the first small group session for setting the tone, the guide advises teachers to appoint groups of two to five students, assigning the most extroverted as group leaders and dividing the least perceptive among the groups. As each group sits in a circle, the teacher should move around to each group to answer questions. To foster imaginative solutions to problems, the guide presents the strategy of brainstorming. Teachers should call for as many and as wild ideas as the students can offer, discouraging any evaluation that may discourage creativity. For the successful use of the discussion method, the guide encourages teachers to consider the purposes that their questions are intended to serve, whether to open discussion, amplify a contribution, or to close a discussion. The guide devotes considerable attention to case studies, a method well-suited to law-related education. Foremost, the teacher should carefully choose the appropriate case, one which involves an enduring legal question and evokes dramatic interest. After introducing students to the facts of the case, the teacher should define the legal issues and arguments and invite students to explain their decision in the case. When controversial subjects arise, students should identify the core issues and recognize the legitimacy of the arguments. (JD)

This comprehensive textbook on criminal justice is intended to serve as the foundation for a high school course on law-related education or as a supplement for civics, government or contemporary-issues courses. Designed to foster critical thinking and analytical skills, the book provides students with an understanding of the criminal justice system, its laws, and procedures. It examines the controversial issues of victims' rights, the insanity defense, the exclusionary rule, police-community relations, mandatory sentencing, the death penalty, youth gangs, the causes of crime, and the effect of race on the criminal justice system. Through case studies, simulations, peer-teaching, decision-making and field activities, students clarify public policy issues, identify values and propose and evaluate solutions. The book is divided into six units: crime and its victims; police; criminal process; corrections; juvenile justice; and solutions. In addition to classroom teaching strategies, "Criminal Justice in America" provides suggestions for field trips to courts and police facilities and for the use of resource persons. Covering all dimensions of crime from street crimes to white collar crime, the textbook challenges students for their reactions to real cases of fraud, violence, and rape. In the appendices, the textbook offers excerpts of the Constitution and a table of Supreme Court cases critical to the evolu-

tion of U.S. criminal law. Contains a glossary and references for each chapter. (JD)

This teaching guide provides methods for integrating the study of law and citizenship into chronologically based U.S. History courses for elementary students. Correlated with the Illinois State Goals for Learning and the Learning Outcomes of the Chicago Public Schools as well as with national standards projects, the lessons encourage critical thinking, interactive learning, and the use of resource persons. The lesson strategies cover the origins of law, the American Revolution, conflict resolution, protest, nonviolence, the three branches of government, the Civil War, geography, women's

rights, civil rights, and tolerance. The teaching methods outlined in the guide include role playing, brainstorming, and research. For each unit, the guide provides suggestions for resource persons such as attorneys, city council members, landlords, mediators, native Americans, judges, principals, committee heads, lobbyists, consumers, real estate agents, librarians, and social activists. To make the most effective use of the resource persons, the authors advise teachers to assure that the resource person is well-informed of the character of the class, its level of knowledge, the lesson planned, and their expected role. Because several of the topics may ignite controversy, the guide offers strategies for handling conflict. Teachers, the guide argues, should devise classroom rules for handling controversy, clearly identify the grounds for disagreement and the underlying assumptions, assure that students argue ideas rather than personalities, and support their arguments with facts. This annotated catalog of materials available from the Smithsonian Institution and its affiliate organizations, lists over 400 cross-indexed resources for classroom use. The contents are arranged as follows: An overview of the guide; catalogs and visitor guides; periodicals; resources for the arts, language arts, science, and social studies/history. Many items are free or available on loan. Appropriate grade level is indicated for materials to be used for instruction in the aforementioned subject areas. Included are a title index, a subject index, and a media index. The catalog concludes with a directory for where to order materials and order forms. (MM)

This collection of perspective pieces and conference notes articulates concerns addressed at the Fourth National Invitational Conference, "Achieving National Education Reform: Art Education as Catalyst" (San Francisco, California, February 4-6, 1993). Six essays include: (1) "Education Reform in and through the Arts" (Gordon M. Ambach); (2) "Understanding Cultural Diversity through Arts Education" (Vada E. Butcher); (3) "Equity and Access through Arts Education" (Michael Greene); (4) "The Language of Technology Is the Language of the Arts" (Nancy Hechinger); (5) "The Challenge from Business to Arts Education" (William H.

Kolberg); and (6) "The Challenge of Political Priorities to Arts Education" (William W. Staton). Session topics summarized are: "Education Reform in and through the Arts"; "Strong Arts, Strong Schools"; "Challenges Facing Arts Education"; "The Language of Technology Is the Language of the Arts"; "Arts Education as a Catalyst to Reform"; "Arts Education Partnership Working Group"; "Art Education's Value in Interdisciplinary Learning"; "Education Reform and Assessment in the Arts"; "Understanding Cultural Diversity through Arts Education"; and "Equity and Access through Arts Education." A conference summation, final words, a discussion of the recommendations of the arts education partnership working group, and a list of the advisory committee conclude the work. (MM)

The characteristics necessary to looking at art thoughtfully also characterize reflective thinking. Reflective thinking directs and manages experiential thinking. Reflective art viewing counters negative thinking dispositions of hasty, narrow, fuzzy, and sprawling thought by cultivating four habits: (1) taking time to look; (2) looking and thinking broadly; (3) thinking clearly and deeply; and (4) organizing thinking and looking. These strategies produce sound thought processes. (MM)

This anthology addresses the effects of future national and international change upon education. Contributing authors: (1) refer to preparation of art educators for the 21st Century; (2) examine content, methods, theories, and goals of art education; (3) question past and present values and beliefs; and (4) look to new directions for art education. The 10 articles include: (1) "Becoming an Art Educator: An Historical Perspective on Higher Education" (Mary Ann Stankiewicz); (2) "Educating Future Teachers of Art: The Role of Educational Philosophy" (George Geahagan); (3) "Aesthetics and Politics in Education" (Michael W. Apple); (4) "The Contribution of Arts Education to National Income—the Pattern Which Sells the Things" (Harry Hillman Chartrand); (5) "Postmodernism and the Challenge of Content: Teaching Teachers of Art for the Twenty-First Century" (Brent Wilson); (6) "Open the Window to the 21st Century by Chancing a Romance with Contemporary Media Forms: A Challenge for the Arts in Higher Education" (Richard L. Loveless); (7) "Artist or Teacher: A Time of Reckoning" (Phyllis J. Kozlowski); (8) "Art is about Everything: On Educating the Teacher of Art" (Kenneth Marantz); (9) "Teacher Education of Arts Educators: Stepping into the Future" (Marlene M.

This volume examines the way individuals think about objects and events in the world. These thoughts specify a priori assumptions that indicate what will be considered beautiful, valuable, and good. Decisions made about these matters determine what actions will be taken in regard to them. The continuous change that historically characterizes art educational practices is driven by shifts in ways of thinking (beliefs). Curricular goals for art education must be consistent with ways of thinking. The text is organized into five chapters. Chapter 1 provides a brief review of 18th and 19th philosophical thought and the concepts of relations between objects and events. Chapter 2 explores these concepts as interpreted by 20th century aestheticians, art historians, critics and artists specifically as they concern thinking about and making art. Chapter 3 examines paradigms for artistic conception. Chapter 4 identifies how these paradigms now function in the art curricula of schools and chapter 5 how the paradigms relate to curriculum practice. (MM)

This publication contains proceedings of a seminar structured around five basic themes: (1) cultural diversity in education; (2) discipline based art education (DBAE) and cultural diversity; (3) how cultural diversity has affected practices in art history, aesthetics, criticism, and art making; (4) experiences in other disciplines which effect DBAE; and (5) and implications for evolving DBAE practices. Summarized speeches include: "Multicultural Education: What Does It Mean To Infuse It into a Discipline" (Carl A. Grant; Christine E. Sleeter); "Art Education for Cultural Diversity: Developments in the United Kingdom" (Rachel Mason); "Species-Centrism and Cultural Diversity in the Arts" (Ellen Dissanayake); "Cultural Diversity and Discipline-based Art Education" (Michael D. Day); "How Does DBAE Respond to Cultural Diversity?" (F. Graeme Chalmers); "Cultural Diversity and DBAE: The Challenge of One World and Multiple Visions" (Frances E. Thurner); "Questions and Answers" (Claudine K. Brown); "Revisionist Art History and the Challenge of Cultural Diversity" (Alan Wallach); "The Effect of Cultural Diversity on Aesthetics" (Marcia Muelder Eaton); "Make it Real: Notes on Pluralism, Empirical Criticism, and the Present Moment" (Robert Storr); "How Have Issues of Cultural Diversity Affected Practices in Art Making?" (Alfred J. Quirroz); "DBAE and Cultural Diversity: Some Perspectives from the Social Sciences" (June King McFee); "Learning from Lit-

erature" (Marianna Torgovnick); "Mining the Museum 1" (Lisa Corrin); and "Mining the Museum 2" (Fred Wilson). Responses to papers listed above, a panel discussion, affinity group reports, references, resources, and a participant lists conclude the volume. (MM)

These geography standards are subtitled "What Every Young American Should Know and Be Able To Do In Geography", and constitute a set of voluntary benchmarks that every school and school district may use as guidelines for developing their own curricula. The standards for grades K-4, 5-8, and 9-12 specify the essential subject matter, skills, and perspectives that all students should have in order to attain high levels of competency. The standards provide every parent, teacher, curriculum developer, and business and policy leader with a set of challenging expectations for all students. The purpose of standards for geography is to bring all student up to internationally competitive levels to meet the demands of a new age and a different world. For the United States to maintain leadership and prosper in the 21st century, the education system must be tailored to the needs of productive and responsible citizenship in the global economy. The guide is divided into 8 chapters: (1) "The Geographic View of Our World"; (2) "The Components of Geography Education"; (3) "Geographic Skills and Perspectives"; (4) "The Subject Matter of Geography"; (5) "National Geography Standards: Grades K-4"; (6) "National Geography Standards: Grades 5-8"; (7) "National Geography Standards: Grades 9-12"; and (8) "Student Achievement in Geography." A conclusion discusses thinking geographically and the role of parents in geography education. Five appendices and a glossary complete the document. (DK)

Descriptors—*Citizenship Education, *Civics, Educational Objectives, Elementary Secondary Education, Social Studies, *United States Government (Course)

Identifiers—*National Civics and Government Standards

This document contains the national standards for civics and government for grades K-12. They are intended to help schools develop competent and responsible citizens who possess a reasoned commitment to the fundamental values and principles that are essential to the preservation and improvement of U.S. constitutional democracy. This document is limited to content standards specifying what students should know and be able to do in the field of civics and government. They are not course outlines, but exit standards, that is, they specify what students should know and be able to do as they exit

or complete the 4th, 8th, and 12th grades. The standards address the civic mission of the schools, the need for increased attention to civic education, goals and standards for students, both content and performance, standards for teachers, schools, and state and local education agencies. The K-4 content standards ask 5 questions: (1) what is government and what should it do? (2) what are the basic values and principles of American democracy? (3) how does the government established by the U.S. Constitution embody the purposes, values, and principles of American democracy? (4) what is the relationship of the United States to other nations and to world affairs? and (5) what are the roles of the citizen in American democracy? The standards for grades 5-8 and 9-12 are presented through similar series of questions. Appendices include organizing questions and content summary, illustrative performance standard, glossary, acknowledgements, and an index. (DK)

Identifiers—Historical Interpretation, *National History Standards

Developed through a broad-based national consensus building process, the national history standards project has involved working toward agreement both on the larger purposes of history in the school curriculum and on the more specific history understandings and thinking processes all students should have equal opportunity to acquire over 12 years of precollegiate education. Divided into 3 chapters, this document presents the national standards developed for grades K-4. The first chapter is on developing standards in history for students in grades K-4. It discusses the significance of history for the educated citizen, definition of standards, basic principles in development of standards for K-4, integrating historical thinking and historical understandings in standards for grades K-4, and questions concerning these standards. Policy issues discussed are: (1) ensuring equity for all students; (2) providing adequate instructional time for history; and (3) linking history to related studies in geography, civics, literature, and the arts in an integrated or interdisciplinary curriculum for grades K-4. The second chapter presents an overview of standards in historical thinking including chronological thinking, historical comprehension, historical analysis and interpretation, historical research capabilities, and historical issues analysis and decision making. Chapter 3 surveys eight standards organized under four topics: (1) living and working together in families and communities, now and long ago; (2) the history of students' own state or region; (3) U.S. history, democratic principles and values, people from many cultures who contributed to U.S. cultural, economic, and political heritage; and (4) history of peoples of many cultures around the world. An appendix lists contributors and participating organizations. (DK)

Identifiers—*Reform Efforts, *South Carolina

This resource guide provides information on education reform issues and on programs, projects, and models that are attempting to improve public schooling. Section 1, "The Fundamentals of Restructuring," summarizes the major characteristics of restructuring and includes references to the views of influential educators and agencies on the meaning and process of restructuring. Section 2, "The National Movement for School Reform," outlines several major education reform initiatives. The third section, "School Change in South Carolina," provides an overview of the South Carolina Center for the Advancement of Teaching and School Leadership and its associate school program. The 100 associate schools are K-12 schools, which are implementing restructuring models. The Center provides technical assistance to the associate schools. This section also summarizes results of two surveys of associate school teacher attitudes, three case studies of associate schools that are in the midst of restructuring, and a curriculum reform survey. Highlights of innovations discussed in the responses of the 46 associate schools that participated in the curriculum reform survey are provided. Profiles of school change initiatives in South Carolina are described, including the Goodlad initiative, which involves a network of five colleges and the Center establishing professional development schools and linking teacher education reform to school reform. An annotated bibliography and resources guide and a directory of the associate schools are included. (IAH)

Schmidt, Margaret. Defining "Good" Music Teaching: Four Student Teachers' Beliefs and Practices.

RIE FEB 1995

Pub Date—May 94

Note—34p.; Paper presented at the Qualitative Methodologies in Music Education Research Conference (Urbana, IL, May 19-21, 1994).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Classroom Techniques, Definitions, *Educational Philosophy, Elementary Secondary Education, Higher Education, *Music Education, Music Teachers, Preservice Teacher Education, Qualitative Research, *Student Teacher Attitudes, Student Teachers, Teacher Characteristics, *Teacher Effectiveness, *Teaching Methods

This qualitative research study, using data gathered through participant observation and interviews, explored the definitions of "good" teaching held by four student teachers in instrumental music. Aspects of each one's beliefs regarding the personal qualities, instructional practices, and management strategies of "good" teachers are presented. Their understandings appeared to be individually constructed from a variety of experiences with their parents, peers, teachers, cooperating teachers, and students—experiences which they explicitly and tacitly transformed into principles of "good" teaching. Each student teacher engaged in ongoing refinement of a personal definition of "good" music teaching, consistently filtering potential elements of that model. Their definitions of "good" teaching were influenced by university music education courses, but because of the strength of prior beliefs, each one learned a different version of what was taught. The paper concludes that: (1) the preservice teachers appeared to derive the majority of their teaching practices from their own experience as students; (2) expanding the range of each preservice teacher's experiential understandings of "good" teaching may contribute to more thoughtful practice; (3) effective supervisory communication requires far greater time than is usually allotted; and (4) student teachers appeared to seek an "educative community," a model of teacher education involving both partnership and process. (Contains approximately 80 references.) (JDD)

Descriptors—*Beginning Teachers, Case Studies, Classroom Techniques, Cooperating Teachers, Elementary Secondary Education, *Failure, Females, Higher Education, Interpersonal Relationship, *Practicum Supervision, Preservice Teacher Education, *Self Concept, Student Experience, *Student Teachers, Student Teacher Supervisors, Student Teaching, *Teacher Characteristics, Teacher Supervision

This study focused on the "failure" experienced by four female novice teachers who were successful in university course work but experienced considerable difficulty in their initial teaching assignments. The difficulties these women encountered are examined through analysis of observation notes, interview transcripts, journals and autobiographical writing, and recordings of their classroom teaching. The analysis focuses on the women's personal histories, understandings of themselves as teachers, instructional problems they experienced, and the contexts of their beginning teaching experiences. The paper concludes that these perceived failures resulted not from any single factor but from the cumulative effect of such factors as unassertiveness, compliance, low self-confidence, and underdeveloped conceptions of instructional techniques and management routines. More connected, collaborative styles of supervision, which might have allowed these capable women to do more than "survive" their initial teaching experiences, are identified. Five types of experiences for prospective and beginning teachers are suggested: validating their personal experiences as students and teachers, using those experiences to explore their personal histories and develop models of teaching, helping them create expectations of success, encouraging their comfort with the experience of "not knowing," and creating expectations of appropriate support and mentoring. (Contains approximately 90 references.)

Descriptors—Cognitive Style, Curriculum, Elementary Secondary Education, Graduate Study, Higher Education, *Holistic Approach, *Individualized Programs, *Language Arts, Methods Courses, Preservice Teacher Education, Reading Instruction, Teachers, *Teacher Supervision, *Teaching Styles, Undergraduate Study

This study compared a measure of theoretical orientation and a measure of style orientation administered to 107 classroom teachers in graduate and undergraduate language arts methods courses, examined their responses to holistic curriculum structures, and examined the types of support that students/teachers needed to modify traditional beliefs. Specifically, the study examined correlations of pre/post instruction scores on the Theoretical Orientation to Reading Profile (TORP) with scores on the Gregorc Style Delineator. The TORP measures a teacher's beliefs about reading practices along a continuum from a highly structured phonic orientation to a more open-ended holistic orientation. The Gregorc Style Delineator measures the amount of structure and sense of concreteness (from concrete sequential to abstract random) inherent within individuals. Characteristics of teachers in each quadrant of the Gregorc Style Delineator (concrete sequential, abstract sequential, concrete random, and abstract random) are presented in terms of TORP results. Implications of results include: faculty need to offer discussions of personal orientation and style more frequently to support and confirm obvious differences in performance and need to offer more individualized assistance to students as they prepare course assignments. An appendix lists and describes strategies used with preservice and inservice teachers, including curriculum mapping, ideal teacher/ideal learner, style pre-assessment, and in-process journals. King, Irvin L. And Others. Who Is Better in Math, Boys or Girls? A Report from the Palau Math Project.

Pub Date—11 Aug 94

Note—32p.; Paper presented at the Annual Pacific Educational Conference (11th, Saipan, Northern Mariana Islands, August 11, 1994).

Pub Type—Speeches/Meeting Papers (150)—Reports—Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Achievement Gains, Elementary School Students, Elementary Secondary Education, Females, Foreign Countries, Longitudinal Studies, Males, *Mathematics Achievement, *Mathematics Skills, Secondary School Students, *Sex Differences, Social Influences, Sociocultural Patterns

Identifiers—*Palau

A 1984-85 study of Palau elementary students, who were pretested, instructed with a textbook and additional practice booklets, and posttested, revealed gains for every skill at every grade level. A 1986-87 study, using a series of 26 booklets representing a fairly complete math curriculum, showed that students using the experimental booklets gained more during the year than students using regular textbooks. A longitudinal study conducted between 1985 and 1992 showed decreasing scores over the period. Overall competence in mathematics at the sixth through eighth grade level was most highly correlated to recall of division facts. Students scored higher on the computational component than on the application component of the test. Evaluation of 1993 data indicated that girls in grades 2 to 8 outperformed boys on each of the subskills. Scores on the Stanford Achievement Test administered to some students in grades 4, 6, 8, 10, and 12 showed that girls outperformed boys at each grade level except 12. This performance is attributed to the fact that girls in Palau must go home and remain there after school while boys are free to roam about; hence, girls are more likely to do their school work.

As boys get closer to graduation, they begin to take their studies more seriously and improve their performance. The outcomes of the studies strongly suggest that social factors are just as, or more important than genetic factors with regard to math performance. Sixteen data tables are attached. (JDD)

The Relative Importance of Different Psychological Approaches for Teaching: Implications for the Quality of Education.

Pub Date—[92]

Note—37p.

Pub Type—Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Behaviorism, Business Administration Education, *Cognitive Structures, College Students, Educational Quality, Engineering Education, Higher Education, *Humanistic Education, Humanities Instruction, Instructional Effectiveness, *Psychoeducational Methods, Social Sciences, Student Attitudes, *Student Evaluation of Teacher Performance, Student Reaction, *Teaching Methods

This study sought to determine student perceptions of the relative importance of three approaches toward teaching in the classroom: behaviorist, cognitive, and humanist. A survey of 320 students studying in 4 different schools (social sciences, humanities, engineering, and administration/business management) of a university found some similarities among the schools regarding the relative importance. Each school considered the items belonging to the cognitive approach as having the most relative importance, followed by the humanist and behaviorist approach items. The relative importance means were greater for the schools of administration/business management and social sciences than for other schools. The number of cognitive and humanist items showing statistically significant differences in relative importance was greater for students in their first semesters of college than for students in their last semesters. The study concludes that each student probably evaluates teaching according to his or her perception of the ideal strategy, and this evaluation is different from that made by other students. An appendix provides a copy of the survey instrument. (JDD)

Identifiers—Education Reform Act 1988 (England), *United Kingdom

This paper reports on findings from a 1990-93 PACE (Primary Assessment, Curriculum and Experience) study concerning the impact of the United Kingdom's Education Reform Act on teachers' professional perspectives and responses to change. Data are drawn from interviews with a national sample of 88 teachers and more intensive classroom study interviews with 9 teachers. The majority of teachers in 1990 felt the impact of the National Curriculum on their work and their role was largely negative, involving more administration, increased planning, and increased stress and anxiety. By 1992 and 1993, these negative feelings had intensified. From 1990 to 1993, an increasing proportion of teachers felt that their strengths and skills and their relationships with children were being eroded by the National Curriculum. However, about one-fifth of teachers saw the National Curriculum as enhancing their skills and providing the opportunity to develop

them further. Nearly half the teachers felt a loss of autonomy in pedagogic decision making. A significant minority of teachers felt that a new professionalism involving creative ways of working with children and assessing them was possible, provided they had the confidence to shape the imposed changes to more professionally acceptable ends. Factors which enabled teachers to take control of the changes and selectively adapt them are examined. (Contains 19 references.) (JDD)

Identifiers—African Americans, *Grambling State University LA, Preservice Teachers, *Teacher Researchers

This paper presents a method for increasing the pool of potential African-American educational researchers. The approach, called Researching Teachers in Residence (RTR), provides opportunities for inservice and preservice teachers to engage in collaborative research with university-based staff and faculty. RTR was started at Grambling (Louisiana) State University in 1988 and involves: (1) allowing inservice teachers access to the research skills of university personnel in order to investigate problems observed in the classroom; and (2) exposing preservice teachers to the formal inquiry method by having them formulate research questions, analyze the literature, conduct research and data analyses, and interpret the results. Research questions can be generated by students, inservice teachers, or faculty. RTR is characterized as a socially based research group, and its advisors concentrate upon turning the questions as posed into viable studies without losing the focus of the original question. Results of the RTR model provide evidence that inservice teachers and undergraduate preservice teachers can engage in research that increases the knowledge base, and that changes have taken place in attitudes toward research and knowledge of the research process. Future directions are explored. (Contains 11 references.) (JDD)

King, James R.

Uncommon Caring: Primary Males and Implicit Judgments.

Pub Date—Jan 94

Note—29p.

Pub Type—Opinion Papers (120)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Behavior Patterns, Elementary School Teachers, *Homophobia, *Homosexuality, *Males, Parent Attitudes, Primary Education, *Sex Role, Social Attitudes, *Social Bias, Teacher Characteristics, *Teacher Student Relationship

Identifiers—*Homosexual Teachers, Pedophilia

The caring and nurturing of children, which characterize primary education culture, have tended to shape a public perception of primary teaching as "women's work." Several social factors influence men's underrepresentation in the profession of primary education, such as parents not wanting their children exposed to "soft" males. Male primary teachers are characterized as "feminine," "homosexual," and "pedophile," and these characterizations control the number of men who choose to enter primary education and manipulate those men who do teach young children. Some gay primary teachers feel compelled to monitor themselves carefully because of other educators' and parents' beliefs that social contact with homosexuals is harmful for children. Such self-censoring preempts caring relationships with students. The use of touch in classrooms is very suspect as a behavior and also requires self-monitoring. Feeling paranoid about their sexual orientation, gay and lesbian teachers have adopted coping strategies that reduce their effectiveness as

teachers. Social constructions that have worked against males teaching in early grades can also be found in the implicit but pervasive relationship that has been drawn between primary male teachers and pedophiles, a relationship not supported by data. Bullying and excluding gay males who may provide nurturing and caring in ways that are especially productive for young children are clearly inappropriate. (Contains 27 references.) (JDD)

Descriptors—*Cognitive Processes, Constructivism (Learning), Elementary Education, Elementary School Mathematics, Higher Education, *Instructional Effectiveness, *Mathematics Education, Mathematics Instruction, *Methods Courses, Preservice Teacher Education, Problem Solving, Student Role, Student Teachers, Student Teaching, Teacher Attitudes, *Teacher Effectiveness, Teacher Role, Teaching Methods, Transfer of Training, Undergraduate Study

Identifiers—*Cognitively Guided Instruction, Preservice Teachers, Professional Development Schools, University of North Carolina Greensboro

This study examined whether inclusion of cognitively guided instruction (CGI) in a mathematics methods course for 34 undergraduate preservice teachers at the University of North Carolina at Greensboro would improve their teaching performance, compared to controls. The Beliefs Survey, with four subscales (Role of the Learner, Relationship between Skills and Understanding, Sequencing of Topics, and Role of the Teacher) was administered four times. The mathematics methods course occurred between the second and third administrations, and student teaching occurred between the third and fourth administrations. The survey revealed that preservice teachers in both cohorts changed beliefs to a more constructivist orientation to teaching mathematics during their professional program of study. In both cohorts, the greatest change in beliefs occurred during the semester in which the mathematics methods course was taught, suggesting that dealing explicitly with mathematics pedagogy influences preservice teachers' thinking about teaching and learning mathematics. The beliefs of the CGI cohort continued to change fairly dramatically during the student teaching semester while the beliefs of the non-CGI cohort did not. In response to open-ended questions, preservice teachers acknowledged the need for teachers to know what children were thinking. There were few suggestions from either cohort on how CGI should be actualized in instruction. Implications for teacher preparation are offered. (Contains 28 references.) (JDD)

Descriptors—*Context Effect, Elementary Education, *Field Experience Programs, Higher Education, Language Arts, Longitudinal Studies, Methods Courses, Preservice Teacher Education, *Professional Development, Qualitative Research, Reading Instruction, *Student Development, Student Experience, *Student Teaching, Teacher Behavior, Teacher Education Programs, Urban Schools

Identifiers—Preservice Teachers

The purpose of this longitudinal qualitative inquiry was to describe the socially constructed, negotiated, and contextual nature of an early field placement in an urban elementary school. The ob-

jectives were to document subtle changes over time in preservice teachers' reading/language arts subject matter knowledge and teaching beliefs and behaviors in an early field placement, and to determine how the contextual influences of an urban elementary school contribute to these changes in both positive and negative ways. The participants in the study were 75 elementary education majors enrolled in a reading/language arts methods block designated as an early field experience. Data sources were formal and informal observations, interviews, field notes, dialogue journals, final reflective statements, and interpretations of researcher-devised illustrations depicting teaching methods. Results indicated that most of the preservice teachers experienced increasing frustrations after a few teaching sessions, became preoccupied with group management concerns, did not construct knowledge about reading/language arts until the end of the semester, developed a sense of responsibility and concern for students' instructional and emotional needs, came to value the field experience, experienced a decrease in prejudice towards culturally diverse and at-risk students, and became more flexible. Educational implications are discussed. (Contains 25 references.) (JDD)

Descriptors—Classroom Communication, Communication (Thought Transfer), *Didacticism, Higher Education, *Instruction, Interaction, *Interpersonal Communication, *Mediation Theory, Models, Semiotics, Teacher Role, *Teacher Student Relationship

Identifiers—Didactic Teaching

This paper explores the symbolic representation of the teaching situation as a triangle involving teacher, student, and content. The paper explores what is meant by didactic communication, and then studies the meaning of the semiotic triangle in the light of two lines of research: the patterns used to analyze communication situations and ongoing research being conducted in the field of teacher thinking and teacher planning. The paper discusses the distinction between didactic and pedagogical communication, examines the forms of didactic communication, clarifies the distinction between didactic communication and didactic speech, and examines the parts played by each partner in the didactic communication contract. The paper distinguishes among three types of didactic communication, which vary according to context (pedagogical method chosen, age of students, communication contract, etc.): (1) the teacher as the only acting partner and the producer of messages; (2) verbal interaction between teacher and students with two sorts of content (content to be taught, for the teacher and content to be learned, for the student); and (3) mediation between student and content, as the teacher builds an interactional strategy that helps students give meaning to the content. The paper concludes that such complex realities cannot be explained simply by placing "content" as a third pole on the semiotic triangle. (Contains 25 references.) (JDD)

Descriptors—Comparative Education, Educational Change, Elementary Secondary Education, Foreign Countries, Higher Education, Integrated Curriculum, *Preservice Teacher Education, *Professional Education, Schools of Education, Teacher Certification, *Teacher Education Curriculum

Identifiers—*France, Preservice Teachers

This paper examines the relationship between pre-

professional and professional training for preservice teachers in France. Preprofessionalization consists of having students at University Centers for Teacher Training include in their 3-year curriculum 10 percent vocational training, focusing on the French educational system and policies, the sociology of education, cognitive psychology, epistemology, and didactics. Professional training then takes place at one of France's 28 regional schools of education, where students emphasize academic lectures the first year (to pass a competitive exam) and field sessions the second year. The competitive exam, by which students can officially become salaried civil servants (as teachers in France are), serves as the turning point when students become trainee teachers and begin professional training. Many students view the professionalization training as a short, hectic period of time in which to become efficiently armed to start teaching the following year. Thus, future teachers go through several abrupt changes in the course of their training, as they pass from one institution to another, study academic subjects and then cram vocational training, and change abruptly from student to trainee teacher. Efforts to integrate teacher training over the 5-year course of education are described. (Contains 24 references.) (JDD)

Making Connections: An In-Depth Concept Teaching Technique.

Pub Date—[93]

Note—22p.; Paper presented at a Meeting of the Center for Critical Thinking (August 1-4, 1993).

Pub Type—Speeches/Meeting Papers (150)—Reports - Descriptive (141)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Concept Formation, *Critical Thinking, Elementary Secondary Education, Higher Education, Preservice Teacher Education, Relationship, *Teaching Methods, *Thinking Skills

Identifiers—*Connectionism

"Making connections" is an analytic tool that promotes the search of relationships between a concept to be taught and the elements that may affect its meaning. The ability to make connections prepares students to tackle new information, to discover its basic organization, and to reduce its complexities. It adds meaning to knowledge, aids in retention, and eases transfer. Assumptions in the use of "making connections" as an instructional technique deal with the issues of prior knowledge, discovery learning, constructivism, schema theory, the dynamic nature of knowledge, creative thinking, and questioning techniques. The instructional technique of "making connections" outlines 14 elements, to focus the learner on examining a specific aspect of the concept under study and carefully looking for all possible relationships. The 14 elements include: substance, purpose, concreteness, causes, effects, relationships, variability, components, evolution, limits, similarities and differences, physical sensations, affective elements, and visual representation. Curriculum implications are listed. Two worksheets for examining the 14 elements of a concept are appended, one being a concrete version and the other an abstract version. (Contains 18 references.) Identifiers—Australia, Northern Territory University (Australia)

The key to successful harnessing of the power and potential of new educational technologies lies in appropriate training of teachers. An educational technology joint venture was created at the Northern Territory University in Darwin (Australia) in which the Institute of Technical and Further Education

provided the equipment, the Computing Services section provided the technical support, and the Faculty of Education trained the trainers. This joint venture has provided a vertical integration of expertise in preservice and inservice training for teachers and lecturers. It helps trainers acquire a "mindshift in attitudes" to use information technology to facilitate an exciting and lasting journey of discovery for their students. Students and lecturers are given a "tool set" of skills and techniques, beginning with word processing and idea processing, followed by up to three core units in information technology. Effective use of new technologies is enhanced by use of interactive tutorial packages that allow users to perform real exercises involving all of the major sections in the application. For the future, the university is looking at Electronic Performance Support Systems which integrate hardware, software, and end-user interfaces and provide on-the-job assistance and training. (JDD)

Identifiers—Australia, Queensland University of Technology (Australia)

This study on the role of university lecturers in supervision of practicum experiences for preservice teachers is based on a literature review that examined the ideal and actual characteristics, roles, responsibilities, tasks, and activities of university supervisors. A survey was conducted of 52 university supervisors, 93 supervising teachers, 35 school coordinators, and 79 student teachers in the practice teaching program for preservice teacher education at the Queensland (Australia) University of Technology. The survey questionnaire gathered data concerning ratings of actual and ideal supervisory elements in personal, professional, and procedural categories, and ratings of characteristics of practice teaching schools/centers. Results indicated that student teachers (compared to the other three groups) recorded the highest discrepancy scores between actual and ideal characteristics of university supervisors. University supervisors were seen to be most lacking in consistency, awareness of student teacher individual development, and stating their expectations clearly. They came closest to participant ideals for friendliness, being well-qualified academically, and treating other participants as fellow professionals. Compared to the other three respondent groups, school coordinators perceived the closest match between ideal and actual characteristics of university supervisors. (JDD)

Identifiers—New Zealand, University of Waikato (New Zealand)

This study, currently in progress, explores the per-

ceptions of 75 near graduate primary teacher education students at the University of Waikato in Hamilton, New Zealand, about their preparedness to teach. It investigates the students' views about the areas of teaching for which they feel the 3-year program of teacher education at the School of Education, University of Waikato, has prepared them well and the areas in which they feel the program could have prepared them better. The study also identifies the things which students wish to know more about before they start with their first class of children, and the things they anticipate may cause them problems as a first-year teacher. The survey will be followed by interviews with 20 subjects concerning their perceptions of teaching after 6 months of teaching experience; 4 interviews are reported here. Initial survey data revealed that respondents felt the best prepared in setting up classroom reading-language programs, understanding the importance of planning, practical classroom teaching experience, and understanding the importance of assessment. They did not feel well prepared to manage children's behavior, to conduct long-term planning, and to teach mathematics. Interview data indicated that planning for a whole class across the range of curriculum subjects had been difficult, but that models provided by their tutor teachers had been helpful. Beginning teachers found it hard to articulate their planning process. Their planning is based on identified learning needs, New Zealand curriculum documents, constructivist views, research evidence, and transference of planning knowledge from one curriculum area to another. Descriptors—Beginning Teachers, Constructivism (Learning), Elementary Secondary Education, Foreign Countries, Higher Education, Models, *Practicum Supervision, Preservice Teacher Education, Student Teachers, *Student Teacher Supervisors, *Student Teaching, *Supervisory Methods, Teacher Role

Identifiers—Australia, *Collaborative Supervision, *Reflective Teaching

This paper suggests criteria for effective student teacher experiences and supervisory roles. A system of student teaching supervision with a heavy emphasis on imitative and reproductive learning is an unlikely means of equipping teachers with the confidence to apply process skills of inquiry and problem solving to the numerous dilemmas of teaching. The aim is to prepare beginning teachers who are able to reflect on the origins, purposes, and consequences of their actions, as well as on the material and ideological constraints and encouragements embedded in their classroom, school, and societal contexts. Such an aim is in harmony with schema theories and a constructivist view of learning. A proposed system of collaborative supervision would include: organic collaborative partnerships, student teacher professional learning that is largely determined by the nature of student teachers' personal and professional qualities and through their own actions and experiences, a university supervisor who provides support for the student teacher in developing skills of reflectivity and who assists professional development of cooperating teachers, and individualized assistance for student teachers based on their developmental level. Establishing collaborative supervision is difficult, as it requires supervising teachers to relinquish their traditional positions of power and perceived expertise and requires a greater investment of time and emotion. (Contains 32 references.) (JDD)

Identifiers—Australia, Australian Catholic University, *Reflective Teaching

This paper examines definitions of reflection and the concept of reflective teaching, and then documents attempts to implement a reflective approach taken by second-year undergraduate teaching students at the Australian Catholic University, Queensland Division. Sixteen students completed their first field experience, which included 12 half-day sessions with a supervisory teacher and provided written post-lesson reflections and a progress report. Analysis indicated that all 16 students were developing a reflective approach toward practice in the field. Their reflective writing was primarily at the lowest level (descriptive) with a few instances of dialogic reflection. Case studies of four of the students revealed that they demonstrated greater complexity of thought in spoken than in written reflections. Concerns for classroom control and management dominated the content of students' early reflections. Later reflections moved from survival concerns to task concerns and, at times, impact concerns. The reflective activity of the students appeared to take the form of self-dialogue, mediating the expression of feelings with that of the context. Students recognized the need to have more time made available for professional discussions with their supervising teacher, tutor, and peers. A detailed case study of one student is appended. Identifiers—Australia, Sweden, *Teacher Collaboration

The Project for Enhancing Effective Learning (PEEL) is a well-established Australian example of teacher collaborative action research. The aim of the project, which began in a secondary school in Melbourne, Victoria (Australia) and later spread to other countries, is to improve the quality of students' classroom learning through practice in purposeful enquiry and to help teachers become more independent and interdependent by enhancing their awareness, responsibility, and control of their teaching. The project uses a collaborative action research model, with regular group meetings among teachers, sometimes supplemented by university academics, to share ideas and experiences and to maintain motivation. The group meetings identify good learning behaviors and then devise specific teaching procedures that foster one or more of the good learning behaviors. The project was felt to be successful because it arose from teachers' own needs and concerns about classroom teaching and learning, teachers remained in control of the project's implementation, and teachers worked together for improvement. The importance of the support of senior school staff and the need for effective training of group leaders are emphasized. The project is being implemented at a Swedish school, with teachers reflecting on their own classroom practice and searching for the meaning behind the decisions they make and the behaviors they exhibit. Identifiers—*Australia

This case study examines one School Community Consultative Committee (SCCC) involved in planning and implementing a primary school Human Relationships Education program in Australia. Developments on the local level that have led to this type of parent participation are outlined. Findings from two literature reviews on parent participation are summarized. The case study outlines membership on the SCCC as including elected parents, school staff, and other community members. Committee responsibilities include knowledge of school policy and other local school programs, curriculum review, resource review, understanding the school and community profile, and representing wider community values and beliefs. Interviews with 12 committee members (principal, 6 teaching staff, and 5 parents) revealed a general belief in the theory of parent participation in schools, a perception that parents on the SCCC operated at a low level of collaboration, and the acknowledgement of a knowledge differential between staff and parents. The study concludes that, in order to make parent participation in curriculum decision making a truly constructive and genuinely participative process, the level of participation needs to be developed and gradually implemented in a direct equation with the participants' levels of knowledge regarding the organizational culture of schools. Identifiers—University of Melbourne (Australia)

This paper reports the results of 4 years of a mentoring program at the University of Melbourne (Victoria, Australia) that has been directed to developing the research aspirations and performance of ex-Melbourne College of Advanced Education staff who are coping with increased research demands following the 1989 amalgamation with the University of Melbourne's Faculty of Education. Participants for the program each year were selected on the bases of their research performance or potential and the extent to which their research activity had been limited by various types of structural or circumstantial factors. The program's key elements included fractional time release for research, individualized mentoring, and group collaboration. The mentor's role involved assisting staff to focus on and clarify research goals and to support and guide staff in their progress. The program's success has been evidenced through such outcomes as conference presentations, publication of articles in refereed journals, completion of postgraduate research publications, and success at gaining competitive or peer-reviewed funding for further research. Identifiers—Australia (Sydney), *Empowerment
This paper reports on research into the professional development practice of principals in the Diocese of Parramatta, which administers a system of approximately 75 schools in the west of Sydney, Australia. A survey of 46 principals gathered data on respondents' qualifications, association membership, participation in Catholic Education Office professional development activities and in inservices provided by other agencies, conferences attended, other activities contributing to professional development, valued forms of professional development, perceived professional development needs, preferred methods of delivery, and tertiary credit. The data indicated that the principals in the Parramatta diocese are, by and large, an experienced and highly qualified group and in general they participate regularly in professional development activities. The most commonly attended forms of professional development are conferences organized by the principals' associations. The most valued professional development activities are those classified as "learning on the job" or involving interpersonal skill development. Female principals, lay principals, and primary principals attended more professional development activities than their male, religious, and secondary counterparts respectively. In light of these results, three major initiatives were developed to address the professional development of principals at three stages: pre-appointment, induction, and ongoing development. (JDD)

Identifiers—Australia, *Teacher Development
Studies of teacher development face the issue of providing a valid and generalizable analysis reflecting the influence of differences in people and contexts and their interactions. To adopt a study designed upon a single set of data, whether extensive or intensive, is limiting—both types of data are needed. Effective research provides for a wide set of data gathering instruments to be used, and the construction of categories and constructs that are validated across individual participants and the populations from which they are drawn. Theories and interventions based upon such research will have more generalizability than those developed from a series of case study research projects. A study of the characteristics and processes of teacher development in the management domain, based on data from student teachers, beginning teachers, and expert classroom managers, illustrates use of this research approach. The study shows how cohort and case study components can be included in a study of teacher development in ways which allow the generalizability of the insights and findings to be studied with cross-sectional and longitudinal cohort data. The study resulted in identification of five management approaches for classifying belief, advice, and self-description responses and resulted in construction of five management schema types that trace development changes. Identifiers—Australia (New South Wales), *University of New England (Australia)
Developments in the New South Wales (Australia) secondary school curriculum have led to a number of former home economics teachers being allocated to teach in the area of Personal Development, Health and Physical Education (PDHPE). The New South Wales Department of School Education in conjunction with the University of New England (New South Wales, Australia) has commenced a reskilling program for former home economics teachers who wish to complement their teaching skills with further training in physical education. The 2-year program results in the Graduate Diploma of Teaching (Physical Education). The program is delivered through correspondence and residential courses. It includes a theoretical component covering such topics as applied anatomy, exercise physiology, physical fitness, and appraisal of movement skills and a practical component covering dance, gymnastics, and game skills. This paper outlines steps in developing the program, gives a demographic profile of the teachers undertaking the program and how they are coping with the initial stages of the process, and notes program evaluation plans. Appendices list key learning areas in the New South Wales curriculum and provide demographic data about reskilling participants. (JDD)

Identifiers—*Professional Development Schools, Teacher Development, Teacher Leaders, *Teacher Leadership, Teacher Researchers

Findings from a study, which examined the development of leadership skills and roles among the teachers in a professional development school (PDS), indicate the emergence of a nontraditional teacher leadership paradigm at the PDS. In contrast to typical teacher leadership models, in which carefully selected and screened teachers are placed in leadership positions, the teacher leadership paradigm that has emerged is characterized by a form of collective leadership in which teachers develop expertise reflecting individual interests. The Learning/Teaching Collaborative (L/TC) is a PDS, which was initiated in a Brookline (Massachusetts) elementary school in 1987 by two teachers to improve the work of teachers, reform preservice teacher education, and mainstream special needs students more effectively. Four components of the L/TC are team teaching, school-university collaboration, special education inclusion, and alternative professional teaching time (APT). APT allows teachers at least one day per week to assume an alternative role (e.g., curriculum writer, researcher, student teacher supervisor, college teacher). The eight teachers who were interviewed for this study indicated that the PDS nurtured teacher leadership, leadership activities grew naturally out of professional interests and

working in teams, teaching practices changed significantly, and professional relationships improved. Teachers experienced the greatest growth and development in the following areas: team teaching and collaboration, preservice teacher education, curriculum development, research, and governance. Identifiers—*Reform Efforts, Vignettes

This paper attempts to create a vision of what it would be like to teach for understanding, to adopt the view of learner as constructor of his or her own understanding, and to share in the creation of an environment for reconstructing students' understanding and reasoning. Such a program is based on assumptions about the cognition of learners, aspects of curriculum, teaching strategies, and assessment consistent with these assumptions. The paper begins with a fictional story based on reform in science classroom teaching. Statements and questions provided by students are consistent with actual statements made by students as they attempted to negotiate meaning from their experiences in and out of the classroom. The vignette provides a vision of what it might look like when focus is on teaching for understanding, on helping students reconstruct their understanding and reasoning from prior ideas and experiences and from new experiences directly related to their initial ideas. Teachers who have incorporated ideas discussed in this paper have found significant change in their students' understanding and reasoning; the teachers themselves have felt revitalized with regard to their own teaching and learning. Some concerns expressed include resistance of students who believe that teachers should be imparters of information and demonstrators. Also, even when the approach is perceived as valid, it can be difficult to implement if a teacher is working alone. The conclusion is that the benefits far outweigh the costs. A discussion of the benefits and concerns derived from the teaching for understanding perspective completes the document. (LL)

Identifiers—*Protege Mentor Relationship

This paper provides background information from the professional literature related to teacher mentoring programs. It is organized into four sections. The first section, "Mentoring Rationale" discusses the need for new teacher support, the success of mentoring as a useful induction strategy, and benefits to participants. Section two, "The Knowledge Base—Using Information on Mentoring" describes the concept of mentoring, the findings from research in adult development, business, and education, and the unique quality of mentoring in schools. The third section "The Critical Factors—Conditions

Fostering Program Success" deals with the selection of mentors, matching mentor-new teacher pairs, roles for mentors, training for mentors, a supportive environment, and realistic program expectations. Section four, "The Mentoring Program-Determining Roles and Activities" focuses on mentoring in practice, shared roles and responsibilities, and program development. Among the recommendations are that educators consider the implications of the literature in planning statewide mentoring programs and that school districts initiate a pilot mentoring program before adopting one districtwide. Descriptors—College School Cooperation, Educational Change, *Educational Cooperation, Elementary Secondary Education, *Faculty Development, Higher Education, Partnerships in Education, Teacher Educator Education, *Teacher Educators, *Teacher Role

Identifiers—*Empowerment, *Teacher Collaboration

Ideally teacher educators play a significant role in the initial empowerment of teachers as professionals. The level of success teacher educators have in this role reflects their own level of empowerment. Empowered teacher educators have a clear perception of the role of a teacher and of their own role as a teacher educator. To achieve empowerment requires overcoming fears of change or of discomfort that change may cause, coming to an understanding of the forces for change and the nature of the changes sought, grasping a sense of the diverse possibilities in teacher education through the literature and through listening to others, and reflecting on increasing understandings in order to reach some greater clarity about oneself as a teacher educator. An empowering strategy linked with the ongoing renewal and refinement of teacher education curriculum within institutions is proposed, based on collaboration, support and trust of each other, and a view of oneself not as a leader dispensing wisdom but as a partner in an ongoing process contributing to effective education. Teacher educators need to overcome obstacles to collaboration and begin to build bridges to others in the faculty, other faculties, students, teachers, schools, and beyond. (Contains 17 references.) Identifiers—*Australia (Queensland)

This paper considers the implementation of Student Performance Standards (SPS) in Queensland, Australia, and their implications for teacher education. Student testing procedures in various Australian states and territories are described. A theoretical framework, grounded in Australian educational history, is elaborated for understanding the political ramifications of SPS. S. J. Ball's explication of market, management and, particularly, curriculum controls over public education is applied to show how explicit emphasis on student performance is linked to wider forces promoting an instrumentalist and managerialist view of schooling. The emergence of statewide testing is seen as a quality

control measure designed to ensure that schools are producing human resources tailored to the needs of a post-fordist economy; an attempt to shape the quality, character, and content of classroom practice; and a potential step toward monitoring the performance of teachers and schools, making comparisons among them, and linking these comparisons to performance-related pay awards. The paper concludes that SPS constitutes a not entirely desirable response to a series of complex educational and political changes within and outside Australia. SPS represents in microcosm what is a broader challenge to the celebration of diversity and the recognition of heterogeneity that ought to underpin any teacher education program. Identifiers—Australia (New South Wales), *Preservice Teachers

Student teachers' journal entries during a 3-week practicum experience were analyzed to determine their perceptions of effective teaching. The students were given no guidance about journal content; they were simply asked to write about issues or experiences that concerned them, to write reflectively, and to attempt to write daily. From analysis of journal entries, four themes emerged: classroom management concerns, characteristics of successful teaching, perceptions of practice teaching, and relationships with others. Effective instruction involved being able to cater to all levels of pupil performance and using reinforcement and praise. Student teachers moved from a teacher-centered, egocentric perspective in their initial year to more pupil-centered outcomes-based notions of effective instruction in their final year. There was an almost universal concern with "control" as a fundamental characteristic of effective management, especially among first and second year students. Students appear to have a reasonably holistic view of teaching, appreciating its complexities and the links between effective instruction, management, and the maintenance of good relationships. Implications of the study for teacher education are noted. (Contains 21 references.) (JDD)

Identifiers—University of Newcastle (Australia)

This study investigated the practice teaching experiences of Bachelor of Education (Design and Technology) students at the University of Newcastle (Australia) to determine what they saw as successful and unsuccessful events. Eleven second-year students at the University of Newcastle were asked to write about one successful and one unsuccessful experience on each day of their 4-week practicum, and were asked to reflect on their experiences weekly. Major categories of successful events included pupil behavior, pupil learning, personal feel-

ings of the student teacher, interactions with other teachers, and praise from supervising teachers. Over 60 percent of successful events related to what the student teachers saw as appropriate student behavior; only 20 percent mentioned student learning. Student teachers saw themselves predominantly as being responsible for the successful events. Over half of the comments student teachers made about unsuccessful events were related to inappropriate student behavior, and about 14 percent of comments about unsuccessful events made reference to student learning. Student teachers seemed reluctant to accept blame for unsuccessful events. Few students described successful events in terms of the components of effective teaching commonly mentioned in the literature (e.g., clarity, enthusiasm, structure, and task orientation). Identifiers—Preservice Teachers, University of Sydney (Australia)

Problematic issues in developing preservice teachers' capacities for reflection include: distinguishing reflective thinking from reflective action; immediate versus extended time frames for reflection; the complexity of critical reflection and the need to foster it over a considerable period; and the role of problem solving in reflection. An ongoing investigation into reflection is being undertaken within the Secondary Bachelor of Education course at the University of Sydney (Australia), based on student reports and self-evaluations, videotapes of their teaching, and interviews. Analysis demonstrated clear evidence of student teachers undertaking reflection in their final year, with the largest proportion of reflective units in written reports being descriptive reflection rather than critical or dialogic reflection. Barriers that hinder reflective approaches are identified. A framework for conceptualizing and researching reflection within the context of professional preparation is proposed. Components of the developmental framework include: technical reflection, where skills are evaluated in controlled or simulated situations and immediate feedback is provided; reflection-on-action, with its three forms being descriptive, dialogic, and critical; and then reflection-in-action, based on contextualization of multiple viewpoints. An appendix lists criteria for the recognition of evidence for different types of reflective writing. (Contains approximately 70 references.) (JDD)

Identifiers—*National Qualifications Framework (New Zealand)

This study examined teachers' recording and reporting practices in conjunction with the recently published New Zealand Curriculum Framework (NZCF), which requires teachers to report the

achievement of students in curriculum strands. Teachers from 10 primary, intermediate, and secondary schools examined existing practices and worked to develop innovative approaches consistent with the NZCF. Findings revealed a trend for schools to be individual in designing new methods for recording and reporting. While it was feasible for schools in some geographical areas to coordinate their recording and reporting practices, for others it was not. Success in achieving consistency with the NZCF was dependent upon the involvement and leadership of the school principal or curriculum leader; teachers' knowledge of the new curricula; and available resources of time, finances, and personnel. There was a great deal of effort devoted to involving students in the recording process, to enhance student motivation and learning. There was widespread criticism of the national system for recording achievement in primary schools. Teacher development was a major outcome of the study, as teachers were researchers in the project and "owned" the changes that took place and because the study provided professional development opportunities. Identifiers—*University of Waikato (New Zealand)
In 1989, New Zealand abolished the inspectorate that evaluated beginning teachers and made recommendations for certification. Schools were made responsible for the process of induction and recommendation of teachers for registration as certified teachers. The School of Education of New Zealand's University of Waikato developed a partnership with area schools to help them implement this new task. Schools identified three areas of need for the School of Education: support for beginning teachers by enabling them to meet together and share their ideas, needs, and information; support for tutor teachers; and support for the principal and school through visits and assistance in providing another perspective where required. Programs have been developed for beginning teachers focusing on classroom management and organization, planning, behavior management of disruptive children, and subject content. Programs for tutor teachers have made them aware of their legal obligations in respect to the process of registration and have assisted them in developing advisory and guidance skills for their role. The School of Education has arranged visits to principals, tutors, and beginning teachers, with no official or evaluative role. The program is felt to be a positive step to ensure that the links between pre-service and in-service teacher development are established and maintained. (JDD)

Utilizing the professional expertise of school

nurses, the Des Moines (Iowa) Public School system is committed to providing professional health services and health education for students, employees, and the community in order to promote success in the learning process. The health services program is an integral part of the total school program in the Des Moines public schools. The program provides for direct health services, including appraisals and preventive and remedial aspects for students and staff. Health education and health promotion are provided through planned, correlated, incidental instruction, and integrated learning. Safety is provided for through review of the physical environment, which contributes to student success in the teaching and learning process. The health services program ensures direct service and ongoing collaboration with community agencies for students, staff, and parents to decrease barriers to learning. This paper provides an input evaluation, a process evaluation, and a product evaluation of the 1993-94 health services program. A Comprehensive School Health model recommended for districts by a health advisory committee is under review. (LL)

Identifiers—*Gender Issues, Title IX Education Amendments 1972, *Wisconsin

These guidelines explaining state pupil nondiscrimination requirements in interscholastic athletics are the result of a collaboration between the Wisconsin Department of Public Instruction and the Wisconsin Interscholastic Athletic Association (WIAA). The guide is designed to help schools fully implement Wisconsin's pupil nondiscrimination guidelines and administrative rules. The guide is organized into the following sections: overview; philosophy; Administrative Rule; meeting the goals of equity in athletics; and questions and answers. It is intended that the guidelines will help ensure the following: (1) No student's athletic participation is to be determined by any of the discriminatory factors listed in section 118.13, Wisconsin Statutes; (2) male and female athletic programs are to be provided with comparable facilities, coaching, equipment, schedules, etc.; (3) levels of competition provided are to be commensurate with student interests and abilities; (4) activities peripheral to the athletic program are to be assigned on the basis of a school plan that does not include sex as a factor; and (5) administrators, coaches, parents, and athletes must understand both the legal and philosophical implications of discrimination in athletics. Eleven appendixes include the following information or documentation: how to provide cheerleaders for both boys' and girls' sports; the school's responsibility if a complaint is filed under the Pupil Nondiscrimination Law; a sample discrimination complaint procedure; a sample discrimination complaint form; WIAA comparable sports; student interest surveys; a sample student athletic interest form; the Attorney General's opinion on logos; the State Superintendent's letter to district administrators; resources; and Section 118.13 Wisconsin Statutes. Descriptors—*Asthma, Curriculum Guides, Elementary Education, Elementary School Students, Elementary School Teachers, *Health Education, Integrated Curriculum, *Learning Activities, *Lesson Plans, Resource Materials, *Special Health Problems

Asthma is the most common chronic childhood condition and a leading cause of school absences. With asthma occurring in almost every classroom in America, this curriculum guide, developed for use by elementary school children, suggests that teachers integrate an asthma lesson into a comprehensive health education curriculum. The lessons include suggestions for math, science, art, and language arts and can be integrated into the social sciences as they relate to getting along with others and learning about community resources. There are two 30-minute lessons for grades K-3 and 4-6. The lessons are designed to: (1) develop a basic understanding of asthma and help correct misinformation; (2) inform students about appropriate actions that can help people with asthma; and (3) provide resources to share with parents and other family members. In addition, the resource section provides information to help teachers learn more about asthma before teaching the lessons. Pre- and post-tests for grade K-3 and grade 4-6 students, a letter to parents written in both English and Spanish, and activity sheets including hidden pictures, mazes, crosswords and scenarios are included. Identifiers—Performance Monitoring

High school academic eligibility rules for interscholastic athletic participation have been imposed by 50 states and the District of Columbia. The purpose of the eligibility rules is to emphasize excellence in academics over athletic performance and to enhance the academic performance of athletes. This policy paper synthesizes current literature, reports on the findings of states that have evaluated the effects of the policies; and clarifies issues which require further study. The document is organized in the following sections: (1) academic eligibility standards and athletic associations; (2) academic eligibility standards and the States; (3) academic eligibility standards and the law; (4) evaluations of extracurricular participation and school performance; (5) effects of high-stakes academic requirements on athletic participation; and (6) alternatives to high stakes. Informants' suggestions formed the basis for policy recommendations such as: tying eligibility rules to academic support programs, extending participation in extracurricular activities, establishing greater flexibility for individual circumstances, and levying stringent standards for participation in interscholastic athletics. Descriptors—*Adolescent Development, *Adolescents, *Child Development, Cognitive Development, Developmental Stages, Early Intervention, Elementary Secondary Education, *Health Promotion, Nurse Practitioners, Nursing Research, *Preadolescents, *Research Needs, Role Perception
Identifiers—*Health Behavior, Strategies Intervention Model

This publication reports the findings of an expert panel convened by the National Center for Nursing Research to address health promotion for older children and adolescents (ages 8 through 18), the role of nurses, and the contributions of nursing science. Three chapters focus on basic science, intervention, and application. Each chapter includes an introduction, a review of the state of the science, a discussion of research needs and opportunities, and a list of research recommendations based on the identified needs and opportunities. The first chapter, "Life Transitions in Late Childhood and Adolescence: Critical Points for Promoting Healthy Behavior," examines the effects of biological, cognitive, emotional, and social transitions on development and behavior. Chapter 2, "Approaches for Designing and Implementing Interventions," discusses basic concepts and principles of health promotion, types and features of successful interventions, and the effects of self- and health-related perceptions. The final chapter, "Strategies and Settings for Nursing Interventions," considers approaches for providing health promotion services to youth, and the use of traditional and nontraditional settings for health promotion. Bibliographical sketches of panel members are included. (Contains approximately 100 references.) (LL)

What Black Women Should Know about Lupus: Ideas for Community Programs.

National Inst. of Arthritis and Musculoskeletal and Skin Diseases (NIH), Bethesda, MD.

Report No.—NIH-93-3445

Pub Date—Sep 93

Contract—NO1-AR-0-2201

Note—92p; Prepared by the National Task Force on Lupus in High Risk Populations.

Available from—National Institute of Arthritis and Musculoskeletal and Skin Diseases, Box AMS, 9000 Rockville Pike, Bethesda, MD 20892.

Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Adults, *Blacks, *Clinical Diagnosis, *Community Programs, *Females, Health Activities, *Health Education, Health Materials, Health Promotion, Program Design, Program Development, Resource Materials, Special Health Problems, Young Adults

Identifiers—*Lupus

Lupus is a serious health problem that mainly affects young women between the ages of 15 and 44. Although people of all races may get lupus, black women have three times higher rates of incidence, prevalence, and mortality than white women. With early detection and proper treatment, most people with lupus can lead a normal life. This kit is designed to help develop educational programs, plan activities to increase awareness about lupus in black women, and encourage early diagnosis of the disease. The kit is divided into four sections. The first section, "How to Develop a Lupus Awareness Program," provides a sample program plan and a list of activities to be used in schools or in the community. Section two, "How to Work with the Media," includes guidelines for working with public service announcements, and a sample newsletter article. The third section, "How to Use Camera-Ready Materials," provides instructions for production of a booklet titled "What Black Women Should Know about Lupus," a test of lupus knowledge, a bookmark, stationery, and logos. The final section, "How to Find Additional Resources," provides names and addresses of organizations that have additional information about lupus. A copy of "What Black Women Should Know About Lupus," a booklet to increase awareness about signs of the disease, an order form to request additional copies of this kit or the booklet, and an evaluation form complete the kit. Descriptors—Elementary Secondary Education, Foreign Countries, Grades (Scholastic), *Grading, Higher Education, *Practicums, Preservice Teacher Education, Schools of Education, *Student Teacher Evaluation, Student Teachers, *Student Teaching, *Teacher Competencies
Identifiers—Australia, *University of Melbourne (Australia)

In 1993, the University of Melbourne's Institute of Education determined that School Experience and Professional Practice subjects would be graded according to the University's standard assessment scheme instead of a pass/fail scheme. To establish a framework for assessment, the Beginning Teacher Competencies from the National Project on the Quality of Teaching and Learning were used, with six main categories across all years of all pre-service courses except Early Childhood. The categories include: planning for learning, use and development of knowledge, teaching methodology, monitoring and assessment, communication skills, and reflection and evaluation. Seven assessment levels ranging from outstanding to unsatisfactory were determined to reflect the grades in the university's standard assessment scheme and the wish to distinguish between almost satisfactory performances and very poor performances. Appended to the paper are: (1) the Institute of Education's School Experience Assessment Form, with space for comments and a rating for each of the six main assessment categories as well as a global assessment; (2) criteria for assessment; and (3) Practicum Report Form. Descriptors—Check Lists, Classroom Communication, *Diagnostic Teaching, Education Majors, Elementary Secondary Education, Foreign Countries, Higher Education, Instructional Effectiveness, *Instructional Improvement, Measurement Techniques, *Participant Satisfaction, Preservice Teacher Education, *Student Evaluation of Teacher Performance, *Student Participation, Teacher Effectiveness, Teacher Student Relationship, Teaching Methods

This paper describes how students can be personally challenged in the work they do and how secondary students or tertiary-level education students and teachers can collaboratively diagnose existing quality of classroom practice, via the concepts of personal challenge and interpersonal shared adventure. The approach involves the teacher obtaining systematic and diagnostic information from students about the effects of his/her teaching approaches on their learning. The teacher analyzes the information, reports response trends back to the students, and together the class decides on appropriate action in order to improve identified aspects of teaching. The Challenge Checklist, which is the basis for student diagnosis of classroom activities and practices, assists students to focus upon and diagnose the extent and level of satisfaction with factors that foster a sense of challenge and enhanced learning performance. The "Challenge Checklist" addresses perceptions of class activities' difficulty, importance, opportunities for mental and physical activity, and opportunities for productive classroom interactions; student enjoyment; and student satisfaction with his/her performance. Use of this approach fosters a spirit of shared adventure, which constitutes quality in classroom teaching and learning. The "Challenge Checklist" is appended in both university-level and secondary-level formats. (JDD)

Curriculum Needs of Students with Mild Intellectual Disabilities: Implications for Teachers and Teacher Educators.

Pub Date—Jul 94

Note—19p; Paper presented at the Annual Conference of the Australian Teacher Education Association (24th, Brisbane, Queensland, Australia, July 3-6, 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143) — Tests/Questionnaires (160)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Curriculum Development, *Educational Needs, *Elementary School Teachers, Elementary Secondary Education, Employer Attitudes, Foreign Countries, Higher Education, Inservice Teacher Education, *Mild Mental Retardation, *Needs Assessment, Parent Attitudes, Preservice Teacher Education, Questionnaires, *Secondary School Teachers, Teacher Attitudes, *Teacher Educators

Individuals from a spread of stakeholder groups (i.e., teachers, parents, peers, employers, carers and agency professionals, administrators, and taxpayers) responded to six paragraph-length portraits describing schooling experiences of students with mild intellectual disabilities (MID). Supplementary interviews and surveys were also carried out. Research questions focused on the needs of MID students, concurrence in the perceptions of stakeholders with regard to such needs, and the curriculum available to MID students and discrepancy between needed and undertaken curricula. Results indicated that: (1) non-academic skill and content domains were clearly favored over the traditional academic curriculum domains; (2) teachers felt frustration at not knowing what occurred at earlier or later levels of schooling, not knowing how workplaces operate, and being unable to have enough of their eligible students participate in alternative programs; (3) employers favored a more significant proportion of academic skills involvement than did other stakeholders; (4) at least 3 years of vocational preparation was required for students with MID; and (5) students developed a more personal locus of control following engagement in workplace programs. Implications for classroom teachers and implications for teacher educators and teacher professional development are listed. Copies of questionnaires, including the six portraits describing students' schooling experiences, are appended. (Contains 18 references.) (JDD)

Supervision of Second Career Teachers: What's Our Line?

Pub Date—Apr 94

Note—24p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Career Change, Case Studies, *Constructivism (Learning), Elementary Secondary Education, Employment Experience, Graduate Students, Higher Education, Nontraditional Education, Student Teachers, *Student Teacher Supervisors, *Supervisory Methods, Teacher Education Programs, Teacher Educators, *Teacher Supervision, *Teaching (Occupation), Theory Practice Relationship

Identifiers—*Preservice Teachers, *Second Careers
By examining the role of supervision in the induction process of second career teachers, this study provides a new lens both for examining the career transition of second career teachers and for viewing the role of instructional supervision. Using case study methodology, the transitions of three cohorts (N=38) of participants in a teacher education program specifically designed for second career teachers and two cohorts (N=12) in a program designed to serve both second career and traditional entry teachers were studied. The data from the cohorts, separately and as a whole, indicate that a model of supervision combining institutional opportunities for dialogue between the second career teacher and his or her supervisor with weekly forums for peer exchange facilitated by a supervisor, was most effective in addressing the concerns of second career teachers. This approach helped them to bridge theory and practice by identifying, adapting, and utilizing their own strengths, and supporting their sense of agency. Findings of the study support a social constructivist approach to teacher education by documenting the relationship between the knowledge and experience individuals bring to the field and the ways in which a dialogical approach to su-

pervision can facilitate the extension and application of this knowledge base to the realities of school. (Contains 35 references.) (Author/LL)

Kon, Jane Heckley
The Thud at the Classroom Door: Teachers' Curriculum Decision Making in Response to a New Textbook. Draft.

Pub Date—Mar 94
Note—22p.; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports — Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Decision Making, *Elementary School Curriculum, Grade 5, *Instructional Development, Instructional Materials, Intermediate Grades, *Social Studies, Teacher Attitudes, Teaching Guides, Teaching Methods, Textbook Research, *Textbooks

Identifiers—California

This study, based on interviews and classroom observation, evaluates what seven fifth-grade teachers in California did one autumn when a controversial new state-approved social studies textbook arrived at their doors. By tracking the teachers' daily curriculum decisions for social studies during the first few months following receipt of the textbook, the study examined if and how the new textbook really mattered in their instructional choices. Analysis is focused on five categories of factors: (1) teachers' educational experiences and professional affiliations; (2) their normative views about the goals of social studies education; (3) their evaluation of the needs and abilities of their students; (4) characteristics of their schools and classrooms; and (5) daily relationships between teacher and students within a class. The study concluded that individual differences among teachers make a significant impact on how the teachers respond to external changes such as the arrival of a new text. Teachers who viewed the textbook as their primary resource used the textbook to structure their planning, but others did not. Reformers' hopes that a new textbook written to the specifications of a new curriculum framework would lead directly to improvement in the quality of the social studies curriculum may be ill-founded. Descriptors—*Attitude Change, Case Studies, *Cross Cultural Training, *Cultural Awareness, Cultural Pluralism, Education Courses, Elementary Secondary Education, Higher Education, *Multicultural Education, Nontraditional Students, *Seminars, *Student Attitudes, Teacher Education, Teacher Education Curriculum, White Students

Identifiers—*Preservice Teachers

Many teacher educators share the concern that preservice teachers on predominantly white campuses are inadequately prepared to teach effectively in a culturally pluralistic society. This descriptive, exploratory study examined the experiences, observations, and reflections of 10 nontraditional, post-baccalaureate students seeking teacher certification and/or a teaching degree. Results are reported in narrative, case study form with excerpts from student writings. The intervention of a multicultural education course provided an important first step towards preparing future educators for the classroom. Following this intervention, students became more aware and sensitized to the needs of others as well as more accepting and open-minded concerning ethnic diversities. A discussion of the study's results focuses on ways preservice teacher education might be modified to better prepare students to be effective educators for an increasingly diverse student population. Suggested modifications include: additional field experiences for working with minority students; open forums for discussion of ideas and strategies; multiethnic guest speakers; and the review of multicultural children's literature. (Contains 30 references.) (LL)

MacDonald, Judith R.
Teaching and Parenting: Effects of the Dual Role. Pub Date—Apr 94

Note—9p.; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports — Research (143)

EDRS Price - MF01/PC01 Plus Postage. PC Not Available from EDRS.

Descriptors—Affective Measures, Child Rearing, *Elementary School Teachers, Elementary Secondary Education, *Employed Parents, Females, Males, *Parent Attitudes, *Secondary School Teachers, Sex Differences, *Teacher Attitudes, Teaching (Occupation)

Identifiers—*Dual Role, Relationship Identification, *Teachers as Parents

The purposes of this study were to analyze the effects of being a teacher-parent and to try to identify the knowledge and perspectives teacher-parents derived from the dual role that might be useful to teachers and parents with experience in just one role. The following issues were explored: (1) how parenting influenced teachers; (2) how teaching affected parenting; (3) themes of difficulty in the dual role; (4) differences in how men and women perceived the dual role; and (5) the use of teacher-parents' knowledge for parents and educators with experience in one role only. Subjects—50 female and male, white middle class teachers of elementary, middle, and high school students—were interviewed through a series of open-ended questions to determine their beliefs about the dual role. According to the data analysis, the major effect of parenting on teachers was a greater understanding of and empathy for the parents of their students. In addition, they developed a broadened perspective toward their own children. The main difficulty in the dual role for women was "exhaustion"; male teacher-parents did not find much that was hard in the dual role. Informants' suggestions formed the basis for recommendations including the use of teacher-parents to help educators without children understand how the vulnerability of parents can cause defensiveness, and to help in the development of programs to bridge the gaps of understanding that can develop between teachers and parents. (Contains 15 references.) (LL)

Hansen, Edmund
The Role of Goals and Belief Systems in the Acquisition of Ill-Defined Professional Skills: A Case Study.

Pub Date—Apr 94
Note—17p.; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Speeches/Meeting Papers (150) — Reports — Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Case Studies, *Counselor Characteristics, Graduate Students, Higher Education, *Intellectual Development, *Interpersonal Competence, *Professional Development, Professional Education, School Psychologists, *Skill Development, *Student Attitudes

This case study contributes to the debate about professional education and the nature of complex interpersonal skills. Preservice training programs make certain assumptions about how students acquire practical knowledge and consequently about how such knowledge is best taught. Students form their own beliefs, which in turn exercise considerable influence over the way they learn. Learning professional skills is thus not merely a cognitive act but involves the whole person—a matter of attitude as well as intellect. The current research focused on school-psychological interviewing and consultation skills. Graduate students learned to collect relevant information from parents and teachers about the academic or behavior problems of a pupil in a sensitive and empathetic manner. Although the specific qualities which constitute the expert interviewer are still under discussion, it is clear that more than technical know-how is involved. The study, therefore, tried to identify what students considered the most important aspects of interviewing, and how they described their attempts at becoming proficient in these. It became evident in the course of this research that students were learning much more than interviewing skills, that indeed they were constructing their professional and personal identity as part

of the process. (Contains 22 references.) (Author/LL)

Descriptors—Academic Achievement, Attitude Measures, Attribution Theory, High Schools, *Secondary School Teachers, *Sex Bias, *Sex Differences, *Student Behavior, Student Characteristics, *Teacher Attitudes, Teacher Expectations of Students, Teacher Student Relationship

Identifiers—*Gender Issues

Attribution theory supports the notion that teachers respond to student behavior based upon their own beliefs regarding the causation of behavior. This study examined differences in male and female teachers' attributions and beliefs in relation to gender and success of their students. Subjects, 250 high school teachers, half male and half female, completed a 2-part survey to measure their attributions of student success or failure in relation to gender-associated behaviors. The teachers were also asked to identify the gender of students believed to be most successful within the teacher's content area. Findings indicated over half of the female teachers and a third of the male teachers reported female students to be more successful in their content areas. Both male and female teachers reported boys to be most successful only in traditional male subjects, such as metal shop and woodworking, whereas female students were identified as most successful in all content areas with the exception of these traditionally male dominant areas. The results implied that male and female students are receiving different educational experiences based upon a combination of their own ability and what their teachers believe to be appropriate gender-based behavior. It was recommended that educators be made aware of any sex-bias which influence their behavior toward students and that schools provide students with a balance of male and female teachers from K-12. Findings are reported in 86 tables, which comprise the bulk of the document. (Contains 20 references.) (LL)

Descriptors—Behavior Chaining, Behavior Rating Scales, *Body Language, Classroom Environment, *Eye Contact, *Facial Expressions, Higher Education, *Human Posture, Performance Factors, Preservice Teacher Education, Simulation, *Speech Communication, Teacher Behavior, Teacher Characteristics, Teacher Education, Teacher Educators, *Teacher Effectiveness

Identifiers—*Enthusiasm

Teacher enthusiasm has been linked to increased student achievement and attentiveness. Although enthusiasm is often mentioned to teachers and preservice teachers as being important, they are rarely trained in the particulars of enthusiastic teaching. This investigation was designed to explicate relationships among enthusiasm behaviors in a natural classroom setting. Subjects, four outstanding instructors from West Virginia University, were filmed during two class sessions for 30 minutes each to assess 5 enthusiasm behaviors (eye contact, facial expression, vocalization, gestures, and movement). The presence or absence of these behaviors was scored in 10-second snapshots divided into 2-second intervals for each minute. Concurrent and sequential relations of the enthusiasm behaviors were established by determining which behaviors consistently occurred simultaneously or preceded other enthusiasm behaviors. The results revealed strong concurrent dependencies and sequential dependencies consistently used by these outstanding teachers. Findings may have implications for teacher

training and research on the construct of teacher enthusiasm. (Contains 23 references.) (Author/LL)

Descriptors—Comparative Analysis, *Decision Making, Education Majors, Elementary Secondary Education, *Ethical Instruction, Higher Education, *Moral Development, *Moral Values, Preservice Teacher Education, *Student Teachers
Identifiers—*Preservice Teachers

Teachers are being faced with increasingly complex ethical decisions. This study was conducted to identify and compare the levels of moral development and ethical decision-making processes of entry level teacher education students and exit level student teachers by examining their corresponding stages of moral development and the factors which impacted their decisions. Entry level teacher education students (N=373) and 158 student teachers responded to the Defining Issues Test (DIT) and 3 ethical decision vignettes designed to present ethical dilemmas commonly encountered by inservice teachers. Results indicated that both groups of students had lower than average levels of moral development and that student teachers reported lower levels of principled moral reasoning than entry level education students. Decisions made and the reasons influencing those decisions varied significantly across situations. This descriptive, exploratory analysis is a necessary initial phase in restructuring reflective, moral teacher education. A sample vignette and statistical tables displaying DIT results, vignette decisions and reason rankings, and significance of between group differences are provided. (Contains 22 references.) (LL)

Differences in Novice and Competent Teachers' Knowledge.

Pub Date—Apr 94

Note—20p.; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Speeches/Meeting Papers (150)—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Comparative Analysis, *Developmental Continuity, Elementary Secondary Education, Higher Education, *Knowledge Level, *Lesson Plans, Physical Education, *Student Teachers, Teacher Education, Teaching (Occupation), Teaching Experience

Identifiers—*Experienced Teachers, *Pedagogical Content Knowledge

This study investigates the differences between competent and novice teachers' knowledge of teaching physical education. Participants were teachers (N=5) with five or more years of teaching experience, and novices (N=5), student teachers within a year of graduation with no prior public school teaching experience. Data were gathered through audiotaped, extended, multiple interviews that focused on the knowledge teachers used in planning and conducting physical education classes. Themes and categories emerging from the data were then compared with D. C. Berliner's theory of the acquisition of teaching expertise, a developmental sequence characterized by the following levels: novice, advanced beginner, competent, proficient, and expert. Findings suggest that novices require different strategies to meet their occupational demands and different forms of inservice training. Competent teachers would appear to benefit from inservice programs that allow them to share ideas regarding instructional activities with emphasis on the technical qualities of skills and concepts. Specific differences were found between competent and novice teachers in assessing student learning difficulties, conceptions of knowledge, and reflective practice. (Contains 17 references.) (LL)

Descriptors—*Change Strategies, Curriculum Development, Elementary Secondary Education, English (Second Language), *Ethnic Groups, Foreign Countries, *Language of Instruction, Language Planning, Local Norms, Political Socialization, *Politics of Education, Preservice Teacher Education, Regional Dialects, Second Language Instruction, *Teacher Education Curriculum

Identifiers—*Ethiopia, *Reform Efforts

Ethiopia, a country with 82 distinctly different languages and ethnic groups, has recently emerged from decades of civil war. In the process of restoring civilian rule, alliances have formed between a wide spectrum of local interest groups. Education generally, and language policy more specifically, continues to be one of the most contentious elements of the Ethiopian social and political scene. After enduring centuries of rule by Amharic speaking "Northerners," new regional authorities have elected to purge the Amharic language from the teaching curriculum, in favor of local languages for the primary years and English in the secondary schools. These reforms entail the translation and publication of massive quantities of textbooks, the redeployment of former staff and teaching resources, and the development of new regional and local educational authorities. This paper surveys data from an ongoing field research project, which included an examination of the Ethiopian Teachers' Training Institute. The school was located in Bale, where the Orominya language was adopted into the curriculum. This analysis explores the strength and appropriateness of the curriculum, identifies sources of both failure and innovation, and highlights many of the difficulties inherent in the imposition of major educational reform under severe resource constraints. (Author/LL)

Jonas, James E.
The Effect of Experience upon Teacher Adaptability among Preservice Teachers.

Pub Date—Apr 94

Note—25p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Behavior Development, Elementary Education, Higher Education, *Program Effectiveness, Student Teacher Evaluation, *Student Teaching, *Teacher Education Programs, *Teaching Experience

Identifiers—Adaptability Index (Hunt), *Adaptive Instructional Methods, *Preservice Teachers

The purpose of this paper was to examine the effect of a teaching associateship experience in terms of teacher adaptability. Four preservice teachers taught 15-minute lessons to a primary grade student. The student presented opportunities for teacher adaptability by asking questions during the lessons. These lessons were videotaped so that the teacher's reactions to the questions could be critically assessed according to a 10-point scale of adaptability developed by David E. Hunt. Two preservice teachers, who had not yet been teaching associates, averaged 5 points out of 10. Two preservice teachers who had already been teaching associates for 14 weeks also averaged 5 points out of 10. This corresponds to a level of adaptability at which a teacher realizes the obstacle and makes some attempt to accommodate the student's needs through a modification in instruction. Results suggest that without increased adaptability as a focus, the 14-week teaching associateship does little to promote it, and a conscious effort must be made to improve adaptability. Identifiers—Queensland University of Technology (Australia), *Reflective Thinking, *Teacher Empowerment

This paper, in presenting a view of curriculum as praxis, contends that empowerment is neither allowed nor given. Rather, it emerges as curriculum practitioners engage in a process which consciously seeks to be empowering. The view of curriculum as praxis develops from reflections of curriculum studies taught in higher education programs, and from a review of the nature of curriculum studies and its place in higher education programs at Queensland University of Technology. Implications for teaching curriculum studies within the view of curriculum as praxis are presented as a number of principles which guided the teaching of a curriculum unit in an inservice teacher education program. The guiding principles are used as a basis for telling the stories of teaching this unit from the perspectives of both the teacher educator and the inservice teachers. The paper concludes by reflecting on the experience as a possible example of empowerment through praxis and by an attempt to define empowerment in the context of teaching the unit. Appendixes provide a summary of the curriculum review; an extract from the course outline; copies of teachers' stories; and a letter seeking approval and inviting participation. Identifiers—Australia, *Reflection Process, *Teacher Empowerment

This paper interprets a tale of resistance and its dissolution in an Educational Psychology class of male tradespeople employed as Technology Studies teachers in Secondary Colleges. Changes in identity required by the transition from manual to mental labor are so difficult that negativism and an aggressive pupil control ideology permeate the groups' cultures. To assist the students to better understand their own circumstances, a strategy was employed at the beginning of the course that involved a discussion of the fictional, but culturally-specific story of an individual negotiating the dilemmas of his new career and lifestyle. The process facilitated self-disclosure among participants and provided a 'loan of consciousness' through which the group might reconceptualize their own experiences. A cultural 'transition' appeared to occur, providing conditions under which reflection on one's own ideology and practice might proceed. An important outcome of the discussions was an increasing use of compassionate, just and effective strategies, when working with their own pupils, and an openness to learning in other teacher education courses. "People Becoming Teachers and Students: A Case-Study" is appended. (Contains 50 references.) (Author/LL)

Identifiers—1920s, 1930s, 1990s, Dewey (John), *Great Britain, Lindeman (Eduard), Mansbridge (Albert), Tawney (Richard Henry), Thorndike (Edward L.), *United States, Yeaxlee (Basil A)

This paper explores the ideas of six adult educators from the 1920s to determine the relevance of their thinking to modern adult educators. Three were chosen from Britain: Albert Mansbridge, Basil Yeaxlee, and Richard Tawney. From the United States, three influential theorists in the area were Edward Thorndike, John Dewey, and Eduard Lindeman. During the period in which they produced their most visionary work, Britain found itself in a time of major economic decline while the United States was experiencing prosperity with credit, consumption, and production escalating. In educational terms, it was a period when theorists, who were well ahead of their time, realized that education was not restricted to children. Several of these "greats" in adult education recognized the social implications of encouraging the development of adults through further education. Each of them addressed the problem of adult education and individually and collectively produced many insights. Most of the ideas of these theorists are as relevant today as they were when they were first written and bear evidence of the pervasiveness of good theory and practice regardless of the period. For adult educators of the 1990s, their ideas provide guidelines for effective practice. (Contains approximately 30 references.) (Author/LL)

Students' Learning Styles: Implications for Teacher Education.

Pub Date—Jul 94

Note—13p; Paper presented at the Annual Meeting of the Australian Teacher Education Association (24th, Brisbane, Queensland, Australia, July 3-6, 1994).

Pub Type—Speeches/Meeting Papers (150)—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Cognitive Style, *Curriculum Development, *Educational Planning, Education Majors, Elementary Secondary Education, Foreign Countries, Higher Education, Models, Program Effectiveness, *Teacher Education Programs

Identifiers—Australia, *Learning Style Inventory (Kolb), *Preference Data, Preservice Teachers

Many learners appear to approach learning in different yet reasonably consistent ways. The ability to recognize and take responsibility for these particular styles is an essential feature of efficient and effective planning and efficient and effective learning. Program planners can use knowledge about learning styles to develop programs that: (1) teach about learning styles; (2) model for the learner the implications of this knowledge; (3) provide learners with experiences that encourage the development of a wide variety of learning styles; and (4) do not disadvantage a particular learning style. This paper presents information about the learning profiles of 86 teacher education students using information gleaned from the Kolb Learning Style Inventory. According to Kolb, effective learners need ability in all of the following areas: concrete experience, reflective observation, abstract conceptualization, and active experimentation. Student preferences for distinctive ways of learning were clearly shown—abstract conceptualization was the most commonly preferred. Conclusions are drawn from the data and implications for program planning that better match the needs of learners are provided. Diagrammatic representations as suggested by Kolb are included. New Teachers' Perceptions of the Meaning of the Term "Multiculturalism" in Preservice Education.

Pub Date—Apr 94

Note—42p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Speeches/Meeting Papers (150)—Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Beginning Teachers, Cultural Pluralism, *Educational Needs, Educational Objectives, Educational Planning, Elementary Secondary Education, Higher Education, *Multicultural Education, Perspective Taking, *Preservice Teacher Education, *Teacher Attitudes, *Teacher Education Curriculum, Teacher Educators

The purpose of this study was twofold: first, to investigate new teachers' perceptions of needs for multicultural education in teacher preparation programs; and second, to better understand the meanings new teachers give to the term multiculturalism. Interviews conducted with nine practicing teachers, recent university graduates, focused on their recommendations for teacher education, their definitions of the term multiculturalism, and their rankings of a series of goals based on a typology of approaches to multicultural education. Themes in responses and similarities and differences between teachers' views and views explicated in the literature on multicultural education were sought. Teachers' recommendations included references to: course work in multicultural content, knowledge construction, and pedagogy; field experiences; and qualifications and characteristics of teacher education faculty. Teachers' definitions of multiculturalism included involving students of all backgrounds and understanding perspectives of different groups. Most of the teachers (five of nine) ranked the goal "teach human relations and social harmony" highest. The goal most frequently ranked last was "teach students to adapt to the norms of the dominant culture." The report concludes with implications for future practice and research. Identifiers—*Reflection Process, *Teacher Development

A longitudinal study was conducted to examine how a person's concept of learning, teaching, and self as teacher and learner changes over the years, and to understand the factors which contribute to the development of teachers. This paper presents the stories of two teachers who participated in the study—Beth who taught middle school science classes in an environment that emphasized the learning of thinking processes, and Jim who taught secondary classes for which state-mandated exams focused on the recall of specific content. The research began when the participants were teacher education juniors at Cornell University (New York) in a program committed to student reflection, and followed them through their first 3 years of teaching. Data were gathered through in-depth interviews and classroom observations over the course of the 6 year association. The stories demonstrate that by the third year of teaching, Beth and Jim present very different figures influenced by contextual factors. It is further illustrated that both, now tenured, are still committed to teaching, have thought carefully about their teaching, have structured their teaching to serve the goals operating in the systems in which they teach, and continue to have ideals toward which they are striving. Identifiers—*Pedagogical Content Knowledge, *Teacher Knowledge

While college faculty are experts in their disciplines, teaching expertise is less understood. This paper explores one aspect of the pedagogical content knowledge of faculty new to teaching, specifically, knowledge of student difficulties. The project, conducted at three different institutions, used a case method, employing interviews and observations. Novices ($N=11$) were interviewed about the common difficulties students encountered in a specified introductory college course. Synthesis of data from the cases resulted in a working model of new faculty members' knowledge of student difficulties, including how difficulties are discerned, the actual content and processes of student difficulties, principles of action for overcoming difficulties, what faculty do in response to student difficulties, and how faculty know what they know about student difficulties. Results suggest that the core of what faculty know about student difficulties is represented by problems with specific content, problems with academic processes, and variables that affect students' understanding. Implications for faculty development and agendas for future research on this and other aspects of pedagogical content knowledge are included. (Contains 22 references.) (LL)

Identifiers—Australia, *Diversity (Student), Empowerment, Preservice Teachers, Self Empowerment, University of South Australia

In 1993, a team of seven researchers at the University of South Australia investigated student diversity among its population in relation to the curriculum in action, student experiences of exclusion and inclusion, and staff experiences of attempting to understand and counter exclusion. This paper reports on a case study based on the newly developed set of integrated mathematics and science subjects within the Bachelor of Teaching program. Students had identified these subjects as increasing their understandings of, and success in, mathematics and science as they prepared to become elementary school teachers. The research: (1) describes the underlying principles and approaches adopted by staff; (2) describes and analyzes student perceptions of their learning experiences; and (3) explores issues which impinge upon planning and teaching for "inclusivity" of student diversity. The paper outlines broad findings of the research, critically examines what it might mean to plan and teach for "inclusivity" and "empowerment" within preservice teacher education, and pays particular attention to prior learning and assessment. Appendixes provide categories for coding student answers and the mathematics and science backgrounds of the students. (Author)

Identifiers—Australia, *Preservice Teachers

This paper reports on the effects of an intervention program designed to develop cognitive and affective skills for the study of science by students undertaking a preservice elementary teacher education course. Previous research has indicated that a high proportion of students coming into this course have had negative experience in their previous exposure to science. These students expressed concern about their ability to learn science and to become effective teachers of science in primary schools. The hypothesis tested was that science teaching self-efficacy can be enhanced through rational evaluation of beliefs about science and by experiencing success in science. The program consisted of a range of intervention strategies based on counselling procedures in which matched groups of students were guided in the self-identification and modification of negative affective states and cognitive distortions with regard to science learning and teaching. The intervention strategies were designed to foster a positive sense of science teaching self-efficacy through a greater awareness of successful learning and thinking in science. The study combined both qualitative and quantitative data which when analyzed and reconciled revealed that students with strong negative experiences in science can develop more positive levels of self-efficacy. However, these changes may occur more as a consequence of the teaching strategies adopted than through counselling. (Contains 45 references.) (Author/LL)

Descriptors—*Action Research, *Change Strategies, Elementary Secondary Education, Foreign Countries, Higher Education, Preservice Teacher Education, Program Improvement, *Strategic Planning, *Stress Management, Student Teachers, *Student Teaching, *Teacher Education Programs, Teaching Conditions

Identifiers—Australia, Preservice Teachers

Having completed a study on the causes of stress affecting teacher education students during practice teaching, some members of the team who conducted the project wanted to ensure that the findings made some difference to the lives of students. Therefore, an action research approach was adopted to develop strategies aimed at lessening the stress experienced by the students. The plan containing the following steps—identify the problem, investigate the problem, evaluate data, list possible actions, predict outcomes, select best action, implement action, and evaluate action—was chosen to achieve this aim. It was decided that the research study had already completed the first three steps of this process and so the listing of possible actions became the starting point for the action plan. The researchers concentrated on the 10 most potent and frequently occurring stressors. At a series of meetings, possible actions were listed, outcomes of these were predicted, and the most desirable actions were chosen. The plan was then implemented, evaluated, and refined. Results of the first cycle of the action research project were encouraging and suggested that the plan, with refinements, was worthy of continuing. (Contains 16 references.) (Author/LL)

Identifiers—*Australia, National Board for Professional Teaching Standards, National Council for Accreditation of Teacher Educ, Policy Implications, *Professionalization of Teaching, United States

In Australia at present, there is no central agency for the accreditation of teacher education courses. This paper examines the implications for Australian Schools of Education of the key issues of accreditation of courses and faculties, licensing of beginning teachers and advanced certification, and continuing professional development of teachers in the United States. A discussion of the newly published, revised standards of the National Council for Accreditation of Teacher Education (NCATE) points out that some States are accepting these standards while others have complementary or separate standards. Licenses to teach are issued by the States to graduates of approved courses and to those who enter via alternative routes. Conditions, probationary periods and test requirements may apply. The Educational Testing Service conducts the National Teacher Examination and is now publishing its new Praxis tests. The National Board for Professional Teaching Standards is currently field testing its methods for rigorously assessing teacher performance in order to grant advanced certification to teachers with at least three years' experience. Professional development schools, clinical schools and laboratory schools are linking preservice teacher education and inservice education to promote the simultaneous renewal of teachers and teacher educators. Identifiers—Australia, Pedagogical Content Knowledge, University of Western Sydney Macarthur (Australia)

To guide the development of teacher education programs at the University of Western Sydney Macarthur (Australia), a "Starting Teacher" questionnaire and the Graduate Career Council of Australia survey were administered to 48 early childhood and 168 primary teacher education students at their graduation ceremony in April 1993. These instruments focused on characteristics of the graduates, information about their workplaces, views about the relevance of their courses, and their feelings about themselves. Items in the questionnaire were based on key issues in the literature on induction and issues of particular concern in south-west Sydney. Respondents had been reasonably successful in finding employment in the region which employed large numbers of beginning teachers. According to the data analysis, formal induction programs were minimal; most felt confident and happy about making teaching a career; the vast majority believed that their preservice courses had prepared them well, but a significant number of primary graduates indicated that more emphasis could have been placed on what to teach (subject matter knowledge). In addition, reflective practice, a greater inte-

gration of knowledge, and an in-school semester are emphasized. (Author/LL)

Identifiers—Australia, *Case Method (Teaching Technique)

At the university level, case-based education is a significant feature of professional training programs conducted for law, medicine, and business studies. Cases take various forms including real and imagined scenarios, critical incident analysis, case studies, vignettes, and anecdotal accounts of professional practice. Although case-based education has played a relatively minor role in teacher education, there is evidence of new interest in this approach. This interest is associated with growing concerns about the limitations of traditional teacher education programs and an increasing recognition and acknowledgement of the ambiguity and complexity of teaching and learning. In an attempt to portray the multi-faceted nature of teaching, the National Project on the Quality of Teaching and Learning has chosen to use cases to illustrate the Framework for Competency Standards for the Teaching Profession. This paper reports on issues that emerged when developing cases for the project. Further, the paper links this study with current interest in case-based teaching for teacher education and examines the potential, possibilities, and practicalities of using case-based approaches for professional development. A sample vignette is appended. (Author/LL)

Recent Developments Concerning Individual Study Programmes in Higher Education and Alternative Assessment Procedures for Students.

Pub Date—94

Note—53p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Reports—Evaluative (142)—Speeches/Meeting Papers (150)

EDRS Price—MF01/PC03 Plus Postage.

Descriptors—*College Students, Educational Assessment, Educational Research, Foreign Countries, Higher Education, *Individual Instruction, Labor Market, Measurement Techniques, *Program Development, *Test Construction

Identifiers—*Alternative Assessment

The need for study programs that fit better to the characteristics of learners, their interests, and the labor market has led education from being supply driven toward being demand driven. The construction of individual study programs requires appropriate assessment methods. The technologies generally available for assessment seem to reinforce the supply-driven nature of assessment, but demand-driven education, where students influence content selection and teaching is growing. The central finding of research of the past 15 years is that the key to developing an integrated and generative knowledge base is to build on the learner's prior knowledge. An empirical study is reported that focuses on the application of new forms of assessment for individual study programs, concentrating on prior knowledge and progress assessment. Questionnaire responses of 2,000 university students show that students largely agree with the use of prior knowledge state and progress tests and that their aims are improvement of knowledge and of study methods. Seven

graphs and one table present study findings. (Contains 60 references.) (SLD)

Identifiers—Pearson Product Moment Correlation, *Tennessee, Tennessee Comprehensive Assessment Program

As the latest in a series of studies analyzing the data reported on Tennessee's school district report cards, this paper focuses on finding a common statistical treatment to examine the impact of predictor variables on dependent variables. Investigations of the 1988-89 report card data explored the relationships among eight school district variables and the relationship between each variable and the average student test scores at the school district level. In 1990-91, Tennessee began using the Tennessee Comprehensive Assessment Program (TCAP) outcome measures, making comparisons of current data with the 1988-89 data impossible. The following four statistical treatments were compared for their usefulness in analyzing the data: (1) Pearson product moment correlation; (2) Guttman's partial correlation; (3) stepwise regression; and (4) multiple regression. Independent variables do not have the same impact on student outcome at all outcome levels using the four methods, and it was evident that choice of method has an impact on study conclusions. The contribution of each variable is considered. Four tables in the text and eight presented as appendices present analysis results. (Contains 9 references.) (SLD)

Identifiers—Cognitive Apprenticeships, *Tutoring in Problem Solving

TIPS (Tutoring in Problem Solving) System 1.0 is a computer-based instructional environment designed to support adolescent and adult problem-solving training based on the instructional objectives and training theory described in this document. The objectives of TIPS training are basic mathematics concepts and general problem-solving skills derived from cognitive theory, and the training philosophy is based on cognitive apprenticeship. The TIPS approach employs complex arithmetic story problems as contexts for helping students develop better problem-solving abilities. Future versions of TIPS will incorporate expanded intelligent diagnostic and tutoring capabilities, and thus will be able to tutor students with a minimum of human intervention. The current version works best if human instructors oversee student work on the system. Instructional personnel can use this handbook to help them understand the TIPS system, curriculum, and instructional philosophy. An appendix

gives excerpts from the user's guide. (Contains 56 references, 1 table, and 1 figure.) (Author)

Identifiers—*Education Consolidation Improvement Act Chapter 1, Iowa Tests of Basic Skills Technical problems with norm-referenced achievement testing that can lead to the erroneous evaluation of schools for Chapter 1 Program improvement is discussed, and an alternative testing model is presented. The history of Chapter 1 testing and evaluation policies is briefly reviewed, and problems with the norm-referenced model are explored. Data from a large urban district with an extensive Chapter 1 system for the Iowa Test of Basic Skills are used to demonstrate the way in which regression bias can lead to unintended consequences that impair the validity of an identification scheme. An alternative testing model, based on item response theory, is proposed that would allow schools to develop their own assessment devices. To avoid inequities, the ideal testing system would require schools receiving Chapter 1 funds to administer two tests to their students, a locally developed assessment and the state test. The Federal government could establish criteria for program identification that the school would meet, such as 75% of students attaining the school's standards, and the state test would ensure that the school's standards were appropriate. (Contains 19 references.) (SLD)

Identifiers—Paper and Pencil Tests, *University of Texas Austin

The Grammar, Spelling, and Punctuation (GSP) test is administered to students in the College of Communication at the University of Texas, Austin, as a means of determining eligibility to register for certain courses in journalism, broadcasting, and advertising. The test was administered in a paper-and-pencil version to 16 students and in a computerized (CAT) version of 23 students. Overall, results suggest that the CAT version is an excellent alternative to the paper-and-pencil test. The pass rate for both versions was 73%, and classification decisions of one version relative to the other had an overall agreement rate of 73%. Attitudes toward the clarity of directions, ease of use, and perception of skill assessment were overwhelmingly positive. An appendix lists equivalent scores on the two test versions. Six tables present study results. (SLD)

Identifiers—Paper and Pencil Tests, *University of Texas Austin

Results of administering a computerized adaptive version of the Grammar, Spelling, and Punctuation Test (GSP) to students in the College of Communication at the University of Texas, Austin were studied. The computerized adaptive version (CAT) was administered for the first time in June 1992 to 35 prospective students who participated in the College of Communication's Minorities in Communication (MICOM) program. MICOM is a minority student recruitment program for high-achieving minority students. Statistical comparisons of the two versions conducted in a previous study were used to indicate the relationship between the paper-and-pencil scores and CAT scores. One result of the test administration is the average total number of items administered on the computer version of the test was 60.5 items, as opposed to the 100 items required on the paper-and-pencil version. MICOM students taking the CAT version were asked for feedback about the test and their experiences with microcomputers. Students had favorable attitudes about the CAT test, and most indicated that they would prefer it to the paper-and-pencil version. Students also indicated a great deal of experience with computers. One table summarizes study findings. (SLD)

Descriptors—Comparative Analysis, Computer Simulation, *Equated Scores, Error of Measurement, *Item Response Theory, Scaling, Statistical Studies, Test Format, Test Theory

Identifiers—Anchor Tests, Calibration, Major Axis Equating, *Rasch Model

An attempt was made to determine which item response theory (IRT) equating method results in the least amount of equating error or "scale drift" when equating scores across one or more test forms. An internal anchor test design was employed with five different test forms, each consisting of 30 items, 10 in common with the base test and 5 to 10 in common with one or more other forms. Simulated data were generated for each using the Rasch model. Using one form as the base test, each of the others was equated directly to the base test and equated through one or more others to the base test. Equating methods examined were: (1) concurrent calibration; (2) equating constant procedure; (3) major axis procedure; and (4) fixed by procedure. When equating error was assessed, it was found that concurrent calibration resulted in the least amount of equating error overall. When concurrent calibration is not feasible, results indicate that major axis equating results in the least amount of equating error when equating across one or more forms. Identifiers—*University of Texas Austin

The Measurement and Evaluation Center conducted two validity studies designed to determine the test scores to be used by the Division in making decisions about credit by examination at the University of Texas Austin (UT Austin) in Biology 302, Cellular and Molecular Biology, and Biology 303, Structure and Function of Organisms. Seventy-nine summer-term students in Biology 302 took the UT Austin Test for Credit in Biology as part of their final examination. In Biology 303, Structure and Function of Organisms, 68 students took the UT Austin Test for Credit. Analysis of these results and course grades for students resulted in a recommendation that 31 be the decision score for students in the C range in Biology 302 and that 39 be the decision score for students in the C range in Biology 303. Scores for A and B grades are also recommended for each test. Seven tables present scores and findings. (SLD)

Trent, Lynn M. And Others

Two-Semester Validity Study of the Use of the College Board Achievement Test in Mathematics Level 1 for Placement into M 403K at UT Austin. Fall 1988 and Spring 1989.

Test Users, Austin. Measurement and Evaluation Center.

Report No.—RB-90-3

Pub Date—Mar 92

Note—15p.

Pub Type—Reports—Research (143)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—*Achievement Tests, College Faculty, *College Students, Cutting Scores, *Decision Making, Grades (Scholastic), Higher Education, *Mathematics, Scores, Statistical Analysis, *Student Placement, *Test Use, Test Validity

Identifiers—College Board Achievement Tests, *University of Texas Austin

At the request of the Department of Mathematics at the University of Texas Austin (UT Austin), the Measurement and Evaluation Center conducted a validity study to assist in revising the department's placement policy for Mathematics 403K (M 403K). The existing decision score on the College Board Achievement Test in Mathematics Level 1 (460) was causing unacceptable placement error. Data, including Achievement Test scores and final course grades, were analyzed for 1,337 fall semester students and 781 spring semester students. A recommendation was made that the decision score of 460 be changed to 530. Faculty representatives subsequently lowered the decision score to 480, although students with scores from 480 to 520 were advised that completing an algebra course prior to enrolling in M 403K would probably improve their grades. Eight tables present analysis data. (SLD)

Ethics in Testing.

North Carolina State Dept. of Public Instruction, Raleigh.

Pub Date—93

Note—9p.

Journal Cit.—School Management Advisor; n21

Pub Type—Reports—Evaluative (142)—Collected Works—Serials (022)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Academic Achievement, Accountability, Administrators, Boards of Education, Codes of Ethics, Educational Policy, Elementary Secondary Education, *Ethics, *Government Role, Incentives, Public Schools, School Districts, *Standardized Tests, State Government, *State Programs, *Testing Programs, Test Results, *Test Use

Identifiers—*North Carolina Statewide Testing Program, Test Security

The North Carolina statewide testing program is designed to determine and ensure the competence of high school graduates, evaluate the educational process, and provide public accountability for educational results. There is little law to guide school administrators in dealing with various ethical issues in statewide testing, but there are some laws that provide ways of dealing with unethical behaviors. School boards should adopt codes of ethics for dealing with standardized tests, and it should be possible to dismiss a teacher if unethical use of test material

can be established. Any disciplinary action customarily used in the school district can be used if an employee violates test security. School board policy must determine whether an administrator or school can properly offer incentives to teachers on the condition that their classes perform well on standardized tests. Such incentives are not necessarily unethical, but must be examined carefully. An appendix contains pertinent North Carolina state law related to testing. (SLD)

Assembly Education Committee Report on the New Jersey Skills Testing Program Pursuant to AR-113.

New Jersey State Office of Legislative Services, Trenton. Assembly Education Committee.

Pub Date—17 May 93

Note—9p.; For a related document, see TM 022 107.

Pub Type—Reports—Evaluative (142)

EDRS Price—MF01/PC01 Plus Postage.

Descriptors—Accountability, Achievement Tests, *Basic Skills, Cost Effectiveness, *Educational Change, Elementary Secondary Education, Remedial Instruction, Standards, *State Programs, Student Motivation, Student Placement, *Testing Programs, Test Use

Identifiers—*New Jersey, Reform Efforts, State Legislatures

The New Jersey Assembly Education Committee studied the development and administration of the New Jersey Department of Education's skills testing program. A committee meeting received testimony about the program and reviewed correspondence. The committee has found that the academic standards of the state must be raised and that a high school proficiency test is essential to this goal. Accountability, student motivation, instructional reform, and the improvement of basic skills performance are outcomes expected from the high school proficiency test. The committee finds testing in eleventh grade to be rather late, limiting chances for remediation. Testimony on efforts to develop a high school proficiency test for the state has led the Committee to the conclusion that a commercially developed test might save the state money. A commercial test would also allow the public to see how students measure up nationally and internationally. Potential legal challenges are reviewed, and a merger of the high school proficiency test and College Basic Skills Placement Test is suggested. Establishment of a bipartisan committee on testing issues is also recommended. (SLD)

Identifiers—*New Jersey, Reform Efforts, State Legislatures

The Assembly Education Committee of the New Jersey Office of Legislative Services held a hearing pursuant to Assembly Resolution 113, a proposal directing the Committee to investigate the skills testing program developed and administered to New Jersey children by the State Department of Education. The Committee was interested in the eighth-grade early warning test designed to identify students who might have problems with the proposed High School Proficiency Test. Testifying about the testing programs were: (1) Mary Lee Fitzgerald, Commissioner, New Jersey Department of Education; (2) Leo Klagholz, Assistant Commissioner, Division of Academic Programs and Stan-

dards, New Jersey Department of Education; (3) Patricia Wang Iverson, private citizen; (4) Ellen Oppenheimer, private citizen; (5) Joseph G. Rosenstein, Ph.D., Mathematics Department, Rutgers—The State University, and Director, New Jersey Mathematics Coalition; (6) Patricia Clark Kenschaft, Ph.D. Professor of Mathematics, Montclair State College and Director, Project for Resourceful Instruction of Mathematics in the Elementary School-PRIMES; and (7) Ira Sweet, teacher, guidance counselor and school psychologist in the New Jersey Public School System. Several supplemental reports and correspondence introduced by those testifying are appended. (SLD)

Identifiers—ACT Assessment, *Wisconsin

This second statewide School Performance Report offers a snapshot of public education in Wisconsin during the 1992-93 school year. District-collected data make up the School Climate section, providing information on enrollment, attendance, suspensions, expulsions, retentions, dropouts, graduation and later education, and extracurricular and community activities. Also included are data and explanations of the Third Grade Reading Test, the Enhanced ACT assessment, and the Advanced Placement Test. Limited information is given about the new eighth- and tenth-grade examinations. The advanced coursework section includes details about advanced placement courses, the College Advanced Placement program, and courses considered advanced by the department, as well as foreign language offerings throughout the state. Two sets of information are included in the district profile text and data sections. These are staff and student ratios and credits required for high school graduation. The financial section provides information about school revenue and expenditures. The state's special-needs schools are discussed. Appendices present tables on school climate, test results, advanced coursework, district profile, and finance. A glossary is attached. (SLD)

Descriptors—*Accountability, *Attitudes, *Educational Assessment, Educational Change, Educational Policy, Elementary Secondary Education, Expectation, *Policy Formation, *Student Evaluation, *Test Use

Identifiers—Experts, Reform Efforts

The gap between policymaker enthusiasm for the uses of student assessment and expert caution is analyzed by examining new forms of student assessment as an education policy strategy. The study is based on interviews with 34 national and state policymakers and focuses on their differing expecta-

tions of what assessment policy can accomplish and how they view the feasibility of assessment-based reforms. Some policymakers agree with testing experts that assessments should provide information about the overall status of the education system and aid in instructional decisions about individual students, but others want to use assessments for accountability or for certifying that individual students have attained specified levels of mastery. Testing experts, who have cautioned against assessment misuse in the past, are in danger of being ignored as they continue their dire warnings against using assessments in policy formation. Pub Type—Guides - Non-Classroom (055)

EDRS Price - MF01/PC01 Plus Postage.
 Descriptors—*Classification, *Data Collection, *Definitions, *Early Childhood Education, Educational Research, *Elementary Secondary Education, *Statistical Analysis, Surveys

This handbook is an effort to establish current and consistent terms, definitions, and classification codes to maintain, collect, report, and exchange comparable information about students. It is a reference guide to those concerned with the collection of student data. Definitions reflect a consensus about best practice in the field of education as well as current Federal reporting requirements. Information is included about designing student record-keeping systems for schools, school districts, or other educational institutions. The handbook is not a data collection instrument, nor does it reflect any Federal data collection requirements. There are descriptions of applications of the handbook, including the development of surveys and design of automated record systems. Twelve appendices provide lists of contributors and technical information about data reporting. (SLD)

Descriptors—Administrators, *Census Figures, *Mail Surveys, *National Surveys, *Questionnaires, *Research Methodology, Teachers, Test Construction

Identifiers—*Schools and Staffing Survey (NCES), *Teacher Followup Survey (NCES)

This binder contains the questionnaires used by the Bureau of the Census to conduct the Schools and Staffing Survey (SASS) and the Teacher Followup Survey (TFS) for the National Center for Education Statistics. SASS is a mail survey of teachers, principals, and other administrators. TFS is a mail survey administered one year after the SASS to a systematically selected sample of SASS respondents. The SASS has four main components: (1) the Teacher Demand and Shortage Survey; (2) the School Administrator Survey; (3) the School Survey; and (4) the School Teacher Survey. The 1990-91 year marked the second administration of the SASS. Questionnaires for both SASS and TFS are presented in 10 chapters. (SLD)

Identifiers—International Surveys, National Education Goals 1990, *Reform Efforts

Assessment is an integral part of the systemic reform of the educational process. This pamphlet seeks to reflect a vision for student assessment that will engage students, teachers, parents, policymakers, and the public in progress toward attainment of the National Educational Goal of U.S. students being the first in the world in science and mathematics achievement by the year 2000. Assessment should begin with identifying the purpose and context in which the assessment is to be used, type of information sought and the use to which the information will be put and should be aligned with rigorous and challenging content standards of what students should know and be able to do. Many different methods should be used to ensure that all students have the opportunity to be challenged by assessment. Teachers must be actively involved in the entire assessment process. The community must understand the assessment process and be aware of assessment results. State, national, and international aspects of assessment are discussed. The three central issues at any level are: (1) what students should learn, (2) how they should be taught, and (3) how progress should be measured. An effective assessment should provide information that can be used to improve students' access to mathematical and scientific knowledge and to help each student prepare to function effectively in today's society. Descriptors—*Data Collection, Educational Trends, Elementary Secondary Education, *Enrollment, Item Response Theory, *National Surveys, *Private Schools, *Religious Education, *Statistical Analysis, Statistical Studies, Surveys, Trend Analysis

Identifiers—Private School Survey (NCES)

This report on the private school universe, a data collection system developed by the National Center for Education Statistics, presents data on schools with grades kindergarten through 12 by school size, school level, religious orientation, geographical region, and program emphasis. Numbers of students and teachers are reported in the same categories, and numbers of students are also reported by grade level and religious orientation. The Private School Universe Survey of 1991-92 is the data source for this report. In the fall of 1991, there were 25,998 private elementary and secondary schools in the United States, a number not statistically different than that of 1989 which suggests an end to the recent trend of growth in the number of private schools. Approximately 80% of private schools had some religious orientation, with 34% Catholic and 45% having some other orientation. Just over 60% were elementary schools, 30% were combined schools, and only about 10% were secondary schools. About 4.9 million students were enrolled in these schools, and there were approximately 340,000 full-time-equivalent teachers. Fourteen tables present survey data. Appendix A contains 15 standard error tables, Appendix B presents the survey questionnaire, and Appendix C contains item response rates. (SLD)

Descriptors—Agenda Setting, Child Development, *Child Rearing, Child Welfare, Databases, *Data Collection, *Day Care, Definitions, *Early Childhood Education, Educational Assessment, Educational Experience, Evaluation Methods, Longitudinal Studies, Measurement Techniques, *School Readiness, *Young Children

Identifiers—*Indicators

As a product of the Early Childhood Subcommittee of the National Education Statistics Agenda Committee of the National Forum on Education Statistics, this report evaluates the types of data needed to assess the status of children in their preschool years, evaluate the impact of their early experiences, and address policy questions related to early childhood care, education, and school readiness. It is published as an addendum to "A Guide to Improving the National Education Data System." Issues that must be considered in studies of child development include learning and developmental stages, well-being, child care, education, and the concept of readiness. Associated data collection issues are those of definition and measurement, data needs, and possible indicators for an early childhood database. Recommendations include: (1) giving high priority to developing basic indicators; (2) developing and implementing methods to assess developmental progress; (3) developing and implementing a survey of early childhood care and education programs; (4) linking developmental assessment and the survey data; and (5) undertaking longitudinal studies to assess factors affecting child well-being. An appendix lists specific examples of possible indicators for an early childhood database. (SLD)

Establishing Customer Requirements: An Instructional Analysis for Continuous Quality Improvement Training Design.

Pub Date—Apr 94

Note—25p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Expectation, *Needs Assessment, Planning, Problem Solving, *Qualitative Research, *Quality Control, *Training

Identifiers—*Customer Services, *Instructional Analysis

Establishing customer requirements spans two steps in the planning for quality set forth by Juran (1988), those of discovering customer needs and expectations and translating them into the language of those responsible for meeting the needs. The need for training was documented in a large, decentralized service organization through qualitative analysis of data from a sample of 98 problem-solving team members. Stratified snowball sampling combined with three qualitative data gathering methods identified the tasks and flow of this portion of the quality improvement process. It is concluded that: (1) implementation of any quality improvement process cannot be taken for granted once the basic concepts and problem-solving tools have been learned; (2) establishing customer requirements is essentially the same with internal and external customers; (3) establishing customer requirements extended and customized quality function deployment (QFD); (4) QFD extended the process for establishing requirements by adding options as it informed the instructional analysis; and (5) processes of task and instructional analysis are in themselves QFD. Two figures illustrate the discussion. (Contains 9 references.) (SLD)

Descriptors—Books, *Comprehension, Computer Software, Control Groups, Curriculum, *Encoding (Psychology), Experimental Groups, High Risk Students, Inner City, Kindergarten, *Kindergarten Children, *Learning, Listening, Literacy, *Multimedia Instruction, Primary Education, Public Schools, *Transfer of Training

Identifiers—Decoding (Behavior)

Effects of working with the deep comprehension and decoding activities supported by the software created by Brophy and colleagues to enhance literacy skills in young, at-risk children were studied. Subjects were 53 at-risk kindergartners from a public inner-city school (24 in the control group and 29 in the experimental group). The experimental group used the Multimedia Environments that Organize and Support Text (MOST) environment. This environment involved the subjects' having half-hour sessions each day on the sequencer and multimedia bookmaker software for about 3 months using the "Miss Emma Anchor" video. At the end of 3 months subjects were given a standardized test (the Metropolitan Readiness Test) and MOST assessments. Children in the experimental group gained more on the auditory and language skills portions of the standardized tests and performed better on the MOST assessments, indicating that the MOST software promotes deep comprehension and aids in development of listening comprehension, story production, and decoding skills. Nine figures illustrate the study, and three appendices give narrative, episodic, and overall components. (Contains 3 references.) (SLD)

Testing the Limits: Tool for Assessing Metacognitive Skills and the Zone of Proximal Development.

Pub Date—[94]

Note—9p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Children, *Cognitive Development, Cognitive Processes, Competence, *Educational Assessment, Educational Psychology, Evaluation Methods, *Metacognition, *Problem Solving, Test Use

Identifiers—*Testing the Limits, *Zone of Proximal Development

At present, there are no formal tests to assess adequately the ways in which a child processes in-

formation. Furthermore, scores on current measures cannot be directly interpreted, with few exceptions, as direct measures of cognitive processes, and results are difficult to translate directly into remediation goals or instructional objectives. Testing-the-limits is suggested as a means to establish methods a child uses to solve a problem, providing insight about a child's metacognition. In testing-the-limits, the examiner: (1) provides additional clues; (2) changes modality; (3) establishes methods used by the examinee; (4) eliminates time limits; and (5) asks probing questions. The technique is also useful in finding the child's zone of proximal development (degree of competence that can be achieved with aid). Such information can help psychologists provide more relevant instructional strategies for children. (Contains 15 references.) (Author/SLD)

Descriptors—*Children, *Color, *Elementary School Students, Elementary Secondary Education, Females, *Intelligence Tests, Males, *Performance, Raw Scores, Scaling, Sex Differences, Stimuli, *Test Construction, Test Results, Visual Perception

Identifiers—Subtests, *Wechsler Intelligence Scale for Children III

One of the changes in the test stimuli of the Wechsler Intelligence Scale for Children III (WISC-III) was the addition of color artwork on the Picture Completion (PC) and Picture Arrangement (PA) subtests. While the reactions of children and examiners to the color were positive during pilot testings and tryouts, studies examining the effect of color on students' performances on the PC and PA subtests are lacking. This study compared the performances of elementary-age students on color and black-and-white versions of the two subtests. Subjects were 90 elementary-age students (42 males and 48 females), with a mean age of 10 years, 10 months, randomly selected from grades 3 through 6 from a suburban, middle-class elementary school in the Midwest. Both versions were administered in counterbalanced order to each student. T-tests for related samples were computed for both the raw scores and the scaled scores of the PC and PA subtests. Nonsignificant results were obtained, suggesting that the addition of the color stimuli did not affect performance on the two subtests. Boys and girls performed at an equivalent level on both versions. Three tables present study findings. (Contains four references.) (Author/SLD)

Backing into Community: A Reconceptualization of Equity and Assessment in Higher Education.

Pub Date—[94]

Note—39p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Community, Concept Formation, Definitions, *Educational Assessment, *Equal Education, *Free Enterprise System, Higher Education, *Outcomes of Education

Identifiers—Conversation, Discourse, *Market Analysis

The changing meaning of equity and assessment is traced in the context of a shift from the hegemony of a market discourse to an emergent "conversation" centered around relationships and community. The weakening position of the state and the market through global socioeconomic transformation sets loose a search for alternatives, which ends up "backing into" community. As the market-driven definitions of equity and assessment lose their moorings, alternative constructs emerge. The new conversation locates equity and assessment within the learning process itself, as adjuncts to the creation of a community of learners. After exploring the contours of the new community conceptually, programmatic suggestions are offered for structuring outcomes assessment in higher education in

ways supportive of equity and community building. (Contains 40 references.) (Author/SLD)

Descriptors—Cooperation, *Educational Assessment, *Elementary School Teachers, Elementary Secondary Education, *Mathematics Education, Professional Development, Program Implementation, *Science Education, *Secondary School Teachers, Statistical Studies, *Test Construction, Videotape Recordings, Workshops

Identifiers—*Alternative Assessment, Appalachia Educational Laboratory WV, Collaborative Research

A collaborative study group on teacher development of alternative assessments in mathematics and the sciences was cosponsored in the 1992-93 school year by the Virginia Educational Association and the Appalachia Educational Laboratory. Twenty-two teachers from 11 schools throughout Virginia worked with staff from the sponsoring organizations and the state department of education to design and implement alternatives to traditional testing. Findings from the first project year are discussed in the group-developed guide "Alternative Assessments in Math and Science: Moving Toward a Moving Target." Teacher and student interviews and classroom implementation scenes are the focuses of the second year's products, two videotapes with facilitator's guide to assessment development and implementation workshops. Appendices include: (1) an excerpt from the developed guide (8 tables); (2) the form for reflection and recommendations of study group members; (3) a similar form to evaluate means and discrepancies; and (4) recommendations for implementation and a program description. Identifiers—*National Assessment of Educational Progress, Science Achievement

Since its inception in 1969, the National Assessment of Educational Progress (NAEP) has been regularly assessing the nation's students in public and private schools, serving as a barometer of educational attainment. This report in brief is excerpted from "NAEP 1992 Trends in Academic Progress," which presents trend data in science, mathematics, reading, and writing. Approximately 31,000 students were involved in NAEP's 1992 trend assessments. Student performance is characterized at five levels along the proficiency scales, and percentages of students reaching each level are presented. For reading and writing, results are also presented for individual tasks. In general, trends in science and mathematics show noteworthy improvements since 1983, while trends for reading show slow declines for the same period. Writing performance has been relatively stable for grades 11 and 4, with a recent improvement for grade 8 that awaits support in sub-

sequent years. Eleven tables and four figures present trend data in brief form. (SLD)

Descriptors—*Basic Skills, *Educational Finance, Elementary Secondary Education, *Financial Support, *High School Graduates, Poverty, Reading Achievement, *School Districts, Skill Development, *Standards, State Regulation

Identifiers—*Pennsylvania

School districts throughout Pennsylvania are attempting to implement new state regulations, including the establishment of new standards for high school graduation. As school districts consider standards, they should also make sure that all students have the opportunity to meet those standards. This includes insuring that all students leave third grade reading well enough to profit from subsequent instruction. The General Assembly also has a responsibility to make sure that all districts have the resources to provide all students with the opportunity to learn the skills needed for success in school and the workplace. Extra funding that is needed in high poverty schools could become part of the state's new foundation supplements. The idea of foundation financial support of foundation-skills development, as defined, might help insure adequate funding. Casting the need for foundation support of foundation skills as a serious economic problem may help motivate the public to solve it. Two tables illustrate the discussion. (Contains 15 references.) Descriptors—Elementary School Teachers, Elementary Secondary Education, *Job Analysis, Knowledge Level, Public Schools, *Rating Scales, *Reliability, Secondary School Teachers, Surveys, Teacher Attitudes, *Teacher Certification, Test Construction, *Test Results

Identifiers—*Illinois Certification Testing System,

*Objective Analysis, Subject Content Knowledge

Public school ratings of the importance of subject-matter test objectives associated with teacher certification tests were examined by means of a job-analysis survey conducted in 1986 and a similar survey conducted in 1993. It was predicted that there would be a high degree of change in the importance ratings assigned to these test objectives reflecting the curriculum changes that had taken place over this 7 year period. Objectives examined were those of the Illinois Certification Testing System Surveys, which were sent to over 13,000 public school educators in 1986 (82% response rate) and approximately 9,000 educators in 1993 (77% response rate). The job-analysis results, contrary to expectation, suggest that the body of knowledge that classroom teachers deem important for teachers to know to perform effectively may not change as rapidly as might be expected, and that teachers may not change their priorities and incorporate new recommendations promptly. The study further suggests that there may be, within each subject-matter field, core knowledge that educators think is valuable for the student to learn, even in the face of continually involving instructional methodology that is characteristic of each subject-matter discipline. Test objectives are likely to reflect this core knowledge. One table lists rated objectives. (Contains 6 references.) (SLD)

The Role of Evaluation in Systemic Change in Education.

Pub Date—Apr 94

Note—19p.; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Access to Education, Comparative Analysis, Constructivism (Learning), Cooperation, *Educational Change, Elementary Secondary Education, Evaluation Needs, *Evaluation Utilization, *Local Issues, Mathematics, Outcomes of Education, *School Districts, School Restructuring, Science Education, *Standards, Test Construction

Identifiers—*Michigan Statewide Systemic Initiative, Reform Efforts, Stakeholders, *Systemic Change

The current wave of reform in education, often referred to as systemic change, requires specific evaluation needs, especially at the school district level. Evaluation must address both the local district effort for systemic reform and restructuring. The state and national need to demonstrate accomplishment of student outcomes and adherence to professional standards should be taken into consideration. As evaluators of the Michigan Statewide Systemic Initiative (MSSI), a National Science Foundation sponsored program for reform of mathematics and science education, the authors operate under the premises that everyone is a stakeholder in the evaluation and that all stakeholders need to be actively and collaboratively involved. A collaborative, constructivist approach to evaluating the MSSI gives due consideration to the statewide and local interests. The authors used variables related to knowledge accessibility, the press for achievement, and professional teaching conditions to construct seven instruments for evaluation to allow the district to compare itself to similar districts. One table lists the variables. (Contains 30 references.) (SLD)

Identifiers—*Comprehensive Adult Student Assessment System, *Even Start, *Houston Independent School District TX, Padres y Progreso Program TX

The Even Start—Padres y Progreso program is a nationally funded program designed to prepare young children to enter school by not only offering early childhood education, but also assisting their families with adult literacy and English as a Second Language (ESL), parenting-skills training, and employment-skills training. An evaluation of the program was conducted in the Houston (Texas) Independent School District at an elementary school. At the end of the first year of implementation, test results for a sample of 50 parents indicated that the parents improved in literacy and life skills as measured by the Comprehensive Adult Student Assessment System (CASAS), and the children improved in developmental ability and preparedness for school as measured by the Pre-School Inventory (PSI) and in English-vocabulary acquisition as measured by the Peabody Picture Vocabulary Test-Revised (PPVT-R). Five tables present study findings. (Contains 31 references.) (SLD)

Identifiers—*Current Population Survey

This report contains data on the educational attainment of persons in the United States from the Current Population Surveys conducted by the Bureau of the Census in March 1992 and 1993. Summary data on educational attainment by age, sex, race, and Hispanic origin are shown for both years in Table 1. Other detailed data are shown for 1993 in tables 2 through 16. These tables allow the continuation of the biennial series of data from previous reports. Tables 17, 18, and 19 contain time series of data from 1940 to 1993. The detailed tables present data on educational attainment for persons aged 15 and older by age, sex, race, Hispanic origin, marital status, labor force status, occupation, income, earnings, and region of residence. Summary data are also presented for states and large metropolitan areas. Data indicate that four-fifths of adults have completed high school, and that over one-fifth have completed college. Educational levels of the population as a whole continue to rise, but there are variations by race and ethnicity. Five text tables, four figures, and 19 detailed tables present census figures. Nine tables in two appendices contain additional details. (SLD)

Results of the Missouri Mastery and Achievement Tests (MMAT), 1993, 1993 Summary Report.

Missouri State Dept. of Elementary and Secondary Education, Jefferson City.

Pub Date—93

Note—22p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Achievement Gains, *Achievement Tests, *Criterion Referenced Tests, Educational Trends, Elementary Secondary Education, English, Language Arts, *Mastery Tests, Mathematics, Scoring, Social Studies, Standardized Tests, *State Programs, Student Evaluation, *Testing Programs, *Test Results

Identifiers—*Missouri Mastery and Achievement Tests

For the past seven years, Missouri has been administering the Missouri Mastery and Achievement Tests (MMAT) to fulfill the requirements of the Excellence in Education Act of 1985. The MMAT, as a criterion-referenced test, can measure student progress on specific key skills over time. This summary presents results of the spring 1993 administration of the MMAT for grades 3, 6, 8, and 10. Data for grades 3 and 6 are based on the total population (about 50,000 for each grade), and data for grades 8 and 10 are based on about 10% of test takers. Trend data from 1991 and 1992 are also presented. Scaled scores from 1993 show a general upward trend in student performance. Scores decreased from 1991 to 1993 only for grade-6 social studies, grade-10 English/language arts, and grade-10 social studies. Key skills mastered by the typical (median) student have also increased slightly or remained stable since 1991. The MMAT continues to provide the framework for fulfilling the goals of excellence in education. Three figures and one table present study data. (SLD)

able from EDRS.
 Descriptors—Business Administration, *Business Education, *Cognitive Structures, Concept Formation, *Evaluation Methods, Foreign Countries, Knowledge Level, Measurement Techniques, *Networks, Student Evaluation
 Identifiers—Networking

The networking procedure is explored as a way to describe and measure cognitive structures. A research project at Gottingen University (Germany) tried to operationalize economic contextual knowledge as a qualification for teaching in commercial (business) education. Networking was examined as a way to measure this knowledge. Each student should present his or her prior knowledge by forming a net of the concepts and relations available. Then these concepts and knowledge must be compared to an objective theory of business administration. It is further necessary to demonstrate the complex contextual structures through nets, and to use the nets to model changes. In the Gottingen study, students constructed networks at the beginning of the study and at a later time. Extent, structure, content, and stability of the nets were examined. Results suggest that the network constructing approach can display student concepts and change in knowledge. Eight figures illustrate the networking idea. (Contains 30 references.) (SLD)

Descriptors—Academic Achievement, Classification, *Cross Cultural Studies, Databases, Educational History, Educational Psychology, *Educational Research, Elementary Secondary Education, Foreign Countries, *Interdisciplinary Approach, *International Studies, *Mastery Learning, *Research Methodology, Research Needs, Research Problems

Mastery learning research focuses on learner-oriented and instruction-based factors that relate the concepts of time as a variable and high student achievement as a constant. This research emphasis encompasses optimistic assumptions about the capability of students to learn if: (1) alterable variables are optimized, and (2) diagnostic-instructional procedures based on a medical model of diagnostic-prescriptive interventions are used. Over the past 25 years, mastery learning research has gradually assumed an international character as evidenced by the professional literature. This proliferation, however, has occurred without a concerted effort to accommodate the special features of psychological and educational research in an international context. This paper addresses methodological issues that are initially problematic, yet potentially promising where mastery learning research in the international arena is concerned. Attention is given to such areas as: (1) cross culturalism spanning comparative education and international psychology; (2) multidisciplinary emphases; (3) international databases and resource personnel networks; and (4) a taxonomy of geographic and thematic progressions worldwide. (Contains 142 references.) (Author/SLD)

Descriptors—Educational Psychology, *Educational Research, Elementary Secondary Education, Foreign Countries, Intervention, Literature Reviews, *Mastery Learning, Models, *Research Methodology, *Sociocultural Patterns
 Identifiers—Bloom (Benjamin S), *Europe

Mastery learning represents an increasingly prolific area of research in educational psychology that

encompasses two principal characteristics: (1) an optimistic set of assumptions regarding the capability of students to learn if alterable variables comprising the conditions of learning are optimized; and (2) an array of adaptive instructional procedures predicated on the medical model of diagnostic-prescriptive intervention. From both theoretical and practical perspectives, mastery learning has been a catalyst for paradigm shift from a dominant prediction-selection model to an emerging diagnostic-development model. Since Bloom's seminal publication in 1968, the preponderance of the mastery learning literature has focused on the North American experience and its sociocultural interpretations with only occasional documentation of mastery learning efforts in other parts of the world. In response to this imbalance, this paper attempts to review mastery learning efforts in the European research community over the past 25 years. Attention is given to developments in mastery learning theory and practice as documented in several European countries with a view toward acknowledging and expanding research in this area of educational psychology. (Contains 71 references.) (Author/SLD)

Instructional Design Applications in the Teaching of Psychology.

Pub Date—Aug 93
 Note—12p.; Paper presented at the Annual Meeting of the American Psychological Association (101st, Toronto, Ontario, Canada, August 20-25, 1993).

Pub Type—Reports - Evaluative (142) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Curriculum Development, Higher Education, *Instructional Design, Instructional Materials, Mastery Learning, Models, *Psychology, *Systems Approach, *Teaching Methods, *Theory Practice Relationship, Time Factors (Learning)

Identifiers—Bloom (Benjamin S), Carroll Learning Model

Carroll's (1963) model of school learning and Bloom's (1968) mastery learning both address theoretical and practical aspects of the time factor in school learning via an appeal to diagnostic-prescriptive teaching. The design of instructional environments and materials—particularly as advocated by Glaser (1976)—represents the mechanism to bring to fruition the work of Carroll and Bloom. This paper suggests a systems-based approach to designing an instructional unit that (1) accommodates the earlier efforts of Carroll, Bloom, and Glaser, (2) focuses on the preparatory, delivery, and evaluative tasks of instruction, and (3) has applications in virtually every part of the psychology curriculum. (Contains 22 references and three figures.) (Author)

Urban Adolescent Homicidal Violence: A Closer Look at Who Is at Risk.

Pub Date—Mar 92
 Note—12p.; Paper presented at the Annual National Conference on Adolescents (2nd, San Antonio, TX, March 18-20, 1992).

Pub Type—Information Analyses (070) — Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Adolescents, *At Risk Persons, Causal Models, Ethnic Groups, *Homicide, Inner City, Intervention, *Males, Minority Groups, Prevention, Trend Analysis, Urban Problems, *Urban Youth, Victims of Crime, *Violence

A pattern of increased homicidal violence among adolescent youth in American inner cities has been documented and studied for some time. This elevated lethal violence has been observed to be a major cause of death in this age group and has been observed to be a particularly male phenomenon, especially for ethnic minorities. Both victims and perpetrators are likely to be adolescent males. This paper examines the nature and scope of the pattern of violence among urban adolescent youth carefully and explores theoretical explanations and possible remedies. The section on theoretical explanations examines a thesis of economic deprivation, the thesis of a subculture of violence, and psychoanalytic

and dysfunctional systems theses, as well as a thesis that the criminal justice system is critically flawed. The section on courses of intervention suggests prevention strategies and interventions, discusses parenting, and mentoring strategies, and considers developmental theory and research. (Contains 40 references.) (SLD)

Identifiers—Case Management, Service Utilization

This report synthesizes first-phase evaluation results of the Teenage Parent Demonstration program. This program, whose cornerstone is case management, responded to three concerns: (1) rising welfare caseloads; (2) persistently high rates of teenage pregnancies and births; and (3) the high probability that teenage parents will go onto welfare and have especially long spells of dependency. The first evaluation phase involved a 30-month follow-up study of participants and covered a wide range of issues related to service needs, service-use patterns, service-delivery strategies, and program impacts. The paper first describes the demonstration program and profiles the population of welfare-dependent teenage parents in the demonstration sites. Next, it discusses early lessons about the program's effects on out-of-home activity rates and a wide range of economic and social outcomes. The report concludes with discussions of program design and implementation lessons. Contains a list of other project reports and related publications. (GLR)

Identifiers—Diversity (Groups)

This user's guide provides an overview of an approach to learning about different cultures that is based on an understanding of young adolescent development. It highlights three teaching methods that are considered of particular importance to the educational process: (1) the integration of materials in social studies and language arts classes; (2) the development of cooperative-learning groups; and (3) the utilization of student and teacher resources and interests. The bulk of the report concerns specific educational activities and learning exercises divided into two main groups: "Learning About World Cultures" and "Creating a New Culture." The goals of "Learning About World Cultures" are to compare and contrast three to five widely diverse cultures and identify factors influencing cultural development. Students begin by studying their own cultures and then study two to four specific families

from different geographic locations and historical periods. Students also learn certain social science concepts needed in comparing and contrasting the various cultures. The goal of "Creating a New Culture" is to have students gain firsthand experience in creating a culture and to increase their ability to work cooperatively with other students using small-group interaction. Detailed information about how to structure the cooperative-learning groups, how to evaluate students' work, and where to read more about collaborative learning is provided. (GLR)

Identifiers—*African Americans, Diversity (Groups)

This user's guide presents an interdisciplinary teaching approach for middle school instruction in the area of African-American history. It emphasizes the importance of cultural diversity and the need for tolerance to allow students to see racial harmony as a step to global peace. The guide is divided into four sections that encompass communication skills, mathematics, science, and social science. Each section stresses the outstanding contributions of African Americans in their particular field. Open dialogue is encouraged. In addition, the guide stresses that the history of African Americans is part of the nation's history and, as such, should be integrated into the entire year's study. The activities within the units include interviews; reading, writing, and research projects; experiments; active hands-on projects, games, dramatizations, and simulations; and projects that include some form of art or music. The activities combine learning skills and understandings related to specific content areas with higher-order thinking skills, multiculturalism, creativity, social skills, responsibility, compassion, leadership, cooperation, and self-esteem. EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Academic Achievement, Blacks, Comparative Analysis, Data Analysis, Divorce, *Educational Attainment, Family Characteristics, *Family Income, *Graduation, High Schools, *One Parent Family, Role Models, Socialization, *Stress Variables, Whites

Identifiers—National Survey of Families and Households

This study examined the effect of family composition on high school graduation and level of completed education. It tests the hypotheses that children in single-mother households may be adversely affected in their educational attainment because of the economic deprivation common to such households, the stress caused by family separation, and socialization problems attributable to a lack of male role models. The study used data from the National Survey of Families and Households, which contains information on respondents' household composition while they were growing up and details disruptions in those households where disruptions existed. The effects of family composition on high school graduation, college attendance, and college graduation are examined. Study findings show that divorce and child bearing out of wedlock do contribute negatively to the lives of children, more for Whites than Blacks, with regard to educational attainment. Furthermore, it is not single motherhood per se that is detrimental, but the stress and lower income associated with marital break-up that accounts for most of the differences in graduation rates by family composition. Ten tables and seven figures show report data. (Contains 55 references.) (GLR)

Interpersonal Adaptation in the Urban School: Development and Application of a Sensitizing Conceptual Scheme.

Pub Date—Feb 94

Note—12p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adjustment (to Environment), Change, *Cultural Awareness, Cultural Differences, *Educational Change, Educational Environment, Elementary Secondary Education, *Interpersonal Relationship, Organizational Climate, Personality Traits, Resistance to Change, School Restructuring, *Urban Schools

Identifiers—*Adaptive Capacity, Conceptual Frameworks, School Culture

This paper presents a sensitizing conceptual scheme for examining interpersonal adaptation in urban classrooms. The construct "interpersonal adaptation" is conceptualized as the interaction of individual/personality factors, interpersonal factors, and social/cultural factors. The model is applied to the urban school. The conceptual scheme asserts that individuals can be viewed as varying on a continuum of change seeking, of being open to change in some areas but not in others. Both formal and informal organizational structures affect school members' adaptability to change. Adaptive school structures are characterized by morphogenesis and facilitate change by providing an open environment in which to explore differences and problems. The intersection of adaptive individuals and an adaptive school culture characterizes the adaptive school and results in a transformational culture. Urban schools represent multicultural microcosms of the community. Creating adaptive classrooms is especially im-

portant in the urban schools, for which a change-oriented culture is essential. Two figures illustrate the discussion. (Contains 14 references.) (SLD)

Strodl, Peter Johnson, Burke

Multicultural Leadership for Restructured Constituencies.

Pub Date—94

Note—14p.

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Conflict, Cooperation, *Cultural Awareness, Cultural Influences, *Decentralization, *Educational Change, Elementary Secondary Education, Ethics, Governance, *Instructional Leadership, Interaction, Multicultural Education, Principals, *School Restructuring, Urban Schools

Identifiers—*Conceptual Models, *Constituency Development, Constructive Controversy, Reform Efforts

A conceptual model is developed that presents leadership as process and participation by followers in urban schools in which decentralization efforts are underway. The model advances the work of urban school administrators as they deal with constituencies from diverse perspectives and predilections. Applications of the model involve behaviors that are useful for principals involved in school restructuring. It is useful to see leadership not just in terms of a focal person but as a group process that occurs within the context of a group culture and that requires interaction among many participants. This view is particularly useful in urban environments with great social and cultural diversity. In the context of the transformational leadership that is described, conflict becomes the focal point at which people come together to solve problems, resolve differences, and learn to cooperate with a leader. Leadership is manifested as multicultural group processes that include communication and intuition, interaction among constituency groups, collaboration, negotiation, conflict management, and the ethical response to identified problems. (Contains 52 references.) (SLD)

Identifiers—Diversity (Student), Reform Efforts

This paper addresses educational reform as it affects dropouts, minorities, diverse cultures, training programs, and community-based education. Effective dropout-prevention models are presented that address the needs of at-risk populations. The author states that much dropout prevention and reclamation takes place off of school district campuses and suggests that many community-based educational programs are having a significant impact on prevention and recovery. Several programs are highlighted such as Alternative Street Academy, Project Early Outreach, Operation RETAIN (Rescue Educational Training and Initiative Now), Teens for Responsible Behavior, Project Earn and Learn, RETAIN II, Operation Reclaim, Operation Read/Project Citizen, and the Substance Abuse and Gang Intervention Program. Several reasons are attributed to the success of these programs, including offering individualized education; having proper role models; having a culturally, ethnically, bilingually, and socioeconomically sensitive staff; and using individualized services from counseling volunteers, universities and colleges, and the community. Despite these efforts, however, the high dropout rate continues unabated, fueled by financial pressures, teen pregnancies, cultural and ethnic differences, and high unemployment. Financing validated, effective programs is part of the solution recommended. Contains 15 references. (GLR)

Descriptors—Change, *Classroom Techniques, College Students, *Comprehensive Programs, Delivery Systems, *Early Childhood Education, Educational Improvement, *Educational Innovation, Family Programs, Higher Education, High Schools, High School Students, Internship Programs, Mentors, Parent Education, *Parent Participation, Program Evaluation, Program Implementation, Services

In 1991 the Plan for Social Excellence, Inc., funded three elementary schools to design and implement a comprehensive early childhood education program. This funding initiative, entitled "Excellent Beginnings," supports programs that include innovative curriculum and classroom-management strategies, extensive parent participation, the use of high school mentors and college interns, and the development of systems to provide medical, psychological, and other social services to children and their families. Evaluation took place over a three-year period at the program sites: Midtown West Elementary School, New York City (New York) (Learning for Life), Fairfield Court Elementary School, Richmond (Virginia) (Fantastic Follow Through), and Lincoln Center, Ruston (Louisiana) (Project LINC). Overall conclusions are that implementation was consistent with the program vision and that the funding was a catalyst for positive change. Individual differences among the sites strongly influenced implementation efforts and outcomes. Although some elements of the model are difficult to implement and require technical assistance, this initial evaluation suggests beneficial effects on students. (SLD)

Perceptions of African American Educators toward Historically Black Colleges and Universities.

Pub Date—[93]

Note—10p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Black Colleges, Black Culture, Black History, Black Students, *College Faculty, College Segregation, *Experience, Higher Education, Institutional Characteristics, *Institutional Role, Institutional Survival, Racial Identification, Racial Segregation, *Teacher Attitudes, White Students

Identifiers—*African Americans

The attitudes of African American educators toward historically black colleges and universities (HBCU) were studied, focusing on the degree of support for HBCU, the perception that HBCU meet the needs of African American students, whether non-Blacks should attend HBCU, and why African Americans should choose them. The sample consisted of 30 African American educators teaching at universities and colleges. Respondents exhibited positive attitudes toward HBCU. Thirty-two percent had direct experience with a black college as a student or teacher, and 89 percent had indirect knowledge or exposure through friends or family members. The sample saw many advantages for African American students at HBCU, and all felt that they could recommend HBCU. Most (86.5 percent) supported continued integration at HBCU. Respondents did not feel that HBCU isolate students from mainstream institutions or society. (Contains 18 references.) (SLD)

*Kindergarten Children, Korean Culture, *Learning Activities, Lesson Plans, Mexican Americans, Minority Groups, Parent Participation, *Preschool Children, School Activities, Units of Study Identifiers—Diversity (Groups), Learning Tree, Southeast Asians, Thai People

This book documents a portion of The Learning Tree program, which develops cultural awareness. It provides activities, written from practical experience, that are designed to give children their first contact with the customs of other cultures. These activities are for teachers to share with preschool, kindergarten, and primary-school-age children. Each unit has been reviewed by a native of that culture to make sure that the material is as authentic as possible and does not promote stereotypes. The program examines and shares the lifestyles, foods, and customs of various cultures. This hands-on approach is used in all the activities. Children also role-play the customs and lifestyles they learn about, using clothing, household items, tools, pictures, and other artifacts to add reality to the dramatization. Parents also share information about their own cultural backgrounds. Units include the following cultures: African and African American; American Indian; Chinese and Chinese American; Japanese and Japanese American; Korean and Korean American; Mexican and Mexican American; Thai; and Southeast Asian. Identifiers—*Pennsylvania (Philadelphia)

In 1988 the William Penn Foundation awarded nearly \$6 million to agencies in the Philadelphia (Pennsylvania) area for a variety of programs aimed at preventing child abuse. The 4 programs selected targeted parents who most needed but were least likely to have access to parent education and support services. The Foundation appointed the National Committee for Prevention of Child Abuse (NCPA) to evaluate this multifaceted initiative. The NCPA measured behavioral change in clients, investigated the way each agency carried out its programs, and prepared a detailed report, summarized by this report. Client-impact findings were based on pretesting and posttesting of 1,078 adults who received services, in-depth interviews with 91 of these clients 3 months after termination of services, in-depth interviews with 31 considered at particularly high risk, and pretests and posttests of 133 children and 102 adult caregivers. The NCPA found that all the funded programs were effective in reducing the incidence of child abuse. Based on these findings, the Foundation renewed many of its grants. Ten charts summarize evaluation findings. Appendixes list grantees, evaluation reports, risk factors, and adult functioning problems. (SLD)

In efforts to make parents feel more welcome at school and to increase their involvement, a number of schools are creating parent centers—providing parents with a room of their own in the school. Part I of this report examines the role of parent centers in strengthening family-school relationships through case studies of four parent centers in urban schools, three elementary and one junior high. The case studies illustrate how parent centers are created and developed, the types of projects and programs they develop and implement, the dynamics through which they work to achieve family-school partnerships, and effects on children's academic and social success. In Part II, cross-site analyses of the case study information combined with the survey information are conducted to examine the links that exist between the work of parent centers and Federal, state, and local policies pertaining to school-family relationships. In Part III, the policy implications of parent centers are drawn in four areas: child care, integrated services, teacher outreach to parents, and home visits. Appendixes contain six graphs describing programs. (Contains 21 references.) (Author)

America's Teenagers as Volunteers.

Independent Sector, Washington, DC.

Spons Agency—Metropolitan Life Foundation.

Pub Date—92

Note—24p.

Pub Type—Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Adolescents, Experience, High Schools, *High School Students, Interviews, Pub-

lic Service, *Religious Cultural Groups, *Student Volunteers, Surveys, Values, *Volunteers, *Youth Programs

Two national in-home interview surveys conducted by the Gallup Organization and information from a national workshop conference attended by 70 teen volunteers from 28 states and 200 teachers and adult leaders indicate that about three-fifths of youth aged 12 to 17 volunteer an average of just over 3 hours a week. The most frequent volunteer activities are those sponsored by religious organizations, youth development groups, and schools; these are supplemented by informal volunteering on an individual basis. Teens most often become involved by being asked or because a friend or relative was involved or benefitted from the activity. The most active teen volunteers have had positive early childhood experiences relating to volunteering and involvement before age 11. They are likely to be active members of a church or synagogue and to have a value system that emphasizes helping others. School-sponsored community youth service programs are increasing. Students generally do not react negatively to school service requirements. Volunteering during the teen years tends to lead to volunteering in adulthood. Four graphs describe volunteer activities. Identifiers—*Afrocentrism

Progress in civil rights for black Americans does not appear to have been matched, at least in recent years, by equal progress in social harmony. It is argued that a considerable part of present racial difficulties are the result of commonly expressed understandings that are deeply flawed and that these flaws can be corrected only if social scientists are more forthright in their reporting of social science research. The growth of the black underclass represents the greatest impediment to black progress and racial harmony today. The extent to which the growth of the underclass is related to civil rights policies is explored, recognizing that these policies were based on popular understanding rather than social science research. The importance of education is explored in Chapter 9 of Part IV, "The Debilitating Triad: Crime, Illegitimacy, and Inadequate Education." Academic achievement, school funding, affirmative action, school effectiveness, and Afrocentric education are among the educational issues explored. It is concluded that no improvement in black education is ultimately possible without orderly schools and communities. (SLD)

This six-part guide offers practical advice for the establishment and management of a family-support program, including discussions about typical problems and the ways practitioners have chosen to resolve them. This volume, Part 1, defines collaboration and draws distinctions among different collaborative stages. Topics explored include collaborative mechanisms, planning collaborations, overcoming early pitfalls, and challenges of the process. Parts 2 and 3 list common ways to implement collaboration and discuss the planning process and planning tasks. Part 4 describes and discusses strategies to overcome some common pitfalls of the process. Part 5 raises broader questions about collaboration as a long-term strategy for the reform of the system of family-support and education services. The guide concludes with a list of resources for further reading and information. (Contains 26 references.) (GLR)

Identifiers—*Family Support

This guide, Part 2 of a 6-volume guide, is designed to assist program managers in maintaining comprehensive family-support programs through creative funding. It stresses building a portfolio of resources to serve the families within the communities. It also examines the general principles of financing strategy, potential funding sources, tips on finding and maintaining funding sources, program marketing, and public relations. Three basic themes are presented. The first concerns community-based resources, i.e., it takes a village to raise a child and the commitment of that community to attract other funding sources and to make family support and education an integral, long-term strategy for addressing community needs and concerns. The second entails building block funding, which is the process of moving from one funding source to a diverse portfolio of sources by using the first source to attract others. It also deals with building a sustainable funding structure that involves moving away from short-term sources, like demonstration grants, toward longer-term sources, such as tax levies. The final theme deals with creativity or the need to use ingenuity and innovation to sustain the program's funding structure. Six case studies are provided that show what lessons were learned concerning their fundraising efforts. A resource list concludes the report. (Contains 34 references.) (GLR)

This is volume three of a six-volume guide to the establishment and management of a comprehensive family-support program. This volume explains the role played by evaluation in the evolution of family-support and family-education services, introduces key aspects and important considerations in planning an evaluation, and discusses how to choose a starting point for evaluation. Several evaluation models are examined, as are ways of fostering community commitment and communicating the existence of the program to the community. The guide provides a list of resources in which program evaluators can find practical advice; discussions on various aspects of evaluation, including management information system, needs assessment, and cost effectiveness; the theory and history of evaluation; and services and organizations that are available for help. This guide, volume four of a six-part series, describes several community-outreach methods and provides practical outreach suggestions that are based on experience, as well as typical problems and the ways practitioners have chosen to resolve them. The guide is divided into three parts. Part 1 focuses on recruitment. Specific topics cover ways of getting to know families and enlist their help, forming community partnerships, and educating the public. Part 2 provides suggestions for sustaining program participation. It discusses staff training, ways to make the program accessible and to meet family needs through linkages, and methods to stay attuned to parent interests. Part 3 covers how to ease a participant's transition from an early-childhood education and family-support program to the school system. A brief section on recruiting teen parents and fathers is included in the appendix and is followed by a resource guide that lists further sources of information about community outreach. (Contains 11 references.) (GLR)

Identifiers—*Family Support

This volume, the last of a six-part report, is a guide that provides an overview to the Building Villages series. It discusses the need for comprehensive programs, and examines the corresponding need for change in the family-services framework. It sets forth the organizing principles of family support as the movement grows from a program to a community-based service system. The overview lists developmental principles for programs, presents strategies for implementing change, and introduces the stage concept of service progression, which is discussed by component in each of four other guides. The guide concludes with a list of resources for further readings and information. (Contains 47 references.) (GLR)

Identifiers—*Diversity (Student)

This paper examines the lack of familiarity that teachers and administrators have with the communities in which low-income students live and stresses the need to create linkages between the school and the outside world to help at-risk students succeed academically. There is a serious flaw in most community-oriented approaches and many contemporary efforts are limited because they are derived from an exclusively school-focused perspective and thus represent "schoolcentric" thinking. Several situations are presented that depict common, well-meaning attempts of educators to consider the community and its relationship to schooling. The schoolcentric character of these efforts is discussed. The pattern of schoolcentrism is endemic and the ultimate solution is to change the paradigms in which the child is redefined in terms of his or her dual socialization within two valid systems: the community and the school. Such a change requires a recognition of the competencies and talents that the culturally divergent child brings into the school and a realization that the child's primary relationships outside the school have educational relevance. Identifiers—AIDS Beliefs Learned Through Education, California (Los Angeles), Empowerment, Short Term Employment Program

The first paper describes The Los Angeles Free Clinic and its services, which are specifically designed to respond to the needs of low-income and homeless youth within the community. The paper describes a free-of-charge, free-of-judgment comprehensive response system that exists because of collaboration with other health facilities such as Childrens Hospital of Los Angeles. Two programs are highlighted: Project ABLE (AIDS Beliefs Learned Through Education) and Project STEP (Short Term Employment Program). Using drama as the medium, Project ABLE focuses on disease prevention and the empowerment of youth by supplying life-saving education about HIV, alcohol, drugs, and smoking well before they come into the clinic for help with these issues. Project STEP clients participate each morning in a lottery for jobs, the winners of which receive a bag lunch and transportation to the job site. Workshops are provided to help youth look for and find work. These programs can be duplicated as long as collaboration exists between the social-service providers, the health-care providers, and private business. Also included is a brief success story written by a participant in the Los Angeles Free Clinic's Project STEP. (GLR)

Sharing the Vision: Curriculum Articulation in Math and Science K-U in an Urban School District.

Pub Date—21 Apr 94

Note—25p; Paper presented at the Annual Meeting of the New England Educational Research Organization (Rockport, ME, April 21, 1994).

Pub Type—Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Articulation (Education), *Curriculum Development, Economically Disadvantaged, *Educational Improvement, Educational Planning, Elementary Secondary Education, *Mathematics Education, Minority Groups, Program Descriptions, *Science Education, *Teacher Workshops, Urban Schools

Identifiers—*Curriculum Articulation Project CT, Reform Efforts

This paper presents a site and project description and the conceptual framework of the Curriculum Articulation Project (CAP) and its relation to current math and science education reform initiatives. CAP is based on the notion that the teacher is the best individual to ascertain the learning needs of the urban, and often economically disadvantaged, youth. The project addresses the concerns of reform proposals in math and science by striving to articulate the current curriculum, by ranking the skills and knowledge necessary to provide science and math literacy to urban youngsters, and by integrating math and science in units that address the unique needs of city youth. An appendix includes a unit from the program entitled "The Clean Water Problem," which is a CAP project designed for grades seven and eight. (Contains 17 references.) (GLR)

Drawing Strength from Diversity. Effective Services for Children, Youth, and Families.

California Tomorrow, Los Angeles.

Spons Agency—Annie E. Casey Foundation, Greenwich, CT.

Pub Date—94

Note—129p; Funding also provided by Stuart Foundations and the Pacific Mutual Foundation. Available from—California Tomorrow, Fort Mason Center, Building B, San Francisco, CA 94123 (\$18 plus tax).

Pub Type—Information Analyses (070) — Reports - Descriptive (141) — Tests/Questionnaires (160)

EDRS Price - MF01/PC06 Plus Postage.

Descriptors—Case Studies, *Change Strategies, Community Programs, *Community Support, *Cooperative Programs, Cultural Influences, Disadvantaged Youth, *Economically Disadvantaged, Educational Improvement, Ethnic Groups, Governance, *Human Services, Minority Groups, Needs Assessment, Profiles, Public Support, Staff Development, Training

Identifiers—*Diversity (Groups), Reform Efforts

This seven-chapter report explores in depth how issues relating to race, language, and culture can be incorporated into every stage of a reform process targeting supports to disadvantaged children and families. The report draws on 1993 research involving a survey of 98 collaborative programs in California, site visits to seven collaborative programs (six in California and one in Colorado), in-depth interviews with individuals involved in collaborative reform initiatives nationwide, and a literature review. The report's chapters discuss: (1) the links between human-services reform efforts and issues of diversity; (2) the use of community assessments to engage diverse stakeholders in identifying community strengths and resources to evaluate the cultural appropriateness of current services and to identify community needs and goals; (3) some strategies and approaches to the grounding of human services in an understanding of cultural, linguistic, and racial diversity; (4) staff development and other steps that agencies can take to equip themselves with workers who are able to respond to the needs of diverse children and families; (5) the institutional changes needed to promote culturally and linguistically appropriate services; (6) governance strategies that support inclusive decision making; and (7) recommendations that apply to all groups to ensure that issues of diversity are addressed. Appendices contain the research methodology and surveys. Contains 58 references. (GLR)

What Do Teachers Need To Know about the Black Experience before They Teach? An African American Historical and Cultural Continuum: Selected Research Experiences To Prepare Preservice Teachers To Teach the Black Experience.

Pub Date—Apr 94

Note—41p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Guides - Non-Classroom (055) — Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage. PC Not Available from EDRS.

Descriptors—African Culture, African History, Black Culture, Black History, Black Students, *Black Studies, *Cultural Awareness, Cultural Differences, Curriculum Development, Elementary Education, *Elementary School Teachers, *Experience, Objectives, Resources, *Teacher Education

Identifiers—*African Americans

A paradigm is presented for preparing teachers to develop a broader knowledge and perspective of African American history and culture. The approach was designed to instruct nonminority elementary preservice teachers to begin to acquire the knowledge and understanding of critical aspects of the African-Afro-American history and culture necessary to teach minority and majority students. After determining that 67 teacher candidates in the author's class actually knew little about African history and culture, an educational study timeline based on key events and cultural elements was developed to help define the continuum of the African and African American experience. Culturally relevant materials were identified and students were required to become familiar with multicultural education resources in educational research literature and children's literature. Evaluation through a post-test indicated that students learned about black history and culture and were better prepared to teach. Eight figures illustrate the discussion and present the timeline. A bibliography of 13 resources is included. (Contains 26 references.) (SLD)

Taking the Risk To Change Schools from Within: Educators' Cognitive Growth through Multicultural Education.

Pub Date—Apr 94

Note—31p; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 4-8, 1994).

Pub Type—Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Beliefs, *Cognitive Development, Cultural Awareness, *Educational Change, Educational Philosophy, Educational Practices, Elementary Secondary Education, Ethics, Experience, *Graduate Students, Higher Education, *Multicultural Education, *Teachers, Teaching Methods, Theory Practice Relationship

Identifiers—Participation Education, Reflective Teaching

This exploratory-interpretative study has the objective of describing patterns of cognitive-ethical developmental changes using Perry's model and data-driven content categories. In-service teachers taking a multicultural education graduate course (n=55) participated as insightful subject-researchers. Three major patterns were found: (1) experienced teachers linked their educational philosophies and practices, indicating higher cognitive-ethical developmental levels; (2) different content-knowledge modules led to various cognitive-ethical developmental levels; and (3) teachers could not connect teaching practices, research, and multicultural education courses. In conclusion, teachers need to transform their educational philosophies into concrete strategies in multicultural education courses. One table summarizes contents of philosophical and reaction papers. (Contains 16 references.) (Author/SLD)

A Case Study of a Bi-Racial Student At-Risk.

Pub Date—Nov 93

Note—25p; Paper presented at the Annual Meeting of the Mid-South Educational Research Association (New Orleans, LA, November 10-12, 1993).

Pub Type—Reports - Research (143) — Speeches/

Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Academic Achievement, Behavior Change, Behavior Problems, Case Studies, Cultural Awareness, Disadvantaged Youth, Dropout Prevention, Dropout Research, Elementary Education, Females, *High Risk Students, Interaction, *Labeling (of Persons), Nontraditional Education, *Racial Discrimination, Responses, Stereotypes, *Student Attitudes

Identifiers—*Biracial Children, Symbolic Interactionism, Throwaway Children

This case study of a biracial student who was actually pushed out from the regular school system focuses on the student's perceived reality. The theory supporting the study is Labeling Theory, which asserts that the way in which a student is labeled is dependent on the social context of the student. The subject, a biracial 14-year-old in an alternative school in Tennessee, had been expelled from her regular eighth-grade class because of her disruptive behavior. The student recounts examples of racial discrimination by teachers and other students at the predominantly white school to which she had been assigned, and the behavior of classmates who would set her up for confrontations. Following her transfer to the alternative school, the student reverted to being the cooperative and able student she had been before her enrollment in the predominantly white school. Important to the history of this student is that when she attended a neighborhood school close to the housing project in which she lived, she was not labeled a troublemaker. When she was accepted, she was not forced to behave in a rebellious way. Her experiences highlight the importance of teacher sensitivity to student circumstances. An interview transcript is appended. (Contains 56 references.) (SLD)

Descriptors—Academic Achievement, Access to Education, *Computer Attitudes, Educational Practices, Elementary Secondary Education, Equal Education, *Females, Interests, *Mathematics Education, Parent Participation, *Participation, Positive Reinforcement, Resource Materials, *Science Education, Sex Bias, Sex Differences, Sex Stereotypes, Teaching Methods

Identifiers—*Active Teaching Behaviors, *Computer Equity

From 1990 to 1993, 200 educators, primarily classroom teachers of computers, mathematics, and science, participated in the Computer Equity Expert Project. After a seminar on gender equity in these fields, the educators returned to their schools and taught workshops to their colleagues. Together, workshop participants and their colleagues developed strategies to increase the participation of girls in mathematics, science, and computer fields. These strategies are presented, along with their underlying principles, which are: (1) focus specifically on girls; (2) design activities around girls' interests; (3) emphasize usefulness; (4) highlight the social aspect; (5) watch language for sex stereotypes; (6) eliminate biased practices; (7) spread the word; and (8) do it all again next year. Strategies based on these principles are presented for classroom use, extracurricular activities, educational policy, and outreach efforts. Fourteen resources are listed for educator use. (SLD)

Identifiers—*Seattle Public Schools WA

This book describes how an urban public school assumed ownership of the problems of its homeless students and their families and assumed responsibility for correcting social ills and building a better society. The B. F. Day School in Seattle (Washington) was transformed through the efforts of the principal, Carole Williams. When she took over the office, the school comprised two separate and unequal programs, an alternative program for kindergarten through fifth grade for gifted students, called "Orca," and a separate program for emotionally and socially needy children of color at risk for failure. With a new vision, the principal and her staff developed a new program, Kids Organized on Learning in School, focusing on schooling and on housing and jobs. With cooperation from the community, businesses, and the local university and high schools, the school changed from an educational institution of limited effectiveness to an educational and social-service agency with coherent long-term and short-term goals. The story of this school provides a model for urban educational change. (Contains 128 references.) (SLD)

Identifiers—Chicago Public Schools II, *New York City Board of Education

"Small Schools and Savings" rebuts the presumption that capital costs of school planning and construction render small schools uncompetitively expensive. Specific options are outlined that can help small schools be cost effective. The false logic of borrowing economies-of-scale arguments from the factory model and applying them to building schools is contradicted through an investigation that shows countervailing economies in a flexible, adaptive approach to school planning, siting, and organization. Specific potential savings opportunities that are advocated center on (1) the use of smaller sites; (2) renovation of an existing abandoned or underused building; (3) collaboration with other public agencies to incorporate smaller schools in multiuse facilities; and (4) integration with private or public sector construction or renovation projects or negotiation to include a school in construction or renovation of low-rise housing. It is unnecessary and inconsistent with new insights about urban education to continue building new, too-large buildings dedicated to schools. Two appendices consider school size and achievement and findings from a Chicago (Illinois) study, and a third contains a 72-item bibliography. (SLD)

Identifiers—*Economies of Scale, *New York City Board of Education, Reform Efforts

This volume addresses the feasibility of operating small schools as the mainstay of the public school system. Research evidence indicates that small schools are associated with better student outcomes and that they make personal attention, academic focus, and experiential curricula possible. The premise that small schools are more expensive has always been false. No research evidence supports the claim that large schools of the sizes found in New York (1,500 to 4,000 students) achieve operational-cost efficiencies sufficient to justify their existence or to offset their educationally damaging inefficiencies. Studies show penalties of scale in large schools, and disproportionate increases in management costs. Small schools are economically feasible for New York City if barriers to change are overcome. Strategies are proposed for direct cost savings through restructuring and additional teacher involvement. Seventeen tables and two figures illustrate the discussion and provide cost figures. Five appendices present additional detail, and a sixth comprises a 71-item bibliography. (Contains 46 references.) (SLD)

Identifiers—New York City Board of Education

This study illustrates with specific designs how the city might meet two critical educational objectives in its first program of new school construction in many years. The study designs show how New York might build schools small enough to meet criteria for effective learning environments and how these small schools might be closely integrated with their communities. Following an introduction by Rosalie Genevro, two essays discuss the aims and implementation of this study: "Advocacy and Architecture" by Jeanne Silver Frankl and "The New Small Schools for New York Design Study" by Rosalie Genevro. The six neighborhood architectural and educational programs developed through the study are then profiled and amply illustrated. A final essay, "Building and Learning," by Anne E. Rieselbach, expands the analysis of the development of school design in New York City. Drawings and texts are the result of exploration by 50 teams of architects, credited with their drawings. Contains 138 references. (SLD)

Identifiers—Diversity (Student), Reform Efforts, Research for Better Schools Incorporated

The Research for Better Schools Urban Education Project provides a different framework from current education-reform efforts for restructuring urban schools and improving educational quality. This volume organizes a set of invited papers according to the Urban Learner Framework themes of cultural diversity and learning, unrecognized abilities and underdeveloped potential, enhanced achievement through motivation, and effort, and resilience. The decisionmaking framework integrates the new vision of the urban learner, as expressed in four themes with four areas central to the functioning of schools, namely: curriculum, instruction, and assessment; staff development; school environment; and management. Papers and their authors are as follows: (1) "A New Vision of the Urban Learner" (Eric J. Cooper); (2) "Cultural Compatibility and Diversity: Implications for the Urban Classroom" (Roland G. Tharp); (3) "The New Age of Discovery: The Hidden Talents of America's Urban Youth" (Ernesto M. Bernal); (4) "Enhancing Achievement through Expectation and Effort" (Shin-Ying Lee); (5) "Developing Resilience in Youth in Urban America" (Linda F. Winfield); (6) "Linking Urban Students to the 21st Century" (Beau Fly Jones); (7) "Redesigning the 'Vision' through Staff and Professional Development" (Yvette E. Jackson); (8) "The Researching and Inquiring Manager: Responding to the Urban Learner; Working toward Culturally Appropriate Education" (James H. Lytle); and (9) "The Interconnections between Classroom, Cultural, and Natural Systems Ecologies: Understanding the Deep Characteristics of Culture as a Basis of Teacher Decision-making in Urban Settings" (C. A. Bowers). References follow each paper. (GLR)

Descriptors—Black Students, Cohort Analysis, Comparative Analysis, Data Analysis, *Dropout Rate, *High School Graduates, High Schools, *High School Students, Hispanic Americans, National Surveys, School Holding Power, Socioeconomic Status, Tables (Data), White Students

This report presents 1993 data on high school dropout and retention rates, examines high school completion and graduation rates, and discusses new data-collection efforts by the National Center for Education Statistics that have a direct bearing on the issues of high school dropout and graduation rates. The report also draws comparisons between cohort dropout rates for sophomores in 1990 and 1980 and provides detailed data on demographic and socioeconomic levels as they relate to high school completion and graduation rates data. Among the findings it is shown that national dropout rates have declined over the past 10 to 15 years; high school completion rates were increasing; Blacks had larger high school completion rate increases than Whites, but for Hispanics the rates were lower than for either Blacks or Whites; and, within income levels, the rates for Blacks and Whites were similar. While analyses of status and dropout rates for each racial and ethnic group show that the differential between Whites and Blacks is narrowing, analysis of data from two sophomore cohorts a decade apart in time show a 46 percent reduction in the sophomore-to-senior-year dropout rates. Appendixes contain standard-error and time-series tables, technical notes, and the alternative definitions of high school completion rates by age group and race-ethnicity from 1972 to 1993. (GLR)

Document Not Available from EDRS.

Descriptors—Child Advocacy, *Child Development, Child Support, Community Support, Divorce, Family Environment, Family Income, *Family Structure, *Futures (of Society), Marital Instability, *One Parent Family, *Parent Child Relationship, Policy Formation, Success, Surveys

Information from four national surveys and a decade of research, this book demonstrates the connection between family structure and a child's prospects for success. It shows how divorce, particularly with often-attendant drops in income, parental involvement, and access to community resources, diminishes children's chances for wellbeing. It is revealed that children whose parents live apart are twice as likely to drop out of high school as those in two-parent families, one and a half times as likely to be idle in young adulthood, and twice as likely to become single parents themselves. Additionally, data show that some of the advantages often associ-

ated with being white are really a function of family structure and that some of the advantages associated with having educated parents evaporate when those parents separate. The concluding chapter offers recommendations for rethinking our current policies. The authors explain why it is imperative that more of the costs of raising children be shifted from mothers to fathers and from parents to society at large, as well as why universal assistance programs that benefit low-income two-parent families and single mothers must be developed. Appendixes contain data and variables from the studies, bivariate probit models, and sex-difference factors statistical tables. (GLR)

Identifiers—Great Britain

This book, written for those persons who work with refugee children and young people, describes ways that teachers can support refugee students and supplies information they need to do this effectively. There is a scholarly and extensive information brief on the backgrounds of the major refugee groups: the history of the conflicts in their countries, the religious groups, their languages, and their main areas of residence in the United Kingdom. An exposition of the types of refugee status afforded by the Home Office and the rights of refugees are also included. This background material is designed to help teachers understand and help the pupils in their class. The book also considers approaches and strategies in the classroom: how teachers can help children hold on to what they have, including their language, and deal with their losses. Good educational practice is described for issues such as psychological support, home-school liaison, and English as a second language and mother-tongue resources. Up-to-date lists of relevant teaching resources and of support agencies in the UK are provided. Contains an index. (GLR)

A Comparison of Urban School Districts' Health and Human Services.

Pub Date—Apr 94

Note—31p.; Paper presented at the Annual Meeting of the American Educational Research Association (New Orleans, LA, April 5-7, 1994).

Pub Type—Information Analyses (070) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Academic Achievement, Achievement Gains, *Ancillary School Services, Comparative Analysis, *Economically Disadvantaged, Elementary Schools, Elementary Secondary Education, Health Programs, Middle Schools, *Psychological Services, School Districts, *School Health Services, Secondary Schools, *Social Services, *Urban Schools

This paper describes the approaches being taken in 11 school districts that are located in California, Nevada, and Arizona to help disadvantaged newcomers within the districts, contrasts these approaches, and relates them to achievement-gain scores. The study's objective is to gauge whether school districts that were classified as high performers, stable performers, and low performers by their achievement-gain scores between 1984 and 1990 provide different types of service programs for disadvantaged newcomers to the district. Descriptions of the school districts are followed by detailed examinations of three types of programs: social services, health services, and psychological services. An analysis of other service programs intended to enhance the lives and growth of children and their

families is also reviewed. It is reported that all these schools districts are experiencing increasing poverty and family problems. While some communities are making efforts to meet these problems and find solutions, stable districts and their communities do not appear to place a high priority on providing services to children and families. Very little effort is shown to exist in low-performing districts. Data suggest both quantitative and qualitative differences in the services provided to the children and their families in high-performing and low-performing school districts. Information tables provide a summary of the four types of service programs for high-performing, stable, and low-performing school districts. (Contains 10 references.) (GLR)

Identifiers—*African Americans, *National Education Longitudinal Study 1988

This study analyzes NELS:88 data from a dropout sample of students who were enrolled in the eighth grade in 1988 but who were not enrolled in school in 1990. The data for this analysis were collected in Spring 1990 to examine reasons for dropping out and plans for dropouts to resume their education. In both areas, differences were found on race-ethnicity and gender. Concerning reasons for dropping out, a larger percentage of white and Hispanic dropouts cited school-related factors as a cause than did African Americans; African American dropouts cited suspension and expulsion more often than any other group. A significantly larger percentage of male than female dropouts cited job-related factors; females cited family-related reasons more often than did white females. The overwhelming majority of dropouts did have plans for resuming their education, but these plans differed by race-ethnicity and gender. Both male and female white dropouts more frequently planned to take equivalency tests; Hispanic adolescents favored attending alternative high schools, and African American adolescents more often planned to return to a regular high school to earn their diplomas. Six tables. (Contains 18 references.) (Author/BJ)

Pub Type—Reports - Evaluative (142)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Academic Achievement, Advocacy, Case Studies, *Community Development, Economically Disadvantaged, Elementary Secondary Education, *Family School Relationship, *Hispanic Americans, Mexican Americans, *Parent Participation, *Power Structure, Socioeconomic Status

Identifiers—California (Carpinteria), *Carpinteria Unified School District CA, *Empowerment, Latinos

This study examines how Latino families in Carpinteria (California) are building a community among themselves and with the school in support of the students. Parents who are knowledgeable about the school's expectations and the way in which the

school operates are better advocates for their children than parents who lack such information. Research has shown that power undergirds the knowledge required by parents to deal with schools and that Latino families care about their children and possess the capacity to be their advocates. When empowerment is viewed as an ongoing, intentional process that is centered in the local community and involves mutual respect, critical reflection, caring, and group participation, people who lack an equal share of valued resources can gain greater access to and control over those resources. The Carpinteria community study, which involved data collection in 3 schools, describes how the parent-involvement process has been one of shared power between families and schools that led to empowerment of the Latino community. Identifiers—*Chicago Public Schools II, *Local School Councils, Reform Efforts

This report is based on a survey of local school council (LSC) members in Chicago (Illinois) that was conducted in 1992 to determine and share the thoughts of LSC members on planning for school improvements and educational change, implementing policies, training, and fulfilling responsibilities and duties. Nearly 850 council members responded. Findings indicate that LSCs are involved in developing school improvement plans, planning and monitoring school improvement initiatives, budgeting expenditures, and publicizing and holding mandated meetings. Council members also provided school principals with direction by establishing policies and recommending specific actions. While many participated in training beyond that mandated by legislation, many did not participate in sessions that addressed educational theory, personnel selection, and reform legislation. Council members rated the performance of their district service center as "above average," that of the central service center "below average," and themselves "well above average." Council members noted improvements and positive change, with conditions considered worse than in 1991 only in the area of sufficient supplies. Concerns about finance, central administration, extent of participation and role clarity, and the future of reform were addressed in open-ended questions. (Contains 7 references.) (SLD)

Identifiers—Education Consolidation Improvement Act Chapter 1, Saginaw City School System MI, Thinking Skills Program

The school district in Saginaw (Michigan) operates a supplemental-education delivery system in reading and mathematics that consists of elementary and secondary compensatory education. The elementary program is both a push-in and pull-out program that serves 1,819 students in grades one through five. The secondary program is a self-con-

tained classroom program involving approximately 621 students in grades 6 through 8. Both are funded through Federal Chapter 1 funds. In 1993-94, approximately 2,440 students participated. In addition to the overall evaluation of achievement, this product evaluation focused on the Thinking Skills program (TSP) in grades 6 through 8. Two questionnaires, a structured interview, and a classroom-observation instrument were used to gather information relative to the TSP program. The California Achievement Test served as the overall evaluation instrument. Pre- and posttest results indicate that the greatest achievement gains occurred in grade 3 for reading and grade 2 for mathematics. Teachers had difficulty implementing TSP objectives, and participating TSP students still show low achievement, especially in reading. Recommendations are presented for program improvement. Five text tables plus 6 data tables in Appendix A and 12 in Appendix B present study findings. Appendix C contains a study checklist, Appendix D is a program description, and Appendix E is the 1993-94 Chapter 1/Article 3 buildings to submit reading and/or mathematics plans of improvement. Identifiers—Reform Efforts, Research for Better Schools Incorporated, *Resilience (Personality), *Urban Learner Framework

The Urban Education staff at Research for Better Schools (RBS), Inc., has developed a conceptual framework to address the complex issues that must be dealt with in urban school-restructuring efforts. This overview of the Urban Learner Framework (ULF) describes its two major features: four research-based themes that are the foundation for a new vision of the urban learner and the ramifications of these themes for decision-making within functional areas of school organization. The four themes are: (1) cultural diversity and learning; (2) unrecognized abilities and underdeveloped potential; (3) enhancement of ability development through motivation and effort; and (4) resilience of urban learners. Integration of knowledge and meaning across these themes leads to a new vision of urban learners that focuses on their strengths. The second major feature of the ULF is a set of decision-making guidelines that begins with determining an appropriate curriculum, instruction, and assessment and then designing effective staff-development programs. Establishing a supportive school environment and building visionary leadership and effective management are other decision-making guideline topics. A list of RBS activities and products is included. In December 1989, the school district in Philadelphia (Pennsylvania) and Research for Better Schools, Inc., with the support of the Pennsylvania State Department of Education, initiated a collaborative 2-year study of the district's Chapter 1 schoolwide projects. This report presents findings from the study of Taylor Elementary School (currently grades K through 4), one of the schoolwide projects initiated in 1988. Section I describes what it means to be involved in a schoolwide project on the basis of interviews with principal and staff and observations. Section II presents an overview of current instructional practices on the basis of visits to nine classrooms and interviews with eight teachers over a 2-day observation period. Section III explores the instruction received by three Taylor students over a given school day. Section IV describes the reflections of evaluators about the process, comments the teachers' dedication to change, and notes some challenges to be faced. Eleven tables and one figure present study data, and an appendix contains the daily schedules of the three students. (SLD)

Identifiers—Research for Better Schools Incorporated, Resilience (Personality), *Urban Learner Framework

Research for Better Schools, Inc., Philadelphia (Pennsylvania) is engaged in an effort to put meaning behind the words "all children can learn" by charting guidelines for the work it takes to change urban education. The result is a decision-making strategy, the Urban Learner Framework (ULF), which focuses on the education or teaching and learning requirements of urban students and leads to systemic change in urban school districts. The case study of an urban student illustrates the mismatch between the capabilities the child brought to school and the school's ability to respond. The student had strengths the school failed to support. The ULF is a tool for making connections between the abilities children bring to school and the school's expectations for new learning. The new vision of the urban learner focuses on the following areas: (1) cultural differences; (2) unrecognized abilities and underdeveloped potential; (3) enhancement of ability through motivation and effort; and (4) resilience. The framework should be implemented in the school through curriculum, instruction, assessment, staff development, changes in the school environment, and effective management. Using the ULF requires changes in both attitudes and teaching styles. (Contains 26 references.) (SLD)

Identifiers—Research for Better Schools Incorporated, Resilience (Personality), *Urban Education Restructuring Framework

The Urban Education Project developed by Research for Better Schools, Inc., has focused on meeting the needs of urban students in a changing and demanding society. In the second contract year of a 5-year contract, the project developed the Urban Education Restructuring Framework by categorizing relevant literature and school-oriented experiences into four themes to guide restructuring decision making. These themes, cultural diversity and learning, unrecognized abilities and underdeveloped potential of urban students, enhancement of ability development through motivation and effort, and resilience, constitute a new vision of the urban learner. The new vision is then integrated with the following areas that are central to the functioning of schools: (1) curriculum, instruction, and assessment; (2) staff development; (3) school environment; and (4) effective management. Urban students should not be seen as the problem, they should be viewed as a major ingredient of the solution to the problems of educational achievement, a strong economy, and a productive society. One figure illustrates the discussion. (Contains 27 references.) (SLD)

Identifiers—Research for Better Schools Incorporated, Resilience (Personality), *Urban Education Framework

The Urban Education Project developed by Research for Better Schools, Inc., has focused on meeting the needs of urban students in a changing and demanding society by creating the Urban Education Framework, which presents a new vision of the urban learner as culturally diverse, capable, motivated, and resilient. This vision suggests that urban educators build on the strengths of the urban learner. This study guide contains a series of readings that can help educators prepare for the restructuring that is necessary to address the needs of the urban learner. Questions follow each of the following selections: (1) "Russell: A Maverick?" (case study); (2) "Cultural Diversity and Learning"; (3) "Unrecognized Abilities/Underdeveloped Potential"; (4) "Enhancing Ability Development through Motivation and Effort"; and (5) "Resilience." One figure illustrates the restructuring model. Contains a 96-item bibliography that provides suggestions for further reading. (SLD)

Identifiers—Goal Based Planning, New Jersey, *Operation School Renewal NJ, Research for Better Schools Incorporated

This paper presents a set of general observations

about state-sponsored school improvement initiatives with data from several sources. One major source is the Research for Better Schools, Inc., Philadelphia (Pennsylvania), implementation study, "Facing the Challenge: Selected Programs and Practices of the Urban Initiative's Operation School Renewal" that focused on New Jersey schools. Other sources include informal school-district contacts, analysis of district and school-improvement plans, and an analysis of a New Jersey Department of Education urban initiative called Operation School Reform (OSR). The first section of the paper defines and describes the key elements of OSR. The second section presents general observations and implications related to the planning process, program implementation, and the technical and financial assistance provided by the state. The final section provides a set of recommendations concerning the design and implementation of future state-sponsored urban school-improvement efforts. Recommendations can be grouped into the following sets: (1) negotiate expectations; (2) respond to local variability; and (3) provide funds according to plan. (Contains 2 references.) (SLD)

Identifiers—*Indicators, *Wisconsin

This report on the well being of the children of Wisconsin is motivated in part by growing evidence of the adverse circumstances of many children today. The report is descriptive, rather than analytic, and does not attempt to explain relations among variables. Section 1, the introduction, is followed by county-based information in section 2 on a number of indicators of child welfare. This information is presented as percentages or rates per thousand whenever possible. Section 3 presents data on child well-being in some of Wisconsin's larger cities. To provide a sense of scale, section 4 presents actual numbers by county for selected indicators reported as percentages or rates elsewhere. Section 5 describes the sources of information in this document and the calculations used to generate the data. It also describes some of the limitations of the data. In general, the child population of Wisconsin is becoming a smaller segment of the whole, although there are areas where the numbers of children, and the corresponding need for services, are increasing. Twelve tables and one graph in Section 1 complement the discussion; tables for each of Wisconsin's 72 counties summarize county details; tables for Wisconsin's major cities present data on child well-being; and tables showing selected incidence numbers of child abuse by county are presented. (SLD)

gram Descriptions, Skill Development, Theory Practice Relationship, Training, Youth Programs Identifiers—California (San Bernardino), *California State University San Bernardino

This article explores the dropout problem at national, regional, and local levels. The demographics of dropouts are examined with particular emphasis on cultural variables and the plight of minorities. The need for community-based education is explored, and a model that has proved successful is outlined for dropout prevention, intervention, and recovery. Early-intervention efforts that have been successful are exemplified by some programs of the Provisional Accelerated Learning (PAL) Center in San Bernardino (California). At the Center, students from California State University, San Bernardino, take classroom theory and put it into practice in a community-based setting. Successful programs include: an alternative street academy for educational and computer literacy training; (2) Project Early Outreach for Saturday tutoring for elementary school students; (3) Operation RETAIN for youth from 14 to 21 years; (4) Teens for Responsible Behavior, a pregnancy-prevention and parenting-responsibility program; (5) Project Earn and Learn, a work-experience program; (6) RETAIN II, a business-skills development program for eligible 16 to 45 year old participants; (7) Operation Reclaim; an adult-education program; (8) Operation Read/Project Citizen, an adult-literacy program (9) a substance-abuse and gang-intervention program; (10) Self-Destruct, and anti-gang and anti-drug video and Mighty Medic, the anti-drug comic book featuring a black superhero and (11) pre-employment training. The PAL Center illustrates the difference collaborative efforts can make in fighting the dropout problem. (Contains 5 references.) (Author/SLD)

Identifiers—*New York City Board of Education

This revised manual presents updated guidelines and regulations regarding student suspensions in New York City public schools. The manual is divided into four main sections: principal's suspension; superintendent's suspension; search and seizure; and suspension of special education students. The manual is specifically designed to assist the principal and superintendent in providing guidance in such areas as suspension procedures, suspension investigation, important phases in conducting suspension hearings, weapons-violation suspension, records disposition, the appeals process, and readmission. Two thirds of the manual is composed of an appendix containing New York City Board of Education Citywide Standards of Conduct and Uniform Disciplinary Measures. (GLR)

Descriptors—*Educational Change, *Educational Policy, Elementary Secondary Education, Financial Policy, *Financial Support, Policy Formation, *Politics of Education, *Public Education, School Districts, School Restructuring, *Urban Education

This paper explores the degree to which the public education funds in selected districts have become

players at the policy table and examines the factors that permit funds to have a credible voice in the turbulent political world of urban districts without seriously jeopardizing their working "inside" relationships with these systems. The analysis draws extensively from the public education fund in Philadelphia (Pennsylvania), PATHS/PRISM: The Philadelphia Partnership for Education, and includes interviews with a total to 25 current and former members of the organization, as well as other top-level officials, and panel presentations by executive directors of various funds. A significant number of funds were found to have taken on projects with goals to effect structural change in individual schools, clusters of schools, or across an entire district or throughout a set of districts. These funds have risked alienating their school-district partners whose goodwill they have cultivated in earlier projects. The ability of public education funds to be policy players appears to depend on whether a district's superintendent is willing to permit this type of involvement. Overall, findings indicate that the multiple roles that public education funds were set up to play (supporter, convener, facilitator, catalyst for change) have stood them in good stead as they have evolved in the past 10 to 15 years. Contains 20 references. (GLR)

Descriptors—Adjustment (to Environment), At Risk Persons, Child Development, *Child Psychology, *Children, *Coping, Elementary Education, Elementary School Students, *Emotional Adjustment, Family Problems, Intervention, Mental Health, Parent Child Relationship, Pre-school Children, Psychological Studies

The book presents 13 papers that explore the intriguing and sometimes baffling phenomenon of children's capacity to deal with adversity. It is divided into three sections. The book's opening section provides an overview of stress research and coping strategies. Section 2 focuses on the determinants of competence and investigates the complex interaction of personality and experience in early childhood. Section 3 begins with a consideration of psychosocial and maternal factors that enable children of psychotic parents to maintain resilience and develop cognitive competence. It also discusses environmental adversity, the helpfulness of early interventions, and aspects of competence during childhood that are most directly related to successful adult outcome. The final paper integrates these findings with those of previous studies and suggests that more is known about the reasons why some people succumb when faced by adversity than why others remain resilient. Papers and their authors are as follows: "Risk, Vulnerability, and Resilience: An Overview" (E. James Anthony); "Multiple Determinants of Risk and Invulnerability" (Ronald Seifer and Arnold J. Sameroff); "Correlates and Predictors of Competence in Young Children" (Felton Earls, and others); "Further Reflections on Resilience" (Lois Barclay Murphy); "John, a Boy Who Acquired Resilience" (Alice E. Moriarty); "Children at High Risk for Psychosis Growing Up Successfully" (E. James Anthony); "Predicting Mental Health in Children at Risk" (Julien Worland, and others); "Competent Children at Risk: A Study of Well-Functioning Offspring of Disturbed Parents" (Lawrence Fisher, and others); "Maternal Factors Related to Vulnerability and Resiliency in Young Children at Risk" (Judith S. Musick and others); "Invulnerability Among Abused and Neglected Children" (Ellen A. Farber and Byron Egeland); "Resilient Children as Adults: A 40-Year Study" (J. Kirk Felsman and George E. Vaillant); "The Traits of True Invulnerability and Posttraumatic Stress in Psychoanalyzed Men of Action" (Edwin C. Peck, Jr.); and "Adversity, Resilience, and the Study of Lives" (Bertram J. Cohler). (Contains an index.) (GLR)

Subject Index

This index lists titles of documents under the major subject terms that have been assigned to characterize their contents. The subjects, which conform to those presented in the *Thesaurus of ERIC Descriptors* and the *Identifier Authority List*, are in word-by-word alphabetical order.

As shown in the examples below, the accession number is displayed below and to the right of the document title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Descriptor _____ **Microcomputers**

Title _____ Public Education and Electronic Technologies.

ED 226 725 _____ **Accession Number**

Identifier _____ **National Assessment of Educational Progress**

Title _____ Reading, Science, and Mathematics Trends. A Closer Look.

ED 227 159 _____ **Accession Number**

ABCs of Construction Project

ABC's of Construction. Final Report.

ED 374 281
Building Workplace Vocabulary for E & I: Compound Words.

ED 374 294
Building Workplace Vocabulary for E & I: General, Specialized, & Technical Terms.

ED 374 293
Building Workplace Vocabulary for E & I: Structural Analysis.

ED 374 292
Building Workplace Vocabulary for Millwright: Compound Words.

ED 374 302
Building Workplace Vocabulary for Millwright: General, Specialized, & Technical Terms.

ED 374 301
Building Workplace Vocabulary for Millwright: Structural Analysis.

ED 374 300
Building Workplace Vocabulary for Pipefitters: Compound Words.

ED 374 311
Building Workplace Vocabulary for Pipefitters: General, Specialized, & Technical Terms.

ED 374 310
Building Workplace Vocabulary for Pipefitters: Structural Analysis.

ED 374 309
Finding the Main Idea. Electrical & Instrumentation.

ED 374 288
Finding the Main Idea. Millwright.

ED 374 296
Finding the Main Idea. Pipefitter.

ED 374 305
Getting Meanings from Context. Electrical & Instrumentation.

ED 374 287
Improving Listening Skills: Hazards Communication. Listening Skills: Portable Fire Extinguishers.

ED 374 283
Meaning from Context. Millwright.

ED 374 295
Meaning from Context. Pipefitter.

ED 374 304
Measuring Decimals. Millwright.

ED 374 303
Measuring Fractions. Pipefitter.

ED 374 312
[Pipefitting Workbooks.]

ED 374 313
Problem Solving Using Charts and Graphs. Millwright.

ED 374 299
Problem Solving Using Charts and Tables. E & I.

ED 374 291
Reading Charts and Graphs. Pipefitter.

ED 374 306
Reading Charts & Tables. E & I. Pipefitter. Millwright.

ED 374 286
Reading Charts & Tables. Electrical & Instrumentation.

ED 374 289
Reading Charts & Tables. Millwright.

ED 374 297
Reading Diagrams. E & I.

ED 374 290
Reading Diagrams. Millwright.

ED 374 298
Reading Diagrams. Pipefitter.

ED 374 307
Solving Problems with Charts & Tables. Pipefitter.

ED 374 308
Study Skills. Test Taking.

ED 374 284
Understanding Sequence: Electrical Instrumentation, Millwright, Pipefitter.

ED 374 285
Writing about Your Craft. Writing Frames for Construction Workers.

ED 374 282
Writing about Your Craft. Writing Frames for Construction Workers.

Ability Identification

The Gifted/Learning Disabled Student: A Contradiction in the Classroom.

ED 374 579

Ableism

How JMC Education Rates in Its Efforts to Sensitize Students to Ableism Issues.

ED 374 435

Abstracts

Resources in Education (RIE). Volume 30, Number 2.

ED 374 205

Academic Achievement

Academic Standards for Interscholastic Athletic Participation.

ED 375 116
Administrative Behavior, School SES, and Student Achievement: A Preliminary Investigation.

ED 374 563
Causal Attributions of Music Majors and Nonmusic Majors Regarding Success and Failure in Music: A Study of Motivation and Achievement.

ED 375 033
Compensatory Education (CE) Product Evaluation.

tion: Elementary and Secondary Programs 1993-94.

ED 375 230
Demand and Academic Performance in Higher Education.

ED 374 735
The Effects of Family Composition on Educational Attainment.

ED 375 188
Family-School Bonding and Student Success.

ED 374 369
Follow-Up of the Fall 1990 FTIC Cohort.

ED 374 847
Impact of Computer-Managed Instruction on Small Rural Schools.

ED 374 946
Improving Student Academic Success and Self-Esteem through the Use of Organizational Skills.

ED 374 590
The Influence of the Principal's Leadership Style on School Climate and Student Achievement. Draft.

ED 374 506
Longitudinal Study: A Retrospective Study of Enrollments and Academic Achievements: First-Time Entering College Students, Fall Semesters 1985, 1987, and 1989. Southwestern College Special Report.

ED 374 846
Maryland's Graduation Requirements: Local Effects of Policy Reform.

ED 374 554
Mobility and Student Achievement in Orange High School.

ED 374 920
Motivation and Cognitive Strategy Use in Reading and Writing.

ED 374 402
NAEP Trends in Academic Progress. Achievement of U.S. Students in Science, 1969 to 1992-Mathematics, 1973 to 1992-Reading, 1971 to 1992-Writing, 1984 to 1992. Report in Brief.

ED 375 172
Parent Centers in Urban Schools: Four Case Studies. Report No. 23.

Institution Index

This index lists the titles of documents under the institution responsible for them and/or the agency sponsoring them. The index is arranged in alphabetical sequence by the name of the university, agency, association, etc. Names beginning with the word "University" have generally been inverted in order to provide a more distinctive entry, e.g. Wisconsin University (for the University of Wisconsin).

As shown in the example below, the accession number is displayed below and to the right of the title. Additional information about the document can be found under that number in the resume section.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

Institution ————— **American Association of State Colleges and Universities, Washington, DC.**
Title ————— **Planning Now for College Costs: A Guide for Families.**
ED 298 804 ————— **Accession Number**

Clearinghouse Number/ED Number Cross-Reference Index

This index cross-references the temporary ERIC Clearinghouse accession number to the permanent ERIC Document (ED) accession numbers by which resumes are arranged in *Resources in Education (RIE)*. Readers who have only Clearinghouse numbers for a given document may use this index to trace the item to this ED number and hence to its location in *RIE*.

The symbol // appearing after an accession number identifies a document that is not available from the ERIC Document Reproduction Service and that is not in the ERIC Microfiche Collection.

The following Clearinghouse prefixes are used in this index.

AA — ERIC Processing and Reference Facility	JC — Community Colleges
CE — Adult, Career, and Vocational Education	PS — Elementary and Early Childhood Education
CG — Counseling and Student Services	RC — Rural Education and Small Schools
CS — Reading, English, and Communication	SE — Science, Mathematics, and Environmental Education
EA — Educational Management	SO — Social Studies/Social Science Education
EC — Disabilities and Gifted Education	SP — Teaching and Teacher Education
FL — Languages and Linguistics	TM — Assessment and Evaluation
HE — Higher Education	UD — Urban Education
IR — Information and Technology

THESAURUS ADDITIONS AND CHANGES

The following additions and modifications have been made to the ERIC controlled vocabulary since July 1990. They are, therefore, not included in the main body of the 12th (1990) edition of the *Thesaurus of ERIC Descriptors*.

Aboriginal People USE INDIGENOUS POPULATIONS

ACTIVE LEARNING Nov. 1994

SN Learning in which the learner is the principal driving force, with the instructor (if one is present) merely as facilitator of the process—among the many active learning approaches are experiential learning, cooperative learning, problem-solving exercises, writing tasks, speaking activities, class discussion, case-study methods, simulations, role playing, peer teaching, fieldwork, independent study, library assignments, computer-assisted instruction, and homework

ADMINISTRATOR BEHAVIOR May 1994

SN Conduct of administrators in or out of job-related situations

ADOPTIVE PARENTS Apr. 1993

AESTHETIC VALUES Oct. 1982

SN (Scope Note Changed) Objective or subjective principles and standards related to human preferences among, or assessments of, artistic forms and qualities (in music, literature, visual arts, etc.) or objects and events in nature—sometimes includes precepts of nonperceptible (e.g., moral or intellectual) beauty

AESTHETICS Nov. 1994

SN Branch of philosophy dealing with beauty, artistic expression, and psychological responses to beauty and art

UF Esthetics

APARTHEID Aug. 1989

SN (Scope Note Changed) Afrikaans word meaning "apartness," referring to the former system of racial segregation and political and economic discrimination officially practiced in the Republic of South Africa (and the territory of Namibia) after the 1948 election victory of the Afrikaaner Nationalist Party (note: Namibia achieved independence in Mar90, and South Africa abandoned the system under a new constitution and all-race elections in Apr94)

AQUARIUMS Dec. 1992

SN Tanks, bowls, or other containers in which aquatic organisms are housed and displayed

Architectural Programming (Del Mar94) USE ARCHITECTURAL PROGRAMMING

ASIAN STUDIES Mar. 1973

SN (Scope Note Changed) Studies, usually interdisciplinary in approach, of such geographic areas as Asiatic Russia, Armenia, Azerbaijan, Bangladesh, Bhutan, China, Georgia, India, Indonesia, Japan, Kazakhstan, Kirgizstan, Korea, Maldives, Mongolia, Nepal, Pakistan, the Philippines, Sri Lanka, Tajikistan, Turkmenistan, Uzbekistan, and the Southeast Asian subcontinent

AUGMENTATIVE AND ALTERNATIVE COMMUNICATION Jun. 1994

SN Communication in which at least one partner is a user of a visual, tactile, or auditory system that either adds to or replaces normal speech and/or writing

UF Alternative and Augmentative Communication

Alternative Communication Systems (Disabled)
Augmentative Communication Systems

Authoring Aids (Programming) (Del Mar94) USE AUTHORIZING AIDS (PROGRAMMING)

AUTHORITY CONTROL (INFORMATION) Apr. 1993

SN The establishment and maintenance of consistent forms of terms, such as names, subjects, and titles, to be used as headings in bibliographic records

UF Authority Files

Beauty USE AESTHETIC VALUES

BIOTECHNOLOGY Dec. 1992

SN The use of biological organisms, systems, or processes to make or modify products

BIRDS Dec. 1992

SN Warm-blooded, egg-laying vertebrates of the class Aves, having feathers, wings, scaly legs, and a beak

BIRTH ORDER May 1969

SN (Scope Note Added) (Note: for specificity, use the Descriptor "First Born"—see also the Identifiers "Second Born," "Middle Born," and "Last Born")

BOOMTOWNS Jul. 1993

SN Towns that have experienced rapid growth and often transition from rural to urban-industrial life as a result of new economic activity, such as large-scale construction projects, new industry, or in-migration (note: includes private, social, and public consequences of rapid community growth)

UF Boom Town Areas Rapid Growth Communities

BRITISH NATIONAL CURRICULUM Sep. 1994

SN A prescribed range of subjects to be studied by all British pupils between the ages of 5 and 16 (note: coordinate with Identifiers "England," "Wales," "Scotland," "Northern Ireland," and/or "United Kingdom" as appropriate)

BURUSHASKI Jul. 1966

SN (Scope Note Added) Language of NW Kashmir, not known to be related to any other language

BUS DRIVERS May 1994

SN (Note: for school bus drivers, coordinate with "School Buses")

CANADIAN STUDIES Jun. 1993

SN Interdisciplinary instruction and research concerned with Canada and the Canadian provinces and territories

CAREGIVER CHILD RELATIONSHIP Jul. 1994

SN (Note: if appropriate, coordinate with "Teacher Student Relationship"—for documents/articles about parents and children, use the more precise term "Parent Child Relationship")

CAREGIVER ROLE Apr. 1993

Cell Biology USE CYTOLOGY

Cellular Molecular Biology USE CYTOLOGY and MOLECULAR BIOLOGY

CHEROKEE Apr. 1970

SN (Scope Note Added) The Iroquoian language of the Cherokee tribe of American Indians

CHEROKEE (TRIBE) Jan. 1994

SN An American Indian people formerly inhabiting the southern Appalachian mountains from the western Carolinas and eastern Tennessee to northern Georgia, with present-day populations in northeast Oklahoma and western North Carolina (also, dispersed kin) (note: for the Cherokee language, use "Cherokee"—for the geographic concept of Cherokee lands, use the Identifier "Cherokee Nation")

CHILD BEHAVIOR Apr. 1993

Chippewa (Language)
USE OJIBWA
("Chippewa, use Ojibwa" was removed)

CHIPPewa (TRIBE) Jan. 1994

SN An American Indian people of the area around Lake Huron and Lake Superior, and westward to Saskatchewan and Montana (also, dispersed kin)—known primarily as Ojibwas in Canada (Chippewa is a corruption of Ojibwa)

UF Anishinabe (Tribe)
Ojibwa (Tribe)
Ojibway (Tribe)
Ojibwe (Tribe)

CHOCTAW Apr. 1970

SN (Scope Note Added) The Muskogean language of the Choctaw tribe of American Indians

CHOCTAW (TRIBE) Jan. 1994

SN An American Indian people originally of Mississippi and Alabama, and presently of eastern Mississippi and southeastern Oklahoma (also, dispersed kin)

Classroom Climate USE CLASSROOM ENVIRONMENT

CLAY Oct. 1994

SN Fine-grained soil material (consisting chiefly of hydrated silicates of aluminum) that is plastic when wet—has many uses in art and industry

UF Clay Minerals

CLIMATE CHANGE Jan. 1993

SN Nonseasonal, semipermanent change in the physical environment of a region or the entirety of the earth, including fluctuations in temperature, precipitation, solar radiation, gas and suspended particle concentrations, and ocean levels (note: for worldwide climate change, coordinate with the Identifier "Global Change" or use the narrower term "Global Warming")

COLLAGE Oct. 1994

SN Composition of various materials or objects, as for artistic and other creative purposes

COMMUNITY BASED INSTRUCTION (DISABILITIES)

SN Systematic training of people with disabilities in functional skills within the natural community setting where such skills are used, in order to ease/enhance transitions to independent living, community participation, and employment *Jun. 1994*

COMPUTATIONAL LINGUISTICS

SN (Scope Note Changed) Branch of linguistics concerned with the use of computers for the analysis and synthesis of language data—for example, in machine transcription, word frequency counts, and speech recognition and synthesis (note: do not confuse with "Natural Language Processing") *Jul. 1966*

COMPUTER ANXIETY

SN Fear or mistrust of computers and computer technology—includes apprehension about learning computer skills *Jul. 1993*
UF Computer Aversion
Computerphobia

COMPUTER ATTITUDES

SN Attitudes toward or about computers and computer use *Jul. 1993*

COMPUTER INTERFACES

SN Connecting links between computers, between computers and peripheral equipment, or between computers and users—hardware interfaces include plugs, sockets, and wires that carry electrical signals, software interfaces are the languages, codes, and messages used by programs to communicate with each other, and user interfaces are keyboards, mice, joy sticks, light pens, command languages, menus, display screens, and other devices used for interactive communication between users and computers *Nov. 1994*
UF Interface Devices (Computers)

COMPUTER MEDIATED COMMUNICATION

SN Interactive use of computers for electronic mail, computer conferences, electronic bulletin boards, and online journals and databases (note: see also the Identifier "Telematics") *Aug. 1994*
UF Computer Assisted Communication
Computer Based Communication
Computer Communication

COMPUTER SECURITY

SN Measures taken to protect computer systems (hardware, software, and data files) from accidental or malicious damage or destruction and from unauthorized access (note: see also the Identifiers "Computer Viruses" and "Data Security") *Nov. 1994*

COMPUTER SELECTION

SN The process of evaluating and choosing computer hardware and/or systems *Aug. 1994*

CONSTRUCTIVISM (LEARNING)

SN Viewpoint in learning theory which holds that individuals acquire knowledge by building it from innate capabilities interacting with the environment (note: see also the Identifier "Social Constructivism") *Dec. 1992*
UF Constructionism (Education)

CORPORATIONS

SN Businesses or other associations organized as legal entities, having rights and duties distinct from those of their individual members (note: see also the Identifiers "Multinational Corporations" and "Transnational Corporations") *Nov. 1994*

COUNSELING PSYCHOLOGY

SN Psychology relating to counseling—more specifically, psychology courses and learning experiences concerned with training counselors or counseling psychologists to assist persons to make adjustments and choices, especially in regard to vocational, education, and personal matters *Jun. 1993*

COUNTIES

SN The principal, often geographically largest, areas into which states, territories, countries, etc., are divided for purposes of local government—in the U.S.A., administrative subdivisions of states *May 1993*

County Government

USE COUNTIES
and LOCAL GOVERNMENT

County History

USE COUNTIES
and LOCAL HISTORY

CREE

SN (Scope Note Added) Algonquian language of the Cree tribe of American Indians *Apr. 1969*

CREE (TRIBE)

SN An American Indian people of subarctic Canada (British Columbia to Labrador) and the northern U.S. Plains (Montana and North Dakota) (also, dispersed kin) *Jan. 1994*

CULTURAL LITERACY

SN Having sufficient common knowledge, i.e., educational background, experiences, basic skills, and training, to function competently in a given society (the greater the level of comprehension of the given society's habits, attitudes, history, etc., the higher the level of cultural literacy) *Oct. 1993*

CULTURAL MAINTENANCE

SN The effort to sustain a culture by asserting its way of life (the ideology, lifestyle, arts, language, etc.) and preserving its material embodiment (landscapes, architecture, and other artifacts) *Sep. 1994*

UF Cultural Preservation
Cultural Revitalization

CURRICULUM BASED ASSESSMENT

SN Direct and frequent measurement of student performance on the classroom curriculum in order to ascertain student instructional needs — used principally for instructional decision making, the approach also supports screening, placement, and monitoring in special education (note: see also the Identifier "Curriculum Related Testing") *Oct. 1993*
UF Curriculum Based Measurement
Curriculum Referenced Assessment

DAKOTA

SN The Siouan language of the Sioux tribe of American Indians (note: use "Sioux (Tribe)" for the Dakota people—use the Identifier "Siouan Languages" for the broad language family to which Dakota belongs) *Mar. 1994*

DATA CONVERSION

SN Process of moving data from one format to another, e.g., from tape to disk, from one computer to another, from one application to another on the same computer, from print to machine-readable form *Aug. 1994*
UF Conversion (Format)

DAY CARE EFFECTS

SN Short- or long-term effects of day care placement on children's cognitive, social, emotional, and physical development and on relations between parents and children—also includes broader social consequences of day care attendance and availability *Jul. 1993*

DECISION SUPPORT SYSTEMS

SN Computer-based decision-making and planning systems that enable users to predict the impact of decisions before they are made *Nov. 1994*

DEMONSTRATIONS (SCIENCE)

SN Descriptions or explanations of scientific phenomena by means of experiments, examples, specimens, or practical applications *May 1994*

DEVELOPMENTAL DELAYS

SN Gaps between developmental (mental or functional) age and chronological age—serious delays may eventually be diagnosed as specific developmental disabilities, while less severe delays may catch up over time with normal development and disappear (note: see also the Identifier "Language Delayed"—prior to Jun94, "Developmental Disabilities" was sometimes used to index this concept) *Jun. 1994*

UF Delayed Development (Individuals)
Developmentally Delayed

Diesel Fuel

USE DIESEL ENGINES
and FUELS

Dietary Technicians

USE DIETITIANS

Dietetic Aides

USE DIETITIANS

DINOSAURS

SN Herbivorous or carnivorous reptiles of the extinct orders Saurischia and Ornithischia from the Mesozoic era *Dec. 1992*

DISCIPLINE BASED ART EDUCATION

SN Art education that draws its content from the four foundational art disciplines of art production, art history, art criticism, and aesthetics, rather than emphasizing art production (studio experiences) alone *Oct. 1994*

Disposition (Individuals)

USE PERSONALITY

Dispositional Characteristics
USE PERSONALITY TRAITS

Diversity (Cultural) as an Observation or a Fact
USE CULTURAL DIFFERENCES

Diversity (Cultural) as a Value
USE CULTURAL PLURALISM

DIVERSITY (INSTITUTIONAL)

SN The multiplicity of variables that embody an institution, including its policies and programs, organization, reputation, and staff/client population characteristics (note: see also the Identifiers "Diversity (Faculty)," "Diversity (Student)," etc.) *May 1993*

DOWNLOADING

SN The process of transferring or transmitting a file, program, software, data, character sets, etc., from a distant to a nearby computer, from a larger to a smaller computer, or from a computer to a peripheral device *Apr. 1993*

Dysphasia

USE APHASIA

Dysphoria

USE DEPRESSION (PSYCHOLOGY)

EARLY ADOLESCENTS

SN Age group between, and overlapping with, "Preadolescents" and "Adolescents" — approximately 11-15 years of age *Jul. 1994*
UF Early Adolescence
Young Adolescents

EATING DISORDERS

SN Gross disturbances in eating patterns *Jun. 1993*
UF Appetite Disorders

ECONOMETRICS

SN Application of mathematical and statistical techniques to economic analyses *Oct. 1994*

ELECTROCHEMISTRY

SN Branch of physical chemistry dealing with the interconversion of electrical and chemical energy *Dec. 1992*

ELECTRONIC TEXT

SN Alphanumeric data (with or without graphics) that can be stored on, and manipulated by, computers *Aug. 1994*
UF Machine Readable Text

EMOTIONAL ABUSE *Jun. 1994*
SN Continual belittling, threatening, blaming, ignoring, rejecting, or otherwise inflicting of psychological pain
UF Psychological Abuse

ENROLLMENT MANAGEMENT *May 1993*
SN A set of systematic, interrelated activities for controlling enrollment patterns—involves marketing, recruitment, admissions, pricing, and financial aid

ENVIRONMENTAL SCANNING *May 1993*
SN Assessing events and identifying trends, in the external environment, that portend challenges or opportunities—integral component of strategic planning

EVIDENCE (LEGAL) *Oct. 1994*
SN Material, such as testimony, records, or objects, used in forming conclusions or judgments in legal matters—often presented to courts or juries during trials

EXCEPTIONAL PERSONS (1978 1994) *Sep. 1994*
SN Invalid term—used inconsistently in indexing—see "Disabilities" and/or "Gifted"
UF Exceptional (Atypical) (1966 1978)
Exceptional Children (1966 1978)
Exceptional Students (1966 1978)

FAMILY WORK RELATIONSHIP *May 1994*
SN Effect of work on the family and/or effect of the family on work
UF Family Job Relationship
Job Family Relationship
Work Family Relationship

FEDERALISM *Oct. 1994*
SN Principle of shared power between a central government and constituent unit governments—often prescribed by a written constitution (note: see also the Identifiers "Federalists" and "Federalist Papers")

FEMINIZATION OF POVERTY *Jun. 1993*
SN Trend towards disproportionately large numbers of women at or below poverty level

FETAL ALCOHOL SYNDROME *Jan. 1994*
SN A medical condition resulting from maternal alcohol abuse during pregnancy—it is characterized by growth deficiency (low weight or short length), facial and other physical abnormalities, and central nervous system impairments (e.g., abnormal smallness of the head, hyperactivity, motor problems, and cognitive disabilities)

FIRST BORN *Apr. 1993*
SN Children or adults born first among siblings (note: see also the Identifiers "Second Born," "Middle Born," and "Last Born")
UF Eldest Siblings
Firstborns

FISCAL NEUTRALITY *May 1994*
SN Equity goal that the level of spending for public education may not be a function of local or school district wealth (note: occasionally refers as well to the notion of equal probability of college attendance across all incomes)
UF Wealth Neutrality

FOSSIL FUELS *Dec. 1992*
SN Hydrocarbon fuels derived from the remains of former life

FOUND OBJECTS *Oct. 1994*
SN Usually familiar and often freely available materials that are found, selected, and used in artwork, play activity, etc.
UF Found Materials

FREEDOM *Oct. 1994*
UF Liberty

Fuel Oil
(former UF of "Fuels")
USE FOSSIL FUELS
and OIL

GASOLINE *Dec. 1992*
(former UF of "Fuels")
SN Mixture of liquid hydrocarbons used chiefly to fuel spark-ignited internal combustion engines

Gender Bias
USE SEX BIAS

Gender Discrimination
USE SEX DISCRIMINATION

Gender Role (Sex)
USE SEX ROLE

Gender Stereotypes
USE SEX STEREOTYPES

GENERAL MATHEMATICS *Dec. 1992*
SN Mathematics courses, frequently of an introductory or remedial nature, that emphasize everyday computational operations and usually include practical applications—most commonly conducted for noncollege-bound secondary school students

GEOCHEMISTRY *Dec. 1992*
SN Study of the chemistry of the earth (or a celestial body)

GEOGRAPHIC ISOLATION *May 1993*
SN A condition characterized by remoteness, relative inaccessibility, and sparsity or small size of population (note: prior to May93, the Identifier "Isolation (Geographic)" was used to index this concept—see also the current Identifier "School District Isolation")

GLOBAL EDUCATION *Nov. 1994*
SN Learning/teaching activities across all grade levels that focus on the inter-relatedness of peoples, cultures, and nations—subfields include world geography, world history, and international relations
UF Global Studies Education
World Studies Education

GLOBAL WARMING *Jan. 1993*
SN Gradual increases in the earth's average temperatures (note: if appropriate, use the more specific term "Greenhouse Effect")

GREENHOUSE EFFECT *Jan. 1993*
SN Global warming caused by atmospheric gases and particulates that trap heat and radiate it back to earth—of concern is possible runaway warming due to buildups of carbon dioxide and other gases through fossil fuel burning and deforestation

Group Decision Support Systems
USE DECISION SUPPORT SYSTEMS
and GROUP DYNAMICS

GUILT *May 1993*
SN Emotional state produced by the knowledge of having committed a real or imagined ethical, moral, or religious offense—less commonly in educational literature, the fact of having committed a violation of law and, possibly, being liable for the penalties associated with that violation (note: see related Identifiers "Shame" and "Self Blame")

HABITATS *Jan. 1993*
SN Places where animals or plants normally live (note: for human habitats, use "Housing," "Place of Residence," "Residential Patterns," etc.)

Handicap Discrimination (Del Mar94)
USE DISABILITY DISCRIMINATION

Handicap Identification (Del Mar94)
USE DISABILITY IDENTIFICATION

HAPPINESS *Dec. 1994*
SN State of psychological well-being characterized by dominantly agreeable emotions ranging from contentment to intense joy
UF Joy

HARMONY (MUSIC) *Oct. 1994*
SN The simultaneous occurrence of musical notes or tones

HEALTH RELATED FITNESS *Nov. 1994*
SN Physical fitness related to basic functional health, in contrast to "skill-related" physical fitness or the ability to perform in sports

Heating Oils
(former UF of "Fuels")
USE FOSSIL FUELS
and OIL

HOMOPHOBIA *Jan. 1993*
SN Fear of or antipathy toward homosexuality and homosexuals
UF Anti Gay Bias
Homonegativism

HOPÍ *Mar. 1971*
SN (Scope Note Changed) The Uto-Aztecan language spoken by the Hopi tribe of American Indians

HOPÍ (TRIBE) *Jan. 1994*
SN An American Indian people of northeastern Arizona (and dispersed kin)
UF Moqui (Tribe)

HYDROLOGY *Jan. 1993*
SN Study of the occurrence, circulation, distribution, and properties of the water of the earth and its atmosphere

Ibo (Del Oct93)
USE IGBO

IGBO *Jul. 1966*
SN (Scope Note Added) A Kwa language of Nigeria

IMMIGRATION *Sep. 1994*
SN The process in which people move to and permanently settle in a country other than their native one (note: for legal and other aspects, see also "Immigration..." Identifiers)

IN LOCO PARENTIS *Apr. 1993*
SN A legal doctrine charging schools and higher education institutions with the authority and responsibility to supervise, regulate, care for, and protect students "in the place of the parent"
UF Loco Parentis

INCLUSIVE SCHOOLS *Dec. 1994*
SN Educational institutions/programs in which students with disabilities and other special needs are integrated fully into regular curricular and noncurricular activities—"inclusion" means successfully educating all students (whether with or without disabilities, disadvantages, etc.) together in the same schools and classrooms, while celebrating the resulting diversity, including various abilities and cultures
UF Full Inclusion
Inclusion (Education)
Inclusive Education

Indian Controlled Schools
USE AMERICAN INDIAN EDUCATION
and TRIBALLY CONTROLLED EDUCATION

INDIGENOUS POPULATIONS *Mar. 1980*
SN (Scope Note Changed) People born in a specific region, country, etc., or whose ancestry is connected therewith (note: when appropriate, coordinate with geographic Identifier(s), e.g., "Australia (Northern Territory)")

INDIVIDUALIZED FAMILY SERVICE PLANS

- SN** Early intervention programs developed by multidisciplinary teams of health care and educational practitioners and the families of young children who have physical or mental disabilities or are at risk for such disabilities—each program or “plan” is written to provide for the individual child’s developmental needs, the family’s needs related to enhancing the child’s development, and the early intervention services required
- UF** Individual Family Service Plans

INDUSTRIAL ARTS

- SN** (Scope Note Added) (Note: since the mid-1980s, most industrial arts programs have become technology education programs—see the Descriptor “Technology Education”)

INFANT CARE

- SN** Nurturant care to meet the physical, mental, emotional, and social needs of young children from birth to about 24 months of age—encompasses a variety of care settings, such as day care centers, family day care homes, the child’s own home, foster homes, hospitals, and other establishments

INFORMATION INDUSTRY

- SN** All enterprise involved in providing access to information, whether via traditional print media, electronic technologies, or otherwise

INFORMATION LITERACY

- SN** The ability to access, evaluate, and use information from a variety of sources (note: use the more generic term “Information Skills,” if appropriate)

INFORMATION POLICY

- SN** Governing principles that serve as guidelines or rules for decision-making and action in the area of information

INFORMATION SKILLS

- SN** Basic to expert-level informational abilities, involved in finding information, and reading, analyzing, interpreting, applying, maintaining, and communicating it skillfully and appropriately (note: do not confuse with “Information Literacy”)

INSTRUMENTATION AND ORCHESTRATION

- SN** Study or use of the various musical instruments—includes organizing instrumental groups, e.g., orchestras or bands, and composing instrumental music
- UF** Orchestration (Music)

INSULATION (Sound)**USE ACOUSTIC INSULATION****INTEGRATED LEARNING SYSTEMS**

- SN** Networked computers running broad-based curriculum software and a management system that tracks students’ progress
- UF** Computer Based Integrated Learning Systems
- Integrated Instructional Systems (Computers)

INTEGRATED SERVICES

- SN** Collaboration among the education, health, and social service sectors to provide a school-based or school-linked comprehensive, coordinated continuum of preventive and prescriptive student and family services—usually for persons considered to be at-risk
- UF** Comprehensive Services (School Linked)
- Full Service Schools (Human Services)
- School Based Interagency Services
- School Linked Services

INTELLIGENT TUTORING SYSTEMS

- SN** Computer-assisted instructional systems employing the principles of artificial intelligence to carry on dialogs with students and use student responses to assess learning

UF ICAI

- Intelligent CAI Systems
- Intelligent Computer Assisted Instruction

INTERACTIVE TELEVISION

- SN** Two-way television systems that allow interaction between the viewer and whatever is on the screen—used in education, teleconferencing, telebanking, teleshopping, electronic opinion polling, etc.

UF Interactive Cable Television

- Interactive Satellite Television
- Two Way Television

INTERVENTION

- SN** (Scope Note Changed) Action performed to direct or influence behavior (note: if possible, use “Crisis Intervention,” “Early Intervention,” “Prereferral Intervention,” or other, more precise terminology)

Invasion of Privacy**USE PRIVACY****IROQUOIS (TRIBE)**

- SN** An American Indian people comprising the Iroquois Six Nations (Cayuga, Mohawk, Oneida, Onondaga, Seneca, and Tuscarora)—originally centered in New York, present-day Iroquois live primarily in New York, Wisconsin, Oklahoma, Ontario, and Quebec

Judicial System**USE COURTS****KNOWLEDGE BASE FOR TEACHING**

- SN** Variable construct of skills and information considered desirable and important for prospective and experienced teachers to know—categories include: subject content knowledge, general pedagogical knowledge, curriculum knowledge, pedagogical content knowledge, knowledge of learners and their characteristics, knowledge of educational contexts, and knowledge of educational purposes and values (note: do not confuse with “Teacher Competencies” or the Identifier “Teacher Knowledge”)

UF Teacher Education Knowledge Base

- Teacher Knowledge Base
- Teaching Knowledge Base

KNOWLEDGE REPRESENTATION

- SN** The encoding of knowledge in biological systems or computers (note: see also such Identifiers as “Knowledge Bases” and “Knowledge Engineering”)

Laboratory Preschools**USE LABORATORY SCHOOLS****and PRESCHOOL EDUCATION****LABORATORY SCHOOLS**

- SN** (Scope Note Changed) Schools of preschool, elementary, or secondary grades attached to universities or colleges for purposes of research and teacher training

LAKOTA

- SN** The Siouan language of the Lakota tribe of American Indians

UF Lakota

- Teton Dakota

LAKOTA (TRIBE)

- SN** Largest and westernmost of the Sioux peoples, principally in South Dakota, Montana, and Manitoba (and dispersed kin)

UF Teton Sioux (Tribe)**Language Handicaps (Del Mar94)****USE LANGUAGE IMPAIRMENTS****LANGUAGE PROCESSING**

- SN** (Scope Note Changed) The cognitive processing of spoken or written language, ranging from the construction of spoken or written messages to the abstraction of meaning from language—includes the computerized simulation of these processes (note: for the concept of using ordinary language to communicate with computers, use “Natural Language Processing”)

LATE ADOLESCENTS

- SN** Age group between, and overlapping with, “Adolescents” and “Young Adults”—approximately 16-23 years of age
- UF** Late Adolescence
- Older Adolescents

LIBRARIAN TEACHER COOPERATION

- SN** Cooperative interaction between librarians and teachers
- UF** Teacher Librarian Cooperation

LIBRARY FUNDING

- SN** The means, including both the sources and the processes of securing the funds, by which libraries pay for their operating expenses
- UF** Library Finance

LIBRARY POLICY

- SN** Governing principles that serve as guidelines or rules for decision-making and action in libraries

Linear Programming (Del Mar94)**USE LINEAR PROGRAMMING****MACROECONOMICS**

- SN** Study of the overall aspects and workings of large economic systems, as of a nation

MATHEMATICAL APTITUDE

- SN** Natural capacity or inclination for skillful performance of mathematical tasks
- UF** Mathematics Aptitude
- Quantitative Aptitude

Mbya Guarani**USE GUARANI****MELODY**

- SN** A succession of single musical tones in some rhythmic scheme or pattern

METIS (PEOPLE)

- SN** People in Canada and adjacent areas of the U.S. who are of mixed Native American and European ancestry

MICROECONOMICS

- SN** Study of some portion of an economy such as individuals, a household, a company, an industry, or a sector

MICROWORLDS

- SN** Computer-based learning tools that provide exploration and manipulation within analogical representations of some aspect of the natural world
- UF** Computer Based Microworlds
- Computer Microworlds

MISSISSIPPI BAND OF CHOCTAW (TRIBE)

- SN** American Indians of east central Mississippi who are descendants of Choctaw not removed to the Indian Territory (Oklahoma) in the 1830s

MIXED AGE GROUPING

- SN** Grouping children or students so that the chronological age span is greater than one year—the primary purpose is to maximize age-group interaction and cooperation (note: do not confuse with “Nongraded Instructional Grouping” or “Multigraded Classes,” both typically including various ages, but not necessarily for the purpose of age-group mixing)
- UF** Multiage Grouping

MODULAR ARITHMETIC Jan. 1993

SN An arithmetic of a finite rather than an infinite set of numbers—the maximum integer (n) selected is known as the modulus, and the arithmetic is referred to as “arithmetic modulo n”—any number greater than n is expressed as the remainder left after its division by n—sometimes called “clock arithmetic,” because the clock provides an example (e.g., n=12)

UF Clock Arithmetic
Finite Arithmetic

MOLECULAR BIOLOGY Jan. 1993

SN Science dealing with the structure and function of the molecules (e.g., proteins, nucleic acids, enzymes) that make up living organisms

Motor Oil
USE LUBRICANTS
and OIL

MULTIMEDIA MATERIALS Dec. 1994

SN Materials, frequently computer applications, that combine some or all of text, sound, graphics, animation, and video into integrated packages

National Achievement Tests
USE NATIONAL COMPETENCY TESTS

NATIONAL CURRICULUM Sep. 1994

SN Any curriculum adopted by a particular country that students of given ages or academic levels take in order to advance or graduate—may be voluntary or required (note: if appropriate, use the more specific term “British National Curriculum”)

National Tests (of Achievement)
USE NATIONAL COMPETENCY TESTS

NATURAL GAS Dec. 1992

SN (“Natural Gases” was a former UF of “Fuels”) A combustible mixture of hydrocarbon gases, usually found in sedimentary rocks and in association with petroleum deposits

NATURAL LANGUAGE PROCESSING Aug. 1994

SN Human communication with computers using natural languages, such as English and Japanese, rather than programming languages, such as BASIC and PASCAL (note: do not confuse with “Computational Linguistics”—for other applications, see the Identifiers “Natural Language” and “Natural Languages”)

UF Natural Language Understanding Systems

NAVAJO (NATION) Mar. 1994

SN The largest American Indian tribe—centered on the Navajo Reservation in northeast Arizona and adjacent areas of New Mexico and Utah

NEGLIGENCE Oct. 1994

SN Failure to do what a reasonable, careful conscientious person is expected to do

NONMETROPOLITAN AREAS Sep. 1994

SN Geographic areas outside of cities and suburbs

Normalization (Handicapped) (Del Mar94)
USE NORMALIZATION (DISABILITIES)

NUMERACY Feb. 1993

SN Familiarity with the use of numbers, or basic competence in mathematics

UF Mathematical Literacy
Quantitative Literacy

OGLALA SIOUX (TRIBE) Mar. 1994

SN American Indian people constituting a subdivision of the Lakotas and located mainly in southwestern South Dakota (includes dispersed kin)

OIL Dec. 1992

SN Any viscous, combustible, water-immiscible liquid composed principally of hydrocarbons and obtained from the ground (note: for “Vegetable Oils” or “Animal Oils,” use those Identifiers)

UF Crude Oil
Mineral Oil
Petroleum (Oil)

OJIBWA Jan. 1971

SN (Scope Note Added) Algonquian language spoken by North American Indians known as Chippewas in the U.S. and Ojibwas in Canada, and by Ottawas, Algonquins, and others (note: use Identifiers for dialects “Ottawa,” “Algonquin,” etc.)

ORAL TRADITION Jul. 1993

SN Aspects of a society's culture (e.g., history, literature, cultural character) that are passed by mouth from generation to generation in ritual drama, songs, poetry, narratives, games, oratory, etc., rather than by written accounts

Punjabi (Del Jul94)
USE PUNJABI

Participatory Action Research
USE ACTION RESEARCH
and PARTICIPATORY RESEARCH

PARTNERSHIPS IN EDUCATION Jul. 1993

SN Collaborative arrangements and endeavors between and among schools and other entities (corporate enterprises, community agencies, student/parent/citizen groups, colleges, other schools, individuals, etc.) designed to share resources, achieve common goals, and foster educational achievement, improvement, and reform (note: see also the Identifiers “Coalitions” and “Teacher Partnerships”)

UF Academic Alliances
Collaboratives (Education)
Educational Partnerships
Partners in Education Projects

Perceptual Handicaps (Del Mar94)
USE PERCEPTUAL IMPAIRMENTS

PERFORMANCE TECHNOLOGY Aug. 1994

SN Systematic design, analysis, selection, implementation, and evaluation of products and activities to influence human and organizational performance

UF Human Performance Technology

Petroleum (Oil and Gas)
USE FOSSIL FUELS
and OIL

PETROLOGY Jan. 1993

SN The branch of geology concerned with the origin, occurrence, structure, classification, and history of rocks

UF Petrography
Rock Studies

PHYSICAL FITNESS TESTS Jun. 1993

SN Tests designed to measure one or more health-related fitness components, such as cardiorespiratory capacity, body composition, muscular strength and endurance, and low back/hamstring flexibility

POLICY ANALYSIS Oct. 1993

SN Systematic study of the nature, rationale, cost, impact, effectiveness, implications, etc., of existing or alternative policies, using the theories and methodologies of relevant social science disciplines (note: use as a minor Descriptor for examples of this kind of study — use as a major Descriptor only as the subject of a document)

POLYGONS Jul. 1993

SN Closed plane (two-dimensional) figures formed by the line segments that connect three or more points not in a straight line (note: see also specific Identifiers, e.g., “Triangles,” “Quadrilaterals”)

PORTFOLIO ASSESSMENT Dec. 1994

SN Systematic collection of a student's work samples, records of observation, test results, etc., over a period of time for the purpose of evaluating student growth and achievement—used occasionally with populations other than students (note: prior to Dec94, “Portfolios (Background Materials)” was used, usually with “Student Evaluation,” to index this concept)

PRAISE Apr. 1993

SN Expression of approval or favorable judgment

PRENATAL CARE Apr. 1993

SN Medical, educational, and social services provided or obtained during pregnancy

UF Fetal Care

PRENATAL INFLUENCES Aug. 1968

SN (Scope Note Changed) Factors occurring between conception and birth and affecting the physical or mental development of an individual (note: use the more precise “Prenatal Care” if appropriate)

PREREFERRAL INTERVENTION Oct. 1993

SN Activities designed to increase classroom teachers' capacity to instruct and manage difficult-to-teach students, thereby reducing unnecessary and inappropriate special education referrals — often “brokered” by one or more support staff, such as a special educator or school psychologist

UF Prereferral Assessment

PRINTED MATERIALS Dec. 1994

SN Communication media making use of paper or a similar substance to inscribe text, illustrations, etc.

UF Print Media (Materials)
Printed Text

PRINTMAKING Oct. 1994

SN The process of making a picture or design from an impression of an engraved metal plate, wooden block, silkscreen stencil, lithographic stone, photographic negative, etc.

UF Print Making Arts

PROFESSIONAL DEVELOPMENT SCHOOLS Nov. 1994

SN Designated elementary or secondary schools that operate programs, generally characterized by college/school district collaboration, in three areas—teacher education and development, research and experimentation, and improvement of teaching and student learning (note: see also related Identifiers such as “Partner Schools,” “Centers of Pedagogy,” “Professional Development Centers,” and “Teacher Education Academies”)

UF Clinical Schools (Teacher Education)
Professional Practice Schools

PROFESSIONAL ISOLATION May 1993

SN A condition of professional individuals or groups characterized by lack of communication or interaction with colleagues, the relevant professional community, or related professional organizations (note: prior to May93, the Identifier “Isolation (Professional)” was used to index this concept—see also the current Identifier “Teacher Isolation”)

Programed Instruction (Del Mar94)
USE PROGRAMMED INSTRUCTION

Programed Instructional Materials (Del Mar94)
USE PROGRAMMED INSTRUCTIONAL MATERIALS

Programed Tutoring (Del Mar94)
USE PROGRAMMED TUTORING

Programers (Del Mar94)
USE PROGRAMMERS

Programming (Del Mar94)
USE PROGRAMMING

Programing (Broadcast) (Del Mar94)
USE PROGRAMMING (BROADCAST)

Programing Languages (Del Mar94)
USE PROGRAMMING LANGUAGES

PROPRIETARY SCHOOLS Jul. 1966
 SN (Scope Note Changed) Private schools conducted for profit (note: see also the Identifier "Profit Making Schools")

PUEBLO (PEOPLE) Jan. 1994
 SN Culturally similar American Indians of the southwestern United States and northern Mexico who have traditionally lived in permanent stone or adobe dwellings in compact villages—includes Zuni, Hopi, Tanoan, and Keresan groups

PUNJABI Jul. 1994

RECESS BREAKS Nov. 1994
 SN Periods of rest during the schoolday, in which children may engage in recreational activities

RECIPROCAL TEACHING Apr. 1993
 SN An instructional technique in which a teacher and student, or a tutor and tutee, take turns with the role of teaching—frequently used for improving reading comprehension

REFERRAL Jul. 1966
 (Moved from "Information Dissemination" hierarchy)
 SN (Scope Note Changed) Process of referring an individual or group to an appropriate agency, service, or specialist

REFLECTIVE TEACHING Nov. 1994
 SN Thinking about and critically analyzing one's own teaching in order to improve teaching practice

RELIEF (ART) Oct. 1994
 SN The projection of carved, molded, or modeled figures and forms from fixed backgrounds, as in sculpture, or such projection that is apparent only, as in painting

RETROSPECTIVE CONVERSION (LIBRARY CATALOGS) Aug. 1994
 SN Partial or complete conversion of existing manual library files to machine-readable form

Rhythm (Language)
USE LANGUAGE RHYTHM

RHYTHM (MUSIC) Oct. 1994
 SN The aspect of music concerned with time, comprising such elements as meter, beat, accent, measures or bars, and tempo

RISK MANAGEMENT Sep. 1994
 SN Technique or profession of minimizing and preventing loss or harm to a business, institution, group, or individual, as through safety measures, the use of insurance, etc. (note: see also related Identifiers "Risk Assessment" and "Risk Reduction")

Risk Populations
USE AT RISK PERSONS

ROLE Jan. 1994
 SN Functions or tasks expected of or performed by individuals, groups, or things (note: use a more specific term if possible)
 UF Functions (Sociology)
 Social Role

ROMANIAN Nov. 1994
 SN (Note: this Descriptor was returned to its original 1969-80 "Ro..." spelling—preferred spelling 1980-94 was "Ru...")
 UF Rumanian

Rumanian (Del Nov94)
USE ROMANIAN

RURAL WOMEN Sep. 1994
 SN Women living in rural areas or having strong social or economic ties to rural life
 UF Farm Women

SADNESS Dec. 1994
 SN Psychological state associated with unhappiness or sorrow
 UF Melancholy

School Bus Drivers
USE BUS DRIVERS
and SCHOOL BUSES

SCHOOL DISTRICT WEALTH Oct. 1993
 SN Primary measure of a school district's ability to pay the costs of education—calculated variously by states, etc., based on property tax revenues, per student expenditures, median family income, and other indicators

SCIENCE LIBRARIES Aug. 1994
 SN Libraries, library departments, library branches, etc., devoted to one or more scientific or technical areas
 UF Science and Technology Libraries
 Technical Libraries

SCIENCE PROCESS SKILLS May 1994
 SN Broadly transferable intellectual skills, appropriate to all scientific endeavors—included basic process skills (e.g., observing, inferring, measuring, communicating, classifying, predicting, using time-space relations, using numbers) and integrated process skills (e.g., controlling variables, defining operationally, formulating hypotheses, interpreting data, experimenting, formulating models) (note: see also the Identifier "Science A Process Approach" for a curriculum espousing the learning and use of these skills)

SCREEN DESIGN (COMPUTERS) Aug. 1994
 SN The arrangement of the elements on a computer screen—includes the context, amount, and density of information presented and the manner of presentation, e.g., capital vs. lower case, interlinear spacing, line length, row or column format, etc. (note: prior to Aug94, "Screen Format" was the preferred Identifier for this concept)
 UF Computer Display Design
 Display Layout (Computers)
 Screen Format

SEARCH INTERMEDIARIES Aug. 1994
 SN Individuals trained in database searching who perform online or other searches for requesters

SELECTION TOOLS Nov. 1994
 SN Items used to assist in selection activities, e.g., choosing reading materials, acquiring merchandise—most commonly refers to selection tools used by librarians, including such items as bibliographies, reviews, subject lists, and core collection lists
 UF Book Selection Aids

SELF DESTRUCTIVE BEHAVIOR Aug. 1986
 SN (Scope Note Changed) Acting or tending to harm or destroy oneself (note: for self-infliction of physical injury, use "Self Injurious Behavior")

SELF INJURIOUS BEHAVIOR Oct. 1993
 SN Self-infliction of physical injury, through such behaviors as head banging, biting, scratching, hair pulling, punching, pinching, and gouging—may occur among normal populations, but with greater frequency, severity, and chronicity among the developmentally disabled
 UF Head Banging

SELF MANAGEMENT Oct. 1993
 SN Deliberate use of learned strategies to maintain or modify one's own attitudes and actions—such strategies include goal setting, self-monitoring, self-correcting, and self-solicitation of feedback
 UF Behavioral Self Management

Self Mutilation (Del Oct93)
USE SELF INJURIOUS BEHAVIOR

SEVERITY (OF DISABILITY) Jun. 1994
 SN Extent of a mental, physical, or sensory impairment, from mild to severe (note: prior to Jun94, "Impairment Severity" was the preferred Identifier for this concept)
 UF Impairment Severity

SICK CHILD CARE Jul. 1993
 SN Day care alternatives for children who are ill and already involved in regular day care or school programs, including care in isolated areas of the child's own day care center/school, separate sick child care centers, family day care homes open to sick children, and the child's own home by home health personnel or known adults (including parents under family leave policies or otherwise)
 UF Ill Child Care

SIOUX (TRIBE) Mar. 1994
 SN An American Indian people mainly of the upper Mississippi area and the Great Plains (and dispersed kin) (note: use "Dakota" for the Sioux language—use the Identifier "Siouan Languages" for the broad language family to which Dakota belongs)

Site Based Management (Schools)
USE SCHOOL BASED MANAGEMENT

SMALL TOWNS Jul. 1993
 SN Small settlements of both residences and businesses, often acting as trade and service centers for surrounding rural areas—largely urban in character, small towns are generally distinguished by such qualities as ready access to local political figures and a close-knit sense of community, rather than defined by population size (frequently 2,500-10,000, but can be 25,000 or higher)

Sociology of Education
USE EDUCATIONAL SOCIOLOGY

SOLAR SYSTEM Jan. 1993
 SN The sun and all the celestial bodies that revolve around it (including the planets and their moons, the asteroids, comets, and meteoroids)

Speech Handicaps (Del Mar94)
USE SPEECH IMPAIRMENTS

SPEECH LANGUAGE PATHOLOGY Jun. 1994
 SN The science and practice of screening, assessing, diagnosing, rehabilitating, and preventing disorders of speech, language, and related communication functions
 UF Speech and Language Pathology

Speech Pathology (Del Jun94)
USE SPEECH LANGUAGE PATHOLOGY

STARS Jan. 1993
 SN Self-luminous celestial bodies of hot gas held together by gravity—their energy is produced by nuclear-fusion reactions

STATE REGULATION Jul. 1994
 SN State/provincial government control or influence based on legislation
 UF Provincial Regulation

STRATEGIC PLANNING Feb. 1993
 SN Process of continuous planning for change, which assesses an organization's or program's internal and external environment, analyzes the implications of relevant trends, and identifies effective strategies for achieving a desired future state
 UF Strategic Management

STUDENT SURVEYS Aug. 1994
 SN Studies in which data are gathered from students on their attitudes, interests, activities, characteristics, etc. (note: use a minor Descriptor for examples of this kind of survey—use as a major Descriptor only as the subject of a document)

STUDIO ART *Oct. 1994*
SN Instruction and study concerned with the practice of drawing, painting, sculpture, printmaking, and other visual arts
UF Art Making (Instruction)
 Art Production Curriculum
 Art Studio Courses

SUSTAINABLE DEVELOPMENT *Nov. 1994*
SN Development that meets the needs of the present without compromising the ability of future generations to meet their own needs (i.e., development that nurtures the economy and improves the quality of life without undermining the natural resources and environmental integrity on which they depend) (note: see also the Identifier "Sustainable Agriculture")

Taste (Aesthetics)
USE AESTHETIC VALUES

TEACHER COMPETENCIES *Jun. 1993*
SN Explicit, demonstrable knowledge and skills necessary for performing the role of teacher (note: if possible, use the more precise terms "Competency Based Teacher Education" and/or "Teacher Competency Testing")

TEACHER COMPETENCY TESTING *Jun. 1993*
SN Measurement of the ability of teachers or would-be teachers to demonstrate specific, predetermined, and desirable pedagogical techniques or subject-matter knowledge
UF Teacher Testing (for Competency)

TECHNOLOGY EDUCATION *Feb. 1993*
SN General education programs concerned with the study of technology, the use of technical means and processes to solve problems, and the impact of technology on individuals and society (note: since the mid-1980s, "Technology Education" has become the preferred name for "Industrial Arts" programs)
UF Industrial Technology Education
 Technological Education

Tempo (Cognition)
USE CONCEPTUAL TEMPO

TEMPO (MUSIC) *Oct. 1994*
SN The rate of speed at which a musical composition is performed

THERMAL INSULATION *May 1994*
SN Prevention of transfer of heat (by conduction, convection, or radiation) from a hot area to a cold
UF Insulation (Heat)

TOTAL QUALITY MANAGEMENT *May 1994*
SN Management approach to long-term success through customer satisfaction (based on concepts developed by W. Edwards Deming and Joseph M. Juran)—TQM involves all members of an organization in continuously improving processes, products, and services
UF TQM

TRIANGULATION *Aug. 1994*
SN A research technique for increasing the validity of one's results by using multiple and diverse (at least three) collection methods or data sources, e.g., using both qualitative and quantitative measures or obtaining perspectives from several different groups—also, occasionally refers to a procedure used in surveying and navigation to determine distance (note: do not use for family triangulation—see the Identifier "Family Triangles" for that concept)

TRIBAL GOVERNMENT *Sep. 1994*
SN Includes the modern government(s) of American Indian tribes and Canada/Alaska native villages, as well as traditional/contemporary political institutions of tribal societies in general

TRIBALLY CONTROLLED EDUCATION *May 1993*
SN Educational ideologies, philosophies, theories, and practices specified by a native tribal government or other forms of native sovereignty, as well as educational institutions managed by such authorities
UF Contract Tribal Schools
 Tribal Colleges
 Tribal Schools

Tupi Guarani
USE GUARANI

USER FRIENDLY INTERFACE *Sep. 1994*
SN Any connection or link to a computer system that is easy to learn and use (note: prior to Sep94, the Identifier "User Cordial Interface" was used to index this concept)

VENDORS *Aug. 1994*
SN Organizations or individuals that market and sell materials and/or services

VERBAL ABUSE *Sep. 1994*
SN Insulting, intimidating, or excessively critical statements (oral or written)

Visually Handicapped Mobility (Dei Mar94)
USE VISUALLY IMPAIRED MOBILITY

VOLCANOES *Nov. 1994*
SN Vents in the crust of a planet or moon through which lava, steam, ash, etc., are expelled either continuously or at irregular intervals—also, the mountains or hills formed by emissions from such vents
UF Volcanology

WAIT TIME *Feb. 1993*
SN The duration of pauses separating utterances in a conversation, e.g., the time a teacher waits after asking a question and after receiving a response (note: use the Identifiers "Time Lag" for broader contexts and "Time Delay" for response prompting and fading with the disabled—see also the generic Identifier "Waiting")
UF Teacher Wait Time

WEEDING (LIBRARY) *Aug. 1994*
SN Practice of discarding or transferring to storage excess copies, rarely used books, and materials considered no longer useful in the library

WETLANDS *Jan. 1993*
SN Low areas with shallow water or water-soaked soils (e.g., freshwater marshes, salt-water marshes, swamps, mud flats, bogs)
UF Bogs
 Fens
 Marshes
 Salt Marshes
 Swamps

WILDERNESS *Sep. 1994*
SN An environmental condition that is characterized by a naturally developed life community undisturbed by human activity, often featuring remoteness, ruggedness, and sometimes potential dangers (note: coordinate with "Outdoor Activities" or "Outdoor Education" for experience or education relating to wilderness)

WORKSTATIONS *Aug. 1994*
SN Individual work areas equipped for performing a particular type of task—usually refers to terminals or microcomputers in a local area network, or to stand-alone microcomputer configurations that may include such peripherals as printers and optical/video disk systems
UF Computer Workstations
 Work Stations (Home or Office)

ZUNI (TRIBE) *Jan. 1994*
SN An American Indian people of western New Mexico (and dispersed kin) (note: use the Identifiers "Zuni" for the Zuni language and "Zuni (Pueblo)" for the Zuni Reservation in New Mexico)

Submitting Documents to ERIC

What Kinds of Documents to Send ERIC

ERIC would like to be given the opportunity to examine virtually any document dealing with education or its aspects. The ERIC audience is so broad (encompassing teachers, administrators, supervisors, librarians, researchers, media specialists, counselors, and every other type of educator, as well as students and parents) that it must collect a wide variety of documentation in order to satisfy its users. Examples of the kinds of education-related materials collected are the following:

- Research/Technical Reports
- Program/Project Descriptions
- Opinion Papers, Essays, Position Papers
- Monographs, Treatises
- Speeches and Presentations
- Evaluation Studies
- Feasibility Studies
- State of the Art Studies
- Instructional Materials
- Syllabi
- Teaching Guides
- Resource Guides
- Manuals
- Handbooks
- Curriculum Materials
- Conference Papers
- Bibliographies
- Legislation and Regulations
- Texts, Questionnaires, Measurement Devices
- Vocabularies, Dictionaries, Glossaries, Thesauri
- Statistical Compilations
- Taxonomies and Classifications
- Dissertations

ERIC does not accept non-print materials (such as films, filmstrips, videotapes, tapes, records, cassettes, etc.). However, if such material accompanies a printed text, ERIC may process the printed text and refer the user to the accompanying non-print components, as long as a source of availability for them can be cited.

A document does not have to be formally published to be entered into the ERIC database. In fact, ERIC seeks out the unpublished or "fugitive" material not usually available through conventional library channels.

Selection Criteria Employed by ERIC

• QUALITY OF CONTENT

All documents received are evaluated by subject experts against the following kinds of quality criteria: contribution to knowledge, significance, relevance, newness, innovativeness, effectiveness of presentation, thoroughness of reporting, relation to current priorities, timeliness, authority of source, intended audience, and comprehensiveness.

• LEGIBILITY AND REPRODUCIBILITY

Documents may be type-set, typewritten, xeroxed, or otherwise duplicated. They must be legible and easily readable. Letters should be clearly formed and with sufficient contrast to the paper background to permit filming. Colored inks and colored papers can create serious reproduction problems. Standard 8 1/2"x11" size pages are preferred.

Two copies are desired, if possible: one for processing into the system and eventual filming, the other for retention and possible use by the appropriate Clearinghouse while processing is going on. However, single copies are acceptable.

• REPRODUCTION RELEASE

For each document submitted, ERIC requires a formal signed Reproduction Release form indicating whether or not ERIC may reproduce the document. A copy of the Release Form appears as a separate page in each issue of this journal. Additional Release Forms may be copied as needed or obtained from the ERIC Facility or any ERIC Clearinghouse. Items for which releases are not granted, or other non-reproducible items, will be considered for announcement only if they are noteworthy education documents available from a clearly identified source, and only if this information accompanies the document in some form.

Items that are accepted, and for which permission to reproduce has been granted, will be made available by the ERIC Document Reproduction Service (EDRS).

Advantages of Having a Document in ERIC

Contributors of documents to ERIC can benefit in the following ways:

- **Announcement**—Documents accepted by ERIC are announced to some 2,000 organizations receiving the abstract journal *Resources in Education (RIE)*.
- **Publicity**—Organizations that wish to sell their own documents in original copies can have this availability (together with address and price information) announced to users in *RIE*, thus serving to publicize their product. After the document is sold out at the original source, it is then still available through EDRS, if permission to reproduce has been granted to ERIC. (Original copy prices, while the supply lasts, are generally less, and are therefore more attractive to users, than EDRS on-demand duplication prices).
- **Dissemination**—Documents accepted by ERIC are reproduced on microfiche and distributed (at no cost to the contributor) to the more than 800 current subscribers to the ERIC microfiche collection.
- **Retrievability**—The bibliographic descriptions developed by ERIC are retrievable by the thousands of subscribers to the online database retrieval services (offered by commercial vendors such as BRS and DIALOG). In addition there are thousands of locations offering computer searches of ERIC based on either compact disk (CD-ROM) systems (offered by DIALOG, and SilverPlatter) or other local computer-based systems.
- **Always "In Print"**—The presence of a master microfiche at EDRS, from which copies can be made on an on-demand basis, means that ERIC documents are constantly available and never go "out of print." Persons requesting copies from an original source can always be referred to ERIC. This archival function relieves the source of a distribution burden and solves the availability problem when the source's supply has been exhausted.

In addition, submission of a document to ERIC reduces the overall likelihood of overlap, redundancy, and duplication of effort among users. It increases the probability that the results reported in the document will be available indefinitely and used in subsequent efforts.

To encourage submission of documents to the system, ERIC offers to send contributors notice of document disposition, giving the ED identification number (for ordering purposes) of those documents selected for *RIE*. Additionally, ERIC will send a complimentary microfiche to each contributor when the document is announced in *RIE*.

There are no fees to pay in submitting documents to ERIC, nor does ERIC pay any royalties for material it accepts. Other than a statement concerning permission to reproduce, there are no forms to complete.

(OVER)

Where to Send Documents

Documents usually enter the ERIC system through one of two ways:

They may be sent to the Clearinghouse most closely related to their subject matter. A list of the Clearinghouses and their addresses appears on the inside back cover of this issue. Material is expedited if it is directed to the attention of "Acquisitions."

If it is uncertain which Clearinghouse is appropriate, materials may be sent to the following address:

ERIC Processing and Reference Facility
Acquisitions Department
1301 Piccard Drive, Suite 300
Rockville, Maryland 20850-4305

The ERIC Facility will forward all submissions to the appropriate ERIC Clearinghouse for consideration and, if selected, processing.

U.S. DEPARTMENT OF EDUCATION
Office of Educational Research and Improvement (OERI)
Educational Resources Information Center (ERIC)

REPRODUCTION RELEASE

(Specific Document)

I. DOCUMENT IDENTIFICATION:

Title:	
Author(s):	
Corporate Source:	Publication Date:

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, *Resources in Education* (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic/optical media, and sold through the ERIC Document Reproduction Service (EDRS) or other ERIC vendors. Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce the identified document, please CHECK ONE of the following options and sign the release below.

<input type="checkbox"/>	← Sample sticker to be affixed to document	Sample sticker to be affixed to document →	<input type="checkbox"/>
<p>Check here</p> <p>Permitting microfiche (4"x 6" film), paper copy, electronic, and optical media reproduction</p>	<div style="border: 1px solid black; padding: 5px;"> <p>"PERMISSION TO REPRODUCE THIS MATERIAL HAS BEEN GRANTED BY</p> <p style="text-align: center;"><i>Sample</i></p> <p>TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)."</p> </div> <p style="text-align: center;">Level 1</p>	<div style="border: 1px solid black; padding: 5px;"> <p>"PERMISSION TO REPRODUCE THIS MATERIAL IN OTHER THAN PAPER COPY HAS BEEN GRANTED BY</p> <p style="text-align: center;"><i>Sample</i></p> <p>TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)."</p> </div> <p style="text-align: center;">Level 2</p>	<p style="text-align: right;">or here</p> <p>Permitting reproduction in other than paper copy.</p>

Sign Here, Please

Documents will be processed as indicated provided reproduction quality permits. If permission to reproduce is granted, but neither box is checked, documents will be processed at Level 1.

"I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce this document as indicated above. Reproduction from the ERIC microfiche or electronic/optical media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries."	
Signature:	Position:
Printed Name:	Organization:
Address:	Telephone Number: ()
	Date:

OVER

III. DOCUMENT AVAILABILITY INFORMATION (FROM NON-ERIC SOURCE):

If permission to reproduce is not granted to ERIC, or, if you wish ERIC to cite the availability of this document from another source, please provide the following information regarding the availability of the document. (ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents which cannot be made available through EDRS).

Publisher/Distributor:	
Address:	
Price Per Copy:	Quantity Price:

IV. REFERRAL OF ERIC TO COPYRIGHT/REPRODUCTION RIGHTS HOLDER:

If the right to grant reproduction release is held by someone other than the addressee, please provide the appropriate name and address:

Name and address of current copyright/reproduction rights holder: Name: Address:

V. WHERE TO SEND THIS FORM:

Send this form to the following ERIC Clearinghouse:

If you are making an unsolicited contribution to ERIC, you may return this form (and the document being contributed) to:

ERIC Facility
1301 Piccard Drive, Suite 300
Rockville, Maryland 20850-4305
Telephone: (301) 258-5500

- Based on International Postage Rates in effect
- Allow 160 Microfiche or 75 Paper Copy pages per pound
- Specify exact mail classification desired

DEPOSIT ACCOUNTS

Customers who have a continuing need for ERIC Documents may wish to open a Deposit Account as follows:

- **Domestic Customers**—By depositing a suggested minimum of \$200.00 or submitting an executed purchase order.
- **International Customers**—By depositing a minimum of \$500.00 in U.S. Dollars drawn on a U.S. Bank.

STANDING ORDER SUBSCRIPTION ACCOUNTS

Subscription Orders for documents in the monthly issues of Resources in Education (RIE) are available on microfiche from EDRS. The microfiche are furnished on diazo film and without protective envelopes at \$0.130 per microfiche. If you prefer silver halide film, the cost is \$0.266 per microfiche, and each microfiche is inserted into an acid-free protective envelope. Prices are effective January 1, 1995 and are subject to change without notice. Shipping charges not included. A Standing Order Account may be opened by depositing \$2,500.00 or submitting an executed purchase order. All International Orders must be prepaid. The cost of each issue and shipping will be charged against the account. A monthly statement of the account will be furnished.

BACK COLLECTIONS

Back collections of documents in all issues of RIE since 1966 are available on microfiche at a unit price of \$0.153 per microfiche. The collections are furnished on diazo film without envelopes. Prices are good through December 31, 1995, and do not include shipping charges and applicable taxes. For pricing information, write or call toll-free 1-800-443-ERIC.

GENERAL INFORMATION

1. PAPER COPY (PC)

A Paper Copy is a xerographic reproduction, on paper, from microfiche of the original document. Each paper copy has a Vellum Bristol cover to identify and protect the document.

2. PAYMENT

The prices set forth herein do not include any sales, use, excise, or similar taxes that may apply to the sale of microfiche or paper copy to the customer. The cost of such taxes, if any, shall be borne by the customer.

Payment terms are **NET THIRTY (30) DAYS** by check or money order payable to EDRS in **U.S. Dollars drawn on a U.S. Bank.**

3. REPRODUCTION

Permission to further reproduce a copyrighted document provided hereunder must be obtained from the copyright holder, usually noted on the front or back of the title page of the copyrighted document.

4. CLAIMS POLICY

All sales are final. EDRS will replace products returned within 6 months of delivery due solely to reproduction defects or incompleteness caused by EDRS.

HOW TO ORDER

Resources In Education (RIE)

Resources in Education (RIE) is a monthly abstract journal covering the document literature of education. It is published for the U.S. Department of Education by the U.S. Government Printing Office (GPO). RIE consists of twelve (12) monthly issues (each announcing over 1000 documents and indexing them by Subject, Institution, Personal Author, and Publication Type) and two (2) cumulative semiannual indexes (January-June, July-December). RIE is sold by GPO on subscription or as individual issues on-demand. Stock is retained for only approximately six months; issues older than that are generally not available from GPO. Orders from foreign sources cost 25% additional, as shown in the table below.

NOTE: The Semiannual Index to RIE is being discontinued; the last issue will be the volume for July-December 1994.

RIE Product (Master Stock No. 756-003-00000-8)		Domestic	Foreign
Subscription to Monthly Issues	(12 issues)	\$56.00	\$70.00
— Single Copy On-Demand	(1 issue)	\$20.00	\$25.00
Subscription to Semiannual Index	(2 issues)	\$30.00	\$37.50
— Single Index On-Demand	(1 issue)	\$30.00	\$37.50

Mail Orders: Check or money order (full remittance required) made payable to "Superintendent of Documents":

Mail to: Superintendent of Documents
U.S. Government Printing Office
Washington, DC 20402-9371

Telephone Orders: Acceptable credit cards are: Choice, Mastercard, or VISA. You may also charge against your pre-paid GPO deposit account, if available.

Call: 202-783-3238 (Note: This is not an FTS or AUTOVON line.)

ERICTAPES ERICTOOLS

HAVE A COMPUTER?

LOOK AT ERICTAPES!

The Educational Resources Information Center (ERIC) database is available on magnetic tape in a variety of options. Under special authorization from the U.S. Department of Education, these tapes are offered at unusually low cost to encourage the widest possible dissemination.

The ERIC database provides coverage of the significant literature in the field of educational resources. Report literature (announced in *Resources in Education (RIE)*) is covered from 1966 to date; journal article literature (announced in *Current Index to Journals in Education (CIJE)*) is covered from 1969. Monthly, quarterly, and annual updates are available for both *RIE* and *CIJE*, so that the files may be kept current.

The basic files are available in the ERIC Format (IBM/OS variable length records). These files include the complete resume (document description, indexing, and abstract or annotation) of each document or journal article announced, in accession number order. A variety of peripheral files,

including Postings Files (inverted subject and source indexes) and the Thesaurus (controlled indexing vocabulary) are also available on magnetic tape, and virtually any segment of the master files is obtainable on Special Order.

The files may be purchased individually or on annual subscription. The files are written on new, high quality, 9-track tapes (600, 1200, or 2400-ft., as appropriate) at either 1600 or 6250 BPI and are guaranteed. Prices per tape reel start as low as \$75.

NO COMPUTER?

LOOK AT ERICTOOLS!

For organizations without access to a computer,* ERICTOOLS provide manual access to the ERIC document collection. ERICTOOLS are a series of printed indexes, directories, and cross-reference lists, distributed internally to components of the ERIC network. The *Title Index* provides access by document title. The *Source Directory* provides access to all organizational names used in the system, i.e., corporate authors and sponsoring agencies. Cross-reference lists lead the inquirer to the accession number (ED number) from: Report Number; Contract Number; and Clearinghouse Accession Number.

ERICTOOLS are available individually and on annual subscription. Prices start from as low as \$20 for some individual documents.

* Many of these documents are also valuable tools for computer searchers.

For additional information, complete and mail the reply form or call: **ERICTAPES/ERICTOOLS, 1301 Piccard Drive, Suite 300, Rockville, Maryland 20850-4305, (301) 258-5500**

Toll-Free 800 Number Makes Education Information Accessible

ACCESS ERIC is your gateway to the Educational Resources Information Center (ERIC), a nationwide information service designed to make education literature readily accessible.

With its toll-free number, **1-800-LET-ERIC**, ACCESS ERIC makes it easy for you to locate and obtain education information. One call puts you in touch with information specialists who can answer questions about ERIC, refer you to subject-specific information sources, and provide education-related publications produced by ERIC.

Sponsored by the U.S. Department of Education, Office of Educational Research and Improvement, ERIC helps teachers, librarians, students, parents, researchers, and policymakers stay abreast of the most important developments in the education field. Through ERIC, you can access information on a wide range of subjects.

In addition, ACCESS ERIC recently introduced four reference and referral databases to guide you through the vast world of education information. These databases are also available as print directories.

■ **ERIC Digests Online**--Synthesizes information for you and includes more than 470 full-text ERIC Digests (two-page summaries) on current topics in education.

■ **ERIC Information Service Providers**--Lists nearly 1,000 agencies, such as libraries and information centers, that provide computerized searches of the ERIC database, have a sizable collection of ERIC microfiche, or subscribe to and collect ERIC hard-copy reference tools.

■ **Education-Related Information Centers**--Helps you quickly locate agencies knowledgeable about your subject needs. Describes more than 200 resource centers that cover a broad range of education-related topics and provide user services, technical assistance, and information dissemination.

■ **Education-Related Conferences**--Presents nearly 500 international, national, State, regional, and local education-related conferences covering the entire calendar year.

And, to help you stay up to date on a broad range of education-related issues, ACCESS ERIC offers free subscriptions to *The ERIC Review*. You can also order copies of *A Pocket Guide to ERIC* and other resources to help you access and use ERIC.

Gain entry to a world of education literature. For more information, call 1-800-LET-ERIC, Monday to Friday, 8:30 a.m.-5:30 p.m. (eastern time), or write:

**ACCESS ERIC
1600 Research Boulevard
Rockville, MD 20850**

MAJOR VENDORS OF ERIC ONLINE SERVICES AND CD-ROM PRODUCTS

The ERIC database is one of the most widely used bibliographic databases in the world. Users from approximately 100 countries perform an estimated half million online or CD-ROM searches a year using a variety of available commercial systems (listed below).

Users wishing to search ERIC online need a computer terminal equipped with a modem that can link by telephone with the vendor's system. Those preferring stand-alone CD-ROM systems must have a computer equipped with a CD-ROM drive.

As an alternative to acquiring your own ERIC search capability, the *Directory of ERIC Information Service Providers* (available from any ERIC component) lists approximately 1000 organizations that perform ERIC searches on demand for users.

ERIC Network Components

There are currently sixteen (16) ERIC Clearinghouses, each responsible for a major area of the field of education. Clearinghouses acquire, select, catalog, abstract, and index the documents announced in *Resources in Education (RIE)*. They also prepare interpretive summaries and annotated bibliographies dealing with high interest topics and based on the documents analyzed for *RIE*; these information analysis products are also announced in *Resources in Education*.
